KINGSTON (JAN 31) - The International Monetary Fund (IMF) is to extend a credit of 108 million dollars to Jamaica over the next 15 months, Jamaican Finance Minister Seymour Mullings told Parliament Tuesday.

He said the Jamaican dollar had been devalued by seven percent to meet the credit conditions.

"The objectives of this economic program agreed with the IMF is the re-establishment of favourable conditions for economic growth while reducing the debt burden," Mr. Mullings said.

The new exchange rate is seven Jamaican dollars to the U.S. dollar, he said. The Jamaican dollar has been devalued by 21.5 percent since June of last year.

He said the government would enforce reducing consumption and the island's current account deficit from eight percent of the gross domestic product (GDP) to 3.5 percent.

Government officials said that interest rates would be increased and credit

ceilings would be tightened to contain demand.

The Caribbean island will have a shortfall of 190 million U.S. dollars in foreign exchange in the next 15 months, the minister said.

Proceeds of debtequity conversions, private flows and rescheduling parts of the island's 4.5 billion U.S. dollars foreign debt will make up the shortfall, he added.

In addition, arrears of 200 million U.S. dollars on external payments are to be eliminated over the next 15 months.

Consumption duties, retail sales taxes and electricity rates will be increased, and government subsidies previously used to keep down the prices of imported food will be progressively removed, Mr. Mullings said.

Government officials are due to meet this week with representatives of creditor nations and commercial banks.

MAPUTO (JAN. 31) - Mozambique's Minister of Cooperation, Jacinto Veloso, Wednesday accused Mozambique National Resistance (RENAMO) rebels of deliberately targeting vehicles carrying emergency food aid and other supplies.

Opening a national meeting that is preparing a new emergency appeal to the international donor community, Mr. Veloso said that in 1989 RENAMO had destroyed at least 30 trucks carrying food aid or seed for the planting season.

He described this behaviour as ''criminal and terrorist acts of bandit gangs indifferent to the sufferings of thousands upon thousands of Mozambican families.''

The minister described donor response to last year's emergency appeal as ''feeble.''

So far, donors had made firm pledges that amounted to just 49 per cent of the 362 million dollars Mozambique had requested at the donors' conference held in New York last April.

Much less than this has actually arrived in the country.

As a result, stocks of food aid had run out in parts of the country, forcing relief workers to reduce already inadequate rations distributed to the needy, Mr. Veloso said.

Poor donor response, he added, minister said, was compromising the country's emergency program, and particularly ''the government's strategy of giving priority support to the most vulnerable strata of the rural population.''

Mr. Veloso blamed the war and natural disasters in parts of the country -- principally drought in the south -- for the continued emergency situation.

But he said that drastically increased customs duties and the repeated devaluation of the Mozambican currency as part of the country's economic recovery program sponsored by the World Bank and the International Monetary Fund, had not helped matters.

These factors, he said, ''delayed, or made much more expensive, emergency operations, thus severely compromising urgent relief work.''

Mr. Veloso said that about a third of the Mozambican population, which is estimated at more than 15 million, was still living in ''deplorable conditions.''

Currently missions are visiting the provinces in order to assess the numbers of people facing chronic food shortages, as part of the preparatory work for the 19901991 appeal.

Figures released in November suggested that about two million Mozambicans were displaced from their homes inside the country, while a further 1.8 million were unable to produce enough for their own subsistence.

In addition, about a million Mozambicans have fled over the borders into neighboring countries.

MALISEVO, Yugoslavia (JAN. 31) - Special units of the Yugoslav federal police sprayed residents with machinegun fire in the town of Malisevo in Kosovo Tuesday, killing a number of people, the local police chief and the local communist party secretary said here Wednesday.

The officials put the number of people killed as two, while witnesses told Agence France-Presse that there were four people left dead after the passage of a three-vehicle police convoy from which the machinegun bursts were fired.

But all the sources agreed upon one thing: that no demonstration was taking place in the central square of Malisevo at the time of the murderous attack.

The little town is about 10 kilometres (six miles) from the spot where a Serbian police officer was seriously wounded Tuesday in an ambush set by militant Albanian nationalists. All those who died in the police shooting at Malisevo are ethnic Albanians.

Some of the worst clashes with police over the last nine days in Yugoslavia's troubled Kosovo province took place Tuesday at Malisevo. At least 11 people have died in the unrest, according to various sources.

Of the two people known to have been killed by police Tuesday in Malisevo, one was a 17-year-old high school student who was helping his father at the family store, the other a 28-year-old farmer who was driving a tractor at the time.

Two armoured cars entered the town at high speed, firing at anything that moved. The doors of the truck following them then opened and the police inside opened fire with their machineguns on the crowd in the main square, the witnesses said.

Shops, the local dispensary, even the police post and party office in Malisevo bear bullet traces.

The previous day 9,000 people had gathered in the village shouting the slogans "Democracy!" and "Equality!", the local communist party secretary Rexhep Kastrati said. "We talked with the demonstrators who dispersed without incident," he said.

When the police arrived in armoured cars, "we let them know we did not need their help", Mr. Kastrati said. But in the meantime, 10 kilometres away, a member of the same forces, a Serb, suffered serious bullet wounds in an ambush set by Albanian nationalists.

The Malisevo party chief said he had met with Kosovo party leader Rahman Morina about the affair, and said he also intended to bring it to the attention of the head of state.

Meanwhile the little town was in a state of revolt and paralysed by a general strike Wednesday, as workers surrendered their communist party cards and thousands gathered for the funeral of the two dead in Malisevo.

#90031d8620 01/31/1990 ~French/German News Agency

PARIS (JAN 31) - The French perfume industry had record sales for the second year running in 1989, largely thanks to a 16.5 percent increase in exports, the industry's professional association said Wednesday.

Sales totalled 39.56 billion francs (6.9 billion dollars) last year, 43 per cent of it abroad, and up 13.5 percent on the previous year's level, the association said.

Exports rose 16.5 percent to 16.9 billion francs (2.9 billion dollars) while domestic sales increased a more modest 11.4 percent.

But the export growth was slower than 1988's 19.3 percent, largely due to falling consumption in Britain and the United States, which between them account for 20 percent of foreign sales.

The perfume industry is France's third largest exporter, behind automobiles and foods.

BEIJING (JAN. 31) - The Lhasa city authorities have built a special hotel with room for 400 dogs to relieve the problem of stray animals in the Tibetan capital, the China Daily newspaper reported Wednesday.

The city last year invested 60,000 yuan (12,700 dollars) in the hostelry for homeless hounds in Tibet, where people believe in reincarnation and so cannot sanction killing.

Lhasa contains one dog for each of its 100,000 human beings, the paper said, but about 10,000 of the dogs are homeless.

Inhabitants in most Chinese cities are not allowed to keep dogs, which are regarded as a gastronomic delicacy in southern areas of the country.

KUALA LUMPUR (JAN. 31) - Some 65,000 Malaysian plantation workers began an indefinite strike on Wednesday, disrupting work on 800 natural rubber, oil palm, cocoa and coconut estates to press demands for fixed monthly salaries instead of daily rates, union officials said.

The National Union of Plantation Workers (NUPW) said that the system of daily rates meant that workers were not paid when work stopped because of rain or other disruptions, and that the strike would continue until settlement of the union's 10-year-old claim for a basic monthly wage.

Acting labour minister Lee Kim Sai said that he was hopeful of "ironing out the issue" at a meeting on Wednesday with officials of the NUPW and the Malaysian Agricultural Producers Association (MAPA).

But MAPA executive director John Chelliah called the strike "totally unexpected, hasty and unwarranted" and said "there will be no negotations until the union calls off the strike. We will not neogotiate with a gun at our heads."

A commodities trader said the strike was unlikely to have an immediate impact on commodity supplies most of which were now in surplus.

#90031d8900 01/31/1990 ~French/German News Agency
PARIS (JAN. 31) - A family row over who controls the Petrossian caviar, foie gras and smoked salmon empire went before a French commercial court here Wednesday.

At the heart of the dispute is whether the company should continue its 70-year tradition of providing luxury foods for gourmets or should branch out into downmarket items, Christian Petrossian, who took the case to court, said after Wednesday's hearing.

Mr. Petrossian is calling for an assessor to be appointed to look into the company's affairs. His lawyer said that the family dispute was threatening the entire business and worrying its suppliers.

Mr. Petrossian took over as head of the family concern after the death of his father in 1972.

Eight years later, it obtained exclusive rights to import and distribute caviar in the United States and Canada and set up a subsidiary to handle the American business, Caviar Petrossian, in New York, headed by Mr. Petrossian.

The company now has 10 shops across America, but in 1988 disagreements broke out between the company's bosses, with several people claiming that they headed the enterprise.

#90031d9190 01/31/1990 ~French/German News Agency
VIENNA (JAN. 31) - The Soviet Union cut oil deliveries to Hungary and Czechoslovakia by 20 percent in January, due to transport problems, informed sources said here Wednesday.

It may also reduce deliveries to East Germany and Poland, oil specialists said.

The reason for the cuts was apparently problems with loading and transport in the troubled southern Soviet republic of Azerbaijan.

Production seems to have been normal, even in the coldest regions in western Siberia, the Soviet Union's main oil-producing region.

The Soviet Union delivered only 390,000 tonnes of oil to Hungary in January against a commitment of 500,000 tonnes and is expected to fall 350,000 tonnes short of its commitments for the first three months of this year, according to the Hungarian news agency MTI.

Hungary is due to receive 6.48 million tonnes of Soviet oil this year.

To make up for the January shortfall, Hungary had to buy 200,000 tonnes of oil from Iraq, at prices far higher than those it pays for Soviet oil.

Czechoslovakia also received only 80 percent of its expected Soviet oil deliveries in January, but Moscow has promised to make up the shortfall during the rest of the year.

Prague, which imports some 16.6 million tones of Soviet oil a year, is Moscow's second bigest Eastern European customer after East Germany.

But the Soviet Union had promised to increase oil deliveries to Romania by 500,000 tons in January to help it cope with energy supply problems.

NAIROBI (JAN. 31) - Gunmen in northern Uganda killed Italian missionary Egidio Biscaro last Monday as he travelled from his mission at Pajule 300 kilometres (185 miles) from the capital Kampala, colleagues in the Verona Fathers missionary society said Wednesday.

Fr. Biscaro, 62, had been in Africa since 1955. He was the eighth Verona Father slain in Uganda, where the Italian-based congregation arrived in 1911.

The sources, speaking by phone from Kampala, said Fr. Biscaro was driving to Kitgum when his car came under automatic weapons fire from the edge of a forest.

It was not known if the shooting was the work of gangsters or of guerrillas fighting the government, the sources said.

Fellow missionary Aldo Pieragostini, 63, and a Ugandan student were wounded in the attack.

PRETORIA (JAN. 31) - Police shot and teargassed squatters Wednesday as they marched on the offices of the council that had bulldozed their shanty homes, according to an interim police "unrest" report issued here.

Unconfirmed reports said a four-month-old baby was killed in the clash.

The squatters from Etwatwa, near Daveyton east of Johannesburg, smashed windows and burned furniture at the Daveyton council offices, police said, before they scattered under a hail of police birdshot.

Marchers from the Etwatwa Civic Association told reporters they had wanted to present a list of demands to the council, notable for water, sewerage, tarred roads, house numbers, electricity and a post office.

#90031d9520 01/31/1990 ~French/German News Agency

NEW DELHI, Jan 31 (AFP) - Indian authorities have "detained" copies of the latest issue of the U.S. magazine Newsweek on the ground that they contained a wrongly printed map of Kashmir, the Press Trust of India (PTI) said Wednesday.

Customs officials on Tuesday detained some 10,000 copies of the magazine on their arrival at Bombay airport, after consulting higher authorities, officials quoted by PTI said.

"The external boundaries of the country (India) are not found to be authentic and correct" in a map carried with an article in the magazine, the officials in the western business city reportedly said.

The map showed "Kashmir as part of Pakistan," the officials were quoted as saying.

The copies were yet to be released, PTI said.

India's only Moslem-majority state of Jammu and Kashmir, on the northern border with Pakistan, is claimed both by New Delhi and Islamabad.

The two nations have fought two of their three wars over Kashmir since the subcontinent's 1947 independence from the British.

The northern third of Kashmir is under Pakistani control and known there as Azad (Free) Kashmir because Pakistan considers it independent.

The remainder is under Indian control and forms the state of Jammu and Kashmir.

LA LINEA DE LA CONCEPCION, Spain (JAN. 31) EFE - Spanish police have seized 310 kg of hashish worth some dlrs 2.8 million near the southern town of La Linea de la Concepcion, officers said Wednesday.

The drugs were discovered Tuesday aboard a boat after police received a tip-off that a major narcotics shipment was to be unloaded off the southern coast near Gibraltar.

Officers arrested a Morrocan who was on board the vessel.

A police spokesman in La Linea de la Concepcion, 560 km southwest of the capital, said investigations were underway to discover who was to receive the hashish.

Southern Spain has become a major European gateway for hashish coming from North Africa.

TOKYO (JAN. 31) KYODO - PIONEER ELECTRONIC CO. SAID WEDNESDAY THAT IT HAS BEEN RECALLING AND REPAIRING FREE OF CHARGE DEFECTIVE LARGE-SIZED COLOR TELEVISION SETS FOR THE PAST EIGHT MONTHS IN VIEW OF THEIR POSSIBLY BURSTING INTO FLAMES.

THE DANGER STEMMED FROM FAULTY CONNECTION OF THE HIGH-VOLTAGE CIRCUITS OF THREE TYPES OF 29-INCH COLOR TV SETS, 9,135 OF WHICH HAVE BEEN SOLD, COMPANY OFFICIALS SAID. THE THREE MODELS IN QUESTION ARE THE SD-29 PROX, SD-29 PROW AND SD-29M.

POOR SOLDERING OF CONDENSER LEAD WIRING IN TRANSFORMER PERIPHERAL PARTS COULD LEAD TO SPARKING AND BURNING OF PRINTED CIRCUIT BOARDS, THEY SAID.

FOUR FIRES HAVE BEEN SO FAR CONFIRMED IN THIS CONNECTION SINCE THE TOKYO-BASED FIRM RECEIVED COMPLAINTS FROM CUSTOMERS FOR THE FIRST TIME LAST MARCH.

PIONEER OFFICIALS SAID THE ANNOUNCEMENT OF THE RECALL HAS BEEN DELAYED IN THE BELIEF THAT THE COMPANY COULD RECOVER AND REPAIR MOST OF THE DEFECTIVE BATCH ITSELF IN VIEW OF THEIR RELATIVELY SMALL SALES AND THE LIMITED SALES NETWORKS.

THE COMPANY HAS SO FAR RECOVERED AND REPAIRED 8,296 OF THE DEFECTIVE TV SETS. OF THE REMAINDER, 798 SETS HAVE NOT BEEN TRACED AND 41 COULD NOT BE REPAIRED DUE TO THE ABSENCE OF THE OWNERS, THE OFFICIALS SAID.

PIONEER EXPORTED SOME 600 OF THESE THREE MODELS TO TAIWAN AND SOUTHEAST ASIA, AND THE COMPANY WILL MAKE SIMILAR ANNOUNCEMENTS IN THE COUNTRIES WHERE THEY HAD BEEN SHIPPED, THE OFFICIALS SAID.

#90031p0001 01/31/1990 ~PR Newswire

WASHINGTON (JAN. 31) PR NEWSWIRE - United Press International has appointed veteran newspaper chief executive James L. Whyte to serve as executive vice president-news, reporting to UPI President Paul Steinle.

Whyte will be responsible beginning Feb. 5 for UPI's Core Editorial group, which is composed of all domestic news operations.

The appointment of Whyte "positions UPI's Core Editorial staff as a full-fledged UPI business unit, affording editors and reporters greater autonomy and responsibility," said UPI Vice Chairman Joseph K. Taussig.

The Core Editorial management team reporting to Whyte includes UPI Senior Vice President/Executive Editor Al Rossiter Jr. and Managing Editor Bill Ferguson.

Whyte, 62, was previously vice president and general manager of the Florida Times-Union, Jacksonville, Fla., a newspaper owned by Morris Communications Corp. Whyte held chief executive positions with three Morris newspapers during 23 years with the newspaper chain, prior to his retirement from Morris in December.

Whyte served as vice president and general manager of Morris' The Florida Times-Union, 1983-1989; Amarillo (Texas) Globe-News, 1972-1983; and Savannah (Ga.) News-Press, 1966-1972.

Earlier, he was editor of the Hollywood (Fla.) Sun-Tattler, the Scripps-Howard newspaper he joined after graduating with a B.A., Journalism, from the University of Miami, Coral Gables. The course of his 14 years with the Sun-Tattler was broken only by a 14-month stint as an editorial writer for Cox Newspapers' Miami Daily News.

Whyte is a 25-year member of the American Society of Newspaper Editors (ASNE) and is a former member of both the American Newspaper Publishers Association (ANPA) and the Southern Newspaper Publishers Association (SNPA).

Whyte has served as a member of the editorial committee of the Southern Newspaper Publishers Association; and, he has served as a member of the

boards of the Florida Press Association and the Texas Daily Newspaper Association.

UPI, founded June 21, 1907, has 180 bureaus and is represented in 90 nations. UPI is owned by Infotechnology, Inc. (NASDAQ: ITCH), an information and communications company.

#90031p0022 01/31/1990 ~PR Newswire

WEST CHESTER, PA (JAN. 31) PR NEWSWIRE - Commodore International Limited (NYSE: CBU) today reported earnings of $11.3 million or $0.35 per share on sales of $310.7 million for the second fiscal quarter ended Dec. 31, 1989. This compares with earnings of $38.2 million or $1.20 per share on sales of $349.0 million in the year-ago quarter.

For the six months ended Dec. 31, 1989, Commodore reported earnings of $4.8 million or $0.15 per share on sales of $476.0 million. In the prior-year period, Commodore earned $47.8 million or $1.50 per share on sales of $549.2 million.

For the quarter, results reflected continued growth in demand for the Amiga computers and the mid-to-high-end of the MS-DOS PC product line, offset by a decline in C64/C128D and low-end PC sales. Sales of the Amiga line increased to over 50 percent of total revenue. Geographically, strong growth was reported in most European markets, but in comparison to the prior year quarter, this was more than offset by general softness in other worldwide markets and by a modest negative impact from adverse foreign exchange movements.

Compared to the prior year, gross margin declined, reflecting both lower sales and unfavorable currency adjustments. Operating expenses increased substantially, primarily reflecting extensive marketing investments made in certain major markets.

Irving Gould, chairman and chief executive officer, commented: "Although our results were below last year's Christmas quarter, we are encouraged by our return to profitability, strong demand for the Amiga product line, and increased sales of our professional PCs."

Gould concluded: "We remain fully committed to restoring our sales growth and sustained profit growth as we benefit from the investments made in several major markets."

Commodore International Limited, through its subsidiaries around the world manufactures and markets personal computers for home, education, business

and professional users. The company has three product lines: Amiga computers, PC compatibles and C64 computers.

#90031p0023 01/31/1990 ~PR Newswire

FORT LAUDERDALE, FL (JAN. 31) PR NEWSWIRE - Telematics International, Inc. (NASDAQ: TMAX), announced today that its revenues for the fourth quarter ended Dec. 31, 1989 were $19,218,000, a 43 percent increase from revenues of $13,425,000 for the corresponding 1988 period. Net income was $677,000, or $.04 per share, compared to a net loss of ($702,000) or ($.04) per share for the comparable period in 1988. The fourth quarter 1989 results were affected by a ($1,019,000) loss incurred by Spectrum Digital, a Telematics wholly owned subsidiary.

Revenues for the year ended Dec. 31, 1989 were $62,517,000, a 16 percent increase from revenues of $54,058,000 in 1988. The company reported a net loss of ($6,123,000), equivalent to ($.36) per share which included a $2,870,000 unusual charge in the second quarter related to the write-off of the company's investment in Globenet. This compares to net income in 1988 of $4,913,000, or $.29 per share.

The result of operations of Spectrum Digital were included in the 1988 consolidated results from the date of acquisition, Sept. 2, 1988. The 1989 results were affected by a ($4,455,000) loss incurred by Spectrum Digital.

John Pitt, chairman and chief executive officer of Telematics, stated, "The positive results reported in the third quarter of 1989 continued in the fourth quarter with improvements in revenues, spending, profitability and asset management. Overall, 1989 did not meet our performance expectations. However, we strategically invested in the company's future by expanding our European market coverage with a new office in West Germany, opening one in Japan, and developing new product technologies for the 1990s."

Currently, Telematics stated that it is in the process of adjusting its organizational structure to expand its worldwide market access, improve the quality of its customer support, and further optimize its product development efforts. Mr. Pitt commented, "We have the resources in place to accelerate the implementation of this more focused business strategy that builds on the company's strengths and will allow us to be increasingly responsive to customer needs." He added, "Although we anticipate that the short-term impact of taking steps to reposition the

company may result in a reported loss for the first quarter of 1990, we expect that 1990 will be a profitable year for Telematics."

Founded in 1982, Telematics designs, manufactures and markets general-purpose computers and software products for communications applications and networks. The company's products include a full range of programmable packet switching systems, low-end protocol converters and switches, and T1 multiplexers. Telematics has approximately 400 employees worldwide. Headquartered in Fort Lauderdale, Fla., Telematics also has facilities in Calabasas and San Mateo, Calif.; Herndon, Va.; Basingstoke, England; Paris, France; Frankfurt, Germany; and Tokyo, Japan.

#90031p0025 01/31/1990 ~PR Newswire

RESEARCH TRIANGLE PARK, NC (JAN. 31) PR NEWSWIRE - The Graphicon(tm) Products Division of Star Technologies, Inc. (NASDAQ: STRR) today announced support for the IBM PC/AT(tm) personal computer and compatibility with its Graphicon 1700 Simulator (G1700S). The company also announced price reductions for the G1700S and its sister product, the Graphicon 1700 Graphics Processor (G1700).

Designed for performance-intensive, 3-D simulation applications such as flight simulation, and armor, driver and ship pilot training, the G1700S manipulates and renders up to 1,000 large flat-shaded polygons at 30 Hz or 300 polygons at 60 Hz.

The G1700S is the first product in its price range to fill polygons at a rate of 110 million pixels per second. High polygon fill rate is crucial to the rapid update of complex, 3-D scenes. The 1700S easily supports multiple channel applications through either a DR11-W or Ethernet interface.

"With support of the IBM PC/AT, the Graphicon G1700S becomes a more cost-effective solution for simulation and training applications," said Brad Wyckoff, senior marketing engineer for Graphicon. "Now cost-conscious users can take advantage of the very powerful graphics and simulation capabilities of the G1700S with an existing PC/AT or through a very small investment in a personal computer."

The G1700S and G1700 are now available for list prices of $24,000 and $26,000, respectively. Prices include a DR11-W high-speed, parallel interface and appropriate software. Quantity discounts are available. For a limited time, Star is including a sophisticated database consisting of airport, city, town and airplane models.

Star Technologies, based in Sterling, Va., is the market share leader in 32-bit array processors, providing the industry's fastest array processors for a variety of compute-intensive applications in image, data and signal processing. The company's Graphicon Products Division, located in Research Triangle Park, N.C., produces the Graphicon family of image generators for commercial and military simulation and training, C3I and scientific applications. Customers for image generators and array processors include Boeing, NATO, the U.S. Navy, G.E./RCA, Northrop, Lockheed, Procter and Gamble, the National Institutes of Health, and Western Atlas, as well as other leading research facilities, universities and corporations worldwide.

#90031p0026 01/31/1990 ~PR Newswire

SAN FRANCISCO (JAN. 31) PR NEWSWIRE - BEI Electronics Inc. (NASDAQ: BEII) a San Francisco-based technology company, today announced plans to repurchase up to 250,000 shares of its common stock. The stock will be purchased from time to time in the open market.

In making the announcement, George S. Brown, president and chief executive officer, said, "The board of directors authorized the repurchase of BEI's stock because it considers the shares to be undervalued in the current marketplace."

BEI recently announced record sales and earnings for the first quarter of fiscal 1990 ended Dec. 30, 1989. Sales were $19,172,000 and net income was $1,861,000, increases of 29 percent and 25.6 percent, respectively, from the results posted in the prior year. Earnings per share were 27 cents in the first quarter of 1990 as compared with 30 cents in the first quarter of 1989. Outstanding fully diluted shares increased to approximately 7.0 million shares from 5.0 million shares in the year earlier quarter because of the July 1989 Initial Public Offering.

BEI designs, manufactures and markets electronics, ordnance and motion control systems and components used in military, commercial, industrial and aerospace applications. The company has major operations in California, Texas and Arkansas.

MEMPHIS, TN (JAN. 31) PR NEWSWIRE - Perkins Family Restaurants, L.P. (NYSE: PFR) today reported that net income for 1989 was $11,663,000 or $1.14 per unit, as compared with $9,710,000 or $.95 per unit for the prior year, a 20.1 percent increase.

Revenues increased to $166,510,000 in 1989, an 11.0 percent increase over 1988. Same store sales for company-operated restaurants were up a strong 6.1 percent over last year and revenues from franchise operations were up 18.7 percent.

Revenues for the fourth quarter were $40,515,000, a 3.7 percent increase over the $39,071,000 reported in the fourth quarter of 1988.

Net income for the fourth quarter of 1989 increased 7.0 percent to $1,885,000 or $.18 per unit, as compared with $1,761,000 or $.17 per unit for the previous year's fourth quarter. Excluding the one-time costs associated with starting up nine restaurants acquired during the third quarter, net income was $2,524,000, a 43 percent increase over the fourth quarter of 1988.

Donald N. Smith, Chairman and Chief Executive Officer, said, "The success of 1989 is largely attributed to our people, products and plans, which we believe will carry us successfully into 1990 and beyond. We feel very positive about our new restaurant package currently being offered for franchising. At the end of 1989, we had over 35 franchised restaurants under development or planned that we expect to open in 1990."

During 1989, Perkins paid cash distributions totaling $1.20 per unit. As of December 31, 1989, Perkins Family Restaurnats, L.P., a Delaware limited partnership, owned and operated 114 Perkins Family Restaurants and franchised and additional 257 restaruants in 27 states and Canada.

OCALA, FL (JAN. 31) PR NEWSWIRE - Microdyne Corporation (NASDAQ: MCDY) announced today that it has executed a formal letter of intent to purchase the telemetry products business unit of Acurex Corporation of Mountain View, Calif.

The telemetry products line, a unit of Acurex's Autodata Division, consists of wireless data couplers (WDC's) -- RF telemetry equipment used to sense and transmit data over short distances from harsh environments and rotating equipment such as jet engines.

The acquisition price will be between $4 and $5 million. The completion of the acquisition will be subject to the company's due dilligence and finalization of a purchasing agreement.

"The acquisition of the telemetry products line," said Microdyne CEO Kenneth Harple," is part of the our ongoing strategy to expand our telemetry product offerings across broader, more diversified markets. Also with the acquisition we will obtain a thick film micro-electronic capability -- a technology which can accelerate our entry into other areas of the telemetry business."

Microdyane Corporation is a leading supplier of RF telemetry receivers, radomes, antennas, and communication systems, with annual sales in the $20

million range.

DAYTON, OH (JAN. 31) PR NEWSWIRE - The Mead Corporation (NYSE: MEA) announced today that it is actively seeking potential buyers for Dataline Inc. of Toronto.

Dataline, a provider of real-time Canadian and U.S. stock market and other financial information services, was acquired in 1987 by Mead Data Central, Inc., a wholly-owned subsidiary of Mead.

Dataline's revenues in 1989 were approximately $17 million (Canadian). Dataline's principal product is CANQUOTE(TM), a real-time stock, options and futures quote service.

"We purchased Dataline to gain access to real-time technology for our LEXIS(R) and NEXIS(R) online information services," said Jack W. Simpson, president of Mead Data Central. "Since we acquired Dataline two years ago we have made considerable investment in real-time technology -- an investment that has benefitted, and will continue to benefit, both companies."

"For example, we have already been able to make real-time stock quotes available directly to LEXIS/NEXIS subscribers. In turn, Dataline's next generation technology, which will be introduced later this year, will provide a solid platform for future growth," Simpson said. "Having realized our objectives, we believe that a sale of Dataline will be in both companies' best interests."

Dataline is based in Toronto, with sales and service offices in Calgary, Halifax, Montreal, Ottawa, Vancouver and London, England. The company has approximately 110 employees. In addition, 20 individuals working in Dataline's offices are employed by Mead Data Central.

The sale of Dataline will be handled by Gerald W. Bialka, Manager, Corporate Development, for the Mead Corporation, Courthouse Plaza Northeast, Dayton, Ohio, 45463.

The Mead Corporation based in Dayton, Ohio, is a leader in forest products electronic publishing and color imaging.

#90031p0039 01/31/1990 ~PR Newswire
MIDLAND, MI (JAN. 31) PR NEWSWIRE - The Dow Chemical Company (NYSE: DOW) announced its third consecutive record year and second- highest fourth quarter, even though quarterly results fell below the company's expectations.

Dow posted record sales of $17.6 billion in 1989, up nearly 6 percent from the previous record set in 1988. While operating income slipped just over 2 percent to $4.06 billion for the year, net income was $2.49 billion, up nearly 4 percent from the record set in 1988.

Earnings per share also set an all-time record at $9.20, up almost 8 percent from a year ago. Earnings per share reflect the 3-for-2 split of common stock that became effective Nov. 21, 1989.

Sales for the quarter were $4.26 billion, approaching the $4.3 billion record set in the fourth quarter of 1988. Operating income was $702 million, down from $1.14 billion last year, while net income for the quarter was $427 million versus $635 million for the same period last year. Earnings per share were $1.59 for the quarter compared with $2.29 a year ago.

"Dow posted its third consecutive record year even with a slower-than-anticipated fourth quarter," said Frank Popoff, Dow's president and chief executive officer. "Fourth-quarter results were impacted by non-recurring events and a price decline from the peak levels of late 1988 and early 1989," Popoff added.

He noted that for 1989, prices about matched the record set in 1988, even though fourth-quarter comparisons were off nearly 9 percent from last year's record high prices resulting from product shortages. In addition, business activity softened as the U.S. economy slowed from a 3-percent real GNP growth in the third quarter to 0.5 percent in the fourth quarter.

CLEVELAND (JAN. 31) PR NEWSWIRE - Chase Brass & Copper Company, a subsidiary of BP America, Inc., today announced that it will close its narrow strip and tube operations, effective April 1, 1990. Chase Brass's Solon (Ohio) headquarters also will be closed.

Not affected by these closures is the Rod Division of Chase Brass in

Montpelier, Ohio, or the Rod Division's Los Angeles warehouse.

The closures will eliminate some 130 jobs. Appropriate severance terms will be offered to the affected employees.

The narrow strip plant is located in Shelby, North Carolina, and the welded tube facility is at the Chase Brass headquarters site in Solon. The narrow strip and tube businesses were created to commercialize Chase Brass's proprietary high-speed casting and processing technology, however commercial success has not been achieved and the businesses are currently running at a cash loss.

The whole of Chase Brass & Copper Company has been for sale for some time now but, in the absence of a suitable buyer for the narrow strip and tube divisions, Chase has reluctantly decided to close the facilities.

STAMFORD, CT (JAN. 31) PR NEWSWIRE - Xerox Corporation (NYSE: XRX) had 1989 net income of $704 million and primary earnings per share of $6.56, the company reported today. The year's revenues of $17.6 billion were up 7 percent from $16.4 billion in 1988.

In the three months ended Dec. 31, net income was $212 million and primary earnings per share were $2.01. Revenues of $4.7 billion in the fourth quarter were up 6 percent from $4.4 billion a year earlier.

Excluding the impact of 1988 year-end restructuring charges, 1989 income rose 11 percent from $632 million in 1988 and primary earnings per share were up 12 percent from $5.88. On a comparable basis, fourth quarter income rose 27 percent from $167 million a year earlier and primary earnings per share were up 29 percent from $1.56.

The 1988 restructuring moves -- refocusing document systems marketing resources, reducing manufacturing capacity, eliminating unprofitable, non-strategic businesses and cutting overhead -- were designed to strengthen the company's document processing market position, improve financial returns and increase shareholder value.

#90031p0046 01/31/1990 ~PR Newswire

PARSIPPANY, NJ (JAN. 31) PR NEWSWIRE - Armco Inc. reported net income of $15.5 million for the fourth quarter of 1989, or $.15 per share of common stock, compared to net income of $32 million for the fourth quarter of 1988, or $.34 per share. Unusual items in the fourth quarter included a $3.3 million charge for workforce reductions at the Kansas City, Missouri, plant and a $2.9 million reduction of the previously recorded gain on the sale of 40 percent of the Eastern Steel Division. The 1988 fourth quarter net income included a charge of $24 million for the AFSG runoff insurance companies and a gain of $8.2 million as a result of a favorable tax settlement.

Sales for the period totaled $416.2 million compared to sales of $831.3 million in the fourth quarter a year ago. The decrease in sales was primarily attributable to Armco no longer including the operating results of its Eastern Steel Division, which became Armco Steel Company, L.P. (ASC), a joint venture formed earlier this year with Kawasaki Steel Corporation.

For 1989, Armco had net income of $165 million, compared to $145.4 million in 1988. Earnings were $1.78 per share of common stock versus $1.57 per share in 1988. Sales for 1989 were $2,422.7 million, compared to $3,227.3 million in 1988.

Net income for 1989 included a number of unusual items which increased income by a net of $35.7 million. They were: a gain on the sale of 40 percent of the Eastern Steel Division of $109.4 million, a favorable ruling on certain export commitments of $15 million, and provisions of $40.4 million for corporate restructuring, $45 million for the runoff insurance operations and $3.3 million for workforce reductions. Net income for 1988 included a net charge of $26.7 million for unusual items.

Commenting on results, Robert E. Boni, chairman and CEO, said "The weakness in the second half was worse than anticipated as the fourth quarter never rebounded from the seasonal weakness of the third quarter. A slowdown in the manufacturing sector of the economy, particularly automotive, resulted in soft demand, a poor product mix and lower prices. Operating results were further affected by rising costs in many of our operations."

CALGARY, ALBERTA (JAN. 31) PR NEWSWIRE - North Canadian Oils Limited (Toronto, Montreal: NCO) and Bramalea Limited (Toronto: BCD) have jointly announced that they have today closed an agreement involving the purchase

by NCO of Bramalea's entire interest in Coseka Resources Limited (Toronto: CKS). The terms of the final agreement provide for NCO to issue 900,000 common shares from treasury to Bramalea in exchange for the security position of Bramalea in Coseka which is as follows:

- 22,647,434 common shares representing approximately 47 percent of the issued shares currently outstanding;

- $20 million secured convertible debenture, maturing in 2006; and

- $12.680 million of unsecured debentures which are convertible into common shares on or prior to 1996.

Prior to entering into this agreement NCO did not hold any securities of Coseka. The purpose of NCO, in effecting the transaction, was to acquire an equity and preferred secured creditor position in Coseka with a view to managing its business and financial condition so as to enhance the value of Coseka. NCO has no current intention to acquire any additional Coseka shares or other securities but may do so in the future depending on developments.

Coseka is a Calgary based company engaged in the oil and gas business and its shares are listed on the Toronto Stock Exchange. Coseka's 1988 Annual Report disclosed that Coseka has proven and probable reserves of 197 billion cubic feet of natural gas, 8.2 million barrels of oil and natural gas liquids and 446,000 long tons of sulphur. For the fiscal year ending December 31, 1989, Coseka's average daily production was 42 mmcfd of natural gas and 2757 bopd of oil and natural gas liquids. Coseka has total long term indebtedness of $166 million including secured, partially secured and unsecured convertible debentures of $65 million.

North Canadian Oils Limited is a conservatively managed, financially and technically strong, Canadian oil and gas exploration, production and marketing company. Its common shares are traded on the Toronto and Montreal Stock Exchanges in Canada and the American Stock Exchange in the United States.

PITTSBURGH (JAN. 31) PR NEWSWIRE - Pittsburgh National Bank, an affiliate of PNC Financial Corp (NYSE: PNC), has introduced Prime and Prime Plus, banking package accounts that offer convenience and potential cost savings to retail bank customers it was announced today.

"The lead account, Prime Plus, offers an array of banking services that meet the consumer's day-to-day needs, all for one price," said Carol Manteris, assistant vice president, Community Banking.

"It's an alternative to single-product pricing, and it can simplify personal banking through consolidation of services. The more our customers use Prime Plus, the more value they get," Manteris said.

For an $8 monthly fee,

Prime Plus features:

Check & Save(R), an interest-bearing checking account, with no fees and no minimum balance required.

Premium Money Fund, a money market account with a blended rate, with no fees and no minimum balance required.

Visa(R) or MasterCard(R).

MAC Visa Access Card, with no annual or transaction fees. This card allows customers to withdraw money from checking or savings accounts, like a regular MAC card. It also lets customers "charge" purchases wherever Visa cards are accepted; payment for these charges comes directly from the checking account, not a credit line.

Check-Credit, a personal or Home Equity line-of-credit account, with a 1/4 percent discount on prevailing rates.

Worry Free overdraft protection, which prevents

accidental overdrafts on checking accounts by
transferring funds from the Check-Credit account to
cover the overdraft.

Bank Extension(SM), telephone bill payment service, at
no charge.

Safe Deposit Service, with a $20-a-year discount on the
safe deposit box rental fee.
Checks, unlimited supply, free.
Travelers Cheques, unlimited supply, free.
Cashier's checks, unlimited supply, free.
Stop Payment orders, free.
Discount Travel. With a special travel service provided
by Discount Travel International, Inc., customers can
choose from hundreds of discounted "short notice"
vacation and cruise packages year-round. Many of these
packages are discounted 50 percent or more.

For customers who don't need all the services available with the Prime Plus Account, Pittsburgh National has a package called the Prime Account. Prime offers Regular Checking and Insured Money Fund accounts, Visa or MasterCard, MAC Visa, Worry Free overdraft protection, Bank Extension, free checks, travelers cheques, cashier's checks and stop payment orders. The monthly fee for the Prime Account is $6.

The new services are being accompanied by print and broadcast advertisements, bank displays and brochures.

LAGUNA NIGUEL, CA (JAN. 31) PR NEWSWIRE - Furon Co. (NASDAQ: FCBN) today announced the consummation of three transactions that will result in net proceeds to the company of approximately $28 million and will further reduce Furon's long-term debt to approximately $114 million from $142 million.

Monty Houdeshell, chief financial officer, said Furon has successfully negotiated the sale of its Reeves Rubber Division in Albertsville, Ala., the sale and leaseback of land and buildings of nine manufacturing plants and the sale of a portion of the company's Components Division in South Carolina. "These transactions are part of our planned program to reduce Furon's long-term debt and concentrate on those existing operations that provide the best return," Houdeshell added.

Furon (formerly The Fluorocarbon Co.), headquartered in Laguna Niguel, is a producer of quality polymer products for the industrial market. The company serves a wide range of industries including petrochemical, aerospace, medical, transportation, pollution control and fluid power.

LOS ANGELES (JAN. 31) PR NEWSWIRE - Filmstar Inc. (NASDAQ: FLTR, Warrants: FLTRW, FLTRZ) today announced that it has engaged Mabon, Nugent & Co., New York, for the purposes of rendering financial advisory and investment banking services in connection with arranging a financing of up to $25 million.

If the financing is successful, Filmstar would utilize these proceeds to expand its ability to issue letter of credit backed guarantees to independent producers utilizing distribution contracts as collateral.

Harlan Kleiman, Filmstar chairman and chief executive officer, said he believed that the financing could soon place his company in a "superior" position in securing a series of foreign distribution contracts "previously unavailable." He added that he believed the financing could "positively and significantly impact Filmstar's bottom line during the current fiscal year."

Filmstar Inc., based in Los Angeles, provides independent filmmakers with "one-stop shopping" services in film financing, operating and distribution. The company's recent projects include "A Shock to the System," the Michael Caine thriller to be released this spring; "Bethune," the soon-to-be-released $18-million historical adventure starring Donald Sutherland; and "No Holds Barred," the highly successful wrestling feature.

SOUTH BEND, IN (JAN. 31) PR NEWSWIRE - 1st Source Corporation (NASDAQ/NMS: SRCE) today announced that its board of directors has approved both a cash dividend of $0.12 per share of common stock and a 10 percent common stock dividend.

Ernestine M. Raclin, chairman of the board, and Christopher J. Murphy III,

president, said the board's decision to add the stock dividend reflects 1st Source's continued strong performance. For 1989, 1st Source reported record net income of $10.6 million, an increase of 11.6 percent from the previous record of $9.5 million reported for 1988. The year 1989 was the fourth-consecutive year in which net income reached record levels.

Raclin said both the cash dividend and the stock dividend are payable Feb. 16, 1990, to shareholders of record on Feb. 8, 1990.

Murphy noted that net income per share of common stock rose 19.7 percent to $3.04 for 1989 compared to $2.54 for 1988. When the common stock dividend is taken into account, net income per common share for 1989 was $2.76 compared to restated net income per share of $2.31 for 1988.

For the fourth quarter of 1989, 1st Source reported net income of $2.9 million compared to $2.7 million for the fourth quarter of 1988, an increase of 8.7 percent. 1st Source Corporation has five subsidiaries: 1st Source Bank; 1st Source Bank of Starke County; 1st Source Capital Corporation; 1st Source Leasing and 1st Source Insurance. In addition to its NASDAQ listing, 1st Source stock appears in the National Market System tables in many daily newspapers under the code name "1stSource".

Marketmakers in 1st Source shares are The Chicago Corporation, City Securities Corporation, William Blair & Company, Edward D. Jones & Company Raffensperger Hughes & Co., Inc. and Roney & Company.

#90031p0063 01/31/1990 ~PR Newswire

NEW YORK (JAN. 31) PR NEWSWIRE - Avon (NYSE: AVP), the world's largest selling brand of cosmetics, will soon be made and sold in China, the world's largest nation.

The U.S.-based beauty products company has entered a joint venture to manufacture and sell cosmetics in China. Avon is one of the first foreign cosmetics companies authorized to manufacture cosmetics in China and the first company -- domestic or foreign -- authorized to sell directly to consumers.

"China is a cosmetics market of tremendous potential," said James E. Preston, Avon's chairman and chief executive officer. "There are about 500 million women in China, more than the U.S. and Europe combined."

Avon owns 60 percent of the new joint venture company. Its partner is the Guangzhou Cosmetics Factory, which is providing the production facility. Avon will provide some equipment, cosmetics formulas, technical expertise and sales and marketing programs.

Avon's initial investment will be about $1 million. The joint venture is scheduled to be in operation by mid-1990 and expects to begin making a profit in the third year.

Although the joint venture's charter allows for distribution throughout China, the company will concentrate first in South China. More than 60

million people live within a radius of 100 miles of the plant.

"We believe Avon will provide a significant earnings opportunity for the women of China, as it does for 1.5 million independent sales representatives around the world," Preston said.

For the start-up, Avon will establish two distribution and training locations. By the end of the first year of operation, the company expects to have a minimum of 3,000 representatives in the Guangzhou area.

The joint venture's product line will have about 50 makeup and skin care products, but the line is expected to expand over time.

Avon has operations in Japan, the Philippines, Taiwan, Thailand, Malaysia, Australia, New Zealand and Indonesia.

Avon has had a long-term relationship with Chinese vendors who supply the company with more than $50 million a year in gift products. Avon's Chinese joint venture partner employs 150 workers and has been in operation for 20 years. In addition to the joint venture with Avon, Guangzhou Cosmetics will continue to produce its current line of cosmetics for sale through retail outlets.

NEW YORK (JAN. 31) PR NEWSWIRE - Ogden Corporation (NYSE: OG) today reported pre-tax earnings of $94,653,000 for 1989 compared with $62,277,000 for 1988, an increase of 52 percent. After-tax earnings per common share for 1989 were $1.68 compared with $1.44 for 1988, an increase of 17 percent. Pre-tax earnings in 1989 benefited from the sale of common stock by Ogden Projects, Inc. but after-tax results were affected by a 21 percent increase in Ogden's tax rate due to the lessened impact of Investment Tax Credits on higher pre-tax earnings.

Ralph E. Ablon, chairman of Ogden, stated that he expects Ogden's earnings in 1990 to approximate the same upward trend.

The attached table sets forth net sales and service revenues, income before income taxes and minority interest, net income, primary and fully diluted earnings per share for 1989 and 1988.

OGDEN CORPORATION
(In thousands, except per-share amounts)

	Year ended Dec. 31	
	1989	1988
Net sales & service revenues	$1,368,818	$1,087,785
Income before income taxes and minority interest	$ 94,653	$ 62,277
Net income	$ 66,958	$ 57,780
Earnings per common share	$ 1.68	$ 1.44
Earnings per common share -- assuming full dilution	$ 1.66	$ 1.41

WALTHAM, MA (JAN. 31) PR NEWSWIRE - Cabot Corporation (NYSE: CBT) announced today it is forming a limited partnership with Manufacturers Hanover Venture Capital Corporation for the purpose of acquiring the assets of AO Safety, the safety products division of American Optical Corporation based in Southbridge, Mass.

Cabot will contribute its Indianapolis-based E-A-R business to the partnership to form a single saftey products business with expected annual revenues approaching $200 million.

In the tax-free transaction, Cabot expects to receive approximately $100 million in cash, $30 million in securities and a significant minority equity interest in the partnership. The amount of the cash distribution to Cabot is not a condition to the AO Safety transaction, which under the purchase agreement signed today, is scheduled to close in late March

subject to satisfaction of customary conditions.

Cabot Chairman Samuel W. Bodman commented, "Both E-A-R and AO Safety are key players in the safety products industry and complement each other extremely well. AO Safety has concentrated essentially in domestic markets, whereas E-A-R is well established abroad and is recognized as a major force internationally. AO Safety also has a strong presence in retail markets while E-A-R has only just begun to approach this market. As a result, the established position of one business will act as a springboard for the products of the other in both international and consumer markets."

E-A-R has preeminent worldwide position in the hearing protection market supported by a full line of products including its well-known patented polymer foam ear plugs. Using its extensive knowledge in energy absorption and hearing measurement, E-A-R has successfully expanded into other health and safety markets with new products and by acquisition. AO Safety is the leading manufacturer and distributor of safety prescription and non-prescription eyewear in the United States and Canada. AO Safety also manufactures respirators and face and head protective products.

Robin A. Brumwell will serve as president and chief executive officer of the combined operation. Brumwell is currently general manager of E-A-R and a vice president of Cabot Corporation. John P. Flanagan, the current president of AO Safety, will serve as executive vice president and chief operating officer. John D. Curtin, Jr. will act as chairman while continuing his responsibilities as executive vice president and chief financial officer of Cabot.

Cabot Corporation is a Waltham, Mass.-based Fortune 300 company with operations in specialty chemicals and materials and energy.

NASHVILLE, TN (JAN. 31) PR NEWSWIRE - Corrections Corporation of America (NASDAQ: CCAX) today announced financial results for the fourth quarter and year ended December 31, 1989.

In the final quarter of 1989, CCA reported net income of $533,905, or $0.06 per share, an increase of 35.2 percent from $395,042, or $0.05 per share, reported in the fourth quarter of 1988. The company's revenues were up 41.8 percent to $11.7 million from $8.2 million in 1988's final quarter, while its contribution from operations (or gross profit) increased 18.6 percent to $2.2 million from $1.9 million for the same period last year.

For the year ended December 31, 1989, CCA's net income was $1.6 million, or $.17 per share, compared with a loss of ($115,537), or ($.01) per share in 1988. Revenues increased 48.7 percent to $36.8 million from $24.8 million in 1988, and contribution from operations for the most recent year grew 66.1 percent to $7.7 million from $4.6 million in 1988.

CCA manages prisons and other correctional institutions for governmental agencies. The company is the industry leader in private sector corrections with 4,288 beds in 16 facilities under contract. CCA provides a full range of services that include finance, design, construction, renovation and management of new or existing facilities.

#90031p0071 01/31/1990 ~PR Newswire

SAN RAFAEL, CA (JAN. 31) PR NEWSWIRE - Good reception in Marin County to First National Bank of Marin's new banking services contributed to the bank's 11 percent growth in assets and net income of $160,000 for 1989. The profitable year is in contrast to a loss of $402,000 in 1988.

The community bank's innovative new professional banking services, its insurance premiums' finance program, its credit card operation, mortgage loan services and special financing for small business all contributed to First of Marin's $23.6 million year-end assets, up from $21.2 million the year before.

"We think we've avoided some of the pitfalls of other institutions and, at the same time, launched sound entrepreneurial operations in very promising financial market niches," said A.C. Rice, chairman and president.

"We are particularly proud of our profit growth in 1989, since it occurred after the substantial costs involved in creating several new services," said Rice. "All the new operations we started in 1989 are profitable, and we expect they will contribute to strong continued earnings growth in 1990."

Rice added that the bank is embarking on yet another new program in 1990 designed to put longer-term capital in the hands of small and mid- size businesses. This Small Business Administration-backed loan program is aimed at slashing the red tape that proves daunting to so many applicants.

"We'll be providing more details shortly on the SBA program," said Rice, "but suffice it to say that it is intended to supplement the other financial services the bank provides the local business person and professional."

The bank's affinity credit card program grew to 5,000 cards after introducing the program in May. Commercial loans were up 18.2 percent.

Rice attributed the bank's "full range" financial services packages for professional firms as another earnings leader, as more lawyers, doctors, dentists and accountants turned to First of Marin for all their financial needs.

Also, the Federal Reserve Board has authorized an increase in the bank's capital through the issuance of additional shares of common stock. The new capital will be available to the bank by Feb. 28, 1990.

BOSTON (JAN. 31) PR NEWSWIRE - Bank of New England Corporation (NYSE: NEB) announced today that it had finalized the sale of the U.S. portion of McCullagh Leasing to GE Capital, which was approved by regulators last week. The sale of the U.S. portion brings $350 million in funds to the company's Boston bank. Completion of the sale of the Canadian operations of McCullagh, expected next week, will bring an additional $100 million to BNEC.

Commenting on the closing, BNEC Chairman H. Ridgely Bullock said, "This sale represents continued momentum in our asset sales plan as we aggressively pursue other options to downsize the company and improve our capital ratios."

Bank of New England Corporation is a Boston-based interstate bank holding company with assets of $29 billion and banking offices in four New England states. Its common stock is listed on the New York Stock Exchange and is traded under the symbol NEB.

#90031p0076 01/31/1990 ~PR Newswire

DALLAS (JAN. 31) PR NEWSWIRE - J.C. Penney Company, Inc. (NYSE: JCP) announced that its board of directors has declared a dividend distribution of one new preferred stock purchase right on each outstanding share of its

common stock. At the same time, the board has authorized the redemption of the old preferred stock purchase rights which were issued Feb. 7, 1986. The new rights dividend distribution is payable as of Feb. 14, 1990, to stockholders of record on that date and will expire 10 years later unless redeemed at an earlier date. The redemption price of $.10 per old right will be paid to stockholders of record at the close of business on Feb. 14 1990.

The decision to make the redemption payment for the old rights is separate from the consideration of the regular dividend, which is normally set by the board at its March meeting. However, the board believes that the redemption payment is appropriate in light of the company's performance since the adoption of the old plan.

The board may redeem the new rights for $.01 per new right prior to the 10th day after 15 percent or more of the company's common stock has been acquired by a person or group. Such period may be extended by the board under certain circumstances.

The new rights will generally not be exercisable until 10 days after a person or group acquires 15 percent or more of JCPenney common stock or 19 business days after a person or group commences or announces an intent to commence a tender or exchange offer for 30 percent or more of the stock. Under certain circumstances, these periods may be extended by the board. Once exercisable, each new right would entitle its holder to buy 1/200th of a share of JCPenney Series A Junior Preferred Stock at an exercise price of $280.

If JCPenney were acquired in a merger or other business combination transaction, each new right then exercisable would entitle its holder to buy that number of shares of the surviving company's common stock which has a market value equal to twice the the new right's exercise price. In addition, if a person or group were to acquire 15 percent or more of JCPenney's common stock (unless the acquisition were approved by the board), each new right would entitle all rightsholders, other than the 15 percent stockholder, to purchase that number shares having a market value equal to twice that new rights' exercise price. After a person or group acquires 15 percent or more but less than 50 percent of JCPenney's common stock, the board may exchange part or all of the new rights (other than those held by the acquiror) at a rate of one share of common stock for each new right.

BURLINGTON, NC (JAN. 31) PR NEWSWIRE - Environmental Diagnostics, Inc.

(NASDAQ: EDIT) announced today that it has been awarded the first year of a contract aggregating $1,195,800 over a five year period to provide Calf Antibiotic Sulfa Tests ("C.A.S.T.") and Live Animal Swab Tests ("L.A.S.T.") to the United States Department of Agriculture, Food Safety and Inspection Service. The Company will provide about 300,000 C.A.S.T./L.A.S.T. tests per year under the contract for the purpose of screening meat products during the processing cycle under the USDA Meat and Poultry Inspection Program.

James D. Skinner, EDI President and Chief Executive Officer, said "We are very pleased to announce that EDI has received the first year award of what will be an exclusive multi-year, large volume contract from the Food Safety and Inspection Service ("FSIS"). The detection of harmful drug residues in meat products destined for human consumption is of great concern to consumers, farmers, and medical professionals, as well as the FSIS. Avoidance of drug residues helps to insure the safety and quality of the nation's food supply. The C.A.S.T./L.A.S.T. tests, manufactured and marketed under the EDI Conventional Biodiagnostics product line, provide an effective method to determine, prior to processing, if residues of sulfa and other antibiotic drugs administered to animals during the growing cycle are present. The C.A.S.T./L.A.S.T. tests, together with the EZ-SCREEN Sulfa drug residue tests and the Sulfa-On-Site ("S.O.S.") test kits, all manufactured by EDI, represent a complete line of testing methods and products utilized by private businesses and government agencies for determining the presence of sulfa drug residues in food products." Skinner added that the Company expects to commence shipments of the C.A.S.T./L.A.S.T. products under this contract to the FSIS shortly.

Environmental Diagnostics, Inc. develops and manufactures human clinical and agricultural diagnostics specifically designed for on-site testing by non-technical personnel. The Company's Conventional Biodiagnostic products are used by government agencies, researchers, clinical testing laboratories and private companies for clinical and veterinary testing. The Company's EZ-SCREEN products provide the accuracy of laboratory results in minutes.

SOUTHFIELD, MI (JAN. 31) PR NEWSWIRE - The Kitchener, Ontario, plant of Lear Siegler Seating Corp., producer of metal parts for seat frames, has received the Ford Motor Company's Q1 Preferred Quality Award.

Alexander J. Trotman, executive vice president of Ford North American Automotive Operations, presented the award to Kenneth L. Way, chairman,

and Richard Hodgson, director of Kitchener operations, LSSC. LSSC's Kitchener plant has 700 hourly and salaried employees.

"The Q1 Award evaluation criteria entail a comprehensive review of plant quality practices and performance," Trotman said. "The satisfaction of customers -- both Ford assembly plants and the ultimate retail customer -- is a major consideration of the ad hoc team that determines if the award should be given.

"Ford pays particular attention to a plant's ability to maintain quality while implementing new manufacturing processes. The use of statistical methods to control manufacturing techniques is also important. The methods increase quality and productivity by reducing the need for redundant testing, inspection, product rework and material scrappage."

The Ford Q1 Award has been earned by more than 1,300 of Ford's North American Automotive Operations outside supplier plants to date and is well known for influencing the acceptance and widespread use of statistical methods among Ford's 2,000 suppliers in North America.

BAYONNE, NJ (JAN. 31) PR NEWSWIRE - At the meeting of the board of directors of Cambrex Corporation (NASDAQ: CBAM) on Jan. 25, Chief Executive Officer Cyril C. Baldwin Jr. announced the appointment of James A. Mack as the corporation's new president and chief operating officer and member of the board of directors.

Mack has managed a number of specialty chemical businesses during his 30-year career in the industry. Most recently, he was vice president of Performance Chemicals of Olin Corporation with responsibility for specialty and urethane intermediates. Previously, he held several positions with Sherwin-Williams Company, including that of president and general manager of the Chemical Division.

He graduated with a B.S. in chemical engineering from Michigan Technological University and received his M.B.A. from Western New England College. He is the immediate past chairman of the board of governors of the Synthetic Organic Chemical Manufacturing Association and has served on the board of the Chemical Manufacturers Association.

Cambrex Corporation manufactures and markets a broad line of specialty chemicals and commodity chemical intermediates.

The chemical families of castor oil pyridine and organometallics and ammonia reaction chemistry are used by the company to produce compounds for its five product categories: urethane systems and additives, coatings-intermediates and additives, health and beauty aids and other specialty chemicals, agricultural chemical intermediates, and commodity chemicals and custom manufacturing.

#90031p0084 01/31/1990 ~PR Newswire

NEW YORK (JAN. 31) PR NEWSWIRE - AmBase Corporation (NYSE: ABC) today reported that consolidated net income in the fourth quarter of 1989 was $20 million, or $0.60 per share, compared with consolidated net income in the 1988 fourth quarter of $13 million, or $0.39 per share.

For the full year consolidated net income was $96 million, or $2.82 per share, in 1989 compared with $87 million, or $2.56 per share, in 1988.

Income before income taxes in the fourth quarter of 1989 was $30 million compared with $31 million in last year's quarter. In 1989, pretax income for the full year was $160 million compared with $137 million reported last year.

Consolidated revenues for the fourth quarter of 1989 were $861 million compared with $826 million in 1988. Consolidated revenues for the full year 1989 were $3,526 million compared with $2,989 million last year.

At Dec. 31, 1989, consolidated assets were approximately $13.1 billion, stockholders' equity was $1,083 million and book value was $31.95 per share.

Insurance Operations Fourth quarter insurance income before income taxes including gains on sales of investments was $50 million in 1989 and $41 million in 1988. For the full year, these figures were $191 million in 1989 and $176 million in 1988.

Net premiums written in the quarter decreased to $444 million from $447 million last year. For the full year, net premiums written were $2,045 million in 1989 and $2,068 million in 1988. Fourth quarter earned premiums were $518 million compared with $507 million in last year's quarter. For the full year 1989, earned premiums amounted to $2,060 million compared with $2,102 million reported in the prior year.

The underwriting loss in the 1989 fourth quarter amounted to $43 million compared with a loss of $45 million in last year's fourth quarter. For the full year, the underwriting loss was $198 million compared with a loss

in 1988 of $186 million. The GAAP combined ratio in 1989 was 108.3 in the fourth quarter and 109.6 for the full year. In 1988, the combined ratio was 108.9 in the fourth quarter and 108.8 for the full year.

In the fourth quarter of 1989, insurance net investment income before income taxes was $88 million compared to $89 million reported last year. For the full year, these figures were $360 million in 1989 and $351 million in 1988. After income taxes, net investment income in the fourth quarter was $65 million in 1989 and $68 million in 1988. For the full year net investment income after income taxes remained unchanged at $266 million in 1989 and 1988.

Banking Operations Fourth quarter banking income before income taxes was $1 million compared with $13 million in last year's quarter. Banking income before income taxes for the full year was $47 million in 1989 and $20 million in 1988. In the 1989 fourth quarter, after a review of all bank loan portfolios, in particular commercial real estate and corporate loans, and in consultation with the U.S. Office of Thrift Supervision, which recently completed an examination of Carteret Savings Bank, general loss reserves were increased approximately $20 million. At Dec. 31, 1989, Carteret met or exceeded all capital requirements established by the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA). Prior to the August 1988 acquisition of Carteret Bancorp, banking income was derived solely from the Company's Imperial Premium Finance subsidiary.

Investment Services Investment services income before income taxes in the 1989 fourth quarter amounted to $2 million compared with $3 million in last year's quarter. Investment services income before income taxes increased to $14 million in 1989 from $8 million reported in 1988.

AmBase Corporation is an insurance, banking and investment services organization. Its principal subsidiaries include The Home Insurance Company, US International Re, Carteret Bancorp, Gruntal Financial Corp., Home Capital Services and Sterling Forest Corporation.

CHICAGO (JAN. 31) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) and Tokyo-based Saison Group today announced plans to test market automotive service centers in Japan this year.

Tires Plus will be a joint venture between Sears and Saison Group, well-known throughout Japan for its retailing, real estate and financial service operations.

Three test units of Tires Plus will open in 1990 in Utsunomiya, Maebashi and Takasaki, cities located within a 100-mile radius of Tokyo. Serving the quick-service automotive customer, Tires Plus will offer high quality name brand and private label tires and batteries as well as a variety of products and related services including tire changing, balancing and alignment; battery installation, testing and charging; quick lubes; cooling and air conditioning services and car washing.

"The automotive aftermarket in Japan is changing rapidly and represents an excellent opportunity for growth," said Edward A. Brennan, chairman and chief executive officer of Sears. "Tires Plus is a perfect union of Sears expertise in the automotive field with Saison Group's outstanding franchise with Japanese consumers."

Seiji Tsutsumi, chairman of the Saison Group, said "This venture is the result of extensive studies regarding the needs and wants of Japanese consumers and represents an extension of our continuing strategic alliance with Sears, Roebuck and Co."

#90031p0090 01/31/1990 ~PR Newswire

PHOENIX, AZ (JAN. 31) PR NEWSWIRE - StatesWest Airlines Inc. (NASDAQ: SWAL) today announced that it has entered into a letter of intent to form a new airline joint venture to be headquartered in Bangkok, Thailand, within the next 30-60 days. The joint venture intends to provide both scheduled and charter service in Thailand and neighboring Pacific Rim countries, subject to appropriate governmental approval and completion of the definitive joint venture agreement.

Joint venture partners involved in this project are: Pongsak Sampawakoop, Bangkok, Thailand, managing director of Business International Co., one of the largest diversified real estate development and management companies in Thailand; Thai Flying Service Co. Ltd., which holds one of two private aviation licenses in Thailand, represented by Thidej Maithai, its managing director; Asia Voyages Group of Companies, a French-based international tour operator specializing in destinations in Southeast Asia, represented by its managing director, Laurent Desmazieres; and Norman Birkenstock, chairman and president of Pacific Gate Corp., San Francisco, which is an international consulting firm specializing in the Pacific Rim. Pacific Gate's clients have included such firms as Northrop Corp. and Pan Am World Services, a subsidiary of Pan American Airlines.

The Thai Flying Service has operated charter passenger and air cargo, as well as technical services-aerial photography and surveys, cloud seeding, etc., in Thailand since 1978. Principals of the company include members

of the family owning Boon-Rawd Brewery, which makes the world-renowned Singha Beer. It has provided air service to various Thai government projects, foreign governments and multinational corporations.

Upon formation, the joint venture partners as a group will be granted a two-year option to purchase up to 10 percent of StatesWest's common stock from the company at a price of $2.50 (U.S.) per share. The group has expressed an interest in acquiring up to 5 percent of StatesWest stock in the open market and has agreed its purchase would not exceed 15 percent of the airline's outstanding shares.

The joint venture will be granted the exclusive right throughout the Pacific Rim to market StatesWest's special package tours to the gaming and resort market of Laughlin, Nev., and future flights to Arizona's Grand Canyon.

Thidej Maithai and Rudy R. Miller will serve as co-chairmen of the joint venture, Pongsak Sampawakoop as managing director, and Nick Crawford as operation manager.

StatesWest is one of the largest regional air carriers in the country not owned or totally affiliated with a major carriers. The company owns 7.34 percent of Mesa Airlines Inc., a regional airline carrier headquartered in New Mexico.

DENVER, CO (JAN. 31) PR NEWSWIRE - The Front Range Sales & Marketing Executive Association (Front Range SME) was granted its charter from the Sales & Marketing Executive Association International (SME International) on Jan. 22, 1990 at a meeting at the Loew's Giorgio Hotel.

Presenting the charter and installing the newly elected officers was Robert E. Langford, president elect of SME International.

The officers installed were: President, J. Patrick Logan, vice president, Sales and Marketing, Staodynamics, Inc. (Longmont);

President-Elect and Senior V.P - Programs, Charles F. Kegley, vice president Marketing, Translogic Corp. (Denver);

Vice President - Education, Gary Bartel, director of sales, Applied Information Systems (Denver); Vice President - Special Services, Leslie Beauparlant, vice president, Sales and Marketing, Airlifted, Inc.

(Evergreen);

Senior Vice President - Membership, Al Vaskey, owner, NML/Baird (Denver); Vice President - Recruiting, Bucky Dilts, regional manager, National Business Systems, Inc. (Denver); Vice President - Involvement, Daniel Noreen, director of sales, Colorado Lottery (Denver); and Secretary and Treasurer, Roger Speyer, president, PSA Security Network (Westminister).

"I view the formation of our chapter as another important step in the Rocky Mountain region's continuing recovery and is indicative of the high level of professionalism we are nurturing along the Front Range," said J. Patrick Logan, Front Range SME president. "We encourage all sales and marketing executives to please join with us so we may help our region and its businesses prosper and grow."

The keynote speaker for the evening was Robert G. Gee, who is the president of his own consulting firm with over 30 years' business experience in sales and marketing. He has also served as chairman of the board and president of SME International. His topic was "Leadership in Sales and Marketing."

The Front Range SME, like its counterpart chapters in other areas, allows sales and marketing executives the opportunity to network and hone their new marketing and sales ideas in a non-threatening, supportive atmosphere. This input is provided by qualified speakers at the monthly meetings and through seminars and workshops held throughout the year. The organization will also support educational programs to teach students the fundamentals of free enterprise, sales and marketing.

SME International, with affiliates in over 200 cities, serves more than 20,000 members worldwide. It provides sales and marketing executives with ideas and concepts that will contribute to their company's successes and their own personal growth.

#90031p0097 01/31/1990 ~PR Newswire

ELGIN, IL (JAN. 31) PR NEWSWIRE - Jacob Saliba, chairman of Katy Industries Inc. (NYSE: KT) announced that Katy expects to sell 25 percent of its Schon & Cie AG subsidiary next month.

The sale is expected to be accomplished by means of an initial public offering of Schon shares in Germany, scheduled to commence on or about Feb. 14, 1990. Katy has entered into an agreement with Commerzbank AG to act as lead manager of the offering.

Based on the anticipated offering price for the Schon shares and estimated transaction expenses, Katy presently expects to realize net proceeds of approximately 44,000,000 DM. At current exchange rates, this would result in a gain to Katy of approximately $12,000,000 after taxes. Completion of the offering is subject to various conditions, including conditions which may affect the pricing of the shares to be sold.

Saliba also noted that Katy is reviewing certain other of its international activities and may consider establishing reserves relating to those activities if warranted by the results of such reviews. Any such reserves could partially offset the gains from the sale of Schon shares.

Schon, a wholly owned subsidiary of Katy based in Pirmasens, West Germany, is a leading manufacturer of shoe lasting and die cutting machinery. Katy will retain ownership of the remaining 75 percent of Schon shares, which will be listed in the ''Geregelter Markt'' (regulated market) on the Frankfurt Stock Exchange. Saliba commented that the offering will give recognition to the outstanding performance of the management of Schon, and will provide Katy a vehicle to expand its European operations in anticipation of the economic integration of the European Community in 1992.

Katy Industries, Inc. is a major diversified corporation with interests in consumer products, industrial machinery, industrial components and energy resources. Katy common and preferred shares (Class B) are listed on the New York Stock Exchange.

#90031p0099 01/31/1990 ~PR Newswire

JACKSONVILLE, FL (JAN. 31) PR NEWSWIRE - EVEN IT UP is a slogan that customers of Winn-Dixie Stores, Inc. identify with in the war against hunger. Since January 1989, it has represented an opportunity for them to donate the small change from their grocery orders toward the relief action of The Salvation Army among the needy.

Through the generosity of Winn-Dixie customers, the EVEN IT UP fund has grown steadily, reaching $185,182 in donations since Jan. 26, 1989, when the program was initiated.

Monies donated were initially designed for deserving families in communities across the Sunbelt, focusing on children and the elderly. Victims of the Hurricane Hugo disaster and the Huntsville, Ala. tornado were also targeted to receive help from the EVEN IT UP For The Hungry fund. These events have put a severe strain on The Salvation Army relief fund.

Donations are desperately needed to help feed the hungry. Food certificates are disbursed by The Salvation Army and redeemable at all Winn-Dixie stores for nutritionally important perishables such as produce, dairy products, fresh and smoked meats which cannot be distributed from non-refrigerated food banks.

The participating Winn-Dixie store locations through Alabama, Georgia, Florida, Louisiana, Mississippi, North and South Carolina are identified by the EVEN IT UP signs at checkout and in the store windows.

#90031p0100 01/31/1990 ~PR Newswire

OVERLAND PARK, KS (JAN. 31) PR NEWSWIRE - George E. Powell, Jr., chairman of the board of Yellow Freight System Inc. of Delaware (NASDAQ: YELL), reported to shareholders today that operating revenue set another record in 1989 reaching $2,219,755,000, up 10 percent from 1988 annual revenue of $2,016,466,000. Net income was $47,785,000, or $1.66 per share, compared to net income of $68,962,000, or $2.40 per share.

Current year results were impacted by the adoption of the Financial Accounting Standards Board's Statement No. 96, Accounting for Income Taxes effective Jan. 1, 1989, which had the effect of increasing net income for the year by $29,200,000, or $1.01 per share. In addition, the company incurred a charge in the fourth quarter of $27,707,000 after tax, or 96 cents per share, almost all of which was needed to increase workers' compensation reserves. The increase in these reserves resulted from a recent actuarial study which identified unfavorable growth trends in the cost of these claims. The charge reflects a favorable effect of a change in accounting method to discount estimated future payments to actuarial present values. The $27.7 million charge resulted in a net loss for the fourth quarter. The combined effect of these accounting changes, however, increased earnings for the full year by 5 cents per share.

Fourth quarter 1989 operating revenue of $559,375,000 was up 7 percent compared to the same period last year. There was a net loss of $27,123,000, or 94 cents per share, compared to net income of $18,796,000, or 65 cents per share, in the fourth quarter of 1988. Without the one-time charge to earnings discussed above, net income would have been $584,000, or 2 cents per share.

General freight less-than-truckload (LTL) tonnage was up 8 percent in the fourth quarter and up 9 percent for the year compared to comparable periods of 1988. Total tonnage was also up 8 percent for the quarter as well as 8 percent for the year. According to Powell, "These tonnage

gains demonstrate continued growth in the economy as well as Yellow's success in providing its customers with quality transportation services.

"The lower fourth quarter profits reflect the deterioration in revenue yields resulting from the pressure on prices the company has experienced throughout much of the year. Results in the fourth quarter were also negatively impacted by the continued rise in fuel prices, labor costs and other operating expenses. The company is moving aggressively to reduce costs and improve efficiencies, while at the same time remaining committed to the highest levels of customer service."

Discounting activity picked up in the second quarter and intensified in the third quarter, but leveled off in the final quarter. This indicates the initial success of current efforts to curtail discounting. The company implemented a 5.5 percent general rate increase (with an initial impact on revenue of approximately 4 percent) effective Jan. 2, 1990. The company is determined to retain the full benefit of this increase. Even with the retention of the increase, however, an additional increase may be required to help restore reasonable levels of profitability.

Powell also told shareholders, "The company is confident that with the cooperation of its employees and the understanding of its customers it can return profitability to levels commensurate with the quality of the service it provides. A more comprehensive discussion of 1989 results will appear in the annual report to shareholders which will be mailed in March."

A quarterly dividend of 19 cents per share was declared by the Board of Directors to be paid February 26 to shareholders of record on February 12.

SAN DIEGO (JAN. 31) PR NEWSWIRE - HomeFed Corp. (NYSE: HFD), parent company of HomeFed Bank, F.S.B., today reported higher fourth quarter net earnings of $33.1 million or $1.41 per fully diluted share, up 2.8 percent from net earnings of $32.2 million or $1.38 per fully diluted share for the same quarter in 1988.

Net earnings for the year were the highest ever for the company, at $115.7 million or $4.93 per fully diluted share, compared with 1988 net earnings of $111.3 million or $4.81 per fully diluted share.

Income from real estate operations for the fourth quarter was $23.8 million, up 64 percent from the $14.5 million posted in the fourth quarter of 1988. For the full year, income from real estate operations was a record $80.2 million, up 82 percent from the $44.1 million reported last year. The company's real estate development business sold more than 2,100 homes and lots in 1989, compared with 1,862 in 1988.

Also up were revenues from service charges, fees and other operating income, which increased 33 percent over the fourth quarter of 1988 and 43 percent for the year. The bank's trust and insurance businesses, as well as fees from loan servicing and shared automatic teller networks, such as STAR and Plus, were primary contributors to the 1989 increase, Adelizzi said.

During the fourth quarter, the bank significantly reduced its level of non-performing assets from $591.6 million at the end of the third quarter to $462.5 million at the end of the year.

The 22 percent drop brings the company's ratio of gross non-performing assets to total assets to 2.60 percent, down from 3.30 percent at Sept. 30 1989. After applying loss allowances, the year-end ratio stood at 1.81 percent of total assets, compared to 2.85 at Sept. 30, 1989.

Net interest income for the quarter decreased $860,000, compared with the fourth quarter of 1988, but increased $6.8 million, compared with the third quarter of 1989. For the year, net interest income rose $3.7 million over 1988. The weighted average interest rate spread at Dec. 31, 1989 was 2.84 percent, compared with 2.67 percent at Sept. 30, 1989 and 2.71 percent at Dec. 31, 1988.

During the quarter, the bank recorded a $115 million provision for losses, bringing new provisions for the year to $158 million. At Dec. 31, 1989, the company's level of loss allowances stood at $165.2 million, a 53 percent increase over the $108 million at Dec. 31, 1988. Of the $165.2 million, $138.8 million were general loss allowances.

PLEASANTVILLE, N.Y. (JAN. 31) PR NEWSWIRE - The Reader's Digest Association, Inc. today announced that it had filed an amended registration statement and an updated preliminary prospectus with the Securities and Exchange Commission (SEC) for an initial public offering of 25 million shares of Class A nonvoting common stock, which represents 21.2 percent of the total common stock outstanding.

The company filed its original registration statement on Dec. 19, 1989. The new document contains financial statements for the six-month period ended Dec. 31, 1989, and updates other information in the preliminary prospectus.

Reader's Digest and company employees who own nonvoting stock will not sell shares in the initial public offering nor will they receive any proceeds from the sale.

Those planning to sell stock are the DeWitt Wallace-Reader's Digest Fund and the Lila Wallace-Reader's Digest Fund, two foundations established by the late founders of Reader's Digest; Community Funds, Inc.; and seven independent foundations established in the early 1980s by the Wallace-Reader's Digest Funds to support key charities favored by the Wallaces during their lifetimes: Colonial Williamsburg, Lincoln Center, Macalester College, Memorial Sloan-Kettering Cancer Center, The Metropolitan Museum of Art, The New York Zoological Society, and Open Space Institute and Scenic Hudson.

All voting stock of Reader's Digest is held by the two Wallace- Reader's Digest Funds and a trust established under the will of Mrs. Wallace, and they do not intend to sell any of the voting stock.

An amended preliminary prospectus relating to the securities may be obtained from the U.S. offices of either Goldman, Sachs & Co., 85 Broad St., New York, N.Y. 10004 or Lazard Freres & Co., One Rockefeller Plaza, New York, N.Y. 10020.

Reader's Digest is a global publisher of magazines, books, music and other products, and a direct-mail marketer.

The amended registration statement relating to these securities has been filed with the Securities and Exchange Commission, but has not yet become effective. These securities may not be sold nor may orders to buy be accepted prior to the time the registration statement becomes effective. This news release does not constitute either an offer to sell or a solicitation of an offer to buy, nor shall there be any sale of these

securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

ENGLEWOOD, CO (JAN. 31) PR NEWSWIRE - Big O Tires,, Inc. (NASDAQ: BIGO) today reported that Ronald H. Lautzenheiser has joined the company as vice president - marketing.

Lautzenheiser has over 25 years of sales and marketing experience in the tire industry, including 12 years with the General Tire and Rubber Company. His most recent position with that company was vice president - marketing where his responsibilities included product planning, product service, telemarketing, advertising and marketing research and planning.

Steven P. Cloward, president and chief executive officer of Big O Tires said, "We are indeed fortunate to have Mr. Lautzenheiser join our company. I am confident he will make a valuable contribution and a positive impact on our marketing efforts and programs for the decade of the '90s. He brings many years of experience with major tire companies and in particular with General Tire, which has an 11.4 percent equity interest in Big O Tires. In addition, we have a 15 year supply agreement with General Tires under which we are assured a consistent supply of both private label and General brand tires which we are actively marketing and promoting."

Lautzenheiser is a graduate of Youngstown State University with a BS/BA degree and holds an MBA degree from Kent State University.

Big O Tires, Inc. distributes tires and automotive accessories and provides undercar service through more than 325 retail stores in 15

western and mid-western states.

PHILADELPHIA (JAN. 31) PR NEWSWIRE - At noon on Thursday, Feb. 1, 1610 Chestnut St. will brim with vibrant activity as Wallachs, a 102- year-old premier clothing chain for executive men and women, officially opens in Philadelphia.

John Eyler, chairman and chief executive officer of Hartmarx Specialty Stores Inc., a division of the Hartmarx Corp. which owns and operates Wallachs, will be on hand.

Nationally registered as an historic landmark, the building has undergone a multi million dollar facelift, creating 22,000 square feet of prime shopping space for its distinctive clientele.

The importance of this illustrious occasion for the future of the Chestnut Street corridor will be underscored at the ceremony. And representatives from After Six Formal Wear and Pincus Brothers Maxwell will be present, signifying the potentially upsweeping effect the new store may have upon these two Philadelphia-based manufacturers, whose lines are carried by Wallachs.

Concerto Soloists Chamber Orchestra of Philadelphia will grace the unveiling of this impressive upscale establishment between noon and 2 p.m. as live mannequins display samples of Wallachs' clothing lines.

Designed to maintain the integrity of the true haberdashery of old, the store will feature marble walkways, walnut panelled walls, leather furniture, oriental rugs, antiques and natural wood floors. The main level showcases men's furnishings (including footwear) and sportswear. The lower level is devoted to men's clothing. The atrium area of the store focuses on women's apparel.

Among its exceptional services, the store will feature monthly women's fashion shows, custom tailored shirts and suits, expert alterations and free delivery in Center City.

Labels to be carried for men are those manufactured by Hartmarx, including Hart Schaffner & Marx, Hickey Freeman, Christian Dior and Austin Reed of Regent Street. The store will also carry clothing from Burberrys, Aquascutum, After Six Formal Wear, and Pincus Brothers Maxwell. Suits

range in price from $365 to $895. A full range of furnishings including Troy Guild and Hathaway dress shirts and Robert Talbott neckwear, footwear from Salvatore Ferragamo, Johnston & Murphy and Allen Edmonds, and casual sportswear will also be carried.

Clothing for the professional woman will be emphasized as well; lines for women include Austin Reed of Regent Street, Corporate Woman, Eleanor P. Brenner and Ellen Tracy. Women's suits range from $265 to $465.

With its Philadelphia debut, the dynamic Wallachs chain numbers 34 locations, including a new site in Cherry Hill, N.J. Wallachs has invested $4.2 million in this market.

JACKSONVILLE, FL (JAN. 31) PR NEWSWIRE - Dave Barnett, head of Barnett's consumer credit area since 1981 announced today a decision to take an early retirement. Buck Harnage, the company's Northern Region Bank Group Executive, will assume responsibilities for the funciton and will work with Barnett in the transition for the remainder of 1990, according to Albert Ernest, president and chief operating officer.

"We are proud of Dave's accomplishments over a 33-year career and are proud of his reputation as one of the finest consumer credit adiminstrators in the country," Ernest said.

In a related move, Ernest announced that Richard Jordan, president and chief executive officer of Barnett Bank of Pinellas County since 1985, will assume Harnage's position as Northern Region Bank Group Executive.

Roland Kennedy, president and chief operating officer of Barnett Bank of Jacksonville, N.A., will replace Jordan in Pinellas. Hugh Jones, chairman and chief executive officer of the Jacksonville bank, will assume the title of president.

-- Harnage joined Barnett in 1970, and served as president of Barnett Bank of Pasco County from 1985 until last year, when he was named Northern Region Bank executive.

-- Jordan is a 30-year banking veteran. He began his career with the company with Barnett Bank of Pasco County in 1979.

-- Kennedy joined Barnett in 1946. He has served in his present position with Barnett Bank of Jacksonville, N.A. for the past five years.

Barnett (NYSE: BBI) is a $29-billion-asset, two-state banking organization. It is the leading financial institution in Florida and the eighth-largest in Georgia.

#90031p0116 01/31/1990 ~PR Newswire

VALLEY FORGE, PA (JAN. 31) PR NEWSWIRE - Alco Standard Corp. (NYSE: ASN) reported today that operating revenues for its first quarter ended Dec. 31, 1989, increased 5.9 percent for the quarter from $983,793,000 to $1,041,974,000 and operating income rose 19.7 percent from $38,594,000 to $46,197,000.

Because of a sharp increase in the company's effective income tax rate, earnings per share from continuing operations of $.45 in the first quarter were unchanged from the same period last year.

Commenting on the company's performance for the first quarter and the outlook for fiscal 1990, Ray B. Mundt, chairman and chief executive officer, noted, "We are pleased with the operating performance of each of our operating groups. First quarter results reflect solid earnings growth in Paper Corporation of America, Alco Office Products, Alco Food Systems and The Triumph Group.

"In Paper Corporation of America, the largest distributor and converter of paper and related products in the United States, revenues increased 2.9 percent from $765 million to $787 million and operating income rose 8.1 percent from $26.9 million to $29.1 million. This growth in operating income is particularly significant because the first quarter of fiscal 1989 was an exceptional quarter for PCA when operating income advanced 18.4 percent over the prior year's first quarter.

"Revenues for Alco Office Products increased 36.7 percent from $120 million to $163 million and operating income advanced 26.3 percent from $8.5 million to $10.7 million. During the first quarter of fiscal 1990 Alco Office Products, the largest network of independent copier and office equipment dealers in North America, continued its aggressive acquisition program by adding four companies to its nationwide network.

Alco Standard Corp., headquartered in Valley Forge, is a publicly held company specializing in high growth, service-intensive industries. For its fiscal year ended Sept. 30, 1989, revenues were $4.1 billion.

#90031p0122 01/31/1990 ~PR Newswire
SALT LAKE CITY (JAN. 31) PR NEWSWIRE - Northwest Pipeline Corporation has announced an open season during which customers can state their needs for additional firm transportation service.

Based on those requests, the company will seek regulatory approval of a system expansion.

Tim Hausler, vice president of marketing and customer service, said Northwest has sent letters to current and potential natural gas shippers asking them to identify their needs for additional firm transportation service.

"We are offering this proposal because of the large number of requests we have received in the past and a continuing expression of interest in expansion of our system," Hausler said. "We have received requests that greatly exceed our current system capacity of 2 TBtu (trillion British thermal units) per day. However, some of these requests may contain duplications. We're asking our customers to identify additional capacity they need so that we can assure any expansion properly meets the needs of the market," he said.

Hausler said the open season for nominations extends until March 1. The letters also ask customers to identify any excess capacity they may have now under existing firm agreements with Northwest in an effort to avoid any unnecessary addition of facilities as part of the process. Also, they have been asked if they have any additional needs for gas storage on Northwest's system.

All service under an expansion would be on a firm transportation basis for

a minimum term of 10 years. Following execution of firm agreements with participating customers, Northwest will file an application with the Federal Energy Regulatory commission (FERC) under Section 7(c) of the Natural Gas Act for construction and operation of the required new facilities on a rolled-in basis with the company's existing mainline facilities.

"Assuming that the level of service requested justifies an expansion, Northwest will provide shippers with information on the potential impact on rates and firm transportation agreements for their execution," he said.

The pipeline's request for FERC approval will be based on volumes indicated by those agreements. Allowing for preliminary engineering work and preparation of the filing, Northwest expects to submit an expansion proposal to FERC in early summer.

Northwest Pipeline Corporation is one of the Williams Companies, Inc., (NYSE: WMB) a Tulsa, Oklahoma-based corporation that operates a nationwide digital telecommunications network and more than 25,000 miles of pipelines which transport natural gas and petroleum products.

#90031p0125 01/31/1990 ~PR Newswire

BALTIMORE (JAN. 31) PR NEWSWIRE - Nova Pharmaceutical Corporation (NASDAQ: NOVX) today announced that it has submitted an application requesting Food and Drug Administration (FDA) approval to conduct clinical trials for the company's bronchial asthma treatment. The treatment, an inhalant form of the bradykinin antagonist NPC 567, is designed to counteract the inflammation associated with asthma. Asthma is a chronic inflammatory disease that affects about 5 percent of the U.S. population.

NPC 567 blocks the inflammatory effects of bradykinin, a substance produced naturally in the body. Bradykinin is thought to have an important role in causing the inflammation that obstructs the airways of asthmatic patients. Bradykinin may also contribute to the airway hypersensitivity that follows an asthmatic attack.

Until recently, asthma therapy has been directed towards rapid symptomatic relief using bronchodilators, drugs that relax conducting airways. Current research is focusing increasingly on treating airway inflammation, the underlying cause of the disease.

Nova's preclinical research has indicated that NPC 567 reduces inflammation and decreases late-phase airway obstruction and

hypersensitivity. By reducing inflammation and hypersensitivity, the frequency and severity of asthmatic attacks may be decreased.

Nova has submitted an Investigational New Drug (IND) application to the FDA. Upon acceptance of the IND, Nova will begin Phase I clinical testing.

Nova Pharmaceutical Corporation, based in Baltimore, is engaged in the research and development of new drugs and drug delivery systems, with a primary focus on central nervous system disorders and pain and inflammation.

ST. LOUIS, MO (JAN. 31) PR NEWSWIRE - LaBarge, Inc. (AMEX: LB) today announced results for its fiscal 1990 second quarter ended Dec. 31, 1989.

Net sales for the quarter were $18,356,000, up 10.4 percent from $16,625,000, recorded during the second quarter of fiscal 1989. For the six months ended Dec. 31, 1989, net sales were $33,832,000 compared to $33,180,000 reported for the comparable period of fiscal 1989.

Operating profit for the quarter was $1,550,000, up 54 percent from $1,006,000 recorded for the second quarter of fiscal 1989. For the six months ended Dec. 31, 1989, operating profit was $2,735,000, up 48 percent from $1,845,000 reported for the same period last year.

Net earnings for the quarter were $458,000 compared to net earnings of $995,000 recorded for the second quarter of fiscal 1989. For the six months ended Dec. 31, 1989, net earnings were $677,000 compared to net earnings of $1,547,000 recorded for the first six months of fiscal 1989. Net earnings for the first half of fiscal 1989 included two one-time gains from previously divested businesses which totaled $609,000. No such gains occurred in the first six months of fiscal 1990.

After giving effect to preferred stock dividends, earnings per common share for the fiscal 1990 periods were 2 cents for the second quarter and 2 cents for the six months. This compares to earnings per common share of 4 cents for the fiscal 1989 second quarter and 5 cents for the first six months of fiscal 1989. The 1989 earnings per common share were enhanced by the one-time gains recorded during the first half of fiscal 1989.

WILMINGTON, DE (JAN. 31) PR NEWSWIRE - Du Pont (NYSE: DD) has pledged up to $750,000 to help establish the Wilmington Partnership Corp. (WPC), a cornerstone of Mayor Daniel S. Frawley's plan to revitalize city neighborhoods.

"Du Pont believes there is a need for affordable housing and is committed to working with the mayor to help solve this critical problem," said Peter C. Morrow, manager of corporate contributions.

The WPC is a non-profit coalition charged with overseeing the implementation of a three-year, $7 million revitalization program that will complement the city's efforts to create affordable housing and job opportunities. The venture will help replace the $38 million in federal housing funds the city has lost.

WPC hopes to create 500 permanent jobs and provide affordable housing for 350 families over the next three years.

In the past three years, Du Pont also has given $75,000 to the Interfaith Housing Task Force and invested $800,000 in two housing projects, Overlook Colony in Claymont and Arbor Place adjacent to Overview Gardens and Dunleith.

HOUSTON (JAN. 31) PR NEWSWIRE - Garnet Resources Corporation (NASDAQ: GARN) today announced initial test results from a new oil discovery in Colombia.

Garnet said that its Linda No. 1 exploratory well flowed at a combined rate of 570 barrels of 28.3 degrees gravity oil per day from drill stem tests of three zones on a 3/8-inch choke. The Villeta "U", Villeta "T" and Caballos sands were each produced on 36-hour tests in the gross interval between 8,747 feet and 9,095 feet.

The discovery is located on a separate geologic prospect approximately 2.5 miles southeast of the Toroyaco No. 1 well, the company's oil discovery announced in October 1989. A previously scheduled confirmation well to the Toroyaco discovery will be commenced immediately upon completion of the Linda No. 1.

Based on the success of the initial drilling program, an expanded seismic program is also planned to further delineate additional prospects on the

344,000-acre block. The Garnet wells are located on its Risk Sharing Contract in which the company will earn a 52 percent interest after fulfillment of its drilling obligations.

Garnet is engaged primarily in international oil and gas exploration activities.

PHILADELPHIA (JAN. 31) PR NEWSWIRE - Responding to an emergency request from New York Telephone on Friday, Jan. 26, 1990, International Mobile Machine Corp. (NASDAQ: IMMC) sent an Ultraphone 200 transportable telephone system within hours to Cove Neck, L.I., N.Y., to provide emergency telephone service to workers at the site of the crash of Avianca Flight 052.

This is the first time that digital cellular technology was utilized by a major telephone company in the continental United States at a disaster site.

The IMM system, capable of providing over 4,000 square miles of coverage compared to less than 50 square miles with a single analog cell, is now transmitting and receiving voice and fax information from the Long Island crash site.

The transportable system, containing a four channel network stations and 25 subscriber units, was shipped via truck to New York Telephone's central office in Oyster Bay, L.I., N.Y., less than two miles from the disaster site. Representatives of New York Telephone and a team of IMM technicians assembled the network station in the phone company's Oyster Bay central office and, within three hours after arrival, the network station was radiating a radio signal toward the crash site. Once this was successfully completed, the emergency team proceeded to the site where they installed subscriber units which provided additional telephone lines to emergency workers from the FAA, the Nassau County Police Department and the news media. On Sunday, the system was used to transmit hard data via fax for a national news television network, the first time that a wireless digital radiotelephone system was used for this purpose.

The Ultraphone 200 transportable telephone system was first used by the federal government following Hurricane Hugo at the U.S. Naval Base at Roosevelt Roads in Puerto Rico, and gain in Panama to insure continuity of communications during Operation Just Cause.

IMM is a world leader in wireless digital access technologies. The company is engaged primarily in the production, sale and installation of Ultraphone, a digital radiotelephone system.

SEATTLE (JAN. 31) PR NEWSWIRE - Airborne Freight Corp. (NYSE: ABF), which operates under the trade name Airborne Express, today reported a 291 percent increase in fourth-quarter earnings, and said that its financial performance in 1989 was the best ever in the company's 40-year history.

Net earnings for the fourth quarter were $6,757,000, or 93 cents per share compared to $1,728,000, or 25 cents per share, for the same quarter last year. Total revenues for the fourth quarter increased 25 percent to $262,161,000, compared to $209,868,000, in the fourth quarter of 1988.

Year-end earnings were up 171 percent to $19,083,000, or $2.67 per share, compared to $7,036,000, or $1.01 per share, for 1988. Revenues for 1989 were $949,896,000, a 24 percent increase over last year.

Earnings from operations increased 151 percent from $6,278,000, for the fourth quarter in 1988, to $15,779,000, for the same quarter this year. For the full year, earnings from operations were $49,512,000, up 121 percent from $22,371,000 for 1988.

Fully diluted earnings were 86 cents per share for the fourth quarter and $2.48 per share for the year. For the 1988 results, fully diluted earnings per share were the same as primary earnings per share.

In 1989, domestic shipments were up 40 percent to 64,134,000, while international shipments rose 29 percent to 1,964,000. For the fourth quarter, domestic shipments handled were up 40 percent to 17,881,000, while international shipments were 526,000, a 33 percent increase over the same quarter in 1988. Total shipments in 1989 increased 39.4 percent to 66,098,000 and total shipments in the fourth quarter were 18,407,000, a 40 percent increase over the prior year's quarter.

Airborne also closed out 1989 with activity that impacted the balance sheet. On Dec. 29, 1989, a sale-leaseback for six aircraft was completed that netted $55 million in proceeds. In addition, in December 1989, the company issued a redemption notice to the holders of the 7-1/2 percent convertible subordinated debentures which were outstanding in the amount of $24,915,000. This resulted in the holders exercising their option to

exchange the debentures for 901,000 shares of the company's common stock.

Airborne Express is the nation's fastest-growing air express company. Airborne primarily services corporate America through the delivery of time-sensitive documents, letters, small packages and heavy freight to more than 45,000 communities and 183 countries worldwide.

MINNETONKA, MN (JAN. 31) PR NEWSWIRE - LecTec Corporation (NASDAQ: LECT) today announced its second quarter revenues and earnings.

The figures reflect the effects of LecTec's acquisition of New Dimensions in Medicine (NDM) from Baxter Healthcare. The financial information for 1989 includes two months of NDM financial results in addition to LecTec's financial results whereas, the 1988 financial information is for LecTec alone.

The increases for total revenues and operating income for the three- and six-month periods ended Dec. 31, 1989, as compared to the previous year, were due primarily to the inclusion of NDM results.

Net income and earnings per share for those periods in 1989 both declined as compared to 1988 due to the costs of the acquisition, including interest expense and goodwill amortization, as well as investments in the medical tape program incurred during the periods.

LecTec/NDM President George B. Ingebrand commented: "The results for NDM are on target. The coordination between the two companies has been exceptional. We expect to see a strong sales boost with the introduction of the snapless diagnostic electrode to Baxter Healthcare this spring.

We are also excited by the coming release of a unique wound dressing that will put our company into a new multi-million dollar medical market."

It is expected that a LecTec stockholders meeting to consider the proposed merger will be held early during the fourth quarter of the fiscal year.

LecTec/NDM is a medical products development, manufacturing, and marketing company. Products include monitoring and diagnostic electrodes, conductive membranes, medical tapes, and transdermal (through the skin) drug delivery systems. LecTec/NDM is headquartered in Minnetonka, Minn., with facilities in Dayton, Ohio, and Puerto Rico. The company is traded on NASDAQ under the symbol LECT.

PHOENIX, AZ (JAN. 31) PR NEWSWIRE - StatesWest Airlines Inc. (NASDAQ: SWAL) today announced that it has entered into a letter of intent to form a new airline joint venture to be headquartered in Bangkok, Thailand, within the next 30-60 days. The joint venture intends to provide both scheduled and charter service in Thailand and neighboring Pacific Rim countries, subject to appropriate governmental approval and completion of

the definitive joint venture agreement.

Joint venture partners involved in this project are: Pongsak Sampawakoop, Bangkok, Thailand, managing director of Business International Co., one of the largest diversified real estate development and management companies in Thailand; Thai Flying Service Co. Ltd., which holds one of two private aviation licenses in Thailand, represented by Thidej Maithai, its managing director; Asia Voyages Group of Companies, a French-based international tour operator specializing in destinations in Southeast Asia, represented by its managing director, Laurent Desmazieres; and Norman Birkenstock, chairman and president of Pacific Gate Corp., San Francisco, which is an international consulting firm specializing in the Pacific Rim. Pacific Gate's clients have included such firms as Northrop Corp. and Pan Am World Services, a subsidiary of Pan American Airlines.

The Thai Flying Service has operated charter passenger and air cargo, as well as technical services-aerial photography and surveys, cloud seeding, etc., in Thailand since 1978. Principals of the company include members of the family owning Boon-Rawd Brewery, which makes the world-renowned Singha Beer. It has provided air service to various Thai government projects, foreign governments and multinational corporations.

Upon formation, the joint venture partners as a group will be granted a two-year option to purchase up to 10 percent of StatesWest's common stock from the company at a price of $2.50 (U.S.) per share. The group has expressed an interest in acquiring up to 5 percent of StatesWest stock in the open market and has agreed its purchase would not exceed 15 percent of the airline's outstanding shares.

The joint venture will be granted the exclusive right throughout the Pacific Rim to market StatesWest's special package tours to the gaming and resort market of Laughlin, Nev., and future flights to Arizona's Grand Canyon.

StatesWest is one of the largest regional air carriers in the country not owned or totally affiliated with a major carriers. The company owns 7.34 percent of Mesa Airlines Inc., a regional airline carrier headquartered in New Mexico.

CONTACT: Rudy R. Miller or Mary A. Nance, 602-225-0504, both of the Miller Group for StatesWest.

TAMPA, FL (JAN. 31) PR NEWSWIRE - GTE Florida, Inc. announced today it is moving forward with both a one-time refund and a permanent rate reduction. The Florida Public Service Commission (FPSC) ordered a $21.4 million

refund to resolve lower federal income taxes paid by the company for tax year 1988 and a $21.4 million permanent reduction beginning early in 1990 to resolve future tax savings.

The one-time refund will apply to customers of record as of Dec. 31, 1988 and will appear as a credit against the basic monthly service charge on bills arriving after Feb. 16. For both residential and business customers the credit will total approximately 80 percent of one month's basic monthly service charge.

The permanent rate reduction will appear on bills arriving after Feb. 22. As ordered by the FPSC, GTE will reduce charges for touch tone service, eliminate "zone charges" for customers located far away fron the nearest switching center, reduce access charges paid by long distance companies and, by the end of 1990 eliminate two-party service.

"We took a series of steps to return federal tax savings to our customers prior to the commission's orders," said Bruce Holmberg, vice president-regulatory and governmental affairs. "The refund completes the process for 1988 and the 1990 reduction will resolve future tax savings."

#90031p0142 01/31/1990 ~PR Newswire

NEW YORK (JAN. 31) PR NEWSWIRE - Alliance Capital Management L.P. (NYSE: AC) today announced a distribution of $0.48 per unit for the fourth quarter resulting in total distributions for 1989 of $1.60 per unit.

The $.08 increase from the third quarter distribution reflects the excellent results of the partnership over the entire year and should be regarded as a year-end "extra" distribution. The higher fourth quarter distribution is not necessarily indicative of future quarterly distributions. The partnership distributed $0.37 per unit for the fourth quarter of 1988.

The distribution is payable on Feb. 16, 1990, to holders of units at the close of business on Feb. 9.

Revenues increased from $34,463,000 to $43,238,000 for the quarters ended Dec. 31, 1988 and 1989, respectively, and from $133,610,000 to $156,702,000 for the years ended Dec. 31, 1988 and 1989, respectively. Assets under management as of Dec. 31, 1989, were approximately $43.8 billion, approximately $0.4 billion less than Sept. 30, 1989.

The partnership is required to distribute its available cash flow, which was $13,576,000, or $0.48 per unit, for the quarter ended Dec. 31, 1989. Because expenses deducted in determining net income include non- cash items and certain employee compensation and benefits expenses that are funded by the partnership's general partner through capital contributions, available cash flow was significantly in excess of net income per unit.

Net income for the fourth quarter was $8,049,000, or $0.28 per unit, and $25,404,000, or $0.90 per unit, for the year ended Dec. 31, 1989. Net income was $4,302,000, or $0.15 per unit, for the fourth quarter of 1988 and, on a pro forma basis, $14,269,000, or $0.50 per unit for the year ended Dec. 31, 1988.

Alliance Capital Management L.P. is a leading international investment adviser, providing investment management services to institutions, primarily pension funds and endowments, and to individual investors through a broad line of mutual funds and cash management products. The partnership's general partner and majority unitholder is a wholly owned subsidiary of the Equitable Life Assurance Society of the United States.

NEW YORK (JAN. 31) PR NEWSWIRE - Simon J. Critchell has been named president and CEO of Cartier, Inc., it was announced today by Ralph Destino, chairman of the firm.

Critchell, who formerly served as senior vice president and general manager of the Lancome division of Cosmair, Inc., will assume his new post on February 19.

Critchell, 43, will be responsible for Cartier's full range of corporate activities in the United States, including the company's chain of retail stores as well as its wholesale divisions Les Must de Cartier and Parfums Cartier.

In accepting the position, Critchell said that "while I loved my many years in the cosmetics business, I very much look forward to the honor and the challenge of directing the continuing growth of the great House of Cartier."

Cartier, Inc. is part of the worldwide Cartier International group, based in Paris, which last year announced a sales volume in excess of one billion dollars. The group markets a broad range of luxury products including jewelry, watches, pens, lighters, leather goods, fragrances,

eyewear and table top items through a global network of 136 Cartier stores and 7,000 authorized dealers assorted through 123 countries.

#90031p0146 01/31/1990 ~PR Newswire

BRIDGEPORT, CT (JAN. 31) PR NEWSWIRE - The Hydraulic Company (NYSE: THC) today reported fourth-quarter net income of $4,110,000, a 40 percent increase from the $2,942,000 earned in the fourth quarter of 1988. Earnings per share in the 1989 fourth quarter were $.86 versus $.63 for the same period of 1988.

For the year 1989, THC reported net income of $9,961,000, up 3 percent from $9,653,000 in 1988. Earnings per share for 1989 were $2.10 versus $2.04 in 1988. The weighted average number of shares outstanding in 1989 and 1988 was 4,740,140 and 4,738,826, respectively.

Jack E. McGregor, THC president and chief executive officer, said THC's fourth-quarter performance benefited from the December sale of a surplus 382-acre parcel of land in Trumbull, Conn., by the company's principal subsidiary, Bridgeport Hydraulic Company (BHC). BHC and its Stamford Water Company subsidiary serve a population of some 460,000 in 18 communities in Fairfield, New Haven and Litchfield counties.

Net income attributable to that sale approximated $.98 per share, McGregor said. This gain was offset by charges of $.43 per share related primarily to certain of THC's nonregulated investments and to legal expenses associated with an intended appeal of the Connecticut Department of Public Utility Control's (DPUC's) decision on the sale of the Trumbull land as it relates to the general principle of sharing the net gains on sales of utility land with utility customers.

The THC chief executive noted that, excluding the Trumbull land sale, earnings from operations of the company's water utility segment declined substantially.

Utility earnings were depressed, McGregor said, for several reasons: lower

revenues resulting from abnormal rainfall during the warm-weather months, an experience shared by other water suppliers in the Eastern United States; continuing declines in water use by manufacturers in the Bridgeport and Stamford areas served by the company; and a DPUC decision effective June 1, 1989 allowing BHC a rate increase of only 7.7 percent, less than half of what was requested. According to McGregor, the company currently is studying the need for further rate relief.

Revenues for the 1989 and 1988 fourth quarters were $26,915,000 and $16,951,000, respectively, while consolidated 1989 operating revenues were $78,289,000, compared with $67,577,000 in 1988.

THC is a diversified water management corporation whose core business is public water supply. THC also is engaged in nonutility enterprises through its Hydrocorp, Inc. subsidiary, which is involved in diversified water management, environmental and utility services ventures; through its Timco, Inc. subsidiary, which has forest products and electricity cogeneration facilities in New Hampshire; and through its Main Street South Corporation real estate subsidiary.

PITTSBURGH (JAN. 31) PR NEWSWIRE - As the largest environmental company headquartered in Pennsylvania, Chambers Development Co. Inc. (AMEX: CDVB) today said it strongly supports a House-Senate conference committee report to amend the Motor Vehicle Code prohibiting truckers from carrying food in the same vehicles used to haul garbage.

The measure would make Pennsylvania the first state in the nation to ban 'backhauling.'

"We whole-heartedly support the conference report to ban improper backhauling," said John G. Rangos Jr., executive vice president of operations for Chambers. "We think the process of improper backhauling is a legitimate cause of public concern and we do not want our industry associated with it at all.

"We support this measure that insures the integrity of our industry and outlaws the backhauling of food, medical supplies or any product in tractor-trailers used to haul refuse.

"This is a very important piece of legislation and we want the public and our public officials to be aware of our stance," Rangos said.

Chambers Development Co., headquartered in Pittsburgh, is a leading environmental firm offering services in collection, hauling, disposal, recycling and landfill development. The company also provides security through its wholly owned subsidiary, Security Bureau Inc.

#90031p0149 01/31/1990 ~PR Newswire

MINNEAPOLIS (JAN. 31) PR NEWSWIRE - John G. Grundhofer has been named chairman, president, chief executive officer and a director of First Bank System, Inc. (NYSE: FBS).

Grundhofer joins First Bank System from Wells Fargo Bank, headquartered in San Francisco, where he was vice chairman and senior executive officer for southern California.

Darrell G. Knudson will remain as First Bank System vice chairman and director. During the search process, Knudson also served as acting chief executive officer, replacing D.H. Ankeny, Jr., who resigned as chairman and chief executive officer in September 1989.

Grundhofer, 51, joined Wells Fargo in 1978. His range of banking experience includes retail, corporate and middle markets, loan adjustment and the wholesale services offered by the Information Services Division.

Grundhofer is a director of six of Wells Fargo's subsidiary companies, including being chairman of the board of Wells Fargo Capital Markets.

According to Richard Schall, acting chairman of the board of First Bank System, who headed the search committee, "Grundhofer will bring strong outside leadership to First Bank System. He was selected after a careful and thorough review of industry executives who could fill this position."

Schall said the board was especially impressed with the breadth of Grundhofer's experience spanning all aspects of retail and commercial banking with an emphasis on middle market banking. "He has broad management experience in a major regional banking environment covering both urban and rural communities. This depth of experience combined with his management ability made Jack the right choice to lead First Bank System into the 1990s.

"At the same time, we were fortunate to have had the leadership of Darrell Knudson these past several months," Schall said. "Darrell took over at a critical period and he's made some tough decisions in a difficult environment. First Bank is better positioned as a result."

Grundhofer began is banking career in 1960 as a credit analyst with Union Bank, Los Angeles. He became a vice president in 1970 and a regional vice president in 1972.

In 1978 he joined Wells Fargo as executive vice president in charge of the Southern California Area Retail Banking Group. He was named executive vice president and group head of the Commercial Banking Group in 1980. In 1984 he was named senior executive officer with responsibility for increasing the bank's penetration in middle market lending in Southern California.

A native of California, Grundhofer has an M.B.A. in finance from the University of Southern California and a B.A. in economics from Loyola University, Los Angeles. Grundhofer and his wife, Beverly, will be relocating to Minneapolis from their home in Los Angeles.

Grundhofer has extensive involvement in professional, cultural and community organizations. He is a director of several non-profit organizations and foundations including the UCLA Graduate School of Business and a member of the Board of Regents of Loyola Marymount University of Los Angeles. He is a director of the Los Angeles Chamber of Commerce, trustee of the South Coast Repertory Theatre, and vice chairman of the Los Angeles Music Center Unified Fund Campaign. He also chairs the Southern California U.S. Olympic Committee.

Wells Fargo, a bank known for strong financial performance, currently ranks as the 11th largest bank holding company in the United States with assets of nearly $50 billion.

First Bank System is a regional bank holding company headquartered in the Upper Midwest with assets of $20.8 billion. The company provides complete financial services to individuals and institutions through 35 banks and trust companies with more than 150 offices located in Minnesota, Colorado, Montana, North Dakota, South Dakota, Washington and Wisconsin.

DANBURY, CT (JAN. 31) PR NEWSWIRE - Union Carbide Chemicals and Plastics Company Inc. (NYSE: UK) today announced plans to build and operate the first full-scale, multi-plastics recycling facility in the United States. The expandable 40 million pound-per-year plant is scheduled to begin operations in the first quarter of 1991, subject to state and local approvals. It will be located at Union Carbide's technical and manufacturing complex in Piscataway, N.J.

"The new Union Carbide Plastics Recycling Center is unique because it will process post-consumer plastic film and rigid plastic containers," Polyolefins Division Vice President Gordon D. Mounts said.

"The new facility offers an alternative to sending plastics to already overburdened landfills. It will play an important role in helping to develop solutions to the growing solid waste problem facing the Northeast. While pilot-scale facilities have been established to recycle plastic film, the size and sophistication of our recycle facility will make us a clear leader in large-scale recycling of plastic film generated by consumers and businesses."

The facility will accept a mix of post-consumer plastics including:

- Polyethylene wrap: trash, lawn, grocery, produce and merchandise bags and protective coverings, such as shrink and pallet wrap.

- Rigid polyethylene household and industrial containers, such as detergent, bleach and motor oil bottles, and plastic milk and juice bottles.

- PET (polyethylene terephthalate) soft drink and liquor bottles.

"Although we will draw primarily on municipalities, counties, brokers and businesses in the tri-state area (N.Y., N.J., Conn.) initially for our raw material wastes 'feed'," Recycle Business Manager E.T. (Ted) Clark said, "we are looking longer term to serving areas within a 500 mile radius of the center." This area, he said, encompasses nearly 40 percent of the U.S. population.

The facility will employ state-of-the-art technology to more effectively clean and separate useful plastics from other materials in the waste stream. The separated materials will be compounded with resins and other additives to improve the physical properties and lot- to-lot consistency of the final product, which will be sold in pellet form for use in a wide range of products.

Union Carbide is the nation's largest compounder of polyolefin-based products for end uses ranging from film and rigid packaging to highly sophisticated telecommunications and power distribution wire and cable insulation systems. Its Piscataway location was the site of the first commercial scale production of plastics in the U.S. more than 50 years ago.

GUILDERLAND, NY (JAN. 31) PR NEWSWIRE - Intermagnetics General Corporation-IGC (NASDAQ: INMA) today announced an agreement with Philips Medical Systems (PMS) to supply Magnetic Resonance Imaging (MRI) Magnets, the value of which is expected to exceed $25 million.

Deliveries are scheduled to be made over the balance of calendar year 1990 to the extent that volume shortfalls due to manufacturing start-up delays encountered can be made up.

In announcing the agreement, Carl H. Rosner, president, commented, "We are extremely pleased to receive this order, which culminates almost three years of a development program with PMS to produce an innovative new 0.5 T MRI magnet.

"The order reflects the high level of customer acceptance Philips has generated for their new Gyroscan T-5 medical diagnostic imaging system which incorporates the IGC designed MRI magnet. To meet this demand, and that of our other MRI magnet customers, we have initiated plans to expand manufacturing capacity."

"Rosner concluded by stating, "We are also very pleased that, in addition to the order being placed with IGC, Philips is also ordering MRI magnets from our 40 percent IGC owned European joint venture, Alsthom-Intermagnetics, SA., located in Belfort, France".

Philips Medical Systems, is a leading global supplier of medical diagnostic imaging and therapy equipment.

IGC is a leading manufacturer of superconducting wire and superconducting magnet systems, especially those used in Magnetic Resonance Imaging (MRI) medical diagnostic imaging systems. The company also produces cryogenic

equipment, permanent magnet systems and material separators.

NEW YORK (JAN. 31) PR NEWSWIRE - AT&T (NYSE: T) announced today that Metropolitan Life Insurance Company, one of the nation's largest insurers, has awarded it a five-year communications contract worth in excess of $132 million. The contract has a one-year renewal option.

Under the contract, AT&T will provide a nationwide custom voice and data service to handle all domestic and international traffic at MetLife's corporate headquarters in New York and at approximately 1,500 locations of MetLife and affiliated companies.

"The agreement will enable us to increase cost efficiency while maintaining the quality of service that our policyholders and customers have come to expect," said Daniel Cavanagh, MetLife senior vice president of information systems. "We believe AT&T is best qualified to meet our needs for superior network performance, reliability and leading-edge technology."

"We're very happy to be entering into this contract," said Lou Golm, AT&T vice president of business sales. "Based on MetLife's commitment to excellence, we will provide high levels of network service, performance and technical support, and we will dedicate all necessary resources to ensure that we live up to AT&T's high standards."

CALGARY, Alberta (JAN. 31) PR NEWSWIRE - Bow Valley Industries Ltd. (AMEX Montreal, Toronto: BVI) of Calgary announced today that the Brae Group has successfully tested exploration well 16/3a-11, located on a separate structure in the Brae area. The discovery is situated 165 miles northeast of Aberdeen, and eight miles north of the North Brae gas and condensate field.

Well 16/3a-11, drilled by semi-submersible drilling rig ''Western Pacesetter IV'', was spudded on Oct. 24, 1989. Only one production test was conducted resulting in a maximum flow rate of 2,016 barrels of 39 degree API gravity oil per day, through a 3/4 inch choke. The results of the test are encouraging and suggest additional potential for the acreage held in this area, and are currently being evaluated by Marathon and its Brae group partners.

Participants in the Brae Groups are: Marathon Oil U.K., Ltd. (38.0 percent) - operator; Britoil PLC (20.0 percent); Bow Valley Petroleum (U.K.) Ltd. (14.0 percent); Kerr McGee Oil (U.K.) PLC (8.0 percent); Gas Council (Exploration) Ltd. (7.7 percent); LL & E (U.K.) Inc. (6.3 percent); Sovereign Oil and Gas PLC (4.0 percent); and Norsk Hydro Oil and Gas Ltd. (2.0 percent).

BENSALEM, PA (JAN. 31) PR NEWSWIRE - Francis X. Selgrath, president and chief executive officer of Mustard Seed Inc., has recently announced the appointment of Cynthia A. Maruschak to the position of executive vice president of the Bensalem corporation.

In this capacity she will direct all operations of the drug and alcohol treatment provider. Selgrath stated, "Cindy's extensive clinical

background in the caring treatment of the chemically dependent greatly strengthens our commitment to a client-centered approach to treatment services."

Maruschak, who has 16 years experience in the treatment of the chemically dependent, served most recently as vice president clinical services for Mustard Seed. She was instrumental in developing an original program to insure the continuity of treatment services for chemically dependent patients of several HMO clients of Mustard Seed. She also oversaw the operation of the Detoxification Unit at Nazareth Hospital and their Out-Patient Services.

Beginning her career in the Williamsport, Pa., area as drug and alcohol treatment specialist, Maruschak holds a B.S. from Penn State and an M.H.S. from Lincoln University. She was director of clinical operations for a major rehabilitation program in central Pennsylvania where she was responsible for recruitment, program development and planning. Additionally, Maruschak will continue to be involved in providing direct clinical services.

Mustard Seed Inc. provides employee-assistance programs, educational and training programs on alcohol and drug dependency to organizations and industry. It also provides in-hospital detoxification and referral services.

Maruschak relocated to the Delaware Valley area four years ago and resides in Audubon, N.J.

TULSA, OK (JAN. 31) PR NEWSWIRE - MAPCO Inc. (NYSE: MDA) today reported net income for the quarter ended Dec. 31, 1989, of $30 million, or $.84 per share, based on an average of 35.7 million shares outstanding for the quarter. Net income for the 1988 fourth quarter was $29.9 million, or $.75 per share, based on an average of 39.9 million shares outstanding.

Net income for the year 1989 was $116.2 million, or $3.04 per share, based on an average of 38.2 million shares outstanding. Net income for 1988 was $117.1 million, or $2.94 per share, based on 39.9 million shares outstanding.

Operating profit for the 1989 fourth quarter and year was $67.2 million and $243.7 million, respectively, compared to 1988 operating profit of $55 million and $224.3 million, respectively.

Operating profit for the quarter included: Petroleum at $15.3 million, Transportation at $25.7 million, Coal at $13.2 million and Gas products at $13 million.

In December, MAPCO signed a new $400 million revolving credit agreement with a group of 10 banks.

MAPCO is a diverse energy company whose business is conducted by four operating subsidiaries: MAPCO coal produces and markets bituminous steam and metallurgical coal; MAPCO gas products produces and markets natural gas liquids and fertilizers; MAPCO petroleum operates refineries and retail marketing networks through the mid-south and Alaska systems; and MAPCO transportation operates natural gas liquids and ammonia pipelines, and fractionation and storage facilities.

DETROIT (JAN. 31) PR NEWSWIRE - Northwest Airlines will invest $422 million through 1995 to upgrade service and build customer preference, the airline's president announced today.

Fred Malek said the customer service initiatives are specific steps Northwest will take to become the airline of choice for travelers. Malek announced the initiatives this morning to Northwest's worldwide sales and marketing staff assembled in Detroit for an annual conference.

The customer preference initiatives, developed by an internal task force, target four areas: performance, cleanliness, hassle-free customer experience and employee attitude. They include additional staff, more in-flight amenities, new aircraft interiors, more spacious cabin seating, additional employee training programs, more automation of services and new methods to ensure a reliable flight schedule.

"Since joining Northwest, we have talked broadly of our goal to become the airline of preference," said Malek, who with Alfred Checchi, Gary Wilson and other investors purchased Northwest in August. "After six months of research involving consumers, employees and other key audiences, we now have a specific plan to reach that goal."

The initiatives focus on the delivery of consistently superior service. "We already run a very good technical airline," Malek said. "Now we need to concentrate on becoming an excellent service company."

Approved in the first phase of the program are $422 million in capital and operating expenditures from 1990 through 1995. Two other phases of the program now being developed could add another $127 million to the customer preference investment.

"We will continue to ask our employees and customers what they want and need from an airline. Based on their comments, we will revise our plan," Malek said.

Aside from money, the corporate commitment to excellence involves employees.

"This monetary commitment is an expression of how serious we are in taking Northwest to the top," Malek said. "Even more important is the commitment of 40,000 Northwest employees who want to reach the goal. They have told us very clearly it is a realistic goal, one they are dedicated to achieving."

Some facets, such as automated baggage tags, will be completed this year, he said. Other items, such as completely updating aircraft interiors, are longer-range projects.

COLUMBUS, OH (JAN. 31) PR NEWSWIRE - Richard D. Headley has been elected Chairman, President and Chief Executive Officer of Bank One, Akron, NA, it was announced by Donald L. McWhorter, Chairman of Banc One Ohio Corporation. The bank's board of directors has also elected George W. Aucott a Director of Bank One, Akron, effective immediately. Aucott is Chairman, President and Chief Executive Officer of Bridgestone/Firestone, Inc.

Bank One, Akron, which is headquartered in Akron, Ohio, had year-end assets of $1.36 billion and operates 37 banking locations in a 4-county region of northeastern Ohio. Bruce S. Bailey, who had been Chairman and Chief Executive Officer at Bank One, Akron, was elected Vice Chairman of Banc One Indiana Corporation earlier this month.

Since 1988, Headley, 41, has been Executive Vice President and member of the Management Committee of Banc One Wisconsin Corporation in Milwaukee. In the past two years, Headley's responsibilities included management of Marketing, Human Resources, Banc One Wisconsin Bankard Corporation, Banc One Wisconsin Insurance Services Inc., and as Northern Wisconsin Group Regional Executive, the operations of seven affiliate banks of Banc One Wisconsin Corporation. Headley started his banking career at Bank One, Columbus in 1975. In 1979, he was appointed Assistant Vice President and manager of Cash Management and Public Funds and in 1981 was promoted to Vice President of manager of the branch system. In 1984, he was promoted to Senior Vice President of Manager of Retail Banking at Bank One, Columbus which included the branch system, consumer and small business lending, and deposit operations.

Headley holds a bachelor of science degree from The Ohio State Unviersity and an M.B.A. degree from Texas Christian University. He has been active in community affairs, including United Way and Boy Scouts of America, and served as an adjunct professor of economics at Franklin University in Columbus, Ohio. He is now a member of the Executive Committee, Branch Administration Division of the American Bankers Association. He is a graduate of the ABA Business of Banking School, the National Commercial

Lending School and the IBM Data Processing Executive Institute. Headley, his wife, Diane, and one son will be relocating in the Akron, Ohio area in the near future.

George Aucott started his career with Firestone in 1956 and after numerous management responsibilities was named president of Firestone's tire operations in June 1988 and also named to the new Firestone board of directors following the purchase of the company by Bridgestone Corporation. He was appointed president and chief operating officer in July 1988 and named chief executive officer and president in August 1989. Aucott became chairman of the corporation on Jan. 1, 1990.

Aucott holds a bachelor of science degree from Ursinus College in Collegeville, Pennsylvania. In 1989, he was awarded an Honorary Doctor of Laws degree from the Ursinus College. He is also a graduate of the Program for Management Development at Harvard University. Aucott is married and has three children.

#90031p0179 01/31/1990 ~PR Newswire

DALLAS (JAN. 31) PR NEWSWIRE - Southwest Airlines' (NYSE: LUV) net income for the fourth quarter ended Dec. 31, 1989, was $8.1 million, down 49.5 percent from the fourth quarter 1988 earnings of $16.1 million, and represents earnings per share of $.27 compared to $.51 reported in the fourth quarter of 1988, it was announced today.

The decrease in net income is principally attributable to a 37 percent increase in jet fuel cost per gallon in fourth quarter 1989 and the inclusion of $4.2 million of nonoperating gains in fourth quarter 1988.

Revenues for fourth quarter 1989 increased 13.2 percent to $255.6 million compared to $225.8 million for fourth quarter 1988. The increase in revenue is primarily attributable to a 5.5 percent increase in revenue passenger miles (RPMs) and a 6.7 percent increase in passenger revenue yield per RPM. The load factor declined 2.8 points, from 61.5 percent to 58.7 percent.

Operating expenses for fourth quarter 1989 increased 18.1 percent to $241.3 million, or $.0638 per available seat mile (ASM), compared to $204.4 million, or $.0598 per ASM for fourth quarter 1988. The 18.1 percent increase in expenses is primarily attributable to the 37 percent increase in jet fuel cost per gallon and increases in various maintenance costs.

Southwest Airlines' net income for the year 1989 was a record $71.6 million ($2.37 per share) compared to $58 million ($1.84 per share) for 1988, an increase of 23.5 percent. Revenues increased 18 percent in 1989 to $1.015 billion from $860.4 million in 1988 due primarily to a 20.9 percent increase in RPMs in 1989. The increase in passenger traffic exceeded the 11.2 percent increase in ASMs, resulting in a 5 point increase in passenger load factor from 57.7 percent to 62.7 percent. As compared to 1988, the 1989 traffic increases were in part achieved by incrementally carrying a greater proportion of lower- yielding leisure class passengers, resulting in a slight decrease in the passenger revenue yield per RPM of 2.8 percent to $.1049.

Operating expenses increased 18.5 percent in 1989 to $917.4 million from $774.5 million in 1988. This represents an increase in operating expenses per ASM of 6.5 percent to $.0620 due primarily to increases in jet fuel and maintenance costs. Both 1989 and 1988 were favorably affected by nonoperating gains. Both years included gains from sales of certain financial assets of $5.9 million and $3.6 million, respectively, and gains from aircraft sales of $10.8 million and $5.6 million, respectively.

#90031p0181 01/31/1990 ~PR Newswire

DALLAS (JAN. 31) PR NEWSWIRE - Southwest Airlines (NYSE: LUV) announced today that it had reached "major airline" status as evidenced by its 1989 earnings released today.

A "major" airline is defined by DOT as an airline whose operating revenues

for a 12-month period are one billion dollars or more. With its $1,015,000,000 in operating revenues for 1989, Southwest has achieved that goal.

Southwest began service in 1971 with three Boeing aircraft serving Dallas, San Antonio, and Houston, and has grown over its 19-year history into a major airline with a fleet of 94 Boeing 737 aircraft and service to 32 airports in 14 states. In 1990, Southwest will add $300 million worth of new aircraft to its fleet in the form of 10 Boeing 737-500s and two Boeing 737-300s.

Southwest provided launching orders for both the Boeing 737-300 and Boeing 737-500 and has the youngest jet fleet in the airline industry.

Southwest has paid its employees in excess of $1.2 billion over the years; has never furloughed an employee, and has carried almost 130 million unduplicated customers to their destinations. In 1988, Southwest surpassed Pan American World Airways in terms of passengers carried, becoming the eighth largest airline in the U. S. in this category.

Southwest has been profitable since 1973, with one of the healthiest balance sheets in the airline industry. In the last decade, since it became an interstate airline subsequent to federal deregulation of interstate air service, the carrier has had a cumulative net income of $434,185,000.

Southwest's total operating revenues over the last 10 years have been over $5.9 billion.

Southwest has not only been profitable, it has also been successful in its customer satisfaction program. Among its peers, the 11 largest airlines in the nation, Southwest has had the fewest complaints per 100,000 customers carried for the last eight consecutive years.

In every market that Southwest Airlines has entered, it has brought benefit to the community by providing low fares and frequent flights. When Southwest Airlines enters a new market, travel activity generally increases anywhere from two to five times.

The Southwest Airlines route system stretches from San Diego, Ontario, Los Angeles, Oakland, San Francisco, and, now, Burbank in California, to Birmingham and Nashville and from Detroit and Chicago to the Rio Grande Valley of Texas.

CONTACT: David Brown of Southwest Airlines, 214-902-1524

#90031p0183 01/31/1990 ~PR Newswire

DALLAS (JAN. 31) PR NEWSWIRE - Southwest Airlines, the nation's low cost, high customer satisfaction airline, announced it will inaugurate service between Burbank and Oakland, Calif. beginning April 16.

The airline said it will offer ten roundtrip flights a day starting at approximately 7:00 a.m. from both Burbank and Oakland with the last flight from both airports at approximately 7:00 p.m.

Southwest Airlines said that its non-restrictive walkup fare between the two California cities would be $59 each way vs. the current non-restrictive fare of $164 each way, a reduction of approximately 64 percent. For those who can plan their trip in advance, the airline said one-way fares would be as low as $29 each way.

Officials at the airline said that in an attempt to simplify the California air fare structure between the Los Angeles and San Francisco Bay areas, they were setting a price limit of $59 on all of their non-restrictive, "anytime", intrastate fares at $59 each way. Southwest Airlines will also offer even lower "Fun Fares" on a restricted basis starting as low as $29 each way. In addition to the new Burbank-Oakland Service, Southwest also provides nonstop intra-California flights between Oakland-Ontario, Oakland-San Diego, and San Francisco International Airport-San Diego service.

In making the announcement, Herbert D. Kelleher, chairman of the board, president, and chief executive officer, said, "We are pleased to be able to expand our California operation and bring our low fare, high customer satisfaction air service to Burbank."

Kelleher added that while Southwest Airlines has become known as the "price policeman" of the airline industry, its service level is also at the top of the nation's air carriers.

"Southwest is the only airline to be best in all three categories of service levels (ontime performance, customer complaints, and baggage service) in the same month since the Department of Transportation (DOT) started keeping records -- and Southwest Airlines has done it twice."

Kelleher also reported, "Southwest Airlines has the youngest jet fleet in the nation with an average age of 5.3 years and the longest unbroken streak of profitability of any major airline in the country."

Southwest Airlines captured the attention of the California media and travelers alike when it inaugurated service from Oakland to several points in May 1989. In the process, the airline drove down the price of air transportation between California's major population areas by more than 50 percent and a mini price war followed that generally lowered fares between

many California cities.

With the addition of service from Burbank on April 16, Southwest Airlines will serve six California cities -- Burbank, Los Angeles, Oakland, Ontario San Diego, and San Francisco. Southwest serves a total of 30 cities in 14 states stretching from California to Birmingham and Nashville and from Detroit and Chicago to the Rio Grande Valley of Texas.

Southwest will begin taking reservations for its new Burbank air service on Jan. 31.

CONTACT: David Brown of Southwest Airlines, 214-902-1524.

#90031p0185 01/31/1990 ~PR Newswire

WALL, NJ (JAN. 31) PR NEWSWIRE - New Jersey Resources Corporation (NYSE: NJR) today announced its financial results for its first fiscal quarter ended Dec. 31, 1989.

Consolidated net income increased by 21 percent to $8.1 million, compared with $6.7 million during the same period last year. Earnings per share were unchanged at 61 cents. The average number of shares outstanding increased by 21 percent from 11 million to 13.3 million due primarily to the public sale of new common stock in August 1989.

NJR Chairman and Chief Executive Officer James T. Dolan Jr., who announced the results at the annual meeting of stockholders, here, said the increase in earnings was primarily attributable to the improved results of New Jersey Natural Gas Company, NJR's natural gas distribution subsidiary. In addition, Commercial Realty & Resources Corp., its real estate development subsidiary, and NJR Energy Corporation, NJR's natural gas and oil exploration subsidiary, also contributed positively to earnings.

The improved utility performance resulted from a 22 percent increase in firm therm sales, which led to higher gross margin. The increased therm sales were due to the coldest December in NJNG's history, which resulted in the weather for the quarter being 13 percent colder than the same three-month period last year. The higher gross margin more than offset increases in operation and maintenance, depreciation and interest expenses all of which were associated with the utility's continued customer growth and general system expansion.

During the first three months of the year, NJNG experienced weather that was 15 percent colder than normal, which is based upon 10-year average weather. The colder-than-normal weather had the effect of increasing earnings by $2.6 million, or 20 cents per share. NJNG also continued to experience substantial customer growth, adding 3,478 new customers during

the quarter. During the 12 months ended Dec. 31, 1989, NJNG added 9,550 customers, which represents an increase of more than three percent.

For the 12 months ended Dec. 31, 1989, consolidated net income decreased to $17.8 million, compared with $18.7 million for the same period last year. Earnings per share declined to $1.49 from $1.85. Earnings for the 12 months were negatively affected by the delay in the receipt of new base rates, as higher operating and maintenance expenses associated with the utility customer growth and general system expansion were not fully offset by higher gross margin. In addition, earnings in the 12 months ended Dec. 31, 1988 reflected an after-tax gain of $840,000 from the sale of certain real estate properties.

Earnings per share reflect additional average shares outstanding due to the August 1989 and 1988 public sales of new common stock.

Before the annual meeting, the company's board of directors declared a regular quarterly dividend of 35 cents per share of common stock. The dividend is payable April 2, 1990 to stockholders of record as of March 15 1990.

WALL, NJ (JAN. 31) PR NEWSWIRE - New Jersey Resources Corporation (NYSE: NJR) stockholders today approved the re-election of two directors and the election of two new directors to the company's board.

Re-elected to three-year terms expiring in 1993 were Roger E. Birk and Thomas B. Toohey. Both have been directors since 1986. Elected to their first three-year terms were Dorothy K. Light and Richard S. Sambol.

Birk, 60, is president and director of the Federal National Mortgage Association and former chairman of Merrill Lynch & Co. Toohey, 65, retired in 1989 after 26 years of service to the company. He had most recently served as NJR's president, chief operating officer and chief financial officer.

Light, 52, is vice president and secretary of The Prudential Insurance Company of America. She had been a director of New Jersey Natural Gas Company (NJNG), NJR's principal subsidiary, since 1985. Sambol is president and chief executive officer of Sambol Construction Corp. He had been a director of NJNG since 1988.

In other action, stockholders also approved the re-appointment of Deloitte & Touche as independent auditors for the 1990 fiscal year.

CONTACT: Laurence M. Downes, of New Jersey Resources, 201-938-1483, Glenn J. Phillips of New Jersey Natural Gas, 201-938-1112, for NJR.

NEW YORK (JAN. 31) PR NEWSWIRE - D.E. Foster & Partners L.P. is a new executive search firm resulting from a management buyout of the United States executive search practice of KPMG Peat Marwick, the public accounting and consulting firm.

D.E. Foster & Partners L.P. will function as an alliance firm of KPMG Peat Marwick, which will not have any equity position in the new firm.

Dwight E. Foster, 54, a KPMG Peat Marwick principal since 1974 and national director of the firm's executive search practice for the past six years, will be senior partner of the new firms. He will be based in offices at 345 Park Avenue, New York City. The other practice leaders of the new firm are Dann P. Stringer, senior managing director in Washington, and G. Charles Roy, Jr., managing director in Stamford, Conn. The new firm has an office in Minneapolis, and seven limited partners; it plans to re-establish operations in Dallas and other major cities in the near future.

The firm will have a professional staff complement of 24 and estimated fee revenue of $4 million for its first year of operations, according to Foster. As an alliance firm of KPMG Peat Marwick, D.E. Foster & Partners L.P. will continue to maintain relationships with search practices of other KPMG member firms in the United Kingdom, France, Switzerland, Germany, Spain, Italy, Brazil, Japan and Australia.

"We have been a major player in the search business since Peat Marwick established a practice in 1962," says Foster, "and we believe we can make an even greater impact in our new configuration."

The decision to conduct a management buyout was arrived at mutually with the leadership of Peat Marwick, according to Foster. Both parties realized that the search practice's ability to grow was being hindered by the independence requirements of the public accounting profession. As part of the terms of the agreement, which were not made public, KPMG Peat Marwick will not re-enter the search business.

"Executive search has been an integral part of our firm for 27 years," said William A. Hasler, vice chairman-management consulting, "and we believe that over the year Peat Marwick people have made a number of contributions to the search profession. We wish Dwight and his colleagues well in their new venture and look forward to working with them."

VIRGINIA BEACH, VA (JAN. 31) PR NEWSWIRE - The Essex Financial Partners (EFP) savings and loan acquisition fund, offered by PaineWebber Incorporated as a way to participate in the consolidation of the S&L industry, had its second interim closing Jan. 19, 1990. The fund has, to date, raised a total of $38.5 million.

Explaining important new developments regarding the Essex fund, Lawrence N. Smith, fund chairman, said that acquisition of Emporia Federal Savings and Loan Association of Virginia had been accomplished through a voluntary supervisory acquisition at no premium.

Emporia has been recapitalized with approximately $2 million to meet the new capital requirements. Essex's management plans to expand Emporia state-wide employing the same techniques they used when expanding Essex Savings Bank to state-wide status in North Carolina.

PaineWebber continues to offer EFP, with a sales goal of $50 million. Proceeds will be used to purchase, recapitalize and expand undercapitalized S&Ls throughout the Southeast in order to create an attractive, regional financial institution by the mid-1990s.

EFP finalized the consolidation of Essex Savings Bank of Elizabeth City, N.C., on Nov. 28, 1989, and of Emporia Federal Savings and Loan Association of Emporia, Va., on Jan. 19, 1990. EFP fund units are to be listed on the American Stock Exchange no later than Aug. 25, 1990.

According to Smith, Essex investors are positioning themselves to take advantage of the government imposed 1992 deadline when S&Ls must meet strict capital requirements and "all healthy S&Ls and commercial banks will be free to consolidate rapidly into a single core group of financial institutions."

In the meantime, Smith pointed out that EFP investors will be paid an annualized cash distribution of eight percent. EFP investors who acquired their units at the first interim closing (Nov. 28, 1989) will be paid their first quarterly distribution on Feb. 15, 1990. The next quarterly distribution payment is scheduled for May 15, 1990.

Smith said EFP also plans to buy S&Ls in the other Southeastern states. Management intends to expand the acquired S&Ls by opening low-overhead, office-type branches throughout each state that specialize in limited

transaction accounts.

The Essex financial institution will be operated under the same capital regulations as a bank. Within eight to ten years, EFP's management is committed to either selling or recapitalizing the regional financial institution it has forged, in order to provide value for the unit-holders.

NEW YORK (JAN. 31) PR NEWSWIRE - A regular quarterly dividend of 54 cents per share on the corporate common stock was declared today by the board of directors of McGraw-Hill, Inc (NYSE: MHP).

This represents an increase of four cents, or 8.0 percent per share. It will be payable March 12, 1990 to shareholders of record on Feb. 26, 1990.

McGraw-Hill has increased its dividend each year since 1974. The annual rate of $2.16 per share in 1990 represents a compound growth rate in McGraw-Hill's common share dividends of 14.4 percent since 1974.

"Decisions to increase the dividend are never authorized unless there is every reasonable expectation that the new level can be maintained for the foreseeable future," said Joseph L. Dionne, chairman and chief executive officer of McGraw-Hill, Inc.

"We are confident of McGraw-Hill's prospects for the year ahead even though the outlook for the general economy is far from clear."

McGraw-Hill's board of directors also declared a dividend on $1.20 convertible preference stock of 30 cents per share payable March 30, 1990 to shareholders of record on Feb. 26, 1990.

#90031p0205 01/31/1990 ~PR Newswire

SPOKANE, WA (JAN. 31) PR NEWSWIRE - The Washington Water Power Company (NYSE: WWP) today reported improved earnings for year-end 1989 as a result of good performance by virtually all segments of its business operations.

For year-end 1989, the company reported income available for common stock of $60,321,000 and earnings per share of $2.70, compared with income of $56,584,000 and earnings per share of $2.54 for 1988.

For the fourth quarter of 1989, the company reported income available for common stock of $16,606,000 and earnings per share of $0.74, compared with income of $17,330,000, and earnings per share of $0.78 for the fourth quarter of 1988. The slight decline resulted from a non-recurring charge to earnings during the quarter.

Paul A. Redmond, WWP board chairman and chief executive officer, said he was "extremely pleased" with the overall operational performance of the company and its subsidiaries during the year.

"We saw some encouraging improvements in retail electric and natural gas loads during the year," Redmond said. "But even more significantly, we achieved excellent results from our wholesale electric marketing efforts and attained record levels of earnings from our combined subsidiary operations in 1989."

The company reported total consolidated revenues for the year of $589,509,000 compared with $542,313,000 for 1988. Consolidated revenues for the fourth quarter totaled $161,957,000, compared with $139,940,000 for the fourth quarter of 1988.

Redmond said a negative factor in the company's earnings performance for both the year and the final quarter of the year was the impact of natural gas rate orders in both states directing rate reductions totaling approximately $16.6 million. The ordered reductions related to purchased gas cost savings associated with construction of a pipeline interconnection with Pacific Gas Transmission Company.

"In Washington, where regulators ordered $15.5 million of the total pipeline savings rate reductions, we have obtained a stay of that portion of the order and are proceeding with a court appeal," Redmond said. "However, it was necessary to record both the reduction under appeal in Washington and the lesser reduction ordered in Idaho as charges to earnings in the fourth quarter. This resulted in a $12.7 million increase in our purchased gas costs and an $8.4 million decrease in natural gas operating income during the year."

Year-end utility operating income increased $4.3 million, or approximately 4 percent over 1988, Redmond said, while subsidiary earnings improved by $4.6 million, or some 76 percent, from the previous year. On a consolidated basis, however, income available for common stock increased only $3.7 million, or roughly 7 percent, due largely to reductions in the use of accelerated amortization of deferred investment tax credits.

"While much of the improvement in utility revenues for the year resulted from nearly a $15 million improvement in wholesale electric revenues, colder weather and the addition of about 3,000 customers -- mostly

residential -- to each of our electric and gas systems during the year were also factors in our year-end utility revenue improvement," he said.

"We are also very pleased with the performance of our non-utility businesses, which provided approximately 18 percent of our total earnings for the year," Redmond said. "I think it represents the growing potential of this segment of our business to improve our overall earnings performance."

Redmond said also that the accelerated amortization of deferred investment tax credits provided only 15 percent of WWP's total earnings in 1989, as compared with 23 percent of earnings in 1988.

#90031p0206 01/31/1990 ~PR Newswire

DALLAS (JAN. 31) PR NEWSWIRE - Beginning July 1, American Airlines will offer easy connections to and from Hong Kong as a result of a new agreement announced today (Jan. 31) with Cathay Pacific Airways.

Cathay Pacific will begin the only nonstop service between Los Angeles and Hong Kong on July 1 using a 360-seat Boeing 747-400. Under the terms of an expanded codesharing agreement with Cathay Pacific, American will market seats on the flight -- through the Los Angeles gateway -- to passengers in the more than 100 cities American serves in the United States and Canada.

American and Cathay Pacific earlier had agreed to share codes between San Francisco and Los Angeles.

Among the key U.S. points American will link to Hong Kong, in addition to San Francisco, are Chicago, Boston, Dallas/Fort Worth, Nashville and Washington.

"This new arrangement will give American and Cathay Pacific a superior competitive service in the marketplace," said Robert L. Crandall, American's chairman and president. "American's schedules from many points in the U.S. are more convenient than those of competing carriers, and both American and Cathay Pacific are widely known for the excellence of their ground and in-flight service.

"The result is a winning combination for anyone traveling between the U.S. and Hong Kong," Crandall said.

The new service benefits trans-Pacific freight shippers as well as

travelers.

The flights initially will operate Tuesday, Thursday, Friday and Sunday in both directions. The westbound flight will leave San Francisco at 11 a.m. and arrive in Los Angeles at 12:27 p.m. It will depart Los Angeles at 2 p.m. and arrive in Hong Kong at 7:20 p.m. the following day. Eastbound, the flight will leave Hong Kong at 2 p.m. and arrive in Los Angeles at noon the same day. It will depart Los Angeles at 2 p.m. and arrive in San Francisco at 3:25 p.m.

The service will be available for sale in American's Sabre reservations system Feb. 4. Daily service will begin April 1, 1991.

CARLSTADT, NJ (JAN. 31) PR NEWSWIRE - In a civil action after criminal convictions in the Justice Department's "Ill Wind" probe of defense fraud and bribery, Tel-Instrument Electronics Corp. announced today it has filed a $24 million, nine-count damage suit in U.S. District Court, Alexandria, Va., against Teledyne Industries, Inc., and six individuals.

Named as defendants with Teledyne were Eugene R. Sullivan, George H. Kaub, Michael Savaides, William L. Parkin, Fred Lackner and Stuart E. Berlin. All had been officials of Teledyne, the Navy, or consulting firms engaged by Teledyne in the contract conspiracy.

Tel-Instrument Electronics said all were convicted earlier this year for illegally helping Teledyne obtain a $24 million DOD contract to supply Identification Friend or Foe (IFF) flight line test equipment, for which Tel-Instrument's price was only $15 million. The DOD awarded the contract after what was then stated to be competitive bidding.

As a result of the "Ill Wind" conviction, Teledyne was assessed $4.3 million in penalties and forfeited an estimated $4 million in future profits. Other defendants were sentenced to jail terms.

Tel-Instrument Electronics Corp., headquartered in Carlstadt, builds custom avionics test equipment for military and commercial aircraft. Customers include the Department of Defense and other government agencies, military services of NATO countries, and major domestic and international airlines.

DOWNEY, CA (JAN. 310 PR NEWSWIRE - Leroy D. Solid has been selected to become vice president and general manager, Florida Operations, for Rockwell International Corporation's Space Transportation Systems Division (STSD).

Solid's appointment will be effective upon the retirement of Albert C. Martin, who has announced his intention to leave at the end of March, following 38 years with the company.

Solid will direct all activities at the division's Florida facilities, including Space Shuttle orbiter logistics operations and launch support services. He will report to Robert G. Minor, STSD president.

Rockwell International's STSD Florida Operations supports Space Shuttle orbiter logistics operations under contract to the National Aeronautics and Space Administration's (NASA) Kennedy Space Center (KSC), Fla. This responsibility encompasses all functions associated with the purchase of orbiter and ground support equipment (GSE) spares, as well as the repair of existing orbiter and GSE hardware presently assigned to the Shuttle program.

Launch support services include orbiter processing and cargo and system integration performed at KSC under contract to NASA's Johnson Space Center (JSC), Houston. STSD Florida Operations personnel review and approve the procedures used for Shuttle processing, and provide technical expertise to resolve problems. They also serve as technical advisors during the major tests and participate in the go/no-go decision making process during the launch countdown.

Solid joined Rockwell in 1959 as a propulsion engineer for the company's Rocketdyne Division. During the past 30 years, he has served in various engineering and program management capacities for Rocketdyne, including director, Logistics for the division's field operations; director, Huntsville District Office, Huntsville, Ala.; and KSC resident manager and associate program manager, Space Shuttle main engine (SSME) program. He most recently served as Rocketdyne's director of launch operations at KSC.

Solid holds a bachelor of science degree in mechanical engineering from the South Dakota School of Mines and Technology.

Rockwell International is a $12-billion, multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive, and graphics businesses.

#90031p0216 01/31/1990 ~PR Newswire

CORAL GABLES, FL (JAN. 31) PR NEWSWIRE - Stockholders at BankUnited's (NASDAQ-NMS: BKUN) annual meeting were told about the savings bank's record performance during 1989, and learned that fiscal 1990 began with further earnings gains.

In his address to stockholders, Board Chairman and President Alfred R. Camner stated, "One of our major accomplishments has been the substantial increase in regulatory risk-based capital to its present level above $15.2 million. All of our levels of capital far exceed the new government requirements and will permit us to pursue continued growth during the coming year.

"During fiscal 1989, we established new record highs for net earnings, net interest income, assets, deposits, loan portfolio, stockholders' equity and regulatory risk-based capital.

"Further good news came during the first quarter of fiscal 1990 (3 months ended 12-31-89) when we achieved net earnings of $172,568, an 11 percent increase over the same period last year.

"Compared to a year ago, BankUnited's Dec. 31 financial gains are very gratifying. Assets are up 31 percent to $205 million, deposits are up 27 percent to nearly $167 million, and stockholders' equity is up 8 percent to $10 million."

Camner introduced Steven D. Hayworth, BankUnited's new chief operating officer who also will serve as president of its South Florida operations. Hayworth was with Southeast Bank for the past 10 years, and most recently was vice president and manager of its Coral Gables private banking operation. He previously was Southeast's director of marketing.

Earlier this week, Camner had announced that BankUnited soon would be establishing a private banking division within its Coral Gables headquarters.

Hayworth was elected to the bank's board of directors. Re-elected directors were Marc D. Jacobson, president of American Central Insurance Agency, Inc., and Anne W. Solloway, private investor.

Holdover directors are Camner; Lawrence H. Blum, director of the CPA firm of Rachlin & Cohen; Allen M. Bernkrant, chairman and president of Southern General Diversified, Inc.; and Senior Vice President Earline G. Ford.

Stockholders also approved an increase in the number of shares for the bank's stock option plan, and amendments to the terms of its convertible

preferred stock.

BankUnited is a publicly owned financial institution traded on the NASDAQ National Market System under the symbol BKUN. It has its corporate headquarters in Coral Gables and six Florida banking offices in Bonita Springs, Venice, Bradenton, Tamarac, Coral Springs and Coral Gables.

BankUnited's seventh office is scheduled to open in February in Delray Beach, and will be the bank's first entry into Palm Beach County.

CONTACT: Steven D. Hayworth, chief operating officer of BankUnited Savings Bank, 305-442-2327; or John K. Schulte of Schulte Ross & Aguilar, Inc., 305-371-6702, for BankUnited Savings Bank.

SAN DIEGO (JAN. 31) PR NEWSWIRE - Bank of Commerce (OTC "Pink Sheets") announced today the following personnel changes:

Timothy Nager has joined the bank as a loan officer with the SBA Department. His main emphasis will be to provide financing to East County and South Bay companies.

Nager is a graduate of the University of San Diego in 1982 in Business Administration and resides in El Cajon, Calif., with his wife, Judy, and their two children. He has six years experience with other lenders in San Diego County.

In addition, the bank announced that Bonnie J. Fago has been promoted to vice president/sales manager of the Escondido SBA Loan Production Office. Fago has been with the bank for more than eight years and in banking for more than 12 years.

This constitutes an expansion of this office for San Diego County's largest SBA lender. Fago will join Don Meehan, assistant vice president and Carla Murphy in expanding the bank's service to the North County.

Bank of Commerce also announced that Rod Maldonado has joined the bank as an SBA loan officer. Maldonado will be concentrating in the North County area. He is a San Diego State University graduate and has been in SBA lending for more than 10 years. Maldonado and his wife, Tammy, reside in Carlsbad, Calif., with their two children.

#90031p0218 01/31/1990 ~PR Newswire

PLYMOUTH MEETING, PA (JAN. 31) PR NEWSWIRE - Progress Financial Corp. (NASDAQ-NMS: PFNC), a holding company whose primary subsidiary is Progress Federal Savings Bank, Plymouth Meeting, today reported a profit for the year ended Dec. 31, 1989, of $2.6 million or $2.73 per share, and a profit of $612,000 or $.64 per share for the fourth quarter.

This compared to a $84,000 profit in 1988 or $.09 per share. 1989 net income and per-share earnings both represent record results.

Total assets increased 5.5 percent to $334 million at Dec. 31, 1989, vs. $316.6 million at year-end 1988. Deposits increased by 5.9 percent to $294.5 million. Total loans outstanding increased 7.9 percent to $302.1 million.

According to V.P. Moir III, president and chief executive officer, these results exceeded the company's expectations and represented a significant turnaround from the results of 1988, which included approximately $4 million in loan loss reserve increases primarily related to a larger loan on a property located in New York City.

"We believe that the company is back on track and prepared to deal with the significant challenges presented by new regulations and capital standards. We also continue to closely monitor our construction, commercial and consumer loan portfolios in the context of a slowdown in local economic growth."

Progress announced in early January its intent to apply for a charter change to a state savings bank. The change would expand the company's bank subsidiary lending capabilities.

Progress Financial Corp., a Delaware corporation, with its principal executive offices in Plymouth Meeting, is a unitary thrift holding company. The business of the corporation consists primarily of the operation of Progress Federal Savings Bank, headquartered in Plymouth Meeting, as its sole banking subsidiary. The corporation's stock is quoted on the NASDAQ National Market System.

HOUSTON (JAN. 31) PR NEWSWIRE - NL Industries, Inc. (NYSE: NL) announced today that it intends to commence within the next five business days an offer to purchase all presently outstanding shares of Georgia Gulf Corporation at $45 per share net to the seller in cash for all shares validly tendered and not withdrawn.

NL stated that it is prepared also to acquire all shares not purchased pursuant to the offer in a cash merger at $45 per share to be effected promptly after completion of the offer.

NL said that its offer also would extend to Georgia Gulf's preferred share purchase rights associated with the common shares and that it expects that the conditions for the offer would include (a) redemption or invalidation of the preferred share purchase rights, (b) NL being satisfied that Section 203 of the Delaware General Corporation Law does not apply to the offer and subsequent merger, and (c) NL receiving sufficient financing to complete the offer and subsequent merger.

NL said that it intends to request that Georgia Gulf's board take action to redeem the preferred share purchase rights and to take action which would make Section 203 inapplicable.

NL said it would seek the support of Georgia Gulf's board of directors and would encourage Georgia Gulf's management to participate in the acquisition transaction.

NL said that it made a determination to pursue the acquisition of Georgia Gulf because of NL's belief that under current market conditions Georgia Gulf's recapitalization plan will not provide its shareholders with values as great as $45 per share.

NL Industries, Inc. is a worldwide supplier of titanium dioxide pigments and specialty chemicals.

TORRANCE (JAN. 31) PR NEWSWIRE - Five Torrance-area organizations have received a pledge of $1 million in assistance from Toyota Motor Sales (TMS), U.S.A., it was announced today.

The money will be contributed during a five-year period to the Torrance Cultural Arts Center, Little Company of Mary Hospital, Torrance Memorial Medical Center, the Torrance-South Bay YMCA and the Volunteer Center -- South Bay.

The contributions and organizations are:

-- $500,000 to the City of Torrance for the Torrance Cultural Arts Center. To be built at the corner of Torrance Boulevard and Madrona, the center will feature a 500-seat theater, community meeting hall, performing arts wing, visual arts wing and outdoor facilities including a Japanese garden festival plaza. The facility is scheduled to be completed in early 1992.

-- $200,000 to the Volunteer Center-South Bay, toward the purchase of a permanent headquarters building in Torrance. The Volunteer Center coordinates the activities of 11,000 volunteers in the South Bay and supports more than 500 non-profit agencies in the area.

-- $100,000 to Little Company of Mary Hospital for the establishment of a Center for Cancer Control. The facility, to be located on Torrance Boulevard near Del Amo Mall, is scheduled to open in June 1990. Toyota previously contributed $50,000 to Little Company of Mary programs.

-- $100,000 to Torrance Memorial Medical Center towards its $20.4 million building program. Toyota previously contributed $50,000 to Torrance Memorial programs.

-- $100,000 to the Torrance-South Bay YMCA towards the completion of its expansion program started in 1985. Toyota previously contributed $125,000 to the expansion efforts.

TMS moved its U.S. corporate headquarters to Torrance in 1967 when it had less than 300 employees and 719 dealers. A new $100 million headquarters complex was completed in 1984. TMS has since purchased additional land and facilities and recently broke ground on a new $41 million Research and Development Center in Torrance. The company now has about 2,500 employees in the South Bay area and occupies land and facilities valued at more than $330 million.

The headquarters complex provides support for more than 1,300 Toyota and Lexus dealers who last year sold more than 930,000 vehicles, making Toyota the number one import nameplate in the country.

BEDFORD HEIGHTS, OH (JAN. 31) PR NEWSWIRE - Waxman Industries, Inc. (NYSE: WAX), a leading supplier to the growing home repair and remodeling market throughout the United States and Canada, today reported record sales and earnings for the company's second quarter and first half of the fiscal year, which include the operations of Ideal Plumbing Group, Inc. of Canada, acquired May 1, 1989. The strong second quarter results marked the 13th consecutive period of year-to-year increases in quarterly sales and operating income.

Sales for the quarter ended Dec. 31, 1989 reached a record $112,972,000, a 135 percent increase over last year's second quarter sales of $47,992,000. Operating income rose 108 percent to $9,315,000, compared to $4,470,000 a year ago. Net income from operations increased 17 percent to $1,945,000 or $.20 per share, compared to $1,664,000 or $.18 per share for last year's second quarter.

For the six months ended Dec. 31, 1989, sales climbed to a record $229,472,000, up 134 percent from $97,979,000 in the prior fiscal year. Operating income increased 114 percent to $18,886,000 against $8,820,000 in the first half of the prior fiscal year. Net income from operations increased 20 percent to a record $3,945,000 or $.42 per share compared to $3,294,000, equal to $.36 per share, a year ago.

As previously announced, during the second quarter the company called $12,500,000 principal amount of its 6-1/4 percent convertible subordinated debentures due March 15, 2007 for optional redemption. Holders of $6,542,000 principal amount of the debentures elected to convert their debentures into the company's common stock resulting in the issuance of approximately 683,000 shares of common stock. Holders of $5,958,000 principal amount of the debentures did not elect to convert and their debentures were redeemed at the redemption price of 105 percent of the principal amount, resulting in an extraordinary charge of $320,000 (net of tax), equal to $.03 per share, for the second quarter.

Net income after the extraordinary charge totaled $1,625,000, equal to $.17 per share, for the second quarter compared to $1,664,000, equal to $.18 per share, in the prior year second quarter. For the six months ended Dec. 31, 1989, net income after the extraordinary charge totaled $3,625,000, equal to $.39 per share, compared to $3,294,000, equal to $.36 per share in the prior year period.

RIVERTON, WY (JAN. 31) PR NEWSWIRE - John L. Larsen, president of U.S. Energy Corp. (NASDAQ: USEG) announced today that it intends to distribute shares of common stock of its new subsidiary, ATEC of Wyoming Inc., a Wyoming corporation, (ATEC Wyoming) to shareholders of U.S. Energy Corp. (USE).

USE owns 7,700,000 shares of ATEC Wyoming common stock (50 percent of the total number of shares of ATEC Wyoming common stock outstanding) and will distribute one share of ATEC Wyoming common stock for each share of USE common stock outstanding at the record date.

The record date for the distribution has not been established and will not be established until after USE has assured compliance with all necessary regulatory requirements. Following distribution, USE will continue owning approximately 4,200,000 shares of ATEC Wyoming common stock (approximately 24.5 percent).

U.S. Energy's 43 percent-owned subsidiary Crested Corp. (NASDAQ: CBAG) will continue to own 50 percent of the outstanding common stock of ATEC Wyoming.

USE and Crested Corp (Crested) formed ATEC Wyoming to acquire a license agreement from ATEC Inc. of Wyo, a Delaware corporation (ATEC Delaware) which is owned by USE (approximately 45 percent of the outstanding ATEC Delaware common stock) and Crested (also 45 percent).

USE and Crested formed ATEC Delaware in 1982 to develop and market a system for removing ammonia from waste water with zeolites.

ATEC Delaware has also become involved in the development and marketing of aquaculture systems, zeolite products and processes, and a system to oxygenate water. The oxygenation system is curently being installed in a major gold mill in Nevada and if the unit performs as initial tests indicate, it could improve gold recovery by as much as 10 percent with a substantial reduction in retention time that will allow for increased production capabilities of the mill.

ATEC Delaware has previously granted two non-exclusive licenses for application of certain of its technology for use in the aquaculture and gold mining industries.

These existing licenses will remain with ATEC Delaware. ATEC Delaware has licensed all other rights to its technology to ATEC Wyoming which will seek

financing to develop and market the technology further. The license agreement provides for a royalty to be paid to ATEC Delaware.

BETHLEHEM, PA (JAN. 31) PR NEWSWIRE - Bethlehem Steel Corporation (NYSE: BS) had net income of $50 million and $246 million for the fourth quarter and year 1989 compared to net income of $66 million and $403 million for the same periods of 1988, it was announced today. The decline in net income for the fourth quarter and year 1989 compared to the same periods in 1988 was principally attributable to higher costs and softening demand in certain of Bethlehem's product lines.

Net income for the fourth quarter and year 1989 includes $15 million in LIFO inventory liquidation credits. Net income for the year 1989 was reduced by $105 million in unusual charges principally for restructuring and downsizing the operations of Bethlehem's Baltimore Marine and BethForge divisions. Net income for the fourth quarter and year 1988 was reduced by $55 million and $113 million in restructuring charges.

The board of directors today declared dividends of 10 cents per share of common stock, $1.25 per share of $5 cumulative convertible preferred stock and 62-1/2 cents per share of $2.50 cumulative convertible preferred stock each payable March 10, 1990, to holders of record on Feb. 12.

#90031p0236 01/31/1990 ~PR Newswire

FRESNO, CA (JAN. 31) PR NEWSWIRE - Gottschalks Inc. (NYSE: GOT) announced

that January 1990 sales for the four week period ended Jan. 27, 1990 increased 23.6 percent to $12.3 million from $10.0 million for January 1988. Same store sales for the January period increased 13.0 percent. For the 52 week 1989 period to date, total sales increased 19.4 percent to $234.0 million from $196.0 million for the year earlier 52 week period. Same store sales on a year-to-date basis increased 8.4 percent over the prior year.

Joe Levy, Gottschalk's chairman and chief executive officer stated that, "because fiscal year 1989 is a 53 week period, we will announce our final sales results for fiscal 1989 in March when earnings results are announced. We currently estimate our full year 1989 sales to be approximately $236 million. By summarizing our January sales results we are comparing them against the same 52 week period in fiscal 1988.

"While our total sales results were reduced from the closing of our downtown Santa Cruz store, our total sales increase was encouraging and very nearly matched our strong December percentage sales increase. Major increases were experienced in women's and men's apparel as well as consumer electronics. Our same store sales growth of 13.0 percent continues to be impressive even in a somewhat softer economic environment which certainly bodes well for us when the economy strengthens," added Levy.

Gottshcalks is a regional department store chain, currently operating 23 department stores and 28 specialty apparel stores in the Central Valley and Central Coast areas of California. Gottschalks offers moderate to upper moderately priced brand-name fashion merchandise, and is in its 85th year of continuous family management.

#90031p0245 01/31/1990 ~PR Newswire

OKLAHOMA CITY (JAN. 31) PR NEWSWIRE - Kerr-McGee Corp. (NYSE: KMG) today reported 1989 net income from continuing operations of $125.8 million, or $2.58 per common share, up 23 percent from $102.6 million, or $2.11 per common share, earned in 1988.

Net income from continuing operations for the fourth quarter was $37.9 million, or 76 cents per common share, a 10 percent increase from $34.6 million, or 71 cents per common share, for the 1988 quarter.

Including $30 million realized in the first quarter of 1989 from the completion of the sale of discontinued uranium operations, net income for the year was $156 million, or $3.20 per common share, up 42 percent from $110.1 million, or $2.27 per common share, in 1988.

Net income for the fourth quarter, including discontinued operations, was $37.2 million, or 75 cents per common share, up 11 percent from $33.4 million, or 69 cents per common share, for the 1988 quarter.

Sales Sales for the year were $3.087 billion, up 15 percent from $2.689 billion in 1988. For the fourth quarter, sales were $799 million, a 16 percent increase from $689 million in 1988.

For the fourth quarter, the increase in earnings over the like 1988 period was due to improved results from exploration and production and chemical operations. Results were lower for refining and marketing, coal and contract drilling operations.

The higher operating profit for exploration and production operations for the year and the fourth quarter, compared with the 1988 periods, resulted primarily from higher crude oil volumes and prices. The company's crude oil production increased 19 percent for the year and 23 percent for the fourth quarter. Average crude oil prices were up $2.95 per barrel for the year and $5.31 per barrel for the quarter, compared with 1988.

The 1989 operating loss from contract drilling operations was lower than in 1988 due to improved day rates. Lower rig utilization in the fourth quarter resulted in a greater loss than in the 1988 quarter.

Coal operating profit for the year and the fourth quarter, compared with 1988, declined primarily as a result of lower sales prices. The fourth-quarter results also reflect lower coal sales volumes than in the 1988 period.

#90031p0249 01/31/1990 ~PR Newswire

OAKLAND, CA (JAN. 31) PR NEWSWIRE - Kaiser Aluminum & Chemical Corp. announced today that it will spend $9 million to expand the capabilities of its aluminum extrusion plant in Los Angeles. The expansion, scheduled to begin immediately for completion in early 1991, will include the addition of a 4,000-ton extrusion press and the installation of a remelt and casting facility.

The 4,000-ton press will make the larger shapes required by many customers. In addition, it will provide the plant with the opportunity to lower costs and increase volume.

The planned remelt and casting facility will be capable of producing 90 million pounds of high-quality aluminum log and billet annually. This major addition will allow the plant to produce extrusion billet for its own use and for sale to others.

The remelt project will include two conventional 70,000-pound capacity furnaces, a 70,000-pound tilting holding furnace, and a casting pit that will accommodate logs up to 20 feet long.

In addition, a 200,000-pound capacity homogenizing furnace and forced-air cooling will help ensure excellent metallurgical properties, and a new laboratory will house computerized spectrographic analysis equipment for close quality control.

According to plant manager John Barneson, "The new press and remelt facility will enable us to sustain our leadership in cost and service in the Western market, while offering our customers the expanded extrusion sizes that allow them greater flexibility in product design."

"Each of our regional extrusion businesses is the low-cost, high-quality producer in its market, and our division-wide investment strategy is to build on existing strengths," said Jim Owen, vice president and general

manager of the division. "The expansion of the Los Angeles plant offers an excellent opportunity to support that strategy in our Western market."

Kaiser Aluminum's extrusion division owns and operates three plants which service the general aluminum extrusion market. They are located in Sherman, Texas, and Toronto, Canada, as well as in Los Angeles. A fourth plant - in Tulsa, Okla. - produces magnesium extrusions and aluminum and magnesium anodes.

Kaiser Aluminum & Chemical Corp. is a subsidiary of MAXXAM Inc. (ASE: MXM).

LIVINGSTON, NJ (JAN. 31) PR NEWSWIRE - Valley National Bancorp (NASDAQ/NMS: VNPB) (VNB), Clifton, N.J. and Mayflower Financial Corporation (NASDAQ/NMS: MFFC) (MFC), Livingston, N.J. announced today that they have signed a letter of intent providing for the acquisition by VNB of all the issued and outstanding shares of the common stock (1.15 million) of MFC.

Upon consummation of the proposed transaction, MFC's wholly owned thrift subsidiary, Mayflower Savings Bank, SLA, would be operated as a separate subsidiary of VNB.

Under the terms of the proposed transaction, each share of MFC would be converted into the right to receive $15.75 cash plus a fraction of a warrant (.3605 warrants per share) to purchase VNB common stock at an exercise price of $27.50 per share for a period of five years. The warrants are intended to have, as of the date of the letter of intent, a value of $1.25 per MFC share. However, there can be no assurance as to the market value of the warrants.

Gerald Lipkin, vice chairman and chief executive officer of VNB, said, "Mayflower Savings is a well-managed and profitable institution which fits precisely with our acquisition strategy of broadening our franchise in attractive markets. They have excellent loan quality and earnings performance records and the affiliation will enhance MFC's growth and earnings potential."

Norman Goldfarb, president and chief executive officer of MFC, said that "the proposed transaction with VNB will be advantageous to all of our constituencies -- our shareholders, our employees, and the market that we serve. We bring to Valley a very strong customer following and a solid earnings record."

The execution of a definitive agreement is subject to prior regulatory approval. Consummation of the transaction is subject to approval of a definitive agreement by both boards of directors, the shareholders of MFC and approvals of New Jersey and federal regulators.

VNB is a bank holding company with assets totaling $1.8 billion and shareholders' equity of $171.5 million on Dec. 31, 1989. VNB conducts a commercial and retail banking business primarily within Bergen, Passaic, Essex, Hudson and Morris counties, New Jersey.

MFC is the holding company of Mayflower Savings Bank, SLA, which has two branch offices in Livingston, N.J. As of Dec. 31, 1989, MFC had total assets of $122.7 million and shareholders' equity of $17.5 million.

#90031p0252 01/31/1990 ~PR Newswire

LOS ANGELES (JAN. 31) PR NEWSWIRE - Union Exploration Partners, Ltd. (NYSE: UXP) today reported preliminary earnings for 1989 of $253.7 million or $1.03 per unit.

The current year earnings represent a record for any twelve month reporting period since the partnership was founded in 1985, and compares with 1988 earnings of $189.4 million, or 77 cents per unit.

For the fourth quarter of 1989, preliminary UXP earnings totaled $52.2 million, or 21 cents per unit. This compares with earnings of $31.6 million, or 13 cents per unit in the fourth quarter of 1988. There were 245.7 million units outstanding during the entire 1989 and 1988 periods.

The full-year and fourth quarter earnings reflect higher crude oil prices, record natural gas sales volumes and lower charges for the amortization of exploratory lands. These positive factors were partially offset by lower crude sales volumes, higher charges for depletion and depreciation related to higher levels of production, increased interest expense and a modest decrease in natural gas prices. The 1989 full-year results also benefited from contract settlements reached with several of UXP's natural gas pipeline customers. Dry hole costs were down for the quarter, but up for the year.

Fourth quarter revenues were $170.3 million, up from $160.6 million for the same period in 1988. Total revenues for 1989 were $753.2 million, up from $640.3 million in 1988.

Funds available for distribution in the fourth quarter were 38.61 cents per unit, compared with 32.66 cents per unit a year earlier. For 1989, funds available for distribution totaled $1.8783 per unit, versus $1.3662 per unit in 1988. The fourth quarter and full-year distributions reflect higher crude oil prices, increased natural gas sales volumes and lower amortization of debt principal. In addition, current year distributable cash includes $70.9 million from the settlements of contract disputes with several natural gas pipeline companies.

Natural gas sales for 1989 averaged 416.3 million cubic feet per day, up nearly 12 percent from 372.8 million cubic feet per day in 1988. In the fourth quarter, natural gas sales averaged 412.2 million cubic feet per day, compared with 397.5 million cubic feet per day in 1988. For the full-year, UXP's crude oil and condensate sales averaged 51,600 barrels per day, down from 56,500 barrels per day in 1988. Crude oil and condensate sales for the quarter averaged 47,800 barrels per day, down from 54,000 barrels per day for the same period a year ago.

UXP's fourth quarter exploration and development expenditures totaled $91.7 million, compared with $68 million recorded in the same period of 1988. For the full-year 1989, exploration and development expenditures were $257.9 million, up 13 percent from $227.7 million the year before. Both 1989's full year, and fourth quarter expenditure totals constitute records for exploration and development spending.

HUNT VALLEY, MD. (JAN. 31) PR NEWSWIRE - George G. Radcliffe has been elected to the EA Engineering, Science, and Technology, Inc. (NASDAQ: EACO) board of directors, it was announced today by Loren D. Jensen, Ph.D. chairman, president and chief executive officer of the engineering and environmental services firm.

Radcliffe, who recently retired as the chairman of the board of Baltimore Life Insurance Company, has been prominent in business and civic affairs of Baltimore for many years. He currently serves as director of the Baltimore Life Insurance Company of Maryland, MNC Financial, Inc., Maryland National Bank, and the Baltimore Gas & Electric Company. He is the chairman of the board of trustees at The Johns Hopkins University and is a trustee of The Johns Hopkins Health Systems Inc. He served in numerous charitable and community activities.

In announcing the election, Jensen commented that Radcliffe's presence on the board of directors complements the perspective of the other members,

and brings Radcliffe's considerable acumen and experience to benefit EA's long-range planning and management.

Radcliffe earned his bachelor's degree from the Johns Hopkins University and received training in advanced management at Harvard Business School. He is a member of the Johns Hopkins Club and the Maryland Club.

EA Engineering, Science and Technology, Inc. is a multidisciplinary professional services consulting firm providing a wide range of engineering, scientific, analytical and remediation capabilities to address existing and potential threats to the environment and to human health and safety for government and industrial clients across the nation. EA designs building systems for energy conservation, indoor air quality, and climate control; provides remedial designs at contaminates sites; and develops solutions for waste management, energy conservation and emissions control. The firm is headquartered in Hunt Valley and has offices in Texas, California, New York, New Jersey, Georgia, Nebraska, Illinois, Massachusetts, North Carolina, Washington and Virginia.

PHOENIX, AR (JAN. 31) PR NEWSWIRE - Rudy R. Miller, chairman and chief executive officer of StatesWest Airlines Inc. (NASDAQ: SWAL) today announced W. James Lane has been elected president and chief operating officer of StatesWest Airlines Inc.

Miller stated: "Mr. Lane has been employed with StatesWest since 1988. He has served as Vice President, Chief Financial Officer and most recently Executive Vice President. He has worked very closely with me this past year and has made major contributions to the Company's improved daily operational results. He has earned my respect and the right to oversee and meet the Company's day-to-day operational demands and assist me in directing the future growth of StatesWest."

"For me, in my new role as President, the excitement has just begun," Lane said. "I look forward to presiding over StatesWest's daily operations and working closely with our chairman as we continue to refine our business concept and pursue our expansion strategy."

StatesWest is one of the largest regional air carriers in the country not owned or totally affiliated with a major carrier. The company owns 7.34 percent of Mesa Airlines Inc. (NASDAQ: MESA), a regional airline carrier headquartered in New Mexico.

StatesWest operates one of the newest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County and San Diego, along with the Arizona cities of Phoenix, Scottsdale, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca, and Laughlin, Nevada/Bullhead City, Ariz. and Telluride, Colo. StatesWest operates 63 daily departures between these locations.

#90031p0256 01/31/1990 ~PR Newswire

MORRISTOWN, NJ (JAN. 31) PR NEWSWIRE - AT&T Credit Corporation and PacifiCorp Financial Services, Inc. announced today that a new subsidiary of AT&T Credit Corporation -- AT&T Commercial Finance Corporation -- has purchased the assets of the asset leasing and financing division and the distribution financing division of PacifiCorp Credit, Inc., a subsidiary of PacifiCorp Financial Services.

The two divisions, headquartered in Portland, Ore., have a combined net book value of approximately $460 million and employ some 120 people. Both units are expected to remain intact in Portland where they will be integrated into the operations of AT&T Commercial Finance Corporation.

The two divisions were purchased for cash obtained primarily through the use of debt issued by AT&T Credit Corporation and preferred stock issued by AT&T Commercial Finance Corporation to PacifiCorp Credit. AT&T Commercial Finance Corporation purchased the assets of the two divisions for approximately net book value and will not assume any of PacifiCorp Credit's outstanding debt.

The distribution financing division develops and provides comprehensive vendor financing programs for manufacturers supporting their capital equipment sales.

The asset leasing and financing division, with field offices in Atlanta and Denver, provides sophisticated financing structures for broadcast facilities and other media customers, and provides financing to a wide range of franchises.

Middle market financing involves many different types of equipment, with typical transaction values of approximately $100,000 to $5 million.

Activities leading to the sale of these divisions were initiated in mid-1989 as a result of a strategic review conducted by PacifiCorp and

PacifiCorp Financial Services. With the sale of the two divisions, PacifiCorp Financial Services' assets will be approximately $1.8 billion.

The latter division provides debt and equity financing for middle-market companies needing capital for acquisitions, restructurings, recapitalizations and buyouts, and lease financing for venture capital financed companies.

AT&T Credit Corporation is a wholly-owned subsidiary of AT&T (NYSE: T) and engages in a wide array of equipment leasing and financing activities involving both AT&T and associated non-AT&T equipment.

PacifiCorp Credit is an wholly-owned subsidiary of PacifiCorp Financial Services, which is an indirect wholly-owned subsidiary of PacifiCorp (NYSE: PPW), a diversified electric utility based in Portland, Ore.

#90031p0259 01/31/1990 ~PR Newswire

NORWALK, CT (JAN. 31) PR NEWSWIRE - Great Northern Nekoosa Corporation (NYSE: GNN) today announced 1989 net income of $321.1 million, or $5.78 a share, on sales of $3,863.1 million, down 6.0 percent from 1988 net income of $341.7 million, or $6.21 a share, on sales of $3,566.3 million. For the fourth quarter, net income was $51.9 million, or 92 cents a share, on sales of $934.2 million, down 39.5 percent from net income of $85.8 million, or $1.56 a share, on sales of $944.1 million in 1988.

Shipments in 1989 of pulp, paper and containerboard from the company's mills were 4,295,000 tons, compared with 4,266,000 tons shipped in 1988. Fourth-quarter shipments were 1,031,000 tons, compared with 1,052,000 tons shipped in the corresponding 1988 quarter. Fourth- quarter shipments were reduced at the company's southern mills because freezing conditions hampered operations.

Box shipments were 17.5 billion square feet and 4.3 billion square feet for 1989 and fourth quarter 1989, respectively, compared with 17.4 billion square feet and 4.1 billion square feet for the corresponding periods the prior year.

Fourth quarter 1989 results were reduced by 33 cents a share for expenses related to Georgia-Pacific's unsolicited tender offer. Of the 33 cents, $20.3 million pretax, or 22 cents a share, was related to stock appreciation rights and stock performance units expense. Earnings benefited from a lower tax rate in the fourth quarter, which resulted from

the fourth quarter realization of investment tax credits and lower effective state income tax rates. Sales for the fourth quarter and full year 1988 have been restated to conform with the current year presentation.

"Generally, prices for most of our products had been relatively stable the first half of the year, but weakened modestly in the third quarter and continued to weaken in the fourth," said William R. Laidig, GNN chairman. "Our performance in 1990 will depend on both the strength of the U.S. economy and the growth in demand for our products worldwide. Our strong cash flow, a record at $568.8 million in 1989, has enabled us to fund an extensive capital program that has emphasized cost control. This will serve us well in the future," he concluded.

IRVINE, CA (JAN. 31) PR NEWSWIRE - Fluor Daniel Inc. announced today that it has been awarded a contract by Mannesmann Anlagenbau, a subsidiary of Dusseldorf-based, Mannesmann GmbH. Mannesmann Anlagenbau, an international pipeline construction company, was contracted by Saudi Aramco for expansion of their East/West crude oil pipeline system.

The value of the contract was not disclosed.

Fluor Daniel's Hydrocarbon Sector will perform engineering services for pump stations, supporting facilities and pipeline looping. The scope of work includes adding pumps and upgrading control systems for 11 pump station facilities. The pipeline connects production facilities on the east coast of Saudi Arabia, to the port of Yanbu on the country's west coast.

Engineering is under way in Fluor Daniel's Houston offices, with completion scheduled for mid-1991. Fluor Daniel was responsible for engineering, procurement and construction assistance for the pump stations modification project implemented during 1985 and 1986.

Mannesmann Anlagenbau is an international pipeline construction company. Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

#90031p0266 01/31/1990 ~PR Newswire

HOUSTON (JAN. 31) PR NEWSWIRE - Pogo Producing Co. (NYSE: PPP) today reported a 1989 loss of $5.6 million or 23 cents per share from revenues of $121.1 million, compared to a 1988 loss to common stock of $10.5 million or 48 cents per share from revenues of $156.4 million.

Included in the 1988 revenues were $37.9 million realized from the sale of Pogo's natural gas reserves in the British North Sea waters, the sale of various interests in the Gulf of Mexico pipelines and revenues recognized

from the settlement with its major pipeline customers. This was offset by a $22 million pretax writedown in the cost of its oil and gas properties.

For the fourth quarter of 1989, Pogo's loss was $2.1 million or 8 cents per share from revenues of $29 million, compared to fourth quarter of 1988 net income of $6.3 million or 24 cents per share from revenues of $47.6 million. The results for the fourth quarter of 1988 include $19.9 million in revenues representing the gain on the sale of Pogo's natural gas reserves in the British North Sea waters. Results for the 1988 fourth quarter without this gain would have been a loss of $3 million or 12 cents per share on revenues of $27.7 million.

Natural gas sales averaged 111.3 million cubic feet per day in 1989, up from 106 million cubic feet per day in 1988. In 1987, daily gas sales averaged only 87 million cubic feet per day. Average price received for gas in 1989 was $1.88 per Mcf while the 1988 price was $1.86 per Mcf.

Total liquids production in 1989 averaged 6,961 barrels per day compared to the previous year's figure of 8,222 barrels per day. The average amount received for crude oil-condensate in 1989 was $18.86 per barrel, an almost 18 percent gain over the 1988 figure.

Pogo's 1989 capital budget of $37.6 million included the drilling of a number of wells in the Eugene Island Block 330 field, the Eugene Island Block 212 field, and the West Cameron 586-587 fields. These wells would have added substantially to Pogo's proved reserves, however, Pogo's partners and operators elected to delay the drilling of these wells.

DALLAS (JAN. 31) PR NEWSWIRE - Maxus Energy Corp. (NYSE: MXS) reported a loss for the fourth quarter of 1989 of $4.0 million, or after preferred dividends, a loss of 17 cents per common share, compared with a loss of $14.6 million, or 29 cents per common share, in the fourth quarter of 1988.

Sales for the quarter were $160.7 million compared to $129.4 million in the 1988 fourth quarter. Cash flow from continuing operations increased 64 percent to $37.8 million in the 1989 fourth quarter compared to $23.0 million in the fourth quarter of 1988.

Fourth quarter 1989 reflects a provision for taxes of $17.4 million versus the previous year's favorable tax benefit of $48.7 million.

On a pre-tax basis, fourth quarter 1989 income exceeded the previous

year's quarter by $76.7 million. Contributing to this improvement were better prices, lower interest expense, lower depreciation, depletion and amortization and a net gain of $34.8 million on the sale of 10 percent of the Northwest Java contract area. Partially offsetting this, exploration costs for the quarter were up $10.6 million due to dry hole costs and geological and geophysical costs reflecting increased exploration activity.

For the year, Maxus reported a loss of $31.0 million, or after preferred dividends, a loss of 86 cents per common share, compared with a loss of $131.6 million, or $1.99 per common share, in 1988. The 1988 results included a one-time cumulative adjustment of $70.0 million to reflect a change in the accounting for income taxes as required by Statement of Financial Accounting Standards No. 96.

Sales for 1989 were $603.5 million, compared to $574.9 million in 1988. Cash flow from operations for 1989 was up 10 percent to $161.0 million compared to $146.8 million in 1988.

Dallas-based Maxus Energy is one of the largest independent oil and gas exploration and production companies in North America.

CAMBRIDGE, MA (JAN. 31) PR NEWSWIRE - Thinking Machines Corporation, the leading provider of highly parallel supercomputers, announced the purchase of a 16,000-processor CM-2 supercomputer by ATR Auditory and Visual Perception Research Laboratories. "This represents the first sale of a highly parallel supercomputer in Japan," said Thinking Machines Vice President John Mucci.

The Laboratories' goal is "to obtain a breakthrough in the technologies of visual pattern and speech recognition, and to develop efficient and human friendly man-machine interfaces." The machine will be supported by

Advanced Systems Company Ltd., of Tokyo, which also coordinated import of the system.

Thinking Machines was formed to apply parallel processing techniques to the growing number of data-intensive computing applications encountered in business and science. Since announcing its Connection Machine system in 1986, the company has grown to become the second largest supercomputer supplier in the U.S., with 10 percent of the world's installed base. Thinking Machines is headquartered at 245 First Street, Cambridge, Mass. 02142.

#90031p0277 01/31/1990 ~PR Newswire

MANCHESTER, NH (JAN. 31) PR NEWSWIRE - BankEast Corporation (NASDAQ: BENH) today announced an addition of $12.8 million to its loan loss reserve during the fourth quarter, resulting in a net loss for the quarter.

BankEast reported a loss for the year ended Dec. 31, 1989, of $21,805,000, equal to a loss of $1.83 per share, as compared to net income of $5,413,000, or $.50 per share, for the year 1988.

The results for the year include a fourth quarter net loss of $10,574,000, or a loss of $.89 per share. This compares with a loss in the 1988 fourth quarter of $930,000, or a loss of $.08 per share.

The 1989 year's loss resulted primarily from provisions taken for potential loan losses charged against earnings totaling $28.7 million, compared with $3 million in 1988.

"While the $13.7 million provision for loan loss taken in the second quarter was adequate at that time, uncertainty over the short-term prospects for improvement in the regional economy prompted us to boost our loan loss reserves again in the fourth quarter," said W.N. DeWitt, chairman and chief executive officer of BankEast.

During the fourth quarter, total non-performing loans rose to $49.1 million, up from $47.9 million at the end of the third quarter. Total non-performing assets (including non-performing loans, other real estate owned and restructured loans) rose to $61.8 million, or 8.22 percent of total loans and other real estate owned, up from $51.3 million, or 6.69 percent at the end of the third quarter. The company's current allowance for loan losses is $21,184,000, representing 2.85 percent of net loans and 39.2 percent of non-performing loans.

"The economy of our marketplace, particularly the real estate sector, continues to be soft and unsettled," DeWitt said. "While the bank's policies, procedures and plans are in place to address today's challenges, the current economic environment poses significant limitations on our ability to earn through narrowing interest margins, offset to some degree, by improvement in non-interest income.

"Efforts to reduce operating expenses are progressing, consolidations are continuing to be made, and close attention is being paid to working with customers to resolve their problem loans. However, collection and similar costs associated with problem loans have increased through the year.

"The company continues to satisfy minimum regulatory capital requirements at year end. However, the fourth quarter loss has created a technical default under the terms of our subordinated notes. We expect to work with the noteholders to address the deficiency.

"A picture of how 1990 will shape up remains a bit clouded, but one thing is certain -- companies that fare best will be those that have the courage to act quickly and decisively when necessary and swiftly adapt to the changing environment," DeWitt said.

BankEast Corporation is a New Hampshire-based holding company with $1.1 billion in assets.

KENT, WA (JAN. 31) PR NEWSWIRE - The U.S. Air Force has given a $3.6 million third-period 1989 award fee to the Small Intercontinental Ballistic Missile (ICBM) Hard Mobile Launcher and Weapon Control System Program at Boeing Aerospace & Electronics, the company announced today. Redoubled efforts and staff dedication were cited as keys to the award despite a Small ICBM program reduction.

The Kent-based division, part of the Boeing Defense & Space Group, is the full-scale developer of the carrier and launcher proposed for the Air Force's planned single-warhead Small ICBM.

Brig. Gen. Ralph Tourino, Air Force Ballistic Systems Division commander, made the award, 86 percent of the available pool, and concurrently assigned an overall performance rating of "Very Good."

In a letter to Art Carter, Boeing Aerospace & Electronics Missile Systems Division vice president, Tourino wrote that "(the Boeing team's) renewed team spirit, evident since mid-term, has directly contributed to meeting the contract delivery requirements and the quality of the delivered products."

Dick DonMoyer, Small ICBM Programs manager, said the large award fee was significant in light of the program's rescoping approximately one year ago when its 1,000-employee workforce shrank to the current level of 40

employees. DonMoyer said almost all of the surplus employees from the program have been placed in other company projects.

"The award fee and the confidence the Air Force has placed in us has indicated that the team really pulled together," DonMoyer said, "much like a two-minute drill in football in order to complete the task.

"I would like to express the appreciation of the management team to all the folks who put in the tremendous effort and achieved for the company a significant contribution to the 1989 earnings."

The programs technical performance also was praised by the Air Force commander. Tourino complimented Boeing for its successful Northern Tier Test of the Hard Mobile Launcher, in which the prototype carrier of the Small ICBM was subjected to winter weather hazards and rough terrain conditions in Montana.

The Small ICBM Programs manager said Boeing is developing a proposal for a restart of the full Small ICBM Hard Mobile Launcher-Weapon Control System full-scale development program. The Air Force is expected to award such a contract this summer.

ATLANTA (JAN. 31) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) today announced it will construct a new 187,000-square-foot reservations center building adjacent to its Hartsfield Atlanta International Airport general office complex.

This continues a significant expansion of Delta's Atlanta facilities. The new reservations facility, to be built at a cost of some $21 million, will bring Delta's investment for construction projects in Atlanta to more than $400 million. Last month the airline disclosed plans for the expansion of its Atlanta Technical Operations Center, the maintenance hub of Delta's worldwide system.

The new reservations center will be privately financed by Delta. Completion of the reservations center is expected by summer, 1991, while other expansion projects now in various stages of construction will be completed over the next three years.

In addition to the Technical Operations Center and reservations building projects, the $400 million Delta expansion also includes:

-- A just completed, state-of-the-art training center that provides full

facilities for the initial and recurrent training of all Delta pilots and flight attendants, as well as other personnel. The building contains 267,000 total square feet of space.

-- A 115,000-square-foot midfield support building, now under construction which provides storage and office space for airport operations. Completion is scheduled for later this year.

-- An expansion of international air cargo space will soon begin with the construction of a building of 213,000 square feet adjacent to the east end of the existing air cargo facility. It will include an automated inbound cargo handling and storage system.

-- A 215,000-square-foot expansion of Delta's Operations Center to house additional flight simulators and personnel for pilot training was recently completed.

-- Renovation of the existing reservations building for use by Delta's Marketing Division, to begin once the new reservations building is occupied.

DURHAM, NC (JAN. 31) PR NEWSWIRE - Liggett Group Inc. (NYSE: LIG), today reported net income of $13,484,000 or $0.56 per share for the third quarter ended December 31, 1989 compared to net income of $12,685,000 or $0.53 per share for the same period last year. Net sales for the quarter were $173,621,000 compared to net sales of $148,145,000 for the same period last year.

For the nine months ended December 31, 1989, the Company reported net income of $22,307,000 or $0.93 per share compared to net income of $25,381,000 or $1.06 per share for the first nine months of the prior fiscal year. Net sales for the nine months totaled $432,699,000 compared to net sales of $379,413,000 for the same period a year ago.

According to K.v.R. Dey, Jr., President and Chief Executive Officer, "net sales for the quarter and nine months increased over the same periods last year due to cigarette sales price increases, higher unit sales of cigarettes, and the introduction of additional non-tobacco products. Our increase in unit sales of cigarettes was due primarily to the continued success of Pyramid, an extra-low price brand and Eve Ultra Lights 120's. This increase was partially offset by the continuing decline in unit sales of established brands and other price value products. Net earnings for the quarter exceeded net earnings for the same quarter of the previous

year due principally to higher unit sales of cigarettes and profits from non-tobacco products introduced during the year, which were partially offset by unfavorable changes in product mix and increases in administrative and non-operating expenses. However, net earnings for the nine months were below the levels for the same period last year, primarily as a result of changes in product mix, one time charges related to a special voluntary retirement program and other administrative and non-operating expenses partially offset by profits from non-tobacco products introduced during the year.

Liggett Group Inc. manufactures, markets and distributes cigarettes including L&M, Chesterfield, Lark and Eve brands as well as price/value cigarettes such as our Pyramid brand and private label products. The Company also currently markets several sports-related products as well as two confectionery products.

LONG BEACH, CA (JAN. 31) PR NEWSWIRE - In response to consumer demand for safe, chemical-free products, Richards Homewares is introducing Moth-Away, an herbal moth repellent that does not contain the toxins or chemicals found in most moth repellents currently on the market.

Moth-Away is formulated from a natural blend of herbs and represents the first significant change in moth repellent products in over 50 years, according to the company. Moth-Away is the first herbal moth repellent ever registered by the Environmental Protection Agency (EPA), the company said.

It comes in easy-to-use sachet packets that can be placed in garment bags, dressers, linen cabinets, storage chests, sewing baskets and under rugs without leaving lingering chemical odors. One box of Moth-Away will protect clothing in three standard size garment bags for up to a year.

"Moth-Away has been proven effective through laboratory tests and in-home use to deliver protection from moths that damage natural fabrics, fine woolens and other stored items," Freelander said.

Richards Homewares will be distributing the product nationwide in the spring of 1990 through drug and supermarket chains, mass merchandisers, home centers, specialty stores and cataloguers. The suggested retail price for a package of 24 sachets is $4.95.

To find the retailer selling Moth-Away nearest you, contact Richards Homewares, P.O. Box 92019, Long Beach, CA 90809, or call 213-424-8671.

Richards, currently celebrating their 50th anniversary, is a leading manufacturer of crystal clear garment storage products, patio furniture covers and various housewares products, marketed under the popular Richards, Cover-Ups, Master Suite and Patio Suite labels.

#90031p0290 01/31/1990 ~PR Newswire

SACRAMENTO, CA (JAN. 31) PR NEWSWIRE - Shell Oil Co. today became the fourth major motor fuel retailer to agree to dispense methanol at retail sites throughout the state. In an agreement signed with the California Energy Commission, the oil company will install up to four methanol pumps at selected Shell stations as part of the state's alternative transportation fuels demonstration program.

Shell joins three other oil companies (ARCO, Chevron, and Exxon) already participating in the program. In cooperation with the Energy Commission, these companies plan to operate a total of 50 methanol retail pumps in California by 1992. Currently 18 methanol pumps are operating in the state.

Methanol is a clean, odorless fuel that can be produced from domestic resources such as natural gas and biomass. Retail outlets participating in the Energy Commission's alternative fuels program dispense M85, a methanol fuel which is a mixture of 85 percent methanol and 15 percent unleaded gasoline.

As part of the agreement, Shell will also purchase flexible fuel vehicles (FFVs) for its fleet, and has loaned a chemical engineer to work with the Energy Commission for six months. Two Ford Crown Victoria FFVs will be added to Shell's fleet at the Wilmington Manufacturing Complex in the Los Angeles area. Additional FFVs are expected to be acquired for the Shell fleet later this year. FFVs can operate on methanol and gasoline, or any combination of the two.

Energy Commission Chairman Charles R. Imbrecht, co-chair of the United States Alternative Fuels Council and member of the Governor's California Advisory Board on Air Quality and Fuels, is quite optimistic about Shell's involvement in the state program.

"Shell's participation significantly expands California's clean fuels program," Imbrecht noted. "The company has made a 'three-way commitment' to help solve California's air quality problems by testing alternative fuel performance, evaluating the clean fuel market, and providing technical expertise. We hope other oil companies will follow suit."

The Shell methanol dispensing systems will be installed by the end of 1991 at four of the oil company's retail outlets throughout California. The state will pay for the fueling equipment; Shell will assume responsibility for installation, operation and maintenance of the equipment for 10 years.

GREENWICH, CT (JAN. 31) PR NEWSWIRE - The XTRA Corporation Independent Stockholder Committee announced today a counterclaim seeking an injunction was filed in U.S. District Court, Massachusetts, against XTRA (NYSE: XTR), its chief executive officer Charles F. Kaye and certain directors, alleging that they breached their fiduciary duties to XTRA and its shareholders by entering into unfavorable asset transactions in 1988 with Flexi-Van, Inc. and Itel in order to eliminate a threat to their continued control of XTRA.

The suit also alleges that the defendants drastically enhanced their compensation packages in anticipation of threats to their continued control of XTRA; purchased railcar equipment from Kaye at an inflated price; and permitted Kaye to benefit improperly from his knowledge of undisclosed information about XTRA in connection with his exercise of stock options.

The counterclaim was filed by Robert M. Gintel, a member of the XTRA Corporation Independent Stockholders Committee. The counterclaim also alleges that XTRA's proxy materials for the forthcoming annual meeting are materially false and misleading with respect to transactions involving Kaye and XTRA's compensation plans.

The counterclaims seek permanent and preliminary injunctive relief enjoining counterclaim defendants from voting proxies received and from soliciting any further proxies prior to making complete and accurate disclosures. The counterclaims also seek injunctive relief from the counterclaim defendants making any payments to themselves under the guise of "change-in-control" provisions of their employment arrangements.

The XTRA Corporation Independent Stockholders Committee is currently soliciting proxies in favor of the election of its slate of nominees to XTRA's board at the annual meeting of stockholders scheduled Feb. 28, 1990.

IRVING, TX (JAN. 31) PR NEWSWIRE - Michaels Stores Inc. (AMEX: MKE) announced that its sales in January 1990 increased approximately 5.2 percent over January 1989 to $25.3 million from $24.0 million. Sales by Michaels stores in operation in January of both years decreased approximately 7.1 percent to $22.1 million in 1990 from $23.8 million in 1989.

For the fourth quarter of fiscal 1989, which ended Jan. 28, 1990, sales increased approximately 9.4 percent over the fourth quarter of fiscal 1988 to $104.1 million from $95.1 million. Sales by Michaels stores in operation for the fourth quarter of both fiscal years decreased approximately 3.3 percent to $91.2 million from $94.3 million in fiscal 1988.

Total sales for fiscal 1989 increased approximately 16.1 percent over fiscal 1988 to $289.8 million from $249.6 million. Sales by Michaels stores in operation for both fiscal years increased approximately 5.8 percent to $248.0 million from $234.5 million in fiscal 1988.

Michaels Stores Inc. owns and operates a chain of 121 specialty retail stores located in 17 states in the southern half and midwestern sections of the United States which feature a wide selection of competitively priced home decoration and arts and crafts items. The company's headquarters are located in Irving, and its stock is listed on the American Stock Exchange under the symbol MKE.

#90031p0298 01/31/1990 ~PR Newswire
HIGHLAND PARK, MI (JAN. 31) PR NEWSWIRE - Seven veteran road rally racers will raise more than a few eyebrows Feb. 6, when they begin the 10-day, 5,200-mile ALCAN Winter Rally from Seattle to the Arctic Circle and back.

They'll also raise the flags of two of the Midwest's most popular rock 'n roll radio stations at the Arctic Circle to symbolize fund-raising efforts for children's hospitals in Detroit and Cleveland.

WMMS-FM in Cleveland and WRIF-FM in Detroit are leading the fund- raising efforts under the banner, "Going to the Top of the World for Kids." Cleveland's Rainbow Babies and Children's Hospital of Michigan will receive the funds generated by this program.

The Chrysler Fund, the charitable arm of Chrysler Corporation, has pledged $5,000 to each hospital to supplement fund-raising by WMMS and WRIF.

Christopher Jensen, automotive editor of the Cleveland Plain Dealer, and Phil Berg, associate editor of Car and Driver magazine, will lead the Jeep/Eagle team that also includes Cleveland-area rally veterans Bill Sadataki, Dave Killian and Gregory Lester, Jack Christensen of Northbrook, Ill., and Everett Smith of El Paso, Texas.

The racers will pilot two Eagle Talon TSi All-Wheel-Drive sports coupes and one Jeep Cherokee Laredo through Alaska and Canada's Yukon Territory and then up to the top of the globe, staking WMMS and WRIF's claim for kids.

"The ALCAN Winter Rally is now more than just the ultimate endurance test for man, woman and machine," said Martin R. Levine, general manager of Chrysler Motors' Jeep/Eagle Division. "We believe we've given this top-notch rally team the best vehicles to win this grueling race. However, the real winners are those people who support these hospitals in doing what they do best -- helping kids."

PHOENIX, AZ (JAN. 31) PR NEWSWIRE - Rudy R. Miller, chairman and chief executive officer of StatesWest Airlines Inc. (NASDAQ: SWAL) today announced W. James Lane has been elected president and chief operating officer of StatesWest Airlines Inc.

Miller stated: "Mr. Lane has been employed with StatesWest since 1988.

He has served as Vice President, Chief Financial Officer and most recently Executive Vice President. He has worked very closely with me this past year and has made major contributions to the Company's improved daily operational results. He has earned my respect and the right to oversee and meet the Company's day-to-day operational demands and assist me in directing the future growth of StatesWest."

"For me, in my new role as President, the excitement has just begun," Lane said. "I look forward to presiding over StatesWest's daily operations and working closely with our chairman as we continue to refine our business concept and pursue our expansion strategy."

StatesWest is one of the largest regional air carriers in the country not owned or totally affiliated with a major carrier. The company owns 7.34 percent of Mesa Airlines Inc. (NASDAQ: MESA), a regional airline carrier headquartered in New Mexico.

StatesWest operates one of the newest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County and San Diego, along with the Arizona cities of Phoenix, Scottsdale, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca, and Laughlin, Nevada/Bullhead City, Ariz. and Telluride, Colo. StatesWest operates 63 daily departures between these locations.

SALT LAKE CITY (JAN. 31) PR NEWSWIRE - Dynatronics Laser Corp. (NASDAQ: DYNT) announced today its second quarter and six months revenues and net income for the period ended Dec. 31, 1989.

Sales figures for the six month period were comparable to the like period in fiscal 1989. Net profits for the like period were $198,807 as compared to $349,598 in fiscal 1989.

Dynatronics' president, Kelvyn H. Cullimore, stated, "Dynatronics continues to add new products to our line of advanced-technology therapy and diagnostic equipment. This month, we have introduced three new devices which should add impetus to our sales and thus to our profits. Two of these devices will begin shipment this quarter; the third will be available for shipment in April."

#90031p0307 01/31/1990 ~PR Newswire

ST. LOUIS (JAN. 31) PR NEWSWIRE - In 1989, General Dynamics Corporation (NYSE: GD) achieved $10 billion of sales for the first time, it was announced today.

Net earnings for the full year were $293.1 million, or $7.01 per share. In the previous year, net earnings were $294 million, or $7 per share, on sales of $9.6 billion.

For the 1989 fourth quarter, net earnings were $82.8 million, or $1.98 per share, on sales of $2.6 billion, compared to $85.2 million, or $2.03 per share, on sales of $2.5 billion, for the same period a year earlier.

Although operating earnings were up 12 percent over the previous year, higher interest expenses reduced 1989 earnings per share by 24 cents for the quarter and 56 cents for the year compared to 1988. The growth in company borrowings and the corresponding increase in interest is the

result of changes during the 1980s in the tax laws and in DOD procurement policies, including the government requirement for industry to partially finance development of new programs.

"Our fourth quarter results reflect improved earnings from consistent cost reduction efforts at Land Systems as well as the continuing dramatic upturn at Cessna Aircraft, which recorded the highest quarterly earnings since it joined General Dynamics in late 1985," said Chairman and Chief Executive Officer Stanley C. Pace. "The increase in Cessna earnings is attributable primarily to higher deliveries, which were up 42 percent over those in the fourth quarter of 1988."

"Two items account for the reduction of operating earnings in our military aircraft business in the fourth quarter of 1989 versus the comparable period in 1988," Pace said. "First, expenditures for development of the Air Force's Advanced Tactical Fighter increased. Under our conservative method of accounting, we have written off each year all expenses incurred on this program in excess of revenue received. Now, that the great majority of the cost of this contract has been incurred, we have accelerated our 1989 ATF write-off to the extent that we do not anticipate future write-offs on this program as we move from design and construction to flight test and contract completion in 1990.

#90031p0309 01/31/1990 ~PR Newswire

PHILADELPHIA (JAN. 31) PR NEWSWIRE - Sun Distributors L.P. (NYSE: SDP) had net income of $5.5 million for the fourth quarter of 1989, up 77 percent from the $3.1 million earned in the fourth quarter of 1988, it was announced today by Donald T. Marshall, chief executive officer of the diversified industrial distribution firm based here.

Fourth quarter income per limited partnership unit was 49 cents compared to 28 cents in 1988.

Sales for the fourth quarter of 1989 were $140 million, an increase of more than 9 percent from $128 million in the same period of 1988. Marshall noted, "Sun Distributors' sales growth this quarter was well balanced between established operations and new acquisitions. This balance demonstrates the value of our ongoing acquisition program since there was some weakness in many of our established markets."

Sales for the full year 1989 were $562 million, up 16 percent from the $484 million of 1988. Net income for the year was $18.8 million, an increase of more than 52 percent from the $12.3 million earned in 1988.

Income per partnership unit was $1.67 for the year, up from the $1.10 earned in 1988.

"Our strong income performance in 1989 now makes it likely that separation of the partnership units into separately traded Class A and Class B interests will occur in the second quarter of 1990," Marshall said.

Sun Distributors continued its policy of monthly cash distributions to holders of limited partnership units with a total payment of 28 cents per unit in the fourth quarter.

#90031p0310 01/31/1990 ~PR Newswire

PITTSBURGH (JAN. 31) PR NEWSWIRE - Aristech Chemical Corp. (NYSE: ARS) announced today that the outside members of its board of directors have approved a definitive agreement under which a group led by Thomas Marshall chairman and chief executive officer of Aristech, and members of the company's management team, in association with Mitsubishi Corp., will acquire the company for $27 per share in cash for all outstanding common shares.

Under the terms of the agreement, a cash tender offer will promptly commence for all of the outstanding common shares of Aristech. The offer will be conditioned upon, among other things, the number of shares validly tendered; together with the number of shares being contributed by management, totalling a majority of the outstanding shares.

The agreement permits Aristech to continue to provide information to, and solicit proposals from, potential bidders other than Mitsubishi and the management group. The company has been told by Huntsman Holdings Corp. and GE Plastics that they may be prepared to offer "at least $27 per share" for the company unless materially negative information arises from due diligence, which they expected to complete within about two weeks. The company will permit Huntsman and GE Plastics to perform due diligence, subject to the terms and conditions of a confidentiality agreement between the company and Huntsman entered into last week.

The management group consisting of Marshall, chairman and chief executive officer; Craig R. Andersson, president and chief operating officer; Anthony F. Mastro, executive vice president-administration and chief financial officer; Charles W. Hamilton, senior vice president-Intermediate Chemicals and Specialty Products Division; and David F. Tuthill, general counsel and secretary, will purchase approximately 12.5 percent of the common stock equity of a new holding company of which Aristech will be a subsidiary. Another approximately 8.5 percent of the common stock equity

of the holding company will be granted to members of the management group in restricted common stock, which will vest over five years and be tied to five-year employment contracts. A broader group of Aristech management will have the opportunity to participate up to a total of approximately 11.5 percent in common stock equity of the holding company, which can be earned through performance incentives over a five-year period.

Aristech Chemical Corp., headquartered in Pittsburgh, is a producer and marketer of polymers and related products and basic, intermediate and industrial chemicals. It has manufacturing facilities located in Arkansas, California, Florida, Kentucky, Ohio, Pennsylvania, Texas and West Virginia. The company employs a total of 1,850 employees.

#90031p0311 01/31/1990 ~PR Newswire

COLUMBUS, IN (JAN. 31) PR NEWSWIRE - Arvin Industries, Inc. (NYSE: ARV) reported today that sales from continuing operations for 1989 increased 23 percent to $1.5 billion from $1.2 billion in 1988. Earnings per share from continuing operations were 70 cents compared to 69 cents in 1988. Earnings from continuing operations for the year were $19.7 million compared to $16.3 million earned in 1988. Net earnings for the year were $18.4 million.

Fourth quarter sales increased to $397 million from $310 million for the same quarter in 1988. Net earnings from continuing operations were $5.1 million or 17 cents per share compared to $5.6 million or 25 cents per share reported for the prior year fourth quarter.

James K. Baker, chairman and CEO, said, "The previously announced restructuring program is nearing completion. Non-recurring costs are now largely behind us, and more acceptable profit levels will appear by the second quarter of this year."

Employees in all U.S. exhaust system plants have accepted wage reductions of up to $3.00 per hour. As a result, margins are improving toward acceptable levels. The negative effects of start- up costs on new business with the Japanese transplants in the U.S. has diminished.

Fourth quarter results suffered from reduced volume as North America's auto producers reduced schedules significantly. Shipments of original equipment parts in Europe continued strong. The acquisition in September of APA, a leading European producer of shock absorbers and ride control products, contributed operating profits for the quarter. The replacement parts business in both the U.S. and Europe was strong and was boosted by the acquisition of a Canadian exhaust company. Market demand for Maremont

exhaust systems continued to increase. The technology business continued as planned since government research contracts were relatively unaffected by reductions in the federal budget.

Arvin Industries, Inc., an Indiana corporation, is a global Company whose products are sold in more than 100 countries in North and South America, the European Common Market, the Pacific Rim and the Third World.

HOUSTON (JAN. 31) PR NEWSWIRE - Global Marine Inc. (NYSE: GLM) today reported a net loss of $15 million U.S. dollars, or 15 cents per share, on revenues of $63 million for the quarter ended Dec. 31, 1989. In the corresponding period of 1988, the company reported a net loss of $58 million, or $1.85 per share, on revenues of $40 million. For the twelve months ended Dec. 31, 1989, the company reported a net loss of $61 million or 61 cents per share, on revenues of $188 million. For 1988, the net loss was $156 million or $5.14 per share, on revenues of $141 million. Cash and short term investments totaled $63 million at Dec. 31, 1989, compared to $65 million at Sept. 30, 1989. Results for 1989 reflect the implementation of the company's plan of reorganization, which was confirmed in February 1989. Accordingly, the loss per share amounts for the quarter and twelve months ended Dec. 31, 1989, were based on 100.1 million shares and 100.0 million shares, respectively, of new common stock compared to 33.4 million shares and 33.3 million shares, respectively, of the old common stock for the comparable periods of 1988.

C. Russell Luigs, chairman, president and chief executive officer commented, "Operationally, the company is performing much better than in recent years. Global Marine Drilling Company, our contract drilling subsidiary, increased the utilization rate of its offshore rigs to 88 percent in the fourth quarter, for an average of 70 percent for the year. Currently, every one of its 27 rigs is contracted, and the fleet average dayrate is the highest since 1985. Applied Drilling Technology Inc., our offshore turnkey drilling subsidiary, is generating record profits and cash. Challenger Minerals, our oil and gas subsidiary, is profitable and has modestly increased reserves."

Noting that the 1989 loss is less than half the 1988 loss, Luigs said that Global Marine expects offshore drilling markets to continue their gradual improvement. Although further quarterly losses are projected into 1990, full year results are expected to be substantially better than those of 1989.

Global Marine is a major international offshore drilling contractor with interests in oil and gas exploration and production.

#90031p0315 01/31/1990 ~PR Newswire

NEW YORK (JAN. 31) PR NEWSWIRE - The makers of Minute Maid, America's number one orange juice, have joined forces with the Trump Shuttle, the premium airline for business travelers, to raise the standards of travel and airline beverage service in the northeast.

Coca-Cola Foods today announced that the Trump Shuttle has switched to Minute Maid Premium Choice Orange Juice. On all Trump Shuttle flights, Minute Maid Premium Choice will be available in six-ounce cartons specially created for the airline.

The switch to Minute Maid Premium Choice is supported by a major Minute Maid Premium Choice advertising campaign, "starring" the Trump Shuttle, and a supermarket promotion called the Trump Shuttle Minute Maid Get-Away Sweepstakes, awarding more than 7,000 prizes to shoppers throughout the New York area.

According to Pierre Ferrari, senior vice president consumer marketing, Coca-Cola Foods, "We've brought together two recognized names, names with high quality, high profile, and high consumer approval. And, most important, great taste. We are naturally very pleased the Trump Shuttle has switched to Minute Maid Premium Choice."

Geoffrey T. Crowley, vice president, marketing for the Trump Shuttle, explained that the introduction of Premium Choice was a perfect companion to the changes now taking place on the planes.

"The switch to Minute Maid Premium Choice embodies the Trump Shuttle's objective of providing business travelers with high quality, including aircraft featuring amenities such as plush leather seats, extra legroom and Seatfones located at each row of seats," said Crowley.

A television commercial featuring the Trump Shuttle serving Minute Maid Premium Choice will begin airing in the northeast Jan. 31, and will run throughout March 11.

The television commercial, themed "Business As Usual," evokes the rich feeling of the Trump Shuttle. As the camera moves between passengers seated in leather seats, the narration says, "On the Trump Shuttle, it's business as usual...except for a few improvements...some you can see (the camera catches glimpses of people using Seatfones) ...some you can feel

(camera shows person reclining on leather seat) ...and one you can taste (camera shows people sipping Minute Maid Premium Choice Orange Juice) ...Because now, the only orange juice the Trump Shuttle serves is Minute Maid Premium Choice."

The television commercial was produced by Lowe Marschalk Advertising, New York.

"Initially, the television spot shows the quality of the airplane and the extent of its improvements," remarked Nanette Koryn, vice president, creative supervisor/art director for Lowe Marschalk. "Then we show the Minute Maid Premium Choice Orange Juice, which is of equally high quality."

The advertising and companion sweepstakes are part of a new "integrated account marketing" strategy being implemented by Coca-Cola Foods. According to Ferrari, integrated account marketing "simply allows a company and numerous retailers to work together on a single product promotion without jeopardizing the individuality of each retailer or its customer base."

More than 90 percent of metropolitan New York supermarkets are participating in "The Trump Shuttle Minute Maid Get-Away Sweepstakes", running from Jan. 29 through March 11 with customized promotional programs and winners at each chain. The sweepstakes will award grand prizes consisting of expense-paid trips for four to Boston or Washington. More than 7,000 companion airline tickets on the Trump Shuttle will be awarded as first prizes.

As part of the integrated account marketing strategy, Lowe Marschalk has produced 25-second versions of the Trump Shuttle television spot with a special five-second tag identifying each supermarket chain supporting the sweepstakes promotion.

There are also five companion Minute Maid radio commercials customized for the retailers. The commercials tell consumers that the Trump Shuttle is serving Minute Maid Premium Choice and announce the sweepstakes.

"Minute Maid Premium Choice has been selected by the Trump Shuttle, and we are confident discerning consumers in the northeast will be making the same choice," said Ferrari.

#90031p0318 01/31/1990 ~PR Newswire

DENVER (JAN. 31) PR NEWSWIRE - Media Image Corp., a Denver based corporation involved in the publication of yellow pages directories has completed its initial public offering of common stock.

60,000 shares were subscribed at an opening price of $5. The offering was underwritten by Malone & Associates Inc. of Denver. Total shares outstanding are 150,000 with approximately 90,000 held by management.

Media Image has recently published the CABLE YELLOW PAGES(TM), a national telephone directory for the cable television industry. According to Craig Chambers, president of Media Image, the directory has been very well received by users and vendors alike.

Chambers said that Media Image is now underway with its newest national telephone directory, the BROADCAST YELLOW PAGES(TM). 25,000 complimentary copies will be distributed this spring to over 12,000 radio and television stations across the country, to broadcast group owners, video and audio production companies, rep firms, advertising agencies, media buying services, industry trade organizations, schools of journalism and mass communications at major U.S. colleges and universities and various government agencies. Additional copies of the directory will be distributed and sold for a nominal charge after the initial complimentary distribution for a minimum annual circulation of 30,000 directories.

"Our telephone directory is unique in the broadcasting industry," says Chambers, "because of its format, inclusiveness and distribution. Patterned after the familiar residential yellow pages telephone directory, the BROADCAST YELLOW PAGES(TM) is designed to be a convenient and reliable source of all broadcast industry telephone numbers and vendor information." Chambers went on to say, "The broad scope of BROADCAST YELLOW PAGES(TM) and its distribution means that this directory will quickly become an important resource for radio and television station general managers, engineers, promotion directors, programers, news

directors, secretaries and others with an interest in the broadcasting industry."

The BROADCAST YELLOW PAGES(TM) will contain U.S. and Canadian area code reference information, a U.S. Government mini-directory, broadcast and communications calendar of events, a summary of various rules and regulations covering broadcasting and promotions and other useful broadcasting-oriented information.

Additionally, the telephone book will contain the call letters, addresses and telephone numbers of radio and television stations, group owners and the names, telephone numbers, listed by appropriate product/service heading of approximately 4,000 vendors and organizations that provide goods and services to the broadcasting industry.

Qualified vendors will be given one complimentary, one-line basic listing consisting of their organization's name, area code and telephone number under the product/service heading of their choice. Vendors will have a number of options to enhance their exposure in the directory by purchasing additional listings, using spot red, display advertising, pre-printed inserts and more. The BROADCAST YELLOW PAGES(TM) will be printed by US West Marketing Resources.

#90031p0322 01/31/1990 ~PR Newswire

PITTSBURGH (JAN. 31) PR NEWSWIRE - Allegheny International, Inc. (AI) (NYSE: AG) today reported its results for the first quarter of the 1990 fiscal year which ended on Dec. 31, 1989.

AI reported first quarter fiscal 1990 sales of $213.8 million and a net loss of $3.1 million, or a loss of $0.98 per common share. That compares to sales of $227.0 million and net earnings of $1.8 million, equivalent to a loss per common share of $0.53, for the first quarter of fiscal 1989.

AI's consumer products companies reported operating profit of $10.6 million in the fiscal 1990 first quarter, compared to an operating profit of $21.4 million in the fiscal 1989 first quarter.

Sales and operating profits of small appliances and bedding products in the U.S. were adversely affected in the first quarter of fiscal 1990 by highly competitive market conditions and an unstable retail environment. In addition, sales of closeouts and discontinued products in small appliances and patio furniture further lowered the operating margins in these businesses. Sales and operating profits in AI's small appliance companies in Mexico, Venezuela and Peru were also lower than in the first quarter of fiscal 1989, principally as a result of unsettled economic conditions in those countries and lower foreign currency exchange rates.

Pittsburgh-based AI manufactures and markets consumer products that include small household appliances, electric blankets, outdoor furniture, and barbecue grills.

MINNEAPOLIS (JAN. 31) PR NEWSWIRE - Black Hawk Holdings Inc. (NASDAQ:

BHHI), a Minneapolis-based operating company, announced today that Liberty Food Distributors Inc., one of its subsidiaries, finalized the sale of certain assets and liabilities of LVS Food Distributors Inc. to Jensen Acquisition Inc. (JAI).

Dennis Evans, Black Hawk chairman and chief executive officer, said "As a result of this divestiture, Black Hawk will incur a non-recurring charge of approximately $1,500,000 that will be reflected in 1989 financial results. Operating results at LVS had not met our expectations," Evans said, "and prospects for earning an acceptable return on the investment were limited." As Black Hawk has previously indicated to its shareholders this sale is in the long-term best interests of Black Hawk and its shareholders.

Black Hawk's common stock is traded on the over-the-counter market under the NASDAQ symbol "BHHI."

MORRIS TOWNSHIP, N.J. (JAN. 31) PR NEWSWIRE - Allied-Signal Aerospace Company's Bendix wheels and brakes division has been selected by a unit of McDonnell Douglas Corporation (NYSE: MD) to provide the landing-gear systems for the new F-15E Dual role fighter. Contract terms were not disclosed.

Allied-Signal will deliver 36 main nose and landing gear systems to McDonnell Aircraft of St. Louis beginning in December 1991. The contract includes options for an additional 48 systems. The F-15E is designed to perform air-to-ground missions while retaining the superior aerial combat capabilities of the earlier F-15.

The Bendix wheels and brakes division, located in South Bend, Ind., also produces wheels and carbon brakes for the McDonnell Douglas F-15, F-18, A-12 aircraft and landing gear systems for its A-12 aircraft.

Allied-Signal Aerospace is a unit of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive products and engineered materials.

TROY, MI (JAN. 31) PR NEWSWIRE - VOPLEX Corporation's (AMEX: VOT) Lapeer Operations in Lapeer, Mich., has earned Ford Motor Company's Q1 Preferred Quality Award, announced Voplex President and Chief Executive Officer Joseph Bauer.

Voplex, which manufactures interior and exterior trim products for the automotive industry including the Big Three automobile manufacturers, will receive its Q1 flag from Ford's Executive Vice President of North American Automotive Operations, Alexander J. Trotman, at a special luncheon in Dearborn, Mich., early in 1990.

"With the rising quality standards in today's automotive industry, suppliers are challenged to continually improve their products and processes," said Bauer. "Receiving the Ford Q1 Quality Award validates our commitment and efforts to meet the ever-changing and increasingly challenging standards of our industry."

Voplex's Lapeer Operations, which manufactures injection-molded interior trim products, pull handles and roof rail assist straps for Ford, was recommended for the Q1 Award by the automaker's North American Automotive Operations with its Wixom Assembly Plant's concurrence.

"Our hourly employees at Lapeer were vital to our getting this honor," said Bauer. "Their dedication and their acceptance of greater responsibility and accountability for the work they do have made this award possible.

"This same dedication and desire to produce best-in-class components will ultimately fuel our quest for Ford's Total Quality Excellence Award," he said.

VOPLEX products manufactured in Lapeer and at the company's other facilities in Vassar, Mich., and Canadaigua, N.Y., are currently used on a number of Ford, Lincoln and Mercury car and truck models.

VOPLEX is a $75-million Troy-based supplier company with automotive plants in Lapeer and Vassar, and an automotive/industrial products facility in Canadaigua, as well as an industrial plant in Rochester, N.Y. Product capabilities include decorative trim components and interior systems modules for the automotive industry as well as blow molded and injection molded products such as grease cartridges for industrial product industries.

RESEARCH TRIANGLE PARK, NC (JAN. 31) PR NEWSWIRE - Charles A. Sanders, M.D., chief executive officer of Glaxo Inc., has been appointed to the board of directors of London-based Glaxo Holdings, p.l.c. (NYSE: GLX), with responsibilities for Glaxo subsidiaries in North America. Dr. Sanders' appointment, effective today, was announced by Sir Paul Girolami, chairman of the leading British pharmaceutical company and one of the largest in the world. Sanders, 57, joined Glaxo Inc. as chief executive officer in July 1989, succeeding Ernest Mario, Ph.D, who was named chief executive of Glaxo Holdings, p.l.c.

Glaxo Inc., headquartered in Research Triangle Park, N.C., is the largest of Glaxo Holdings' 70 subsidiaries and associated companies and contributed over 40 percent of total Glaxo Holdings sales during fiscal 1988-89.

Sales of Glaxo Inc. for 1988-89 were $1.6 billion, up 28 percent from sales for 1987-88. For the past seven years, Glaxo Inc. has been the fastest-growing U.S. pharmaceutical company and currently ranks among the top four companies in its industry based on prescription sales. Among Glaxo products is the world's leading prescription- medicine, the anti-ulcerant Zantac(R) (ranitidine hydrochloride).

Sanders was also recently appointed the president of the New York Academy of Sciences. Previously, Sanders was vice chairman of Squibb Corporation and a member of its board of directors, where he was widely credited with significantly upgrading the company's drug research programs. Sanders was also chief executive of Squibb's science and technology group, and chaired the Squibb board's science and technology committee, which had responsibility for worldwide research and development for the firm.

Also appointed to the board was Hiroshi Konishi, president of Nippon Glaxo Limited and a director of Glaxo-Sankyo Limited, the group's associated companies in Japan, with responsibility for the Japanese associated companies.

In addition, Sir John Cuckney has been appointed a non-executive director of Glaxo Holdings p.l.c. Sir John is chairman of 3i Group p.l.c. and Royal Insurance Holdings p.l.c. and deputy chairman of TI Group p.l.c., as well as being a director of Brixton Estate p.l.c. and Lazard Brothers & Co., Ltd.

SAN FRANCISCO (JAN. 31) PR NEWSWIRE - In an appearance before investment analysts at a semiconductor industry conference today, Analog Devices'

(NYSE: ADI) President Ray Stata said that the company expects to report bookings of approximately $109 million and sales of approximately $110 million for the first fiscal quarter ended Jan. 27, 1990. Bookings for the first fiscal quarter of 1989 were $113.2 million and sales were $114.1 million, while bookings and sales for the prior quarter were $113.3 million and $110.9 million, respectively.

Stata explained that the primary reason for the quarter-to-quarter declines in bookings and sales was the continuing broadbased slowdown in the U.S. semiconductor market. He noted that Analog's bookings in Europe and the Far East showed increases from the fourth to first quarter. Stata also said that although the second quarter normally shows a strong increase in bookings, the outlook for this year is clouded by the widespread malaise in the U.S. electronics industry. On a positive note, Stata said he expects robust growth in new products to continue even with continued weakness in the sales of older products. Analog expects to formally announce its first quarter results on Feb. 14, 1990.

Analog Devices is a leading manufacturer of precision high- performance integrated circuits used in analog and digital signal processing applications. The company also manufactures modular and board-level products used in computerized data acquisition and measurement and control applications. The company employs approximately 5,200 people worldwide, with manufacturing facilities in Massachusetts, North Carolina, the United Kingdom, Ireland, The Philippines and Japan.

DALLAS (JAN. 31) PR NEWSWIRE - The Southland Corp. today completed the sale of its 50 percent interest in Citgo Petroleum Corp. for $661.5 million in cash. As previously announced, net proceeds of the transaction will be used to further reduce Southland's LBO-related senior bank debt.

Citgo will continue to supply Southland's convenience retailing operations with high-quality, Citgo-brand gasoline under a long-term product purchase agreement.

Southland is the world's largest convenience retailer, with approximately 7,000 7-Eleven and other convenience units, including 2,650 locations where gasoline is sold. In 1989, Southland sold 1.47 billion gallons of gasoline. The company's retail units are supported by the five Southland Distribution Centers, as well as the Southland Foods Division's six food centers. In addition, area licensees and affiliates operate more than 5,800 7-Eleven stores in the United States and 21 foreign countries.

MT. PROSPECT, IL (JAN. 31) PR NEWSWIRE - Zenith Data Systems' most

popular portable computer will soon be available through the Sears network of "Brand Central" home electronics departments, under an agreement announced today by the two companies.

The largest Sears Brand Central locations will start selling the Zenith Data Systems (ZDS) SupersPort 286 Model 20 laptop computer early in the first quarter of 1990, according to executives at both firms. Terms of the agreement were not disclosed.

"Our agreement with Sears is the beginning of the second part of our new distribution strategy, which we recently announced," said ZDS Vice President of Sales, Robert Poznanovich. "We want to work with a few, key national merchandisers who can reach the growing home office market with our mainstream products, and we're delighted that Sears has become the first to join us in this effort.

"To reach businesses looking for our high-end products, we've already started to recruit about 500 full-line computer resellers, who will be our 'medallion' dealers," he said.

"We're pleased to have developed a strong partnership with Sears, a quality organization that also has Chicago roots. They have the marketing clout to help strengthen ZDS brand loyalty, plus they share our commitment to customer service," Poznanovich said.

The SuperPort 286 Model 20 laptop computer offers four hours of battery operation, a 20-megabyte hard drive and a large backlit screen that displays in a double-scan (640 X 400) CGA mode. It operates with an 80C286 processor running at 12-megahertz and includes 1-megabyte of memory which is expandable to 2-megabytes.

ZDS, a Groupe Bull company, is a leading manufacturer and marketer of portable and desktop microcomputers and monitors for single- and multi-user applications. With headquarters in Mount Prospect, Ill., and principal final assembly operations in St. Joseph, Mich., ZDS has manufacturing and sales facilities in more than 20 countries.

EAST HARTFORD, CT (JAN. 31) PR NEWSWIRE - Aeritalia Societa Aerospaziale Italiana of Italy, has been selected by Pratt & Whitney to share in the production of nacelles for the PW4000 engine version being developed for the Airbus A330 airliner.

The nacelle is the structure on the airplane that houses the engine. The agreement provides for Aeritalia to share 18 percent of the PW4000 nacelle program. The company will design, develop and manufacture major components of the nacelle.

Pratt & Whitney is currently developing a higher thrust version of its popular PW4000 engine for the A330 aircraft. The engine will be certified at 68,000 pounds of thrust in 1992 for the A330. The engine currently operates in the 60,000-pound-thrust range.

Aeritalia, headquartered in Naples, Italy, is a designer and builder of aircraft, aerospace systems and subsystems.

Pratt & Whitney is a unit of United Technologies Corp. (NYSE: UTX) of Hartford, Conn.

#90031p0352 01/31/1990 ~PR Newswire

COLUMBIA, MD (JAN. 31) PR NEWSWIRE - The Ryland Group Inc. (NYSE: RYL) today announced that its strong fourth quarter led to its fifth consecutive year of record net earnings, increasing its 1989 results by 43

percent over 1988.

Net earnings for the year ended Dec. 31, 1989 were $58 million compared to $40.7 million in 1988. Primary earnings per share for 1989 were $4.30 compared to $3.10 per share in 1988. These 1989 figures include an increase of $14 million, or $1.05 per share, from the company's adoption of Statement of Financial Accounting Standards (SFAS) No. 96 for accounting for income taxes.

Fourth-quarter net earnings (excluding SFAS 96) were $18 million, up 72 percent from 1988's fourth-quarter of $10.5 million. Primary earnings per share for the quarter were $1.31, compared to the $.80 per share reported last year.

The company also reported record revenues of $1.4 billion in 1989, a 10 percent increase over 1988's revenues. For 1989, Ryland's homebuilding revenues reached a record high of $1 billion, compared to $892 million in 1988.

Revenues for the fourth quarter were $398 million compared to $343 million in 1988. Revenues for Ryland's homebuilding operations were $308 million, up 25 percent from 1988's fourth quarter total of $247 million.

However, new sales contracts signed in the fourth quarter declined 15 percent from 1988's fourth quarter.

"This is the fifth consecutive year in which we have been able to earn a return on equity above 20 percent," said C.E. Peck, chairman of the board. "Geographic diversification of our homebuilding has proven to be a good strategy, enabling us to balance the highs and lows of the local markets in the 17 states in which we are active. Ryland Mortgage Company's consolidated profits, while down from those of 1988, accounted for 18 percent of The Ryland Group's total profits before the extraordinary item.

"Although the economic climate for homebuilding in 1990 is uncertain at this time, we enter the year with a good backlog of 3,126 homes. Current traffic activity at our sales centers is equivalent to last year's record levels," said Peck.

The Ryland Group Inc., one of the nation's largest homebuilders, has built more than 90,000 homes since it was founded in 1967.

#90031p0354 01/31/1990 ~PR Newswire

GREENVILLE, SC (JAN. 31) PR NEWSWIRE - Walter E. Bartlett, Chairman of the Board and Chief Executive Officer of Multimedia (NASDAQ-NMS: MMED), announced today that 1989 operating profit rose by 11 percent to $163.7 million, with operating cash flow(a) increasing ten percent to $195.0 million.

Each of the Company's four operating divisions produced increases in operating cash flow(a) in 1989. Newspaper cash flow(a) increased two percent to $49.9 million; Broadcasting cash flow(a) increased one percent to $55.4 million; Cablevision cash flow(a) increased 12 percent to $54.5 million and Entertainment cash flow(a) increased 31 percent to $40.8 million.

For the year, consolidated revenues were $462.7 million, up five percent from $439.6 million for 1988. Interest expense for 1989 totalled $102.1 million, compared with $108.3 million for 1988. Interest expense for the year included $57.4 million of amortization of original issue discount for debentures.

The company had net earnings for 1989 of $38.7 million, compared with net earnings of $26.9 million for 1988. Net earnings for 1988 included an after-tax gain of approximately $2.0 million resulting from the sale of WZTV Channel 17 in Nashville and Multimedia Entertainment of Tennessee. Net earnings per share for 1989 were $3.11 compared with $2.20 for 1988.

Net earnings for both 1989 and 1988 were favorably affected by fourth quarter adjustments to reduce the annual expected income tax rates for financial reporting purposes from 42 percent to 37 percent in 1989 and from 46 percent to 37 percent in 1988.

These adjustments increased earnings per share by $.24 in 1989 and $.31 in 1988. The tax adjustments were primarily attributable to settlements with the Internal Revenue Service related to contested tax liabilities for prior years. The contested items principally related to income tax matters regarding acquisitions.

Revenues for the fourth quarter were $122.5 million, up four percent. Operating profit for the quarter was $47.3 million, compared with $43.3 million in 1988, a nine percent increase.

Net earnings for the fourth quarter were $15.5 million, compared with $13.1 million in 1988. For the quarter, operating cash flow(a) increased nine percent from $50.3 million to $55.0 million.

Multimedia is a diversified media communications company headquartered in Greenville, South Carolina which publishes 14 daily and 43 non-daily newspapers, owns and operates four television and seven radio stations, operates more than 100 cable franchises in four states, and produces and

syndicates quality television programming, including the Phil Donahue and Sally Jessy Raphael shows.

(a) - Operating cash flow, as defined by the Company, is operating profit plus depreciation and amortization, and amortization of stock awards and stock options.

CONTACT: Elizabeth S. Mills, vice president of Corporate Communications for Multimedia, Inc., (803) 298-4393 or (803) 298-4389.

COATESVILLE, PA. (JAN. 31) PR NEWSWIRE - Directors of Lukens Inc. (NYSE: LUC) today increased the company's quarterly dividend on common stock, payable on Feb. 23, 1990, to stockholders of record on Feb. 12, to $.35 a share from the previous $.30 a share.

Lukens Inc. paid dividends in 1989 totalling $1.10 a share. The quarterly

dividend was last increased from $.25 a share to $.30 a share in the third quarter of 1989.

Lukens reported record 1989 earnings of $41.5 million, or $4.73 a share, on sales of $645 million on Jan. 23. By comparison, 1988 earnings were $33.4 million, or $3.91 a share, on sales of $605.3 million.

#90031p0373 01/31/1990 ~PR Newswire

KANSAS CITY, MO (JAN. 31) PR NEWSWIRE - Harmon Industries Inc. (NASDAQ: HRMN), of Blue Springs, Mo., the nation's most fully integrated supplier to railroad companies, reported higher sales and lower earnings for the year ended Dec. 31, 1989. Results for the fourth quarter were mixed when compared to 1988.

For the year, sales increased from $64.6 million in 1988 to $73.3 million in 1989. Net earnings decreased from $2.5 million, or 55 cents per share in 1988, to $1.2 million, or 25 cents per share in 1989.

For the fourth quarter, sales were up from $15.6 million in the fourth quarter of 1988 to $18.4 million for the quarter ended Dec. 31, 1989. Earnings for the fourth quarter were down slightly from $332,000 or 7 cents per share in 1988, to $319,000 or 7 cents per share in 1989.

"The results for the fourth quarter were significantly better than the third quarter," said Robert E. Harmon, chairman and president of Harmon Industries. He further commented, "The fourth quarter results benefited from the receipt of a litigation settlement as more fully described in the footnotes to the earnings statement. Also included are change orders which reversed some of the loss on long-term contracts that was recognized in the third quarter."

The company reports that Cedrite Technologies Inc. is now producing reconstituted railroad ties around-the-clock. Production continues to increase and the installation of the second press currently is on schedule with an anticipated start-up date late in the first quarter of 1990.

Harmon further reported, "We know there is a long-term need for the recycling of crossties through the Cedrite process. Our challenge is to continue to make production as efficient as possible."

Phoenix Data Inc., which manufactures scientific high-speed data acquisition and test measurement systems, continues to suffer because of a lack of sales which are dependent on the military and aerospace industries. Cut-backs in federal spending are causing projects to be

delayed.

WILMINGTON, DEL./ROME, ITALY (JAN. 31) PR NEWSWIRE - Hercules Inc. (NYSE: HPC) and Intermarine SpA of Italy (Ferruzzi Group) today announced that Intermarine SpA has agreed to purchase Hercules' interest in Intermarine U.S.A., a shipbuilding venture in Savannah, Ga.

Terms of the transaction were not disclosed.

Intermarine U.S.A., a joint venture between Hercules and Intermarine SpA, was formed in 1987 to produce a new class of glass reinforced plastic (GRP) minehunters for the U.S. Navy. Approximately 17 Osprey class vehicles are slated for production.

The U.S. Navy's larger GRP Osprey class minehunters are based on the proven Lerici class vessels produced by Intermarine SpA for the Italian, Malaysian and Nigerian navies. The ships are designed to effectively counter the threat of today's highly sophisticated, microprocessor-equipped mines.

Hercules Inc. is a diversified, multi-national supplier of natural and synthetic materials, products and systems, with more than 80 plants throughout the world.

The Ferruzzi Group is an integrated industrial system operating worldwide in the agroindustrial and chemicals sector.

NEW YORK (JAN. 3) PR NEWSWIRE - PaineWebber Incorporated today announced the offering of the PaineWebber Classic Europe Growth Fund, a proprietary mutual fund with shares available exclusively through PaineWebber and its corresponding firms. The fund raised $107 million in assets on its first offering day.

The fund's objective is to seek long-term capital appreciation through investment primarily in equity securities of European companies.

Herve van Caloen, vice president responsible for continental European

equities for Mitchell Hutchins Asset Management Inc. (the money management subsidiary of PaineWebber Incorporated), will serve as portfolio manager for the fund. van Caloen is uniquely qualified to concentrate his efforts on the European arena. Educated at the European University, Antwerp, Belgium, he has been a European securities analyst since 1985.

Van Caloen said, "With worldwide attention riveted on the reordering of Europe, we believe that now is the time for investors to pursue long- term capital appreciation in the European equity markets. Over the last decade diversification through overseas investments has led to increased investment opportunity, reduced risk and a potential for high returns. Europe now accounts for over 20 percent of the total world equity market capitalization."

The PaineWebber Classic Europe Growth Fund will invest in a diversified portfolio of select European equities that, in the opinion of Mitchell Hutchins, offer the best potential for capital appreciation, regardless of industry category or country of origin. In making investment decisions for the fund, the portfolio manager will consider such factors as the condition and growth potential of the various economies and markets, currency, taxation and other political and social factors.

The minimum initial investment in the PaineWebber Classic Europe Growth Fund is $1,000, and the minimum for additional purchases is $100. Shareholders in the PaineWebber Classic Europe Growth Fund are also entitled to automatic reinvestment of dividends at no charge, a systematic withdrawal plan, an automatic investment plan, and exchange privileges among PaineWebber Family of Funds and Classic Funds.

A prospectus for the PaineWebber Classic Europe Growth Fund is available from any PaineWebber investment executive. It contains further information on sales charges and expenses and investors should read the prospectus carefully before investing or sending money.

PaineWebber Incorporated is a leading full-service securities firm which serves the investment and capital needs of a worldwide client base.

#90031p0384 01/31/1990 ~PR Newswire

AKRON, OH (JAN. 31) PR NEWSWIRE - Telxon Corporation (NASDAQ/NMS: TLXN) today reported a net loss of $1.6 million, or $.12 per share, for the third quarter ended December 31, 1989.

That compares with net income of $3.8 million, or $.29 per share, in the

third quarter of fiscal 1989. Third-quarter revenue totaled $37.1 million compared with $39.4 million in the fiscal 1989 third quarter.

For the first nine months of fiscal 1990, Telxon reported a loss of $5.1 million, or $.38 per share, on revenue of $107.7 million.

That compares with net income of $11 million, or $.84 a share, on revenue of $111.9 million for the same period a year ago.

"We are making solid progress toward our goal of improving our balance sheet for long-term profitability," said Raymond D. Meyo, Telxon president and chief executive officer.

"We've seen an approximate 20 percent improvement in days sales outstanding (DSO), down to 102 days from 126 days in the second quarter, and our accounts receivable levels have been reduced more than 24 percent since our fiscal 1989 year-end," he said.

"Inventory levels have been reduced 10 percent since the second quarter, down to $39.2 million from $43.5 million. And cash and cash equivalents increased $3.5 million since the second quarter, primarily due to inventory and accounts receivable reduction programs."

Dan R. Wipff, Telxon senior executive vice president, chief operating officer and chief financial officer, estimated that of the $3.4 million pre-tax loss for the third quarter, approximately $200,000 to $500,000 was attributable to the quarter's loss from operations.

Special charges against earnings were taken as part of the company's continuing efforts to reduce its cost structure. Specifically, the third-quarter results reflect the following charges:

- $1 million for severance and other reorganization costs
- $900,000 in adjustments to reflect principally two customer accounts deemed uncollectible
- $900,000 in inventory adjustments

Telxon portable tele-transaction computers (PTCs) gather, process and store on-site, real-time data which is communicated to a host computer. These systems incorporate the company's proprietary operating and applications software, associated peripheral equipment and communications devices.

Telxon's executive and engineering offices are located in Akron, Ohio, and its manufacturing facility is in Houston. Telxon customers are served by 41 sales and service offices worldwide.

#90031p0385 01/31/1990 ~PR Newswire

DALLAS (JAN. 31) PR NEWSWIRE - Dorchester Hugoton Ltd. (NASDAQ: DHULZ) today announced that net earnings for the year ended Dec. 31, 1989 totalled $2,862,000 or 26 cents per unit on revenues of $5,853,000 compared to $2,831,000 or 26 cents per unit on revenues of $5,132,000 for 1988. Production volumes were up modestly but a volatile spot market kept sales prices at depresed levels.

Net earnings for the fourth quarter ended Dec. 31, 1989 were $637,000 or five cents per unit on revenues of $1,441,000 compared to $713,000 or seven cents per unit on revenues of $1,434,000 for the previous year's fourth quarter.

NEW YORK (JAN. 31) PR NEWSWIRE - Investment Dealers' Digest Inc. (IDD) announced today the acquisition of the leading U.S. insurance automation magazine, Insurance Software Review, from International Computer Programs (ICP) of Indianapolis.

Insurance Software Review has been recognized as an invaluable source of information on insurance technology for almost 15 years, and is the sole publication that exclusively addresses the concerns of the home-office computing professionals of insurance carriers.

"We are delighted to add Insurance Software Review to IDD's Computer Publishing Division," said Eugene Duncan, group publisher and vice president. "IDD is already well known for providing timely, in-depth coverage of the automation trends within other segments of the financial services business through Wall Street Computer Review and Computers in Banking. Insurance Software Review extends our coverage and enables us to generate additional publishing opportunities within this field. Advertisers now will have unprecedented ability to reach key automation decision makers -- executive and technical -- in the three key segments of the financial services industry, by dealing with one firm." Duncan said that a "network buy" for all three IDD computer magazines would now be possible. This will allow automation providers that target all three segments -- insurance, investment banking and commercial banking -- to leverage their advertising spending while increasing their reach.

IDD is a New York based financial/computer publishing and electronic information services company. In addition to its Computer Publishing Division, IDD includes a Financial Publishing Division, with its most prominent title the weekly IDD Magazine, the leading news publication for the investment banking community. IDD Information Services is a wholly owned subsidiary of IDD that offers electronic data base services directly to financial professionals -- including new corporate and public finance

issues, mergers & acquisition transactions, and historical equity information through its Tradeline data base. IDD information is also available through Dow-Jones News Retrieval Service, Dialog Information Services, and Lotus One-Source.

IDD is a member of the United Newspapers Group, based in London.

MIAMI BEACH, FL (JAN. 31) PR NEWSWIRE - Jefferson Bancorp, Inc. (NASDAQ: JBNC), a publicly held bank holding company headquartered in Miami Beach, today declared a cash dividend of fifty cents a share on its issued and outstanding shares of common stock. The dividend will be paid on Feb. 28, 1990 to stockholders of record on Feb. 12, 1990. This is the company's second ever cash dividend, the first having been paid on Feb. 28, 1989.

Arthur H. Courshon, chairman of the board of Jefferson Bancorp, Inc., stated that "the board felt that because the company remains one of the most highly capitalized bank holding companies in the nation, a cash dividend is appropriate at this time." He added that no decision has yet been made with respect to whether a stock dividend will be declared later in the year.

Jefferson Bancorp, Inc., owns and operates three banks with 12 offices in Miami Beach, Key Biscayne, Northeast Dade, Sunny Isles, West Boca Raton, Hollywood, Fort Lauderdale and Lauderdale Lakes.

#90031p0397 01/31/1990 ~PR Newswire

WASHINGTON (JAN. 31) PR NEWSWIRE - In its fight to get anti-dumping duties levied on Japanese-made mechanical transfer presses, Chicago- based Verson Division of Allied Products Corporation (NYSE: ADP) won the final round today with an affirmative ruling (5-1) by the International Trade Commission (ITC).

The decision culminated a year-long investigation dating back to Jan. 12, 1989, when Allied's Verson Division, along with the United Auto Workers of America and the United Steelworkers of America, jointly petitioned the ITC and Department of Commerce to investigate the pricing practices of the Japanese manufacturers of transfer presses. In February 1989, the ITC ruled preliminarily that material injury had occurred as a result of

imports. The case then moved to the Department of Commerce (DOC). DOC ruled in favor of Verson on Dec. 27, 1989. Today's ITC ruling means that the DOC can issue an anti-dumping duty order, which will result in additional duties being imposed on imports from Japan. The additional duties will range from 7.49 percent to 15.16 percent depending on the identity of the Japanese producer. The additional duties will be significant because the machines can cost as much as $10 million each.

"We feel vindicated," said Martin A. German, corporate vice president of Allied Products Corporation. "Today's decision is a major victory and will help to restore competitive fairness to the marketplace," he continued. "I hope it will mean a resurgence for our advanced segment of the machine tool industry."

According to Paul Rosenthal, a partner and international trade specialist with the Washington law firm of Collier, Shannon & Scott, and counsel to Verson: "This case is one of the first major anti-dumping actions by the machine tool industry and shows that the unfair trade laws can be applied to even these incredibly complex machines. As the economy softens, there is likely to be an upsurge in these kinds of cases by the industry."

Imports of mechanical transfer presses from Japan in 1988 were valued at $109 million. U.S. buyers of such equipment include auto and appliance manufacturers and other metalworking industries.

Allied Products Corporation manufactures agricultural equipment, transportation/industrial products and chemical specialties. Its Verson Division is headquartered in Chicago and has been in the business of manufacturing transfer presses since 1939.

#90031p0398 01/31/1990 ~PR Newswire

CINCINNATI (JAN 31) PR NEWSWIRE - The E.W. Scripps Company (NASDAQ: EWSCA) today said net income in 1989 increased to $89.3 million, $1.14 per share, from $70.1 million, 93 cents per share, in 1988. In the fourth quarter net income was $31 million, 40 cents per share, versus $22.5 million, 29 cents per share, a year ago.

"Despite facing a difficult advertising environment throughout the year, all three of our business segments achieved higher operating income," said Lawrence A. Leser, president and chief executive officer.

"The maturing of our cable operations and the decline in our interest

expense were key to the strong showing in 1989."

Excluding unusual gains and losses in both years, net income in 1989 increased 26 percent and net income per share increased 21 percent. The average number of shares outstanding was 3.1 million higher in 1989, which diluted the year-over-year improvement in income per share.

In the fourth quarter, net income per share rose 19.4 percent, excluding the unusual items.

Interest expense decreased $2.3 million in the quarter and $12.5 million in the year. Long-term debt was reduced $50 million in the last 12 months.

The effective income tax rate in 1989 was 43.7 percent, down from 46.3 percent in the prior year.

Consolidated operating income increased 7.6 percent to $214 million on a 4.3 percent revenue increase to $1.27 billion.

Operating income from the publishing division moved up 3.1 percent to $146 million. The cost of newsprint fell $5.3 million, or 3.9 percent.

Newspaper advertising revenues were up 3.5 percent, excluding divested operations. Broken down by category, local retail advertising increased 4.6 percent to $255 million; classified 3.7 percent to $178 million, and preprints 3.4 percent to $66.5 million. National advertising declined 5.6 percent to $31.9 million.

Character licensing revenues were $69.1 million, off 0.6 percent from 1988. The decline was attributable to the strength of the U.S. dollar versus foreign currencies.

Total publishing division revenues increased 2.4 percent, excluding divested operations.

Operating income from broadcasting increased 2.6 percent to $58.5 million. Costs for syndicated television programming were up 6.1 percent, to $46.3 million, compared to an increase of 28 percent in 1988.

Broadcasting revenues increased 4 percent to $223 million. Year-to-year revenue comparisons were difficult because of the heavy volume of political advertising in 1988. Political advertising decreased $6.2 million year-over-year. Also, 1988 revenues benefited from broadcast of the Olympic games in the first and third quarters.

Operating income from cable television improved $9.9 million to $22.2 million, primarily the result of improved income at the Sacramento, CA, system. Cable television revenues grew 18.6 percent to $177 million.

Sacramento added 10,000 basic subscribers in the year for a total of 167,000 at December 31. Total subscribers increased 27,000, to 558,000.

Consolidated operating income increased 1.8 percent to $68.5 million and revenues increased 3.2 percent to $346 million.

Operating income from the publishing division decreased 0.4 percent in the fourth quarter. The cost of newsprint declined $2.1 million, or 5.9 percent.

Newspaper advertising revenues were up 3.5 percent to $143.5 million. Local retail advertising increased 4.4 percent to $72.9 million; classified 4.2 percent to $42.4 million, and preprint 3.1 percent to $19.7 million. National advertising declined 5.6 percent to $8.5 million.

Licensing revenues fell 16.5 percent to $18.2 million. The decline was primarily attributable to several products and promotions in 1988 which did not repeat in 1989 and the strength of the U.S. dollar against foreign currencies.

Total publishing division revenues increased 2.8 percent, excluding divested operations.

Operating income from broadcasting increased 0.4 percent to $20.9 million. Costs for syndicated television programming fell 9.1 percent to $11.5 million.

Broadcasting revenues increased 0.7 percent to $62.7 million. Political advertising decreased $4.2 million compared to the year- ago quarter.

Operating income from cable television improved $2.0 million, to $6.9 million. Improved results in Sacramento provided much of the lift. Cable television revenues grew 15 percent to $46.2 million.

Total basic subscribers grew by 19,000 in the quarter; 3,000 of those were added in Sacramento.

The E.W. Scripps Company is a diversified media company which operates 19 daily newspapers, nine television stations, five radio stations and cable television systems with 558,000 basic subscribers. The Company also is a worldwide syndicator and licensor of news features and comics, including "Peanuts" and "Garfield."

#90031p0405 01/31/1990 ~PR Newswire

CINCINNATI (JAN. 31) PR NEWSWIRE - Scripps Howard Broadcasting (NASDAQ: SCRP) today said net income rose 27 percent in 1989.

Net income in 1989 was $21.0 million, $2.04 per share, versus $16.5 million, $1.60 per share, in 1988. For the fourth quarter, net income was $9.0 million, $.87 per share, up 9 percent from fourth quarter 1988.

Improved operating income from cable television and $1.1 million decrease in interest expense were key to the Company's strong showing in 1989.

Long-term debt was reduced $50 million in the last 12 months to $239 million.

Consolidated operating income for 1989 increased 15.4 percent to $67.7 million. Revenues were up 9.4 percent to $300 million.

Operating income from television and radio increased 2.3 percent to $59.6 million. Costs for syndicated television programming were up 6.1 percent to $46.3 million, compared to an increase of 28 percent in 1988.

Television and radio revenues increased 4 percent to $223 million. Year-to-year revenue comparisons were difficult because of the heavy volume of political advertising in 1988. Political advertising decreased $6.2 million year-over-year. Also, 1988 revenues benefited from the broadcast of the Olympic games in the first and third quarters.

Operating income from cable television improved $7.3 million, to $11.7 million, primarily the result of improved income at the Sacramento, CA, system. Cable television revenues grew 28 percent to $77.7 million. Sacramento added 10,000 basic subscribers in the year for a total of 167,000 at Dec. 31. Total subscribers increased 13,000 in the year to 226,000.

Fourth quarter operating results: Operating income from television and radio decreased 0.3 percent to $21.1 million. Costs for syndicated television programming fell 9.1 percent to $11.5 million.

Television and radio revenues increased 0.7 percent to $62.7 million. Political advertising decreased $4.2 million compared to the year-ago quarter.

Operating income from cable television improved $2.2 million, to $4.3 million. Improved results in Sacramento provided much of the lift. Cable television revenues grew 19.9 percent to $20.6 million.

Total basic subscribers grew by 8,000 in the quarter: 3,000 of those were added in Sacramento.

Scripps Howard Broadcasting, an 80.4-percent-owned subsidiary of The E.W. Scripps Company, (NASDAQ: EWSCA) operates nine television stations, five radio stations and cable television systems with 226,000 basic subscribers.

NASHVILLE, TN (JAN. 31) PR NEWSWIRE - Coventry Corp., parent company of Pittsburgh-based HealthAmerica, has announced completion of a merger with Group Health Plan Inc. (GHP) of St. Louis.

GHP is the largest health maintenance organization in the St. Louis market providing health care to over 107,000 enrollees representing 600 local employers. The HMO was founded in 1978.

Joseph P. Williams, president and chief executive officer of Coventry, said, "We are fortunate to have the opportunity to acquire another staff model HMO which is a market leader. GHP has a proven track record of

providing quality health care to its members as well as being profitable over a long period of time. With the introduction of new health insurance-related products, we believe the HMO will enjoy even greater growth in the years ahead."

Coventry is an integrated managed health care organization with HMO operations in Pittsburgh and Harrisburg, Pa., and insurance operations in 40 states. It provides services to over 400,000 persons at these various locations.

CHICAGO (JAN. 31) PR NEWSWIRE - The Quaker Oats Company (NYSE: OAT) and its subsidiary, Golden Grain Company, have settled a lawsuit pending against Rice-O-Rollies, Inc. of Coconut Creek, Fla. The suit, which was filed Oct. 3, 1989 in the Southern District of Florida (Fort Lauderdale Division), claimed that the rice ball product ''Rice-O-Rollies'' infringed on Golden Grain's ''Rice-A-Roni'' trademark.

By agreement, Rice-O-Rollies, Inc. will discontinue all use of the ''Rice-O-Rollies'' name within 90 days after entry of the court order concluding the case.

Quaker is headquartered in Chicago. Golden Grain is located in San Leandro, Calif.

DALLAS (JAN. 31) PR NEWSWIRE - Southwest Airlines (NYSE: LUV), the airline headquartered at Dallas Love Field, has announced a program designed to give its customers one free companion ticket for each roundtrip flown having a cost of $78 or more (minimum $39 fare each way).

Dubbed the Valentine Parter Pass, the program is available to Southwest's Company Club members and allows them to accumulate up to four passes. Southwest officials said that while reservations for the free travel are required, seats for the program are not limited nor are there stay-over requirements.

In making the announcement, Donald G. Valentine, vice president-sales and marketing for Southwest, said, "All our customers have to do is be a

Company Club member, fly between Feb. 1 and March 15, 1990, and they will receive one free roundtrip companion ticket for every roundtrip that they pay for having a fare of $78 or more (minimum $39 fare each way).

The free companion ticket can be used by the companion of choice to accompany the Company Club member when the member flies at full fare from April 16 through May 23, 1990, or Sept. 5 through Oct. 31, 1990.

Valentine added that every time the Company Club member travels during the applicable times and he has his card validated, the company will automatically credit the flight to his account and mail the Valentine Partner Passes to the Club member during the second week of April.

"In addition," Valentine said, "current Company Club awards will continue in effect and will be in addition to the Valentine Partner Pass Program."

CALGARY, ALBERTA (JAN. 31) PR NEWSWIRE - Western Resources Minerals Limited (WRML)(Alberta: WTN) announced today that it has recently put three wells on production. A gas well in the Michichi, Alberta area began production Dec. 9, 1989, and has averaged between 1.5 and 2.0 MMCF/D to date. Production from this well has been restricted by transportation availability. WRML has a 50 percent working interest in this well until payout and reverting to a 30 percent working interest after payout.

Two oil wells also commenced production in the Grand Forks, Alberta area in late 1989 and are currently producing 165 B/D of which WRML's share is 34 B/D.

WRML's production in the first nine months of 1989 before these wells was 69 B/D and 414 MCF/D.

WRML is 50.9 percent owned and managed by Cavalier Energy Limited and is traded on the Alberta Stock Exchange.

#90031p0445 01/31/1990 ~PR Newswire

HOUSTON (JAN. 31) PR NEWSWIRE - Amoco Production Company today said it has tested significant amounts of natural gas and condensate from a Gulf of Mexico well drilled in 3,492 feet of water, a world record water depth for the flow testing of natural gas.

Located some 70 miles east of the Mississippi River Delta, the Viosca Knoll 957 well No. 1-Sidetrack 2 flowed during a four-day test at a stabilized rate of 22.5 million cubic feet of natural gas and 2,670 barrels of condensate daily from about 13,000 feet. The natural gas and condensate flowed through a 46/64-inch choke with an average flowing tubing pressure of 2,800 pounds per-square-inch.

The tested well is the most recent of 12 deep-water exploratory and delineation wells drilled from five surface locations by Amoco Production, Exxon Company, U.S.A, and Shell Offshore, Inc., working interest partners in the Viosca knoll 912 unit.

According to Dave Work, Amoco Production Company vice president in Houston Amoco with Exxon worked for about two years to plan a successful production test that would provide valuable information to be used in the planning for field development.

"We are required to address significant economic concerns and operational difficulties when planning for production in deep water," Work said. "With more information about the reservoir, we are better equipped to plan successful development."

Work said that information gained during the test about factors such as the composition of the reservoir fluid, flow capacity, and sand continuity in the reservoir will assist engineers as they plan development of the Viosca Knoll 912 unit.

The field unit, commonly referred to by partners as the RAM/Powell

prospect, covers a surface area of approximately 46,000 acres in water depths from 2,000 feet to 4,000 feet.

Amoco, Exxon, and Shell each have surface interest in some of the eight federal leases included in the Viosca Knoll 912 unit.

Amoco Production Company is the worldwide oil and gas exploration and production subsidiary of Amoco Corporation (NYSE: AN).

#90031p0451 01/31/1990 ~PR Newswire

PEORIA, IL (JAN. 31) PR NEWSWIRE - RLI Corp. (NYSE: RLI) recorded consolidated fourth quarter 1989 net earnings of $3.1 million, or $.55 per share, more than double the $1.2 million, or $.20 per share, earnings for the same period a year ago, it was announced today.

Fourth quarter 1989 net income included realized investment gains of $.03 per share. The fourth quarter 1988 net income included realized investment losses of $.03 per share.

Net earnings for the year 1989 amounted to $8.2 million, or $1.43 per share, compared with $7.3 million, or $1.21 per share for the year 1988. Net income for the year included realized investment gains of $.04 per share in 1989 and $.05 per share in 1988.

Total revenue for the fourth quarter 1989 declined 10.2 percent to $23.3 million, compared to $25.9 million in the same quarter a year ago. Total revenue for the year 1989 declined to $89 million from $103.1 million recorded in the prior year. Gross premiums written increased during the current year to $129.6 million, with fourth quarter production contributing $31.4 million. The 1988 gross premiums written of $125.2 million included fourth quarter production of $34.5 million. During the year 1989, the company continued to increase its purchase of reinsurance to limit its net exposure to risk which was the principal cause of the decrease in total revenue.

The specialty property/casualty segment statutory combined loss and expense ratio was 103.9 percent in 1989 compared to 101.3 percent in 1988. The 1989 property and casualty loss ratio of 56 percent compares favorably to the 1988 loss ratio of 56.5 percent. Losses from the Bay Area earthquake in October impacted fourth quarter net earnings by $.06 per share. In addition, previously reported losses from Hurricane Hugo impacted third quarter net results by $.04 per share. Despite these, the company was able to maintain a relatively stable loss ratio through selective underwriting practices.

The expense component of the combined ratio rose to 47.9 percent in 1989 when compared to 1988 experience of 44.8 percent, reflecting the decline in net premium written resulting from increased purchase of reinsurance. Stephens said he was pleased with the result, as earlier in the year the company had forecasted a much higher expense ratio.

Net investment income before realized gains for the year 1989 reached $9.6 million, a 22.4 percent increase over the $7.8 million attained a year ago. Investment income increased due to a shift toward taxable securities begun in the first quarter 1989 and an increase in cash and invested assets of 11 percent during 1989.

Invested assets amounted to $177 million and had an estimated fair market value of $176 million at the end of 1989. The fixed income portfolio consists almost exclusively of high-quality U.S. government and municipal securities. Consolidated net assets totaled $243.3 million at Dec. 31, 1989, up 7 percent from year-end 1988.

Stockholders' equity on Dec. 31, 1989, was $70.3 million compared with $64 million a year ago. During 1989, the corporation purchased 321,321 shares of its common stock in open market transactions for $2.7 million. These were the first repurchases of the corporation's common stock since late 1987 when it repurchased 210,600 shares for $2 million. Book value per share increased 16 percent during 1989, reaching $12.42 at year-end.

RLI Corp. underwrites selected property and casualty insurance products,

and markets contact lens insurance, related products and practice automation systems to the ophthalmic industry.

#90031p0453 01/31/1990 ~PR Newswire

CALGARY, ALBERTA (JAN. 31) PR NEWSWIRE - Gulfcan Sumatra Limited and Asamera (Jambi EOR) Limited, wholly owned subsidiaries of Gulf Canada Resources, Calgary, Alberta, have signed two contracts covering adjacent lands in the Jambi area of South Sumatra. One is a Production Sharing Contract, the other is a Joint Operating Agreement for an enhanced oil recovery project.

According to Gulf Canada Chairman and Chief Executive Officer Keith McWalter, who participated in the signing ceremony in Jakarta on Jan. 26, the location of these two new projects is of particular significance to Gulf.

''The proximity of the lands to the Corridor Block, where Asamera currently operates about 30,000 gross barrels per day of oil production, will enable us to operate the two new projects using trained staff and infrastructure already in place.''

Gulfcan Sumatra Limited was granted a 30-year Production Sharing Contract (PSC) for a 1,450-square-mile block adjacent to and north of the Corridor Block. Gulfcan has a 75 percent interest in this contract. The remaining interest is held by Pertamina, Indonesia's National Oil Company.

The Joint Operating Agreement signed by Asamera (Jambi EOR) Limited is for an enhanced oil recovery project covering six producing fields in the Jambi area east of and adjacent to Gulfcan's Jambi PSC acreage.

The six fields had original oil in place of approximately one billion barrels, and to date have produced 235 million barrels. Asamera expects additional recovery to be 70 million barrels.

Operations will be carried out under a Joint Operating Body with Asamera, the contractor, and Pertamina each holding a 50 percent interest. Asamera's interest is held 60 percent by Asamera (Jambi EOR) Limited and 40 percent by Bow Valley Industries Ltd.

Gulf Canada is the largest Canadian producer of Indonesian oil. During the past year, the company negotiated a 20-year extension to its Technical Assistance Contract in the Corridor Block and plans to carry out several development and production enhancement projects on this acreage during the next two years.

Last year the company also negotiated a 20-year extension to its Production Sharing Contract on Block A in North Sumatra adjacent to the Arun gas field. A detailed seismic program focussing on deep gas prospects is being carried out on this acreage.

#90031p0455 01/31/1990 ~PR Newswire

HAMMOND, IN (JAN. 31) PR NEWSWIRE - NIPSCO Industries, Inc. (NYSE: NI) today reported 1989 earnings of $123.8 million or $1.72 per average common share before reflecting the fourth quarter extraordinary charge of $51.7 million net of income taxes (72 cents per average common share) for refunds to electric customers for amounts previously collected in rates for the canceled Bailly N1 project. The extraordinary charge reduced 1989 net income to $72.1 million or $1.00 per average common share. Prior year earnings were $103.4 million or $1.41 per average common share.

Revenues for the 12-month period were $1.56 billion compared to $1.52 billion for the same period ending Dec. 31, 1988.

For the fourth quarter of 1989, NIPSCO Industries net income before the extraordinary item was $37.8 million and earnings per average common share of 54 cents, compared to $35.7 million or 49 cents, respectively, for the last quarter of 1988. The 1989 period includes estimated costs, $5.4 million net of income taxes, associated with the announced early retirement and workforce reduction program.

Revenues for the fourth quarter of 1989 were $451.6 million compared to $425.5 million in the fourth quarter of 1988.

For the 12-months ended December 31, 1989, gas deliveries were relatively unchanged, with a slight decrease in industrial demand.

Electric sales for 1989 increased 1 percent reflecting increased industrial demand.

BOSTON (JAN. 31) PR NEWSWIRE - Bank of New England Corporation Chairman H. Ridgely Bullock has announced senior management changes at Bank of New England, N.A., the company's Massachusetts affiliate.

Leo R. Breitman has been named the bank's president and chief operating officer. Breitman leaves his position as president of the corporation's Connecticut affiliate, The Connecticut Bank and Trust Company. Bullock will assume the position of chairman and chief executive officer of BNE, N.A. in addition to his similar responsibility for the corporation.

Richard D. Driscoll, Bank of New England, N.A. chairman and vice chairman of BNEC, has retired at the request of the board of directors. M. Thomas Wilson, president of Bank of New England, N.A., Hugh M. Taylor, senior credit policy officer of the corporation, and James M. Sweeney, executive vice president, real estate lending, will also leave the company. The changes are effective immediately.

BNEC Chairman H. Ridgely Bullock commented, "Leo Breitman has ably demonstrated his capability as a banker and a leader, both during his years at Bank of New England in Boston and recently, in Connecticut at CBT. We'll be working together, with the support of our employees, to restore Bank of New England, N.A.'s long-standing position as a dominant bank in Massachusetts. These changes represent a major step in the achievement of our recovery plan for the company. I expect they'll have an immediate impact on our goal of strengthening credit policies, procedures and administration.

Bullock stated that BNEC Corporation President Gordon I. Ulmer will work with CBT Chairman James F. McNally on the continued improvement of CBT's

daily operations until a replacement for Breitman is named. Ulmer will divide his time between corporate and affiliate bank responsibilities.

Leo Breitman joined Bank of New England in 1971. From 1985 to 1987, he was vice chairman of Patriot Bank in Boston. With the merger of Patriot Bank and BNE in 1987, he returned to head the company's Asset-Based Lending group. Breitman was named president of CBT in July 1989.

Bank of New England Corporation is a $29 billion bank holding company with affiliates in four New England states.

NEW YORK (JAN. 31) PR NEWSWIRE - Chemtex Inc. announced today that its process engineering and design division, Chemtex International Inc., has been acquired by Japan's Mitsubishi Corporation and management of Chemtex in an amicable purchase valued at approximately $30.0 million. MIC Consulting Inc., an investment advisory firm in New York belonging to Mitsubishi, assisted in the transaction.

This division, which specializes in the supply of technology, equipment and engineering services for man-made fibers plants, has in the past accounted for over 90 percent of Chemtex's $100 million annual revenues. In addition to the engineering organization, the sale includes Chemtex overseas affiliates and offices in Tokyo, Bombay, Dusseldorf and Beijing.

Chemtex International shall become a self-managed Mitsubishi Corporation subsidiary and remain at the Chemtex offices at 560 Lexington Avenue, New York. All the approximately 300 engineering, marketing, procurement and commercial administration employees of Chemtex Inc., and its overseas affiliates shall stay with Chemtex International, and Julio J. Martinez will remain as president and chief executive officer.

The two companies have worked with each other for over 20 years on numerous projects, and Chemtex International expects to benefit from Mitsubishi's marketing and financial capabilities in key markets such as Eastern Europe, the Middle East, China and Southeast Asia.

Chemtex Inc. shall continue to execute all current contracts in the field of man-made fibers, and Chemtex International shall provide services to Chemtex Inc. for this purpose under a long-term agreement. Chemtex Inc. will relocate to Old Greenwich, Conn., and will retain various assets unrelated to the engineering organization.

WASHINGTON (JAN. 31) PR NEWSWIRE - MeraBank, FSB, Phoenix, Ariz., a subsidiary of Pinnacle West Capital Corporation (NYSE: PNW), was placed in receivership today by the Office of Thrift Supervision (OTS).

MeraBank Federal Savings Bank, a mutual savings bank, was chartered by OTS to receive all of the assets, deposits and substantially all of the liabilities of MeraBank. The Resolution Trust Corporation (RTC) was appointed as conservator of the new thrift and will oversee its operation.

OTS took the action to protect the interests of insured depositors and the thrift insurance fund. All former branches of MeraBank will remain open for business as usual and continue to operate as branches of the newly created MeraBank Federal.

MeraBank was a federally chartered stock savings bank with $6.565 billion in assets. As of Nov. 30, 1989, MeraBank was the largest thrift in Arizona. On Nov. 30, MeraBank's liabilities totaled $6.561 billion, and the institution's tangible capital was a negative $337.4 million.

Last month, OTS reached an agreement with Pinnacle West calling for the corporation to infuse $300 million in cash plus a $150 million note to boost MeraBank's capital, in exchange for releasing Pinnacle West from further obligation. In reaching the agreement, OTS said it concluded that recoveries provided for in the agreement were preferable to pursuing claims in litigation and bankruptcy.

Even with the infusion of $450 million by Pinnacle West, MeraBank would fail all tangible, core and risk-based capital requirements by substantial amounts, OTS said.

OTS expects Pinnacle West to comply with the agreement, infusing the $450 million in capital by March 31, 1990.

This takeover occurred under authority granted by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) because MeraBank was in an unsafe and unsound condition to transact business. The institution had substantially insufficient capital and had incurred or was likely to incur additional losses that would deplete or nearly deplete all of its capital. There was no reasonable prospect for replenishment of MeraBank's capital without federal assistance, OTS said.

The agency also cited violation of laws or regulations, or an unsafe and

unsound practice or conditions that were likely to cause insolvency or weaken the condition of the thrift, OTS said.

MeraBank's weakened condition was attributed to a substantial percentage of non-performing, non-earning assets and high operating expenses.

MeraBank also has a subsidiary thrift in Texas, which though solvent, is owned by the RTC.

BOSTON (JAN. 31) PR NEWSWIRE - XTRA Corporation announced today that it has reviewed the allegations in the counterclaim filed by Robert M. Gintel and that it believes that the allegations are wholly without merit.

XTRA stated that it intends to vigorously contest that action.

XTRA further stated that it believes that the allegations are only intended to deflect attention from XTRA's own allegations against Gintel and Value Equity Associates I, L.P., a participant with Gintel in the proxy contest.

As previously reported, on Jan. 23, 1990, the United States Federal District Court in Boston, Mass., rejected a motion by Robert M. Gintel and Value Equity Associates I, L.P., to dismiss XTRA's lawsuit against the group.

XTRA Corporation is engaged in transportation leasing services, primarily the leasing, on an operating basis, of rail/intermodal equipment, including piggyback trailers and domestic containers and chassis, as well as over-the-road trailers.

NEW YORK (JAN. 31) PR NEWSWIRE - The Bank of New York Company, Inc. (BNYCo.) (NYSE: BK) today announced that it had reached an agreement in principle to purchase the factoring business of Bankers Trust Company, BT Factors. The transaction is expected to close in April.

The purchase would increase BNYCo's factoring volume to approximately $7.5 billion a year making it one of the two largest Factors in the country.

Commenting on today's announcement, J. Carter Bacot, chairman and CEO of BNYCo. said, "This agreement in principle underscores our commitment to our middle market business and our determination to be a leading participant in the factoring business. Our systems can handle the increased volume in a highly cost efficient way. We are very pleased with the prospect of completing our latest acquisition."

MIAMI (JAN. 31) PR NEWSWIRE - Rudy's Restaurant Group, Inc. (NASDAQ: RUDY) announced a loss of $446,000 or ($0.13) per share on revenues of $19.3 million for the fiscal year ended Oct. 1, 1989, compared to a loss of $240,000 or ($0.07) per share on revenues of $20.8 million for the

previous fiscal year.

Fiscal year 1989 results include a charge to operations of $64,000 primarily related to the closing of a restaurant in fiscal 1989. Fiscal year 1988 results include a charge to operations of $412,000 relating to the company's disposition of an undeveloped site and the closing of the restaurant in fiscal 1989.

The company announced that it has been informed by the National Association of Securities Dealers that its shares of common stock would not be included in the National Association of Securities Dealers Automated Quotations system/National Market System (NASDAQ/NMS), since the market value of the publicly held shares of the company's common stock fell below the $1 million market value required for inclusion.

"At present, approximately 26 percent of the total outstanding shares of common stock of the company are held by the public. However, the common stock of Rudy's Restaurant Group, Inc. will continue to be quoted in NASDAQ, and will appear weekly in The Wall Street Journal under "NASDAQ Weekly Bid and Asked Quotations."

Rudy's Restaurant Group, Inc. currently operates five Rudy's Sirloin SteakBurgers restaurants and seven Samurai Japanese Steakhouse restaurants.

WHEELING, WV (JAN. 31) PR NEWSWIRE - The Ohio Valley Medical Center in Wheeling and the West Virginia University School of Medicine have renewed their affiliation agreement ensuring that faculty from WVU will oversee the internal medical residency program at the Wheeling hospital.

The new agreement places a greater emphasis on the role of the faculty at the hospital, and strengthens the bond between the institutions by making their ongoing commitment more concrete. WVU and OVMC have had an affiliation agreement since 1974.

At a press conference held today to announce signing of the contract, Thomas Galinski, president and chief executive officer of OVMC, said, "Education, both in terms of the residency program and in terms of ongoing professional development, remains an important part of our promise to our community.

"Our ties with West Virginia University are an important part of this commitment. We're delighted that we can draw upon this important regional

resource, WVU, and continue to bring their reputation for academic excellence here," Galinski said.

Dr. Robert D'Alessandri, dean of the WVU School of Medicine, said the Wheeling program and others like it represent a central part of the school's outreach mission.

"Programs such as this one with OVMC enable us to share the extraordinary resources of the School of Medicine with communities throughout West Virginia. At the same time, our students and residents are exposed to regions of the state where we hope they may remain to practice," D'Alessandri said.

In addition to OVMB, WVU medical faculty train residents at Charleston Area Medical Center and Ruby Memorial Hospital in Morgantown. In all, the school supports some 200 outreach programs that touch every community in the state.

Currently, two full-time and one half-time faculty members from WVU serve at OVMC as teachers and physicians on staff. Twenty additional OVMC physicians hold faculty appointments and teach on a voluntary basis.

The internal residency program at OVMC is a three-year period of training and advanced education that follows graduation from medical school.

#90031p0484 01/31/1990 ~PR Newswire

HOUSTON (JAN. 31) PR NEWSWIRE - Kettle Restaurants Inc. today announced the company reported a net profit for the fiscal year ended Nov. 2, 1989, of $619,000 or 34 cents per share, compared with a net loss in 1988 of $4,603,000 or $2.10 per share. Total revenues were $43,639,000 for 1989 compared to $52,585,000 for 1988.

The company reported a net loss in the fourth quarter of 1989 of $76,000 or 7 cents per share, compared with a net loss of $4,130,000 or $1.89 per share in the comparable 1988 period.

The decrease in total revenues relates, primarily, to the decrease in restaurant revenues of $9,261,000. This decrease reflects the net reduction in company operated restaurants of 11 stores and the exclusion, in fiscal 1989, of the results of operations pertaining to the stores which, in fiscal 1988, were identified for disposal. The revenues and expenses of these stores for fiscal 1989 have been charged against the accrued estimated carrying costs established in fiscal 1988.

However, partially offsetting these decreases, weighted average sales per store in company operated stores increased 7.11 percent for fiscal 1989 compared with the prior year. Weighted average sales per store in franchisee operated stores increased 5.3 percent for the like period.

The reported net loss for both the fourth quarter and the fiscal year of 1988 included provisions of $5,805,000 for actual or anticipated losses associated with the contemplated disposition and the reevaluation of assets. Also, the company incurred fees and costs of $310,000, which were charged against earnings in fiscal 1988, relating to an aborted offer by a third party to purchase all of the outstanding shares of the company.

Kettle Restaurants Inc. is principally engaged in the operation and franchising of 24-hour full-service, family-oriented restaurants. The restaurants offer a wide selection of moderately priced menu items for all meal periods, with an emphasis on popular breakfast items. Kettle and its franchisees operate 188 restaurants in 17 states, primarily in the Sunbelt region.

DALLAS (JAN. 31) PR NEWSWIRE - The board of directors of the managing general partner of Diamond Shamrock Offshore Partners (DSP) declared a quarterly distribution by DSP of 12 cents per unit. This cash distribution is payable March 7, 1990, to unitholders of record on Feb. 15 1990.

Consistent with the previously announced policy, cash distributions for DSP are based on the levels of distributable cash generated by the partnership. Distributable cash is defined as net cash provided by operating activities plus proceeds from sale of assets, less expenditures for oil and gas properties and equipment, including dry hole costs, a reserve for any short-term capital and operating requirements, and other obligations of the partnership.

Estimated 1990 program spending for DSP is $59 million, compared to approximately $37 million in 1989.

SEATTLE (JAN. 31) PR NEWSWIRE - NYK Line, one of the world's leading

transportation companies, will establish its primary U.S. computer center at Seattle, and has enlisted Boeing Computer Services to plan, install and test the facility.

Taketaro Kotani, President of NYK Line North America Inc., announced today that the new computer center is scheduled to begin operating in August. The center will be responsible for developing and operating a cargo transportation information system linking NYK's Japan/Far East operations with North America.

Boeing Computer Services, under contract to NYK, will perform a variety of functions, including site evaluation, computer hardware and software installation and integration, and pre-operational center testing.

Tom Smith is the program manager for Boeing on the NYK Seattle computer center. K. Yoshida is project manager of the center for NYK.

NYK Line is a global mega-carrier providing integrated transportation services door to door around the world. NYK provides a full range of sea, land and air transportation and logistics services. A broadly diversified company, NYK's core shipping operations comprise container and conventional breakbulk liners, tramp vessels and tankers.

A division of The Boeing Co. (NYSE: BA), Boeing Computer Services currently operates six major data centers throughout the United States that support all divisions of Boeing. It also provides information management, systems integration, and facilities management services to government and commercial customers worldwide.

The WINS system will run on an IBM 3090-20J host computer at the Seattle computer center, and be linked by a dedicated circuit to NYK hub offices containing IBM 3745-170/150 communications controllers at North American headquarters in Secaucus, N.J., and Seattle, Los Angeles, Chicago, San Francisco, Houston and Atlanta.

#90031p0493 01/31/1990 ~PR Newswire

VALPARAISO, IN (JAN. 31) PR NEWSWIRE - Indiana Federal Corp., (NASDAQ: IFSL) parent company of Indiana Federal Savings and Loan Association, today reported net income of $738,000 or 27 cents a share for the fourth quarter ended Dec. 31, 1989. Net income for the same period last year was $1,041,000 or 37 cents a share.

As previously announced, the board of directors approved a 33 percent increase in the quarterly dividend to 10 cents per share to shareholders of record Feb. 14, 1990, and payable on Feb. 28, 1990. "Despite the earnings decline," according to Peter R. Candela, president and chief executive officer of Indiana Federal, "the board of directors took this action to increase the cash dividend because of its optimistic outlook for 1990."

Net income for the 12 months ended Dec. 31, 1989, declined to $2,760,000 or $1.00 per share from $3,078,000 or $1.11 per share for 1988. Despite stable net interest income, 1989 earnings were down due to lower non-interest income and slightly higher operating expenses.

For the fourth quarter net interest income after provision for loan losses the company's core business, was $3.4 million compared to $3.6 million for the same period in 1988. Net interest income was lower in the fourth quarter primarily due to an increase of $113,000 in the provision for loan losses. The net interest margin for the fourth quarter of 1989 declined to 2.91 percent from 3.03 percent for the comparable period in 1988.

For the year ended Dec. 31, 1989, net interest income after provision for loan losses rose slightly to $13,392,000 from $13,364,000 for the same period a year ago. This increase was a result of an $87,000 decline in provision for loan losses for the full year 1989 compared to 1988.

Other income rose slightly to $791,000 for the fourth quarter of 1989 compared to $777,000 for the same period a year ago. This small increase came as a result of higher loan servicing fees and higher deposit service fee income.

For the full year, other income declined to $2.8 million from $2.9 million for the same period in 1988. Lower commissions on the sale of insurance and securities by our registered representatives and losses on the sale of investment securities were the primary causes of the decline.

Operating expenses were up 8.9 percent to $3.2 million in the fourth quarter of 1989 from $2.9 million in the fourth quarter of 1988. Salaries and employee benefits increased 14.7 percent or $167,000 in the fourth quarter of 1989 compared to the same quarter in 1988. Approximately $82,000, or a 7.2 percent increase, was due to normal salary increases and additions to staff. The difference of approximately $85,000 was due to accrual adjustments which reduced pension and bonus expenses in the fourth quarter of 1988. For the year ended Dec. 31, 1989, operating expenses were up a modest 2.8 percent to $12.3 million compared to $11.9 million for 1988.

Non-performing assets declined to $10.4 million or 1.88 percent of assets at Dec. 31, 1989, from $12.9 million or 2.35 percent of assets at Sept. 30

1989. This decline in non-performing assets resulted primarily from improvement in the status of delinquent income property loans.

Shareholders' equity increased to $55.5 million or $20.22 per share at Dec. 31, 1989, compared to $19.52 per share at year-end 1988. The equity to total assets ration at Dec. 31, 1989, stood at 10.0 percent, making Indiana Federal Corp. one of the strongest capitalized thrift holding companies in the nation.

At Dec. 31, 1989, total assets were $553 million, up 2.4 percent from $540 million at the end of 1988; net loans receivable and mortgage-backed securities increased by 5.1 percent to $466 million from $444 million; and deposits rose slightly to 417 million at year end 1989 from $414 million a year earlier.

Indiana Federal Savings and Loan Association, a wholly owned susidiary of Indiana Federal Corp., maintains a network of eight full service offices in Northwest Indiana and loan production offices in Highland and Fort Wayne, Ind. Indiana Federal Corp. shares are traded on the NASDAQ National Market System under the symbol ''IFSL.''

#90031p0497 01/31/1990 ~PR Newswire

DALLAS (JAN. 31) PR NEWSWIRE - Diamond Shamrock Offshore Partners (NYSE: DSP), the master limited partnership of Maxus Energy Corp., reported a net loss of $9.5 million, or 15 cents per unit, for the fourth quarter 1989, compared to net income of $6.2 million, or 11 cents per unit, for fourth quarter 1988.

Exploration costs for the quarter were up $6.3 million over fourth quarter 1988 due to dry hole costs and geological and geophysical costs reflecting increased exploration activity.

For the year, DSP had net income of $2.9 million, or 5 cents per unit, compared to $32.6 million, or 60 cents per unit, in 1988. The 1989 results included a net loss of $8.3 million on asset sales and $13.8 million in lease and well impairments.

Sales for the fourth quarter 1989 were $25.5 million, compared to $25.7 million reported in fourth quarter 1988. Cash flows from operations before working capital changes were $17.9 million in fourth quarter 1989, compared to $21.1 million in fourth quarter 1988. For the year, sales were $115.8 million, compared to $119.1 million in 1988. Cash flows from operations before working capital changes were $87.5 million for the year, compared to $113.0 million in 1988.

Crude oil production in the fourth quarter 1989 was 5,042 barrels per day (bpd), compared to 5,674 bpd in the fourth quarter 1988. Fourth quarter 1989 oil prices averaged $20.05 per barrel, up significantly from $13.63 per barrel reported in fourth quarter 1988. The decreases in both natural gas and crude oil production were primarily attributable to asset sales.

"The average natural gas production for 1989 was 114.3 mmcfpd, down from 131.1 mmcfpd in 1988. Gas prices were $1.91 per mcf in 1989, compared to $1.84 per mcf in 1988. Oil volumes for the year were 5,416 bpd, virtually unchanged from the previous year's total. Crude oil prices averaged $18.17 per barrel in 1989 and $15.20 per barrel in 1988."

Maxus Energy Corp. (NYSE: MXS), the special general partner of DSP, is an independent exploration and production company based in Dallas.

DALLAS (JAN. 31) PR NEWSWIRE - Southern Union Co. (NYSE: SUG) and Metro Mobile CTS Inc. (AMEX: MMZ.A and MMZ.B) announced that the Deleware Chancery Court has denied TCG Securities Inc.'s request for a preliminary injunction against both the previously announced merger between Southern Union and SU Acquisiton, Inc. currently a wholly-owned subsidiary of Metro Mobile, and Southern Union's redemption of its 10 percent cumulative preferred stock pursuant to a Jan. 3, 1990 notice of redemption.

The lawsuit, which is still pending, was brought by TCG Securities, a holder of 100 shares of Southern Union common stock, as a purported class action lawsuit seeking to enjoin the merger and the redemption, or, in the absence of an injunction, to unwind the merger or for unspecified damages.

Metro Mobile expects to consummate its spin-off of SU Acquisition common stock, and Southern Union, Metro Mobile, and SU Acquisition expect to consummate the subsequent merger of SU Acquisition into Southern Union, as soon as possible. Southern Union and Metro Mobile agreed today that neither will exercise any right of termination before Feb. 7, 1990 by reason of the transaction not having closed on Jan. 31.

#90031p0502 01/31/1990 ~PR Newswire

CLEVELAND (JAN. 31) PR NEWSWIRE - Blue Cross & Blue Shield of Ohio

(BCBSO) is refiling its premium rates with the Ohio Department of Insurance (ODI) for its 90,000 non-group policyholders who are over the age of 65.

The new rates are identical with the recent premium increases rejected Wednesday by ODI, with two exceptions: Dropped are provisions for a 5 percent increase in administrative expenses and a 40-cents-per-contract marketing charge for advertising, which had not been acceptable to ODI. The changes will not materially affect rate totals.

ODI Director George Fabe also rejected BCBSO's rate increase requests for non-group policyholders under the age of 65 in current policies. He did, however, approve rates for a new statewide product.

The order stated, "Clearly, BCBSO did not implement the 'Statewide' filings in direct violation of the Superintendent's prior order dated June 27, 1988. (ODI Ex. 3). By the order, the Superintendent mandated that BCBSO roll-over current subscribers into the new statewide product."

Therefore, consistent with the Superintendent's order, the company will convert its 17,000 under-65-year-old non-group customers to the new statewide policy. The policy has somewhat lower benefits than the existing coverage. The cost, while higher than the existing coverage, is lower than the rate request denied by the Superintendent.

The new statewide policy approved monthly rates are $147.13 for single coverage and $270.45 for family. The existing monthly single coverage is $112.92 and family $198.65.

Requested but denied monthly rates for the existing coverage was $171.30 for single and $299.17 for family.

The new statewide policy is identical to current coverage with the following major differences: It includes an optional maternity rider, limits on regular hospitalization reimbursement to $450 per day ($900 on intensive care, coronary care or burn units), and a reduced catastrophic reimbursement from 100 percent to 80 percent after deductibles for the first $5,000. Coverage is limited to 31 days per year for mental illness, drug abuse and alcoholism admissions.

#90031p0509 01/31/1990 ~PR Newswire

SEATTLE (JAN. 31) PR NEWSWIRE - Qantas Airways of Australia has ordered one Boeing 747-400 and four 767-300 aircraft to augment its present Boeing

fleet, Boeing Commercial Airplane Group confirmed today.

Total value of the five aircraft is approximately $560 million including spare engines and other components. The 747-400 will be equipped with Rolls-Royce RB211-524G engines and the 767 aircraft with General Electric CF6-80C2B6 power plants.

The order is part of Qantas' fleet modernization program, according to W. L. Dix, Qantas chairman.

Qantas said that the long-range 747-400s, because of improved fuel consumption, can fly with a full passenger and cargo payload from the east coast of Australia to London with only one stop at Singapore.

The 767 aircraft, which have extended-range capability, will enable Qantas to improve service frequency to many of the airline's smaller city destinations where the volume of traffic does not support 747-size equipment, according to the airline.

To date, Qantas has taken delivery of five of the 12 747-400s previously ordered plus 12 of 15 767 aircraft also contracted for earlier.

This announcement brings Boeing orders for 1990 to 67 jetliners with a value of about $6 billion.

#90031u0173 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - Budget director Richard Darman came to Capitol Hill to outline President Bush's proposed budget for 1991, but found himself fending off accusations from angry House Democrats that the $1.23 trillion spending plan contains lies, gimmicks and intimidation.

Democrats on the House Budget Committee charged Tuesday that the administration avoided tough choices, like including new taxes to cut the deficit. Some accusations became so personal that House Budget Chairman Leon Panetta, D-Calif., suggested Darman write them off as political rhetoric.

Darman was expected to face more criticism Wednesday during a scheduled appearance before the Senate Budget Committee.

Democrats condemned Bush for proposing what several called an unrealistically high defense budget that fails to account for reforms in Eastern Europe and the reduced Soviet military threat.

Bush proposed more money for defense next year, but less than needed to keep pace with inflation, meaning a cut in the Pentagon's buying power in the fiscal year starting Oct. 1.

House Republicans defended Bush's budget as a credible starting point. But they did so without the passion that accompanied the Democratic attacks.

''Those who do not like your budget have it incumbent on them to produce their better budget,'' said Rep. Bill Frenzel of Minnesota. ''Those who like bold strokes can put them on the table.''

The most bitter Democrat was Rep. Marty Russo of Illinois, a six-year veteran of the budget panel.

''This budget process stinks and lies,'' he told Darman Tuesday during a lengthy outburst during which he said he could not wait to get off the committee.

''All it is is one big charade. ... We don't deal in reality,'' Russo said.

Echoing comments of other Democrats, Russo accused Darman of defending a budget that either dropped tough choices in Congress's lap or avoided them altogether.

He said the administration proposal to cut Medicare payments to doctors and hospitals by $5.5 billion next year is a tough choice for Congress, not Bush.

''Dick, you don't know what a tough choice is,'' Russo told Darman. ''The tough choice for you to is soak the rich and make them pay higher taxes. It (Bush's budget) only makes tough choices in my direction. It doesn't make tough choices in your direction.''

Darman denied the charge and assured Russo that ''I feel some of the same frustrations'' about the budget process.

Panetta, who called Bush's budget ''a disappointment,'' asked Darman how he can say Bush offered an honest budget when it contains money-saving gimmicks, which Panetta listed.

''I think every one of these is defensible,'' Darman countered, offering to provide Panetta with ''a list of gimmicks invented by the Congress'' that numbers more than 100.

Rep. Charles Schumer, D-N.Y., said Darman had a split personality - one that makes reasoned speeches about fiscal problems and another that defends a budget that avoids solving those problems.

''It's almost like we have Dr. Jekyll - Darman the pamphleteer - and Mr. Hyde - Darman the budgeteer,'' Schumer said. ''One side of you sees the problem and the other side is unwilling to really grasp it.''

Rep. Barbara Boxer, D-Calif., accused the administration of ''intimidation'' against Congress by proposing military base closings that save less money than would strategic weapons cuts. Her San Francisco district was targeted for base closings last year and by the Pentagon this week.

Rep. Jim Slattery, D-Kan., fumed that Bush's budget promotes more ''smoke and mirrors'' solutions to budget problems.

He said continued use of the Social Security trust fund surplus to mask the deficit's size was ''the biggest lie we have told the American people'' and said Bush's plan to use the surplus to slash the national debt after 1993 was ''another scam.''

''Our proposal is not smoke and mirrors,'' replied an agitated Darman. ''It will get the deficit down. There isn't a trace of dishonesty in this (budget) presentation.''

Darman told Slattery his accusations were ''out of bounds.''

#90031u0208 01/31/1990 ~United Press International

(JAN. 31) UPI - Police in Dexter, Maine, say firefighters called in to inspect a leaky roof at Reny's department store evacuated about 10 people from the three-story brick building just minutes before the roof and front wall caved in. Three people caught in the collapse... including one firefighter... were injured. Rescue workers used dogs to comb the rubble for several hours until authorities were sure NO one else was trapped in the wreckage.

Officials blame the roof's collapse on the weight of newly fallen snow. A fierce winter storm had dumped 17 inches of snow in the Dexter area, in north central Maine about 15 miles from Bangor, Monday night and Tuesday morning. Other parts of northern New England were left with a blanket of more than two feet of snow.

The State Department says it was out of consideration for Soviet Foreign Minister Shevardnadze and an upcoming Communist Party meeting that led Secretary of State Baker to delay next week's trip to Moscow by one day. An official says the postponement has NO connection to reports that Soviet President Gorbachev was thinking about resigning his post as head of the Communist Party.

A report warns that Western eagerness to invest in Eastern Europe could undermine economic growth in the Third World, particularly in Latin America. The Economist Intelligence Unit, a subsidiary of The Economist magazine, says Western investment and other efforts to bolster fledgling East Bloc markets come at a time when Latin America is ''desperately in need of resources from abroad.'' The report also notes that such

investment could turn Warsaw Pact nations into strong competitors to several Asian makers of cheap consumer goods.

#90031u0256 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - President Bush prepared an optimistic State of the Union address to be delivered to a joint session of Congress Wednesday that will spotlight his agenda for the last decade of the 20th century.

Bush has said his speech, to be nationally televised at 9 p.m. EST from the House of Representatives, will be more thematic rather than ''a shopping list.''

The president on Tuesday went over several drafts of the address, which he is expected to sign off on Wednesday after a bit more tinkering.

He also has rehearsed his remarks in the White House theater under the guidance of his political campaign ''handler,'' Roger Ailes.

Bush appeared more confident on the eve of his major address, having scored a victory with Congress last week when members failed to override his veto of a bill to give permanent residence status to Chinese students.

White House chief of staff John Sununu told reporters Tuesday that the address ''will be a good blend'' of domestic priorities and foreign policy.

Sununu said there will only be ''sampler'' references to programs that have already been specified in the 1991 fiscal year budget that was sent to Congress Monday.

''The speech is a blend of the kinds of things he's trying to do and the ways he's going at some of the things,'' he added.

In foreign policy, Bush was expected to extol the pro-democracy movement in Eastern Europe and to praise Soviet leader Mikhail Gorbachev for pursuing glasnost and perestroika reforms.

At the same time, Bush probably will stress that he remains ''cautious'' and ''prudent'' on defense matters, and while some troop levels in Europe may be cut, American forces will remain on the continent as part of NATO.

On the domestic side, Bush also was expected to again push for a capital gains tax cut, with administration officials hoping to get a vote on the proposal in a couple of weeks. His Clean Air Act, other environmental, education and child care programs also will be spotlighted.

Bush told a group of publishers last week of the thrust of his speech, saying, ''I am optimistic about our country, the state of the Union.'' He acknowledged the nation faces ''enormous social problems,'' but said ''the underpinnings of the United States, the state of the Union, is not bad.''

There were indications, meantime, that the administration has been taken aback by Democratic criticism of the spending blueprint shortly after it was unveiled.

Sununu complained that the criticism came ''from the same party ... with members saying the same things as if they came down from heaven.''

''The demagoguing that capital gains is a tax cut for the rich has got to stop,'' Sununu said.

''The focus of the speech will be on what he thinks is important ... thematic, with a common thread to what he sent up last year,'' said Sununu. ''Things that have come together for the last decade of this century.''

Five minutes after Bush has departed the House, Speaker Tom Foley will deliver the rebuttal for the Democrats.

NEW YORK (JAN. 31) UPI - Police arrested a husband and wife and charged them with robbing at least 92 young girls, some of them at gunpoint, in a two-month string of crimes outside a Bronx school, authorities said Wednesday.

The two allegedly took money, earrings and rings from the girls, who ranged in age from 6 to 14 years old and attended P.S. 79 in the borough's University Heights section, said Sgt. Nick Vreeland, a police spokesman.

The couple, who admitted to using illegal drugs, have five children of their own, he said.

Victor Gonzalez, 23, who lived around the corner from the school, was arrested Tuesday morning after a girl told a police officer patroling the school that three girls had been robbed in the schoolyard, Vreeland said. The child described Gonzalez and said he had robbed the girls, aged 6, 8 and 11.

The suspect was brought to the 46th Precinct where robbery detectives named Gonzalez a suspect in at least 89 more robberies of schoolgirls since Dec. 3.

All the robberies occurred around P.S. 79, and all the victims were either on their way to or home from the school, police said. Gonzalez and his wife live less than two blocks from the school.

Victims identified Gonzalez as the suspect in four robberies that occurred at the school Tuesday morning, Vreeland said.

Because a woman was involved in most of the robberies, police questioned Gonzalez's wife, Denise Aonte, 24. She was arrested later Tuesday after several victims identified her as the woman who robbed them, the spokesman said.

The couple allegedly pulled a gun on many of their victims, none of whom were older than 14, Vreeland said. They used the proceeds to buy drugs,

Vreeland said.

#90031u0274 01/31/1990 ~United Press International
(JAN. 31) UPI - The Orlando Magic, already a winner at the ticket window, is now developing into a success on the court.

Playing before its 20th sellout crowd in 21 home games, the expansion Magic set a team scoring record Tuesday night in a 129-111 victory over the Indiana Pacers. Guard Sam Vincent scored 21 points, handed out a club-record 17 assists and grabbed 11 rebounds to post the first-year franchise's first triple-double.

With three victories in their last six games, the 13-30 Magic are the most successful of the NBA's four expansion teams of the late 1980s. Neither Miami, Minnesota nor Charlotte has reached double digits in victories.

Terry Catledge paced Orlando with 31 points, hitting 13 of 19 shots from the floor. The Magic scored a franchise-record 44 points in the fourth quarter after trailing 86-85 after three quarters.

Orlando trailed 60-44 in the second quarter but used a 16-1 run in the closing 3:13 to pull within a point at intermission. Rookie Nick Anderson scored eight of his 22 points during the surge.

The 6-foot-2 Vincent, who is an exceptional leaper, said of his team-high 11 rebounds, ''I think by sending everybody to the boards we're more effective. (Coach) Matty (Guokas) had been sending only the big guys to the boards. But we don't have any big guys.''

Indiana, led by Reggie Miller's 35 points, drops to 7-15 on the road. Miller hit 7 of 10 3-pointers but his teammates connected on just 1 of their 7 attempts from beyond the 3-point arc.

--- AROUND THE NBA ---

Elsewhere in the NBA Tuesday night, Detroit defeated Atlanta 112-95, Milwaukee stopped Sacramento 109-102, Cleveland outplayed Miami 106-94, Phoenix routed New Jersey 120-95, Portland downed Utah 122-98 and the Los Angeles Clippers upset the Los Angeles Lakers 121-104.

Pistons 112, Hawks 95

At Atlanta, James Edwards scored 20 points and Joe Dumars added 18 to lead Detroit, which never trailed and held a 23-point lead after three quarters. Atlanta, which connected on only 32 of 82 field-goal attempts, was led by Dominique Wilkins' 20 points. Forward Jon Koncak suffered a

torn cartilege in his left knee.

Bucks 109, Kings 102

At Milwaukee, Jack Sikma scored 23 points and hit four three-pointers while Jay Humphries scored 13 fourth-quarter points to pace the Bucks. Sacramento, just 2-17 on the road this season, was led by Wayman Tisdale's 31 points. Humphries finished with 19 points and teammate Alvin Robertson added 16.

Cavaliers 106, Heat 94

At Miami, John Williams came off the bench to score 24 points and Cleveland center Brad Dougherty returned after missing the season's first 41 games due to a nerve problem in his left foot. Dougherty played 15 minutes, scoring seven points and grabbing one rebound. Teammate Mark Price had 21 points and 12 assists. Miami, which lost its sixth straight, was led by Glen Rice's 19 points and Rony Seikaly's 15.

Suns 120, Nets 95

At Phoenix, Kevin Johnson registered 30 points and 14 assists as the Suns handed New Jersey its sixth straight loss. For Phoenix, Jeff Hornacek added 28 points and Tom Chambers had 23. Sam Bowie scored 16 points to pace New Jersey, which lost its ninth consecutive road game.

Blazers 122 Jazz 98

At Portland, Ore., Clyde Drexler scored 25 points and Terry Porter and Kevin Duckworth each had 24 as the Blazers won their seventh straight game. Porter also had 10 assists and eight steals. The Jazz, whose winning streak ended at nine, were led by Karl Malone's 30 points. The Blazers and the Lakers share the league's best record at 31-11. The Jazz slipped to 29-12.

Clippers 121, Lakers 104

At Los Angeles, Danny Manning scored 25 points and four Clippers reached 20 points. Gary Grant and Ken Norman had 22 points each and Benoit Benjamin added 20 as the Clippers ended a four-game losing streak. Lakers playmaker Magic Johnson, weakened by the flu, played just 25 minutes. Byron Scott scored 24 points to pace the Lakers.

THE PITTSBURGH PRESS

Talk about conserving oil in this country nowadays doesn't get much respectful attention. The gasoline crises and long service-station lines of 1973-74 and 1979 are dim memories; the swing to smaller, more fuel-efficient cars has lost a lot of its momentum.

Even so, this country can't afford to ignore oil production and oil-use trends. Or to dismiss the occasional ideas that come along for cutting back on the consumption of this limited resource or reusing part of it.

In the latter category, Republican Senator John Heinz of Pennsylvania and Democratic Senator Timothy Wirth of Colorado have been trying to drum up support for legislation that would encourage the recycling of motor oil.

The idea is aimed in large measure at those people who change the oil in their cars at home and dump and discard the old oil, usually improperly.

Senator's Heinz and Wirth would reinvigorate oil recycling with incentives to refiners who, presumably, would help promote oil collecting at the community and neighborhood level.

Consider this: U.S. oil production dropped 6.8 percent last year, to its lowest level since 1963, while oil imports rose 46 percent, far greater than the 38.8 percent of October 1973 when the Arab oil embargo was imposed.

Such figures offer strong argument for doing more to conserve oil and gasoline in this country. The reclaiming of motor oil offers one relatively painless way of helping to accomplish this.

THE WASHINGTON POST

The Food and Drug Administraton has joined the U.S. Department of Agricultue in vociferously opposing Hearguide,'' a new nutrition labeling program proposed by the American Heart Association, a private charity. With nutrition labeling for foods currently in a state of dire confusion and concerns about nutritional wisdom at their usual panic level, you'd think these players would all be on the same side in wanting to clear up the contesting claims of high-fiber, low-sodium, low-fat, oat-bran, rice-bran, calcium-rich, and ''lite'' products. Instead, what's happened is ceaseless infighting.

The agencies that regulate food labeling object strenuously to several aspects of ''Heartguide,'' which promises to test products for a fee and, if they meet certain guidelines - which the association won't reveal - to mark their packages with a special seal and a bar graph showing their nutrititional content. Both the FDA and the USDA, which regulates meat and

poultry, have opposed ''Heartguide'' since its inception a year ago. ...

... The agencies have some legitimate concerns. ''Heartguide'' has two main flaws: its criteria for each category are secret, so the meaning of the seal is ambiguous to consumers; and it offers that seal only to companies that pay a fat fee before hand to be tested ...

These legitimate concerns are part of a larger one, which is that the regulating and classifying of food ought to be consistent - and that is properly a government, not a private, concern. ...

THE ATLANTA CONSTITUTION

The hard-line Beijing regime made it very plain recently to increasingly anxious inhabitants of Hong Kong just where they will stand when the British crown colony reverts to Chinese ownership in 1997.

Up to their nostrils in quicksand.

A mainlander-dominated panel revealed the latest provisions of what is to be ''basic law'' for Hong Kong into the 21st century and it looks to be a throwback to ''1984.''

Hong Kong's made-in-China legislature appears to be nothing of the kind. Only 18 of 60 members would be elected representatives of the people; the balance would be appointed and presumably subject to Communist Party orders. Any opposition group Beijing labels ''subversive'' will be outlawed in Hong Kong after 1997, thanks to a month-old decree.

The law as it has evolved is a betrayal of the 1984 pact with Britain to maintain a free Hong Kong. It also seems certain to accelerate Hong Kong's brain drain (42,000 emigrants in 1989, 55,000 expected this year).

China doesn't seem to care much about the devaluation of its Hong Kong jewel - so long as it keeps its political primacy.

Britain's parliament ought to pass Prime Minister Margaret Thatcher's Hong Kong immigration bill, which would provide an escape for 225,000 of Hong Kong's best and brightest. Maybe the prospect of losing the cream of the colony would finally shake Beijing to its senses and compel it to honor its word.

#90031u0289 01/31/1990 ~United Press International

(JAN. 31) UPI - While Mario Lemieux is shooting for a record-breaking scoring streak, the Penguins are dropping deeper in the Patrick Division.

Rivals have been unable to stop Lemieux as he drives for Gretzky's point-scoring record of 51 consecutive games. But the defenseless Penguins cannot stop their opponents.

The Philadelphia Flyers are the latest team to feast on Pittsburgh, snapping a month-long slump Tuesday night with a 6-3 victory over the Penguins.

The last-place Flyers, who entered the game 1-9-3 in their last 13 games, moved to within one point of the Penguins in the Patrick Division. Pittsburgh, which was outscored 16-5 in two weekend games, fell to 1-4-1 in its last six games.

''It was a divisional game so it was a big game for us,'' said Tim Kerr, who scored two goals and an assist for a three-point game. ''Our confidence has definitely been down, we've done a lot of head-shaking. We've lost a lot of one-goal games, so it's about time we tried to win a couple.''

Lemieux's assist on Tony Tanti's first-period goal gave him at least one point in 40 straight games, the second longest scoring streak in NHL history behind Wayne Gretzky.

The Flyers outscored the Penguins 3-1 in the second period to carry a 4-2 edge into the final period.

Tanti scored a goal, which gave him his 11th career hat trick, just 30 seconds into the third period to move the Penguins within 4-3. But defenseman Gord Murphy's eighth goal of the season, sweeping the puck into an empty net with goalie Wendell Young out concentrating on Kerr in the right circle made it 5-3 at 14:16. Kerr picked up his third point of the game on the goal. Brian Propp finished the scoring with his 11th at 17:48.

Mike Bullard's 22nd goal of the season, on a slap shot from the right circle, made it 2-1 just 11 seconds into the second period.

Tanti's second goal of the game, after the Penguins had killed off a 5-on-3 Flyers advantage for close to two minutes and with Pittsburgh on a 5 on 3, tied the score 2-2. Tanti lunged and poked in a lose puck in the crease past goaltender Ken Wregget.

The Flyers took a 3-2 lead at 10:26 of the period on Rick Tocchet's 27th of the year. Kerr's 10th of the season, and second of the game with just 30 seconds left in the second period, widened the Flyers lead to 4-2.

Kerr's ninth of the season at 1:40 of the opening period had given the Flyers a 1-0 lead. Lemieux's shot on goal from the top of the right circle ricocheted off Wregget and hit off Tanti in front of the crease and into

the net for his 17th goal of the season at 5:59.

--- AROUND THE NHL ---

Elsewhere in the NHL, St. Louis nipped NY Islanders 2-1, Edmonton and Hartford skated to a 4-4 tie, Buffalo beat Quebec 5-2, Calgary routed Vancouver 7-2, and Los Angeles topped New Jersey 5-2.

Blues 2, Islanders 1

At Uniondale, N.Y., NHL scoring leader Brett Hull notched the game-winning goal and assisted on another to lead St. Louis. Rookie goaltender Curtis Joseph registered his first NHL victory in his second start. The Blues are now 3-0-1 since the All Star break.

Whalers 4, Oilers 4, tie

At Hartford, Conn., rookie forward Todd Krygier scored on a 20-footer from the left circle at 18:15 of the third period to lift the Whalers into the tie. Jari Kurri capped a four-goal Edmonton rally, including two goals by Mark Messier, after Hartford had taken a 3-0 lead.

Sabres 5, Nordiques 2

At Quebec, Phil Housley scored once and added two assists to pace Buffalo in the first game of a home-and-home series. Tony Hrkac scored a goal and an assist for the Nordiques.

Flames 7, Canucks 2

At Vancouver, British Columbia, Joe Nieuwendyk scored two goals and added two assists to lead Calgary. The victory extended the Flames' undefeated streak to seven games and moved them into first place in the Smythe division. The Canucks are now winless in their last eight home decisions.

Kings 5, Devils 2

At Inglewood, Calif., Tomas Sandstrom scored his first two goals as a King and Wayne Gretzky eclipsed the 100-point barrier for an NHL-record 11th straight season. Larry Robinson contributed a goal and assist, giving the 18-year veteran 915 points for his career, tying him with Bobby Orr for second place on the NHL scoring list for defensemen behind Denis Potvin.

(JAN. 31) EDITORIAL SAMPLER:

THE DESERET NEWS, SALT LAKE CITY, UTAH

Television executives don't seem to be getting the message. Despite public outcry againt excessive TV violence and despite bills in Congress to curtail such network shows, programs have grown more violent in the past three years.

What is particularly outrageous is that most of the growth in violence has come at hours and in the kinds of shows - including cartoons - that are watched by children. In other words, the ones who need the most protection are the ones getting the heaviest dose of TV violence.

Levels of violence in prime time in recent years have remained about the same in the '80s - about 6.2 violent acts per prime-time hour, which is bad enough. But, daytime weekend programs usually watched by children have grown to more than 25 violent acts per hour, much of it supposedly humorous.

That's shameful. What are we teaching children? And television teaches, make no mistake about that.

The networks have fought any laws regulating the contents of programs, citing First Amendment rights of free speech. No one likes to infringe on those basic rights. But, if the networks refuse to clean their own house, they can't complain if Congress does it for them.

SACRAMENTO (CALIF.) BEE

The scientist in the corporate research lab investigating the basic properties of materials or the physics of superconductivity doesn't put dollars on the next quarter's bottom line. For that reason, the scientist is becoming an endangered species in the growing number of corporations where next quarter's financial results matter most. That's bad news for the future competitiveness of the U.S. economy.

According to a survey by the National Science Foundation, real spending on U.S. corporate research and development actually fell in 1989 after four years of slowing growth.

At a time when Japanese companies are sharply increasing their R&D spending, the United States cannot afford to see its own efforts dwindle. Although government cannot quickly or easily cure U.S. business of its penchant for short-turn thinking, it can and must, take up the challenge of assuring that America's basic research program remains second to none.

#90031u0296 01/31/1990 ~United Press International

MOSCOW (JAN. 31) UPI - A senior Soviet official, saying the Azerbaijani Popular Front was under the control of extremists, ruled out negotiating with the main nationalist group on the crisis in the Transcaucasus.

Vyacheslav Mikhailov, an official of the Communist Party Central Committee sent to the Azerbaijani capital of Baku to deal with the recent conflict, Tuesday blamed organized nationalist ''flying squads'' for pogroms against Armenians and said ordinary citizens did much to stop the slaughter.

Mikhailov, deputy head of the Central Committee's ethnic relations department, said Moslem Azerbaijani ''terrorists'' organized themselves into squads of 10 or 15 men in an explosion of premeditated killing in the Azerbaijani capital Jan. 14-15.

''This action was well thought out,'' he said.

Mikhailov, who just returned from a visit to Baku, where at least 62 people - mostly Armenians - died in an orgy of ethnic violence, said he could not say categorically that the Azerbaijani Popular Front ordered the killings.

''But the pogroms could not take place without gunmen,'' he said.

He added that stockpiles of weapons were found at Popular Front offices searched by Soviet troops who stormed into Baku Jan. 20. Mikhailov said searches also turned up numbers of bank savings books apparently stolen from Armenians.

He said ordinary Azerbaijanis in Baku had protected many Armenians by taking them into their homes.

''This ensured that the pogroms did not take a more awful character,'' he

said.

Mikhailov ruled out talks with the Popular Front, which he said had split and was under the control of extremists.

He said, however, that the front had intellectual respectability when it was founded in late 1988 and had legitimate demands ranging from economic autonomy, cultural guarantees and development of the rights of Azerbaijani Moslems.

He said the demands should have been dealt with at the republic level but were not, adding there had been official bungling as extremists took over the secessionist front leadership.

''Then they started in the wrong direction - toward disruption,'' Mikhailov alleged. ''It is impossible to have dialogue with sections of the Popular Front who do not have constructive positions.''

Mikhailov said he could not confirm a report carried by Radio Moscow Monday that representatives of the popular fronts from Azerbaijan and Armenia would meet in the Latvian capital of Riga next week for talks to be mediated by popular front leaders from Lithuania, Latvia and Estonia.

But he said he would welcome any talks that helped put an end to bloodshed.

Mikhailov, like Soviet Foreign Minister Eduard Shevardnadze during the weekend, denied 24,000 Soviet, Interior Ministry and navy troops were sent into the Soviet republics of Azerbaijan and Armenia Jan. 20 in order to crush Ajerbaijani nationalism.

''It would not be correct to interpret the introduction of our armed forces as an attempt to restore (Soviet) power. They were introduced in connection with the provision of security for the general population and the averting of bloodshed,'' Mikhailov said.

Last week, the Soviet defense minister indicated one of the aims of the sending of troops was to crush the nationalist movement.

Azerbaijan and Christian Armenia were described by the official Tass news agency as ''quiet'' Tuesday but arrests of militants and troop searches continued.

Tass said there was no end to the Azerbaijani stranglehold on railroads carrying badly needed supplies to Armenia, where factories were shut, schools closed and homes unheated for whole chunks of the day because of fuel and raw material shortages.

The agency also said that strikes were still paralyzing the

Armenian-dominated enclave of Nagorno-Karabakh inside Azerbaijan though Soviet troops cleared and opened the main highway leading southeast from Stepanakert into Armenia.

-30- 4155

#90031u0341 01/31/1990 ~United Press International

(JAN. 31) UPI - Georgetown's game plan against Seton Hall Tuesday was to play better defensively. After the Hoyas defeated the Pirates by 22 points, there was little doubt that the scheme worked.

The sixth-ranked Hoyas forced Seton Hall to miss its first 12 shots of the game and harrassed the Pirates into 26 percent shooting overall to post a 70-48 victory.

Three days earlier, Syracuse scored 95 points against the Hoyas, the most scored against a Georgetown team in 14 years.

''A little humility doesn't hurt, but we don't want to be too humble, though, and that's why we wanted to play well today (Tuesday),'' Georgetown Coach John Thompson said. ''I was hoping that our defense would work well. It hadn't been working the last few games very well.''

Georgetown, 16-2 overall and 6-2 in the Big East, forced Seton Hall into 5 of 28 shooting from the field in the first half en route to a 36-18 halftime lead. The Pirates shot only 18 percent in the half.

''The very clear cut difference in the game was that they played with tremendous intensity and aggressiveness and we did not,'' Seton Hall Coach P.J. Carlesimo said. ''We were not able to match them at any position. They played extremely well and we played poorly, but a lot of it was cause-and-effect with their defense and their aggressiveness.''

Mark Tillmon led Georgetown with 25 points, including 16 in the first half. The Hoyas, rebounding from its 19-point loss to Syracuse Saturday, gained a tie for the lead in the conference with Connecticut.

Frantz Volcy led Seton Hall, 10-8 and 3-5, with 16 points. The Pirates dropped to 1-8 at the Capital Centre.

Tillmon scored five points during a 10-0 run midway through the second half that opened a 53-27 Georgetown lead.

--- AROUND THE COLLEGE SCENE ---

In the only other Top 20 game, No. 14 Connecticut routed Massachusetts 94-75.

At Amherst, Mass., Chris Smith scored 22 points and Tate George added 16 to lead the Huskies, 18-3. Smith scored 14 of his 22 points in the second half when Connecticut expanded a 37-33 halftime lead to a 19-point advantage. Jim McCoy topped the Minutemen, 10-8, with 22 points and Harper Williams added 18.

In other games Tuesday, it was: Alabama 57, Florida 44; Villanova 96, Providence 88, OT; Notre Dame 97, Dayton 79; Houston 102, Texas 93; Army 75, Niagara 70; Rhode Island 87, St. Bonaventure 75; W. Virginia 78, Duquesne 77; Creighton 80, Siena 76 and Texas-El Paso 82, New Mexico 80, OT.

Alabama 57, Florida 44

At University, Ala., Melvin Cheatum scored 23 points to lead the Crimson Tide to the SEC victory. Alabama improved to 15-5 and 6-3. Hosie Grimsley scored 13 points to pace Florida, 6-10 and 2-7.

Villanova 96, Providence 88, OT

At Villanova, Pa., Chris Walker scored nine of his 23 points in overtime as the Wildcats overcame a 19-point, second-half deficit. The Friars took a 67-48 lead with 7:36 to play in the second half, following a 23-4 run in which Carlton Screen had 14 of his career-high 29 points.

Notre Dame 97, Dayton 79

At South Bend, Ind., Keith Robinson scored 23 points and Elmer Bennett added 18 to help the Irish improve to 11-6. Anthony Corbitt scored 21 points and Negele Knight added 15 for the Flyers, 11-7.

Houston 102, Texas 93

At Austin, Texas, Derrick Daniels and Byron Smith scored 19 points each to lead the Cougars to the Southwest Conference victory. The Longhorns made only 14 of 43 shots in the second half to allow Houston to improve to 15-6 and 6-3. Travis Mays scored 25 points and Lance Blanks added 21 for Texas, 14-5 and 7-2.

#90031u0353 01/31/1990 ~United Press International

(JAN. 31) UPI - A businessman in Dexter, Maine, says he was making a phone call Tuesday afternoon when he heard a sound ''like thunder'' and saw the roof and front wall of Reny's department store collapse. Officials blame the weight of newly fallen snow for the cave-in, which injured three people... including a firefighter. Police say firefighters called to inspect the building's leaky roof evacuated about 10 people from the store

minutes before the collapse.

Budget director Richard Darman goes to Capitol Hill again Wednesday to defend President Bush's fiscal 1991 budget proposal. He'll appear at a hearing of the Senate Budget Committee. Darman found himself the target of angry Democrats during his appearance Tuesday before the House budgetary panel. Some of the accusations became so personal that chairman Leon Panetta, a Democrat himself, suggested Darman write them off as political rhetoric.

President Bush spent part of Tuesday polishing his State of the Union address, which he'll deliver to a joint session of Congress and the American public Wednesday night. Bush says the nationally broadcast speech will be more thematic rather than a ''shopping list.'' Five minutes after Bush ends his speech, House Speaker Tom Foley will deliver the rebuttal for the Democrats.

Ronald Reagan will make an unprecedented personal appeal for compassion for AIDS victims. The former president will appear in a 30-second public service announcement for the Los Angeles-based Pediatric AIDS foundation. The spot will air Monday. The foundation was founded by ''Starsky and Hutch'' actor Paul Michael Glaser and his wife, who was infected with the virus by a blood transfusion. Their daughter has died from the disease and their five-year-old son has tested H-I-V positive.

A federal judge in New York has barred publication of an unauthorized biography of the late L. Ron Hubbard unless certain copyright-protected passages are deleted. The ruling is in favor of New Era Publications, which is related to Hubbard's Church of Scientology and plans its own biography of the controversial author. A spokesman for Carol Publishing, which was to publish the contested biography, predicts Tuesday's decision will NOT ''survive.''

-30- 2422

#90031u0359 01/31/1990 ~United Press International

MADISON, Wis. (JAN. 31) UPI - The state Assembly, which killed an attempt to repeal Wisconsin's unenforced criminal abortion law, voted early Wednesday to tighten parental consent restrictions for minors seeking abortions.

The lower House of the Legislature voted 57-39 Tuesday against preliminary approval of the measure to repeal the state's abortion statute, which makes performing an abortion a criminal offense. The law has not been enforced since the Supreme Court's 1973 Roe vs. Wade decision that legalized abortion.

The vote prevented the repeal bill from passing beyond the amendment stage

effectively killing the measure, known as Assembly Bill 500. The repeal possibly could be reconsidered Thursday, but advocates on both sides of the issue said repeal was unlikely.

State lawmakers also voted 72-24 early Wednesday in favor of a bill that would require Wisconsin minors to obtain parental consent or judicial bypass to get an abortion. The measure exempts victims of incest.

The bill, which was sent to the Senate for consideration, requires minors to get consent of one parent or court permission to get abortions in cases where they could not be expected to get their parents' consent, such as in incest.

A physician who performs an abortion without such consent faces a possible fine of $10,000.

Under the incest provision, a minor who has become pregnant through incest may go to her physician for an abortion, but would be required to sign a statement claiming incest by a close relative. The physician, in turn, would be required to report the statement to the authorities.

The Assembly rejected a portion of an amendment that would have exempted rape victims. Some lawmakers were concerned that minors could claim they were raped to obtain an abortion without parental consent.

''People lie and lie ... We can't allow someone who writes a few words on a piece of paper to skirt the law,'' said Assembly Minority Leader David Prosser of Appleton.

Anti-abortionists claimed victory following the Assembly's decision not to send the repeal bill to a floor vote, while abortion rights supporters said the vote showed their cause was gaining momentum in the Legislature.

''This proves that this is not a pro-choice Legislature,'' said Assembly Speaker Pro Tempore David Clarenbach, a strong supporter of repeal.

''Well, the bill wasn't rejected or approved ... but we do feel that this vote was enough to show the people that the Legislature is on their side '' said Susan Armacost of Wisconsin Right to Life Inc.

Barbara Lyons, another member of Wisconsin Right to Life, said the repeal case is significant nationally because it is the first major test since the Supreme Court's Webster vs. Reproductive Health Services decision last July which expanded states' rights to restrict abortion.

Hannah Rosenthal, executive director of the Wisconsin Women's Council, agreed. ''AB 500 is dead, and it is exactly what we wanted,'' the abortion rights supporter said. ''This is the first time the Legislature has had to

go on record on this issue since 1978.''

Rosenthal said polls show Wisconsin voters support legalized abortions, and ''that the elected Legislature is out of sync. This will be remembered when people vote.'' The entire Assembly is up for election this year.

Assembly Speaker Thomas Loftus, a likely gubernatorial candidate in the general election and a declared supporter of legalized abortions, had told the Assembly's Democratic Caucus that if the repeal bill was not approved Tuesday, he would not support reviving it later.

Clarenbach had argued unsuccessfully that repeal was needed to remove conflicting state statutes.

One law provides for criminal penalties against women who receive abortions and another that eliminates the penalties. Neither supercedes the other. Another provision establishes felony penalties against physicians who perform abortions.

#90031u0360 01/31/1990 ~United Press International

HOUSTON (JAN. 31) UPI - Federal authorities expressed doubt a mail bomb that exploded in the lap of a minister's daughter was related to similar devices that killed a federal judge and a civil rights lawyer at the end of last year.

''We don't know of any connection between this incident and those that occurred (in December),'' said Phillip Chojnacki, a spokesman for the federal Bureau of Alcohol, Tobacco and Firearms. ''This probably will be treated as an unfortunate routine bombing.''

The pipe bomb, packed with large nails and concealed in a small package addressed to the Rev. John Osteen, injured his 30-year-old daughter Tuesday when she opened it in the office of his non-denominational church.

Lisa Osteen suffered flash burns, cuts and bruises in the 11 a.m. explosion and was described by a Ben Taub Hospital spokeswoman as being talkative and in ''very good'' condition. She was transferred to Methodist Hospital Tuesday evening.

''She's OK. She's going to be fine,'' Lisa Osteen's sister, April, said. ''Nothing can hurt us. We've got Jesus on our side.''

The package was addressed to John Osteen, pastor of the Lakewood Church, whose sermons are broadcast across the country. But Osteen, whose church is referred to as the ''Oasis of Love,'' told reporters he had not received threats recently.

''We've had no threats of any kind,'' he said.

Osteen said his daughter was not severely injured. ''She's going to be all right. We just thank God she was protected and we know the angels of God watched after her and our prayers protected her. The devil did his best, but his best was not enough.

''We're just going to go on and do the Lord's work. We'll pray for those who have done this. We know that they're sick, they need help.''

Other workers at the church, with a membership of about 10,000, said they heard a loud pop and then screams.

''We did have apparently a pipe bomb that came in a small package in our regular mail that was picked up at the local post office today,'' said a church worker. ''As is normal procedure, Lisa opened the package. There was an explosion.''

Jesse Gallardo, head of security at the church, said the pipe bomb contained 3- to 4-inch nails and was concealed in a white package.

The blast was being investigated by the FBI, ATF, Houston Police Department and postal inspectors.

Osteen had the package sitting on her lap when the bomb went off, and suffered burns and contusions to her abdomen and thighs. She remained conscious throughout the ordeal.

''It was a dangerous device,'' said police Sgt. J.C. Mosier. ''It was a miracle she wasn't hurt worse.''

Lakewood Church, on Houston's east side, is one of the largest churches in the city.

The Houston incident followed by one day the mailing of a booby-trapped briefcase containing a loaded pistol to an assistant U.S. attorney who prosecuted top Asian heroin traffickers in New York City.

The package, addressed to Assistant U.S. Attorney Catherine Palmer, was opened at the U.S. District Court building in Brooklyn but the .22 pistol failed to fire.

There was no evidence to link either the New York or Houston cases to mail bombings that killed a Birmingham, Ala., federal judge and a Savannah, Ga. lawyer in December, FBI officials said.

''According to preliminary reports from the scene, there are few, if any,

similarities between this explosive device and those devices involved in the December incidents,'' said FBI spokesman Tom Moore in Birmingham.

Judge Robert Vance of 11th U.S. Circuit Court of Appeals was killed Dec. 16 at his suburban Birmingham home by a package bomb. Two days later, Savannah City Councilman Robert Robinson, a civil rights lawyer, died when a mail bomb exploded in his office.

A mail bomb was intercepted by mail room workers at the 11th U.S. Circuit of Appeals headquarters in Atlanta Dec. 18 before it went off. The following day, the NAACP office in Jacksonville, Fla., was shipped a package bomb that never exploded.

EAST BERLIN (JAN. 31) UPI - Erich Honecker, the ailing hard-line communist who led East Germany for 18 years before his ouster, spent his first night in a pastor's home after his release from custody, church officials said Wednesday.

Honecker, 77, and his wife Margot will stay with the Protestant pastor's family in a suburb north of Berlin until room is found for them in a church care center, the sources said.

Honecker, an orthodox communist since his youth, had earlier refused to follow an official eviction order and would not accept moving into an apartment supplied by the church.

The former leader was released from investigative custody Tuesday, one day after being jailed to await trial in March on charges of high treason and official corruption.

Police released Honecker through a back door and escorted him to the church to avoid attracting crowds that had gathered outside, said a spokesman for the state prosecutor's office in East Berlin.

Many East Germans have been outraged by the corruption scandal and have called for severe punishment of the man who led their country with an iron fist while resisting widespread demands for reform.

Near the detention center, the words ''No mercy for Honecker'' were sprayed on a wall in large red letters.

Honecker's release came after an East Berlin court turned down an appeal by East Germany's prosecutor general to keep Honecker in custody. Another judge earlier refused to issue an official warrant of arrest against the former leader, citing his poor health.

Honecker was picked up by police Monday after he was released from the East Berlin Charite hospital, where he had undergone surgery to remove a malignant kidney tumor.

Leading authorities in West and East Germany, including East German Prime Minister Hans Modrow, had appealed for Honecker's release from custody on humanitarian grounds.

Honecker, who had spent much of World War II in a Nazi concentration camp, led his country along Stalinist lines for 18 years, until a popular uprising forced his resignation Oct. 18.

The East German authorities have since moved sharply away from orthodox communism and set the country on a reformist path, opening the Berlin Wall and agreeing to hold free and fair elections in March.

Modrow was expected to meet with opposition officials this week to discuss the formation of a new, nonpartisan cabinet to run the country until the elections.

Modrow and the opposition movements had agreed Sunday to form such a government to prevent a complete collapse of authority in the crisis-ridden country.

#90031u0417 01/31/1990 ~United Press International

SANTA FE SPRINGS, Calif. (JAN. 31) UPI - Four people were arrested when police discovered more than 800 pounds of cocaine worth an estimated $6.8 million inside their badly overloaded truck, authorities said Wednesday.

The seizure and arrests Tuesday were the result of a one-month investigation by the San Gabriel Valley Narcotic Enforcement Team involving officers from the Los Angeles County Sheriff's Department, the state narcotics bureau and a dozen local police departments.

Officers staking out a business known as Kali Karts saw several cardboard boxes, sealed with duct tape and marked with large numbers, being loaded into a 1989 Toyota truck, sheriff's Deputy Chris Wahla said.

''The four-wheel drive vehicle was so badly overloaded that there was barely room in the vehicle for the driver, and the vehicle was literally sitting on its axles,'' Wahla said.

Uniformed deputies stopped the vehicle when it left the business about 12:30 p.m. Tuesday, he said.

Officers found 882 pounds of cocaine loaded into the vehicle and obtained a search warrant for the business, where they found another 2.2 pounds of the drug, he said.

A late model Porsche Carrera also was seized at the business, he said.

Narcotics officers also searched an apartment in Glendale where $8,800 in cash and assorted paperwork was seized, he said. Officers said the apartment was nearly empty of furniture and was probably used to store cocaine.

Driver Olavio Mera, 24, of Colombia, who rented the Glendale apartment, Richard Herrera, 39, of Montebello, Miriam Negri, 45, and her son, Ryan, 20, two Colombians living in Walnut, were booked at the Pico Rivera sheriff's station on suspicion of transportation of cocaine.

Bail was set at $2 million each.

Negri and her son were identified as the owners of Kali Karts, Wahla said.

Officers searched the Negri's Walnut home but no evidence was seized in that raid, he said.

The San Gabriel Valley Narcotic Enforcement Team is composed of deputies from the Sheriff's Department and investigators for the state Bureau of Narcotic Enforcement and officers from the Pasadena, San Gabriel, El Monte Azusa, Glendora, Monrovia, La Verne, Pomona, Claremont, Arcadia, Covina and Baldwin Park police departments.

#90031u0532 01/31/1990 ~United Press International

(JAN. 31) UPI - Around the World... Around the Clock... the latest news from UPI...

White House Budget Director Richard Darman faces a second day of criticism over the administration's budget proposal when he goes before the Democrat-dominated Senate Budget Committee today. Darman came under attack from House Democrats yesterday as he outlined the president's budget. Illinois Democrat Marty Russo accused Darman of NOT knowing what tough budget choices were.

Members of the the Wisconsin state House have been debating abortion measures into the early morning hours. A bill requiring parental consent for abortion has been approved and sent to the senate. Lawmakers earlier voted to exempt minors who say they are victims of incest... but they rejected exempting minors who say they've been raped.

The leader of the Operation Rescue national protest movement against abortion has been freed from an Atlanta jail after an anonymous donor paid his two-thousand dollar fine. Randall Terry... jailed since October... had refused to pay the fine on principle. He is headed to Washington, D-C, to address religious broadcasters today.

The entire regional politburo of the Communist Party in the Russian city of Volgograd has resigned following three days of protests by tens of thousands of people. Volgograd was known as Stalingrad before World War Two. The regional party leader... an ally of President Gorbachev ... resigned earier this week.

East German Prime Minister Hans Modrow says that East Germany is bound by international treaty to stay in the Warsaw Pact with the Soviet Union. But after a day of meetings with Soviet President Gorbachev , he concedes that East and West Germany may re-unify.

-30- 1892

#90031u0547 01/31/1990 ~United Press International

(JAN. 31) UPI - New York Police have arrested a husband and wife they say robbed at least 92 young girls... some of them at gunpoint... in a two-month string of crimes outside a Bronx school. Police say the couple... who lived around the corner from the public school the girls attended... used the money to buy drugs.

The State Department says Secretary of State Baker has delayed his trip to Moscow next week by one day. But the department says the delay has NOTHING to do with an UNconfirmed report that Soviet President Gorbachev will resign his post as head of the communist party.

A jury has convicted an Alton, Illinois, woman of murder in the suffocation death of her six-week-old daughter. Prosecutors say they plan to seek the death penalty for Paula Sims... who told authorities that masked gunmen abducted her two daughters in separate kidnappings three years apart.

31-

Pope John Paul is in the nation of Chad on the final leg of his African tour. The pope is telling Moslems in Chad that he is ''a man of dialogue and a messenger of peace.'' He celebrates mass today at Peace Stadium in the war-ravaged country.

A London economic agency says that Western investment in Eastern Europe could divert resources from developing countries in Asia and Latin America. The report says that by fostering the same kind of labor-intensive industry in Eastern Europe that other developing countries

are using... they could be ''robbing Pedro to pay Pavel.''

#90031u0584 01/31/1990 ~United Press International

BEIJING (JAN. 31) UPI - China's governing Communist Party has again warned against internal or external attempts to sabotage ''stability,'' singling out Western influences for special concern, the official news media reported Wednesday.

A circular released by the party's ruling Central Committee warns of ''hostile foreign forces at home and abroad'' that ''want to change China's direction by taking advantage of its temporary difficulties,'' according to the state-run Xinhua News Agency.

China has publicly acknowledged such problems as widespread production halts and overemployment resulting from the country's anti-inflationary economic policies.

The latest salvo in a continuing ideological crackdown, the document states emphatically ''the struggle against bourgeois liberalization and the international reactionary forces' scheme for 'peaceful evolution' in China cannot be relaxed one iota.''

Bourgeois liberalization is a vague catchphrase for perceived corrupt Western political and cultural influences.

China's newly ascendant hard-line leaders have repeatedly accused the West of helping whip up last spring's massive pro-democracy protests as part of a plot to subvert socialism. The protests came to a violent end when the army fired on unarmed demonstrators June 4, killing hundreds, if not thousands.

In an illustration of China's ideological defensiveness since the collapse of hard-line socialist regimes in eastern Europe, the circular warned of the pressing need to ''guard against and prevent any tendency to cast off or weaken the leadership of the party, and guard against and prevent persons harboring ulterior motives from sabotaging stability and unity.''

The circular is aimed specifically at trade unions, women's federations and the party's Communist Youth League. All are mass organizations designed to promote the party line.

Party and government authorities are especially uneasy over the specter of worker unrest, according to Chinese and Western sources. Tight credit policies and a cash crunch have caused millions of rural enterprises to shut their doors, exacerbating the problem of unemployment in China's overpopulated countryside.

Workers in several major cities such as Shanghai and Wuhan reportedly applied for permission recently to protest declining living conditions and 3 million to 4 million workers in state-owned enterprises are sitting idle according to the All-China Federation of Trade Unions.

In a related develpment, President Yang Shangkun congratulated commanders from the army and the paramilitary People's Armed Police for their ''great victory'' in putting down last spring's protests.

Yang's address, carried on the front page Wednesday of the official People's Daily, points up the increased role of the military in politics since June. Over the lunar New Year holiday, state media featured top leaders meeting with soliders and armed policemen in Tiananmen Square.

Yang, who also occupies the second highest seat in the Chinese military, stressed the necessity for absolute loyalty to the party.

The circular proposed in vague language that the party should step up indoctrination of workers, women and children to prevent them from taking to the streets again.

''Party organizations at all levels should support the trade unions, youth league and women's federations to participate in handling social contradictions, especially unexpected social events,'' an apparent euphemism for public demonstrations, the Xinhua report said.

Large numbers of workers and Communist Youth League members joined last spring's massive student-led protests.

#90031u0641 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - The government's index of leading economic indicators rose a stronger-than-expected 0.8 percent in December to bring the annual gain to a modest 0.4 percent, the Commerce Department reported Wednesday.

The annual total was the lowest since 1984 when the index declined 1.5 percent. Last year the index, which is used by the government to forecast future economic activity, gained 3.9 percent.

Economists had expected the index to rise 0.5 percent in December after it gained 0.1 percent in November and fell 0.3 percent in October.

During the month, the index rose to 145.7 from a revised 144.6 the month before. The 0.8 percent rise was the greatest since May.

The index reflected a general slowing of the economy. On Tuesday, Federal Reserve Chairman Alan Greenspan told a congressional panel he believed the probability of a recession within the next six months has declined.

Greenspan, who acknowledged that the economy was mired in a ''temporary hesitation,'' said the government will not know for sure if the threat of a recession has waned until spring economic data is reviewed.

Six of the 11 components used to create the index rose during December, the department's Bureau of Economic Analysis said.

The greatest contributor to the gain was the change in the unfilled orders of manufacturers, followed by contracts and orders for plant and equipment stock prices, money supply, building permits and the index of consumer expectations.

Four of the indicators slowed during the past month, including the change in sensitive materials prices, followed by the average weekly claims for state unemployment insurance, manufacturers' new orders for consumer goods and materials and vendor performance.

The average workweek remained unchanged during December, the department said.

#90031u0643 01/31/1990 ~United Press International

(JAN. 31) UPI - President Bush delivers his State of the Union message... anti-abortion advocates win in Wisconsin... the budget battle continues... and more UNrest in Eastern Europe. Those stories, and more next from U-P-I.

President Bush delivers his second State of the Union address this evening... one that's expected to spotlight his agenda for the last decade of the 20th century.

Bush says his nationally broadcast speech to a joint session of Congress will be more thematic, rather than ''a shopping list'' of national issues.

White House chief of staff John Sununu told reporters yesterday that the address ''will be a good blend'' of domestic priorities and foreign policy.

In foreign policy, Bush is expected to praise the peaceful democratic revolutions in Eastern Europe... as well as Soviet President Gorbachev for pursuing his reform policies.

However, Bush also likely will stress that he remains ''cautious'' and ''prudent'' on defense matters. While some troop levels in Europe may be cut... it's believed that U-S forces will remain on the continent as part

of NATO.

On the domestic side, Bush is expected to again push for a capital gains tax cut. Administration officials are hoping to get a vote on the proposal in a couple of weeks. His Clean Air Act, other environmental, education and child care programs also will be spotlighted.

The Wisconsin state assembly has overwhelmingly approved a bill that requires minors to get permission from their parents to seek an abortion. The bill must be approved by the state senate.

The vote came at 1:40 a-m local time to the cheers of members of the Wisconsin Right to Life group seated in the chambers.

During seven hours of debate... legislators accepted only one amendment. Minors who sign a statement saying they are victims of incest will be allowed to seek abortions without their parent's consent... providing the doctor notifies police.

The assembly rejected a similar amendment for minors who say they were raped.Legislators said that might encourage pregnant minors to lie.

Doctors who perform abortions on minors without their parents' consent would be subject to 10-thousand dollar fines under the law.

Earlier yesterday... the state house voted to leave on the books a law that makes performing abortions a criminal act. The law has been UNenforced since the 1973 Roe versus Wade decision... but abortion supporters fear, and abortion opponents hope that new court rulings could make it legal to outlaw abortions in the state.

-30- 2735

#90031u0675 01/31/1990 ~United Press International

(JAN. 31) UPI - Stock prices fell sharply in early trading on the Tokyo Stock Exchange Wednesday due to a drop in the value of the yen but recovered most of the loss before the close. Trading was light.

The Nikkei Average of 225 selscted issues, which added 41.97 points Tuesday, eased 26.72 points to close at 37,188.95. The Tokyo Stock Index of all major listed shares, a 4.46-point gainer Tuesday, slipped 3.65 points to 2,737.57.

An estimated 400 million shares changed hands, compared with 477 million shares Tuesday. Declines outpaced advances 480 to 443, while 195 issues were unchanged.

A sharp drop in the value of the yen against the U.S. dollar sent the

Nikkei average down more than 250 points in early trading, but bargain hunting brought prices slowly back up.

The dollar's early gain against the yen began eroding late in the day. The dollar opened 1.65 yen higher in the morning but finished trading 1.15 yen higher at 144.40 yen.

Steel issues, including Kawasaki Steel and NKK, lost ground. Machineries, electricals, and certain financials also eased. Pharmaceutical, food, textile, and retail shares ended higher.

Kawasaki Steel paced the actives, followed by Nippon Steel, Sumitomo Mining, Fujisawa Pharmaceutical, and Nippon Mining.

Elsewhere in Asia, stocks closed lower in light trading on the Hong Kong Stock Exchange.

The Hang Seng Index eased 9.20 points to 2,751.60. Utilities lost 13.27 points, financials slipped 1.21, industrials dropped 5.64 and properties fell 27.30 points. Volume amounted to 564 million shares, compared with 519 million traded Tuesday.

"The market just followed the Tokyo market," said a senior broker with a local firm. "There is a lack of general buying interest in the market," said another broker. "I think the Hang Seng Index will continue to stay at its current level for at least the next few days."

Dealers said the Hong Kong market was now sitting on a strong technical support level at around 2,750 points which it previously tested but failed to break.

Stocks closed mixed in brisk trading on the Singapore Stock Exchange as institutional investors came back into the market in full force.

The Straits Times Industrial Index dipped 3.13 points to 1515.01 while the narrower All Singapore Index added 0.70 points to 425.16. Turnover amounted to 160.5 million shares.

Analysts said buying support pushed prices higher but profit taking countered the gains. "The Year of the Horse brought in brisk trading activities," one local broker said of the Chinese new year which began last weekend.

On the trading floor, Isetan led the advancing issues, followed by Development Bank of Singapore, Straits Steamship Land, Hotel Negara, Keppel Corp. (warrants), and Seaview Hotel.

ASEAN Fund paced the declining issues, followed by Eu Yan Sang, Singapore

Airlines, and Jurong Shipyard.

In Australia, stocks closed sharply lower in moderate trading on the Sydney Sharemarket after Federal Treasurer Paul Keating announced there would be no early easing of monetary policy.

The All Ordinaries Index fell 17.9 points to 1677.9. The All Industrials Index lost 23.2 points to 2620.5 and the All Resources Index lost 13.4 points to 959.0.

Golds also weakened, as the Gold Index lost 25.3 points to 1937.2. Volume was 83 million shares.

Keating's announcement followed the release of the December Consumer Price Index which showed a rise of 1.9 percent, slightly above market expectations.

The rise brought the inflation rate for 1989 to 7.8 percent, a rate Keating said was too high by world standards and any further easing of interest rates would be "a matter for both time and judgement."

Among some of the day's highlights, Westpac Bank lost 12 cents to $5.94, NAB Bank slipped six cents to $6.74, News Corp. tumbled 40 cents to $12.10 Adelaide Steam lost 40 cents to $5.90, Brambles fell 15 cents to $14.25, and Coles-Myer dropped 20 cents to $7.86.

-30- 4185

#90031u0678 01/31/1990 ~United Press International

(JAN. 31) UPI - Provisional leaders in Eastern Europe are learning that it's easier to take power than to keep it.

In Romania, the interim government faced down anti-government protesters who prevailed in Bucharest during two days of protest. Thousands of miners and factory workers rallied in support of the ruling National Salvation Front yesterday. Interim President Ion Iliescu promised the pro-government demonstrators more food, as the tense situation began to ease.

Bulgarian leader Peter Mladenov called for his country's Communist Party to reform quickly. In a speech opening a party congress aimed at speeding reforms, Mladenov called for the separation of powers of the Communist Party and Bulgarian state.

In Yugoslavia, ethnic Albanians exchanged fire with riot police yesterday on the seventh day of anti-Serbian demonstrations in the nation's southeastern Kosovo province. The on-going violence has left at least 11 dead.

In Moscow, East German Prime Minister Modrow met with Soviet President Gorbachev... and later rejected the idea of Berlin leaving the Warsaw Pact.

And former East German leader Erich Honecker was released from jail yesterday, where he was held on corruption charges. A sympathetic judge cited the aging hard-line communist's failing health.

A report issued today in London says that developing Third World nations will suffer economically as the West spends it foreign aid funds closer to home.

The Economist Intelligence Unit said in its report, ''World Outlook 1990''... that Western eagerness to invest in Eastern Europe could transform Warsaw Pact nations into powerful competitors to several Asian producers.

The E-I-U is a subsidiary of The Economist magazine and a leading publisher of international business and economic information. Its report says Western investment and other efforts to bolster fledgling markets in Eastern Europe are coming when Latin America desperately needs resources from abroad.

The report outlined several factors that gave a bleak prognosis of the economies of Latin America for 1990. It predicts that the gross domestic product will grow ''in real terms'' by a mere two-point-eight percent in Mexico... two percent in Argentina... and one and a half percent in Brazil.

The E-I-C says the emergence of Eastern European market economies would have an impact on developing countries in Asia, which now produce similar exports.

Many Western firms are trying to operate in Warsaw Pact nations to exploit a well-educated and cheap labor force.

-30- 2737

#90031u0682 01/31/1990 ~United Press International

PITTSBURGH (JAN. 31) UPI - The Teamsters union said it is appealing the loss of a representation election among 8,000 USAir fleet service workers at 140 airports nationwide.

The union, in election results Tuesday, was rejected in its effort to represent 8,000 USAir workers who handle baggage and cargo and who put food on planes. Although 2,371 of the 2,425 votes cast were for the Teamsters, the union lost because a majority of the employees chose not to vote.

The election was an all-or-nothing affair. The defeat, if upheld, means about 1,400 USAir unionized fleet workers at airports in Pittsburgh,

Philadelphia, Boston, and Buffalo will lose their Teamsters' representation.

USAir Chairman Edwin Colodny promised fleet service workers no loss of jobs, pay or seniority if the union was rejected. He said he was gratified by the election results.

"I am pleased that our fleet service employees have had an opportunity to choose whether they wish to be represented by the IBT (Teamsters)," Colodny said. "Now that the election is over, we must put aside any differences and work together to make USAir the premier airline in our industry."

The Teamsters airline division has filed an appeal with the National Mediation Board that accuses USAir of interfering in the mail-ballot election.

"The government was in the hip pocket of the company," said William Genoese, director of the Teamsters' airline division, who criticized the board's handling of the election. "It was an uphill battle from the start."

The mediation board ordered the election after USAir's merger with Piedmont Airlines in December following a $1.6 billion buyout three years ago. Piedmont was based in Charlotte, N.C.

The vote affected 1,060 USAir workers in Charlotte and more than 3,900 former Piedmont Airlines workers, all of them non-union. The formal acceptance of the vote will be upheld while the National Mediation Board investigates the union's charges, said board spokesman Lou Townsend. "This charge is the last of many filed by one party or the other during the election process," Townsend said.

USAir is headquartered in suburban Washington, D.C., but it maintains one of its primary hubs at Greater Pittsburgh International Airport.

#90031u0688 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - Continuous declines in mortgage interest rates boosted home buyers' purchasing power in December, but overall housing affordability in 1989 remained below that of the year before, the National Association of Realtors said Wednesday.

The NAR's housing affordability index, which tracks monthly changes in home buyers' purchasing power, measured 108.2 in December, up from 105.5 in November. At 108.2, the index shows that a family earning the national median income of $33,600 for December had 108.2 percent of the income needed to qualify for conventional financing covering 80 percent of a home priced at $92,500, the median existing-home price for that month.

Half the nation's families earn more than the median income and half earn less. Likewise, half the existing single-family homes sell for more than the median price and half sell for less.

The association pointed out that housing affordability deteriorated in 1989, when the yearlong index dropped to 106.1 from 113.5 in 1988, due to rising interest rates during the first half of last year. As interest rates dropped in the second half, some purchasing power was regained.

Housing affordability improved in December because of a decline in mortgage interest rates to 9.96 from 10.12 percent in November, a fall in the national median home price to $92,500 from $93,200, and a rise in median family income to $33,600 from $33,483.

NAR President Norman Flynn noted that the lower median home price shows a larger volume of purchases in the less expensive range.

The NAR's December housing affordability index was the highest since January 1989, when it was 110.5, down from 111.5 in December 1988.

NAR chief economist John A. Tuccillo predicted further improvements in affordability during 1990 for markets with a sizeable stock of lower-cost housing. In areas where prices have surged ahead of income, however, home buying conditions will remain severe, particularly for entry-level buyers, he said.

-30- 2199

#90031u0695 01/31/1990 ~United Press International

LONDON (JAN. 31) UPI - Stock prices were higher in brisk trading at midday Wednesday on the London International stock exchange.

The Financial Times 100-stock index, which slipped 6.9 points Tuesday, was up 10.8 points to 2,332.8. The narrower top 30 industrial average was ahead 6.5 points to 1,859.5.

Volume was around 355 million shares, compared with 190 million shares traded during the same period Tuesday. Market watchers noted that the volume was swelled by several heavy program trades.

Among the most widely traded stocks, W.H. Smith PLC, a retail and media distribution company, lost ten cents to $5.04, after reporting its latest profits slipped 16 percent.

A number of insurance companies rose on takeover speculation. Sun Alliance PLC gained ten cents to $5.20 as speculation mounted that French insurer UAP may raise its stake in Sun. Guardian Royal Exchange added seven cents

to $4.13 and Legal & General PLC added 13 cents to $6.76.

Elsewhere, Wellcome PLC lost 20 cents to $11.40 on profit taking. The stocks rose sharply Tuesday after a U.S. advisory panel recommended that the Food and Drug Administration approve wider use of its AIDS drug AZT.

MINNEAPOLIS (JAN. 31) UPI - President Bush gets high marks from a majority of Minnesotans for his performance as president, particularly in the area of foreign policy, in a new poll published Wednesday.

A copyright poll in the St. Paul Pioneer Press Dispatch said Bush received favorable ratings from 64 percent of Minnesotans and unfavorable grades from 35 percent of the 767 adults surveyed Jan. 19-25. The poll has a margin of error of 4 percentage points.

In a state that has been carried by the Democrats in seven of the last eight presidential elections, Republican Bush is winning higher marks than Democratic Gov. Rudy Perpich or either of the state's Republican senators, David Durenberger and Rudy Boschwitz.

Bush received favorable marks from 83 percent of Republicans, 62 percent of Independents and 52 percent of Democrats.

Eighty-eight percent approved of Bush's handling of U.S.-Soviet relations and 77 percent approved of his handling of developments in Eastern Europe. Seventy percent approved of the president's efforts in Panama and 62 percent applauded his initiative in the war on drugs.

However, just 24 percent approved of Bush's handling of the federal deficit and only 40 percent agreed with his handling of environmental problems and his efforts to improve public education.

CAMBRIDGE, MA (JAN. 31) UPI - Stride Rite Corp.'s stock plunged more than 18 percent on a weak earnings report and the footwear maker's rejection of a $32 a share friendly merger offer.

Stride Rite, which has thrived with the recent popularity of its Keds line of women's shoes, reported a 71 percent increase in net income in the latest quarter compared with a year earlier, but still fell below analysts projections.

Walsh, Greenwood & Co., Greenwich, Conn., whose December offer valued Stride Rite at about $864 million, withdrew its bid and hinted it might pursue a hostile takeover for the company.

"Your response leaves us no alternative but to withdraw our $32 per share proposal and consider all available options consistent with our objectives " Walsh, Greenwood said in a letter to the Stride Rite board that was released late Tuesday.

But Wall Street did not take the original bid very seriously and the possibility of a takeover fight did nothing to buoy the stock price which closed at $20.125 in New York Stock Exchange trading Tuesday, down $4.625.

A Stride Rite statement said its board of directors unanimously rejected

the unsolicited offer because its long-term best interests would be served by remaining independent.

Stride Rite earnings for the fourth quarter were $7.66 million, or 28 cents a share, compared with $4.48 million, or 17 cents a share, in the same quarter a year ago. Sales climbed two percent.

For the year, the company earned $45.7 million or $1.69 a share, below the $1.70 to $1.80 a share range the company predicted five weeks ago.

#90031u0765 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - The good old boy-os of the Ancient Order of Hibernians got into a bit of a brouhaha over candidates for grand marshal of this year's St. Patrick's Day parade, and now a judge says they'll have to explain it all to her.

Unlike past years, the nomination infighting didn't involve a woman or the Irish Republican Army.

In fact, 1989 was a landmark year for the ladies, when Dorothy Hayden Cudahy, the first female grand marshal in the parade's 227-year history, proudly led the smiling Irish up Fifth Avenue.

This year's dispute began Monday night when about 160 Hibernians met at a midtown Manhattan hotel to choose a grand marshal and the nominations committee offered only two candidates.

When parade chairman Francis Beirne refused to accept other nominations from the floor, things got a bit noisy, according to bystanders.

The vote was supposed to be Tuesday night, but members William Barnett and Patrick Hughes, who wanted to nominate Merrill Lynch Executive Vice President Jack Irwin as grand marshal, went to state Supreme Court in Manhattan and got a temporary restraining order.

The two candidates nominated were Dan Kelly, a Bronx furniture store owner who lives in Scarsdale, and Tim Hartnett, a former U.S. Treasury agent and member of the parade committee for 38 years who lives in Yonkers.

The plainiffs charged in their suit that the bylaws of the group allow the selection committee to permit up to four candidates for the post.

According to an unnamed member, rules were changed last November to eliminate floor nominations ''to try to take some of the carnival atmosphere out of it.''

Said unhappy member Jim McNamara, ''Well, we felt we were denied democratic process and things got pretty loud and out of control.

''In fact, when Francis tried to get a former grand marshal, Brother Charles Quinn, to say a prayer, no one noticed because the delegates were so loud,'' said McNamara, public relations director for the International Longshoremen's Association.

State Supreme Court Justice Myriam Altman ordered the parade committee to explain it all to her next Tuesday.

#90031u0807 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - A sharp rise in durable goods orders pushed the government's index of leading economic indicators up 0.8 percent in December to bring the annual gain to a modest 0.4 percent - the lowest in five years, the Commerce Department reported Wednesday.

The annual total was the lowest since 1984 when the index declined 1.5 percent. The index, which is used by the government to forecast future economic activity, gained 3.9 percent in 1988.

Economists had expected the index to rise 0.5 percent in December after the index rose 0.1 percent in November and fell 0.3 percent in October.

During the month, the index rose to 145.7 from a revised 144.6 the month before. The 0.8 percent rise was the largest since May.

Economists said the index reflects a general sluggishness in the economy.

''Generally, the leading economic indicators have been flat for the past year and we think that's what the economy will be for this year - a bit of bobbling around but no recession. Just sluggish growth,'' said David Wyss, an economist at Data Resources Inc. of Lexington, Mass.

On Tuesday, Federal Reserve Chairman Alan Greenspan told a congressional panel he believes the probability of a recession within the next six months has declined.

Greenspan, who acknowledged the economy has been ''less vigorous'' and is stuck in a ''temporary hesitation,'' said the government will not know for sure if the threat of a recession has waned until spring economic data is reviewed.

''This number today does not protend stronger economic activity,'' said Mickey Levy, chief economist at First Fidelity Bancorp in Philadelphia. ''We've been predicting a 'touch-and-go' with recession.''

Six of the 11 components used to create the index rose during December, the department's Bureau of Economic Analysis said.

The greatest contributor to the gain was the change in the unfilled orders of manufacturers, followed by contracts and orders for plant and equipment stock prices, money supply, building permits and the index of consumer expectations.

Orders for durable goods increased 2.5 percent in December.

Four of the indicators slowed during the past month, including the change in sensitive materials prices, followed by the average weekly claims for state unemployment insurance, manufacturers' new orders for consumer goods and materials and vendor performance.

The average workweek remained unchanged during December, the department said.

Levy said the basket of indicators is likely to decline during January because of falling stock prices and a possible slip in the nation's money supply.

#90031u0830 01/31/1990 ~United Press International

ELIZABETH CITY, NC (JAN. 31) UPI - A former North Carolina State University student stood up in court and said he would starve himself to death before the state can send him to the gas chamber for committing a contract murder.

''I don't believe my life is someone else's for the taking,'' James Bartlett Upchurch III said Tuesday just after being sentenced to death in

Pasquotank County Superior Court. ''I'll take my own life by fasting.''

Upchurch, 21, last week was convicted in for beating and stabbing Leith Von Stein to death in 1988 and assaulting his wife, Bonnie Von Stein. Leith Von Stein's stepson testified he hired Upchurch to kill his family in an effort to collect a $2 million inheritance.

Upchurch has maintained his innocence, saying he was framed. He said he would kill himself in order to ''save my family further burden.''

''I don't want the state to force-feed me through the use of an IV,'' he said in court Tuesday. ''I'm not a cow to be fattened for slaughter. I'm innocent and I'd like to die innocent.''

Superior Judge Thomas Watts also sentenced Upchurch to the maximum sentences of life imprisonment for burglary and 20 years for assualt. Upchurch was sentenced to an additional six years for conspiracy and larceny charges.

Upchurch was being held Wednesday at the state penitentiary in Raleigh under a death watch, meaning he will be monitored at all times. Watts ordered that Upchurch be given mental health treatment.

His case will be assigned a series of automatic appeals.

Bonnie Von Stein, the wife of the slain man, testified last week that she did not want Upchurch sentenced to death.

Christopher Pritchard, Leith Von Stein's stepson, testified he hired Upchurch to carry out the July 25, 1988, attack. Pritchard, 21, pleaded guilty to reduced charged Jan. 2, in exchange for his testimony against Upchurch.

Pritchard and another conspirator, Gerald Neal Anderson, were scheduled to be sentenced Wednesday. Anderson admitted he drove Upchurch to the Von Stein home in Washington, N.C., and police said without Anderson's tip the case might have never been solved.

#90031u0845 01/31/1990 ~United Press International

AGANA, GUAM (JAN. 31) UPI - Former Gov. Ricardo J. Bordallo, scheduled to begin serving a prison sentence next week for corruption, wrapped himself in Guam's flag, chained himself to a statue on a main road and fatally shot himself in the head Wednesday, police said.

Bordallo, 62, shot himself about 3 p.m. and died 90 minutes later at a U.S. Navy hospital, police said.

He had been scheduled to travel Wednesday night to Boron, Calif., to begin serving a three-year prison term following convictions of extorting campaign funds and witness tampering while governor of the unincorporated U.S. territory in the south Pacific.

Highway workers who witnessed the shooting said that after Bordallo had shrouded himself in the island's flag and chained himself to the statue of ancient Chamorro tribal leader Chief Kapuha, he pulled a pistol from his pocket, put it to his head and fired.

''We had no chance to act,'' said one of the workers on Marine Drive, the chief thoroughfare in the capital. ''It was just one, two and three.''

Bordallo, a Democrat, won four-year terms as governor in 1974 and 1982. His indictment came while he was campaigning for reelection.

A longtime critic of the U.S. government, Bordallo was tried in a federal court early last year after being investigated by the FBI and indicted on corruption charges by a federal grand jury.

The former governor had maintained the federal government had no jurisdiction over him. He said he was subject solely to the laws of Guam.

After his attorneys exhausted their appeals, Bordallo was ordered to report to Boron by Feb. 5.

Bordallo's wife, Sen. Madeleine Bordallo, could not be reached for comment. She said Tuesday that she intended to accompany her husband to California.

Guam, surrendered by Spain to the United States in 1898 following the Spanish-American War, is an unincorporated territory administered by the U.S. Interior Department. It became a U.S. territory in July 1950.

Southernmost and largest of the Mariana Islands with 209 square miles - 30 miles long and 4 to 8 1/2 miles wide - Guam lies 1,500 miles southeast of the Philippines and 3,000 west of Hawaii. Its location makes it an important refueling stop for trans-Pacific air traffic.

West of the International Date Line and 14 hours ahead of Eastern Standard time, Guam bills itself as ''Where America's day begins.''

Its 130,000 people are American citizens but cannot vote for president. Since 1972, Guam has had one representative in the U.S. House who can vote in committee but not on the House floor.

Guam has elected its own governor since 1970. Previously, governors were

appointed by the U.S. president.

#90031u0875 01/31/1990 ~United Press International
SRINAGAR, INDIA (JAN. 31) UPI - India Wednesday accused Pakistan of inciting Moslem separatists in Kashmir to ''subversion, violence and terrorist activities'' amid militant attacks that killed four people and new protests in Srinagar against Indian rule.

In a related development, authorities impounded the latest issues of Newsweek magazine at Bombay Airport, charging it carried an ''anti-Indian'' story on the uprising in mostly Moslem Kashmir, the United News of India news agency reported.

The move follows the detention and expulsion last weekend from Kashmir of foreign journalists on grounds of being security threats. The news blackout also includes official denial of public telex and telephone facilities to Indian reporters.

India's latest blast at Pakistan over the disputed region came after a speech by Pakistan Foreign Minister Shahabzada Yaqub Khan over state-run radio and television Tuesday evening, in which he said Islamabad backed the ''struggle for self-determination'' in Kashmir by ''freedom fighters.''

He charged hundreds of Kashmiri Moslems had been killed by security forces during protests, with many more injured and thousands arrested. He also rejected Indian claims Pakistan is arming and training Islamic extremists on its side of the border.

A Foreign Ministry spokesman said Khan's description of the situation ''is deliberately fallacious'' and added ''the statement from the Pakistani foreign minister indicates that his government persists in its efforts to involve itself in our internal affairs.''

''Indeed, some of the rhetoric used in the broadcast amounts to direct incitement to subversion, violence and terrorist activities in a part of India,'' said Aftab Seth, adding Pakistan's stance ''can only create tension.''

Seth said the only issue on Kashmir to be resolved is the ''vacation by Pakistan of territory illegally occupied by it.''

The two neighbors have battled in Kashmir during the three wars they have fought since 1948. India currently controls two-thirds of the rugged Himalayan area, which is divided by a U.N.-monitored cease-fire line.

The turmoil in Kashmir has worsened icy relations between India and

Pakistan, with many diplomats and experts expressing fears over the possibility of a fourth conflict between the neighbors.

In the main Kashmir city of Srinagar, incidents of unrest and rumors of other trouble prompted shopkeepers who opened stores during a relaxation of curfew to close early, leaving the streets to only troops, police and legions of stray dogs.

The curfew was imposed Jan. 20 on Srinagar and other towns of the Kashmir Valley after violence that residents claim was provoked when security forces fired on peaceful pro-secession demonstrators.

Popular perceptions that hundreds of people were killed converted what had essentially been a protest movement into an mass uprising against Indian rule supported by virtually the 3 million Moslem residents of Kashmir.

Official sources put the death toll since Jan. 20 at more than 90, most of the dead victims of security force bullets, although the government pegs fatalities at just over 30.

Some 1,500 people shouting ''Indian dogs go back'' and ''we want independence'' protested a second day in the Zaina Kadal area over soldiers who entered a mosque late Sunday while pursuing Moslem militants who hurled a bomb at a police station, witnesses and official sources said.

Hundreds of residents staged similar demonstrations in the Bohri Kadal, Nawhatta, Saraf Kadal and Lal Chowk areas of the city, 400 miles north of New Delhi, witnesses said.

The gatherings were dispersed without casualties.

#90031u0883 01/31/1990 ~United Press International

JEFFERSON CITY, MO (JAN. 31) UPI - A petition has been filed in the Missouri Supreme Court seeking an order to fine Drexel Burnham Lambert Inc. $2 million and cancel its state license, Attorney General William Webster said Wednesday.

"Drexel Burnham Lambert Inc. has pleaded guilty to securities fraud in federal court," the attorney general said. "In the petition filed today, we contend the securities violations also were violations of state law and served to defraud Missouri investors of millions of dollars."

"The federal charges, which were filed in 1988 after an investigation by the Securities and Exchange Commission, alleged stock manipulation, insider trading, failure to disclose beneficial ownership and other securities violations," Webster said. Secretary of State Roy Blunt also has taken action against Drexel through the office of the securities commissioner.

"We support the effort of the securities commissioner against Drexel's license," Webster said. "Our action seeks additional penalties for the state of Missouri commensurate with the gross profits realized by Drexel over a one-year period."

The attorney general said the company's license to do business in Missouri should be forfeited for misconduct and misuse. "Doing business in Missouri is a privilege granted by the state," Webster said. "We allege that Drexel Burnham Lambert acted with the intent to defraud the investing public, and we ask the court to protect the public by revoking the company's privilege to operate in Missouri."

"Drexel's own Missouri clients invested more than $1 million in companies whose stock prices were affected by the alleged securities violations," Webster said. "Thousands of other Missouri investors have been adversely

affected because they invested in company stocks influenced by Drexel's alleged securities violations."

Webster said the Missouri State Employees Retirement System and the Public School Retirement System both purchased stock in companies affected by improprieties. He said investors who were not Drexel clients also would have been affected if they bought or sold stock in certain companies during a time the prices were subject to Drexel's activities.

WASHINGTON (JAN. 31) UPI - Sales of new single-family homes fell 9.6 percent in last month from November to push sales for the year down four percent to 650,000, the lowest number of home sales in five years, the Commerce Department reported Wednesday.

Last year's home sales were of 650,000 were the lowest since 1984 when sales reached 639,000, the department said. A total of 676,000 new homes were sold in 1988. New home sales in December totaled an estimated 39,000.

"We expected a lower number in December but this is a bit lower than expected," said Robert Dederick, chief economist at Northern Trust Co. in Chicago.

The median price of new homes sold last year was $120,000, down form $125,000 in 1988. December's median home price rose to $130,100 from $121,000 from the same month the year before.

"The median home price is continuing to move up. A lot of concerns we had about declining real estate values do not seem to be affecting the national figures," said Bob Villanueva, a spokesman for the National Association of Home Builders.

Regionally, the Midwest suffered a 28.3 percent decline in new home sales during December. Sales dropped nine percent in the West and 6.1 percent in the South. Only the Northeast, which has been in a housing slump, posted an increase with a 3.9 percent gain in new home sales during the month.

Many economists attributed December's decline to the extremely cold weather that swept across much of the nation. "The Northeast sticks out like a sore thumb when you try to paint a weather-related scenario," said Dick Peach, deputy chief economist with the Mortgage Bankers Association.

Peach attributed the sales rise in the Northeast to increased incentives offered by builders to reduce their housing inventories. "They've gotten to a point where buyers are ginding it sufficiently attractive to buy," Peach said. "There are buyers out there but they are showing a great resistence to higher prices." For the year, economists said the housing industry has faced a series of problems ranging from interest rates to changing demographics.

Rising interest rates during the first half of the year deterred many home buyers from entering the housing market, which saw an upswing when rates lowered at mid-year. The return of higher long-term mortgage rates this month does not bode well for the housing industry, Dederick said.

The absence of younger potential homebuyers, and those slightly older with the financial wherewithal to afford a new home, also has affected sales. "Demographics are going against the housing industry," Dederick said. "The bodies are not in there as they were before."

MOSCOW (JAN. 31) UPI - The following is the full text of remarks the official news agency Tass said Mikhail Gorbachev made to reporters Wednesday as he met visiting Brazilian President-elect Fernando Collor de Mello.

''Many rumors and suppositions are circulating worldwide. All this is groundless. Evidently, it is in someone's interests to propagate such things. The Central Committee of our party will meet for a very important plenum next week. We will discuss documents for the forthcoming congress.

''It has come into vogue in the international press now to set rumor mills working around this as soon as we approach a regular plenum of the party Central Committee. Those of you correspondents who are working in Moscow know this well.

''It demonstrates that we are another country, another society - everything is discussed and discussed openly. The more so at such a watershed and responsible stage, the critical stage of perestroika. We need to bring out all evaluations, all points of view, since it is very important for us to blaze new trails.''

#90031u0919 01/31/1990 ~United Press International
WASHINGTON (JAN. 31) UPI - Sales of new single-family homes fell 9.6 percent last month to push sales for the year down four percent to the

lowest level in five years, the Commerce Department reported Wednesday.

The yearlong 1989 figure of 650,000 new home sales was the lowest since 1984, when sales plunged to 639,000, the department said. A total of 676,000 new single-family homes were sold in 1988. New home sales in December totaled an estimated 39,000, down 9.6 percent from November.

"We expected a lower number in December, but this is a bit lower than expected," said Robert Dederick, chief economist at Northern Trust Co. in Chicago.

The median price of new homes sold last year was $120,000, down from $125,000 in 1988. December's median home price rose to $130,100 from $121,000 in the same month a year earlier.

"The median home price is continuing to move up. A lot of concerns we had about declining (regional) real estate values do not seem to be affecting the national figures," said Bob Villanueva, a spokesman for the National Association of Home Builders.

Regionally, the Midwest suffered a 28.3 percent December decline in new home sales from November's figures. Sales dropped nine percent in the West and 6.1 percent in the South. Only the Northeast, which has been in a housing slump, posted an increase in sales in December, with a 3.9 percent gain in new home sales during the month.

Many economists attributed December's nationwide decline to the extremely cold weather that swept across much of the nation and penetrated deep into the South.

"The Northeast sticks out like a sore thumb when you try to paint a weather-related scenario," said Dick Peach, deputy chief economist with the Mortgage Bankers Association.

Peach attributed the sales rise in the Northeast to increased incentives offered by builders to reduce their housing inventories. "They've gotten to a point where buyers are finding it sufficiently attractive to buy," Peach said. "There are buyers out there, but they are showing a great resistance to higher prices."

In 1989, economists said, the housing industry faced a series of problems ranging from interest rates to changing demographics. Rising interest rates during the first half of the year deterred many home buyers from entering the housing market, which saw an upswing when rates lowered at mid-year. The return of higher long-term mortgage rates this month does not bode well for the housing industry, Dederick said.

The absence of younger potential home buyers, and of those slightly older

with the financial wherewithal to afford a new home, also has affected sales. "Demographics are going against the housing industry," Dederick said. "The bodies are not in there as they were before."

#90031u0924 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - Government, labor and religious groups began a campaign Wednesday urging millions of low-income families who owe no federal income tax to file returns so they can receive their earned income credit - a payment of up to $910.

Using television, radio and print advertisements, the second annual campaign to publicize the credit will focus on rural and Hispanic families because they are more likely to be found among the working poor.

''Families that don't receive their earned income credit are missing out on money they've earned,'' said Robert Greenstein, director of the non-profit group coordinating the Earned Income Credit Campaign.

''There appear to be a substantial number of families who qualify for the earned income credit but do not receive it because they do not know to request it by filing a return,'' he said. ''That's why the campaign is continuing.''

Greenstein estimated several million families last year missed out on the credit designed to reward the working poor. In 1989, 11 million families received tax credits of $6 billion.

Working families with at least one child living at home are eligible for the credit if their earned and adjusted income was less than $19,340 in 1989.

Those who earn too little to owe income tax receive a check from the Internal Revenue Service in the amount of their credit, up to $910 this year. Families that do owe taxes have their taxes reduced.

Workers who wish to receive their credit added to their regular paychecks should ask their employer for a W-5 form, complete it and file it with their employer, campaign organizers said.

People who do not owe taxes will not be penalized if they file a return after April 15. For 1989, a two-parent family of four does not begin owing income tax until its income exceeds $13,200, the coalition said.

The coalition said families do not have to claim their credit on their return to receive one because the IRS will compute it automatically.

The groups involved in the campaign include the U.S. Conference of Mayors, the National Governors' Association, the U.S. Catholic Conference, United Way, the AFL-CIO and the National Restaurant Association.

The campaign - whose theme is ''You've earned more money than you think'' - is being directed by the Center on Budget and Policy Priorities, a non-profit public policy group in Washington.

#90031u0931 01/31/1990 ~United Press International

PAVIA, ITALY (JAN. 31) UPI - A 20-year-old man who spent two years in the hands of kidnappers returned home Wednesday to a grateful mother and a cheering crowd of neighbors.

Hundreds of honking cars jammed the streets of Pavia, some 20 miles south of Milan, where Ceasare Casella was reunited with his parents, ending one of Italy's longest and most dramatic kidnappings for ransom.

Casella escaped Tuesday when his kidnappers, apparantly panicked when they learned police patrols were nearby, left him chained to a pole in a mountain stream near the isolated southern village of Careri.

Police brought Casella to Pavia early Wednesday morning in a motorcade after he was flown from southern Italy to nearby Milan aboard an air force DC-9.

He was hugged and kissed by his mother, Angela, who last June provoked a national outcry when she spent 10 days touring the villages of the bandit-ridden Aspromonte mountain in Calabria, on the toe of Italy, demanding the release of her son.

''During the last few days I was afraid because I felt something was about to happen,'' Casella told reporters. ''At certain moments I was gripped with fear and felt I would explode. But I always managed to keep myself under control while waiting for something to happen.''

National police and paratroopers found Casella around 10 p.m. Tuesday after he knocked on the door of a cottage outside the Aspromonte village of Careri to seek help.

Casella told police he managed to uproot the pole he had been chained to and escape with the chains still round his neck and wrists.

Police spokesmen said they had been tipped off that the kidnappers were about to transfer the 20-year-old student to another location and launched the search to try to intercept them.

Casella's parents had been prepared to pay another $800,000 in ransom for their son.

The youth's father, auto salesman Luigi Casella, had paid $800,000 to the bandits on Aug. 15, 1988. But the kidnappers then demanded $4 million more which they later reduced to $800,000.

The bandits seized Casella outside his home in Pavia on Jan. 18, 1988, and took him to a hideout in the Aspromonte area. Five other kidnap victims are believed to be held in the area, including Carlo Celadon, 20, a youth kidnapped near Vicenza in northern Italy a week after Casella was seized.

The Italian government sent troops to the Aspromonte area for a weeks-long search for kidnap hideouts in response to the national furor caused by Angela Casella's crusade last summer.

For 10 days she lived in a tent in the main square of the Aspromonte village of Plati while she toured the villages of the region. At one point the youth's mother chained herself to a gate.

Village women dubbed her ''Mother Courage'' and demonstrated in her support. She swore she would not leave Calabria without her son but after 10 days police persuaded her to return to northern Italy with the argument that the bandits might panic and kill the youth.

A break in the case came last Christmas Eve, when agents posing as emissaries of the Casella family wounded reputed kidnap gang leader Giuseppe Strangio, 35, as he arrived at a mountain rendezvous with two other bandits to collect the final $800,000 ransom payment.

On Jan. 3 the kidnappers sent a photograph of Casella clutching a sports newspaper dated Dec. 31 to a local newspaper as proof that the youth was still alive. They also sent three letters purportedly written by Casella urging his father to pay the final ransom instalment.

#90031u0977 01/31/1990 ~United Press International

MOSCOW (JAN. 31) UPI - Mikhail Gorbachev said Wednesday he has no intention of resigning as chief of the Soviet Communist Party, dismissing rumors he might step down as ''groundless suppositions,'' the official news agency Tass said.

Tass later reported President Bush called Gorbachev Wednesday and that the men ''exchanged opinions on topical international issues, predominantly concerning Europe, and on prospects for the arms reduction negotiations.''

The report said the men ''reaffirmed their determination to act in the

spirit of the Malta accords'' reached at their summit on the Mediterranean island late last year, and ''noted the importance of regular Soviet-American summit contacts...''

The Tass report did not say if Gorbachev's future was discussed.

Foreign Ministry spokesman Gennady Gerasimov said the rumors were ''ill-intentioned.''

Tass and Radio Moscow said Gorbachev made the denial in remarks to reporters at a reception for visiting Brazilian President Fernando Collor de Mello.

A report carried by the Cable News Network Tuesday said Gorbachev was considering resigning as general secretary of the party because of frustration with implementation of domestic reforms.

''I have no intention of doing that,'' Gorbachev said of the reports that he would quit. ''No one has said that. I have not said that.''

Gorbachev said he had been holed up for a week in his country home preparing for an important Communist Party Central Committee plenum next week but he had not been considering resigning.

''Many rumors and suppositions are circulating worldwide. All this is groundless ... It has come into vogue in the international press now to set rumor mills working as soon as we approach a regular plenum of the Central Party Committee,'' Gorbachev said.

He stressed that would stay to see his policy of perestroika through.

In contrast to his image in the West as the architect of policies that reversed the course of communism in Eastern Europe, Gorbachev's political star is fading at home along with that of the Communist Party as a result of impatience over his perestroika campaign of economic reform and separatist movements spreading in the Soviet republics.

Answering questions at a news conference, Gerasimov repeated that a change of role for Gorbachev was not being planned.

''Any allegations that Mikhail Gorbachev wanted to leave the general secretary role of the party and remain as president are groundless,'' Gerasimov said.

Gerasimov said Gorbachev was always the subject of gossip.

''There are constant discussions about Gorbachev's position - whether it is weak or whether it is strong, whether he will stay or whether he will

quit. These rumors are ill-intentioned,'' Gerasimov said.

Asked how Gorbachev felt about the rumors, Gerasimov said, ''I think he is a little bit annoyed. I don't know how these rumors originate. There are a lot of rumors now. There are no grounds. This makes stock exchanges nervous.''

He said Gorbachev's dual role as president and party general secretary had been debated repeatedly when he took on the presidency last year and it was not a topic for discussion at the forthcoming plenum.

''It is for Parliament,'' Gerasimov said.

Gerasimov said holding both posts was better for perestroika.

''As president he can influence parliament. As party member, he can influence the party,'' Gerasimov said.

Sen. Al Gore, D-Tenn., who just returned from Moscow, told ABC's ''Good Morning America'' that Gorbachev ''seemed strong and confident when I talked with him.''

''But the rumors in Moscow at that time were already beginning simply because the people are unhappy that the lines are longer and store shelves have fewer goods on them and there is a contrast between the extremely strong image he has overseas and the growing unhappiness at home,'' Gore said.

Former dissident and historian Roy Medvedyev said he too thought rumors of resignation were spread by Gorbachev's domestic enemies.

''To me this is not a realistic scenario. There is no alternative to Gorbachev to head the party,'' he said.

#90031u0990 01/31/1990 ~United Press International

WALTHAM, MASS (JAN. 31) UPI - A 74-year-old woman will lead an American Legion band from Massachusetts through Moscow's Red Square as the first such U.S. group to participate in the Soviet Union's May Day celebration.

Dorothy Hill petitioned the Soviets for three years before finally receiving approval to take her 70-piece band to the Soviet Union. Details are still being worked out but the band hopes to play and sing ''God Bless America'' and other red-white-and-blue tributes.

''We're a patriotic band, a 100 percent patriotic band,'' said Hill, a Coast Guard veteran who has been leading bands for 62 years.

The band represents the Joseph Hill American Legion Post of Waltham and is named after Hill's husband, a World War II veteran.

''We're surely psyched,'' Hill said. ''I just feel that we're long overdue for peace. One day I just got up and said, 'The government's a little slow in doing too much about peace. Why don't we try in our little way through music.' Most people felt it would never happen.''

The band will arrive in the Soviet Union April 28, participate in the May 1 parade and visit through May 6.

#90031u1016 01/31/1990 ~United Press International
(JAN. 31) UPI - Police in New York have arrested and charged a husband and wife with robbing at least 92 school girls between the ages of six and 14, some at gunpoint. The arrests culminate a two-month string of crimes outside a Bronx school.

An East German court released former communist leader Erich Honecker from custody one day after he was jailed to await trial on charges of treason and official corruption. The judge cited the 77-year-old Honecker's frail health.

In Moscow, neither East German Prime Minister Modrow nor Soviet President Gorbachev ruled out the possibility of a united Germany in talks yesterday. Modrow made a 24-hour visit and held meetings with top Soviet officials.

Some 200 students at Northern Illinois University in DeKalb protested a scheduled speech by Nation of Islam leader Louis Farrakhan . The students accused the Chicago-based minister of racism and blatant anti-Semitism.

Officials in Ramona, California, have announced that nine-time world champion rodeo cowboy Casey Tibbs died after a bout with cancer. He was 60. Tibbs was a legend among rodeo riders and fans during and after his heyday in the 1950's.

Authorities in Chile are hunting 44 political prisoners who escaped from jail through a 300-foot tunnel. Police have captured six of the escapees, some of whom were jailed for a 1986 assassination attempt on President Pinochet.

Tens of thousands of Muscovites lined up this morning for their first taste of capitalism... a meal at the world's biggest McDonald's. 50 kids from the Soviet children's funds were the first through the doors.

-30- 1775
#90031u1025 01/31/1990 ~United Press International
WASHINGTON (JAN. 31) UPI - President Bush telephoned Soviet leader Mikhail Gorbachev Wednesday morning to discuss arms control in advance of Secretary of State James Baker's trip to Moscow next week, a White House spokesman said.

Press secretary Marlin Fitzwater said that during the conversation there was ''only an oblique reference'' to recent rumors that Gorbachev was

considering resigning as head of the Communist Party. Gorbachev said Wednesday he had ''no intention'' of resigning.

Fitzwater said Baker was with the president when Bush called Moscow at about 7 a.m. EST. He was unable to say how long the call lasted.

''They talked primarily about arms control,'' Fitzwater said. ''There was no direct reference to the rumors'' that Gorbachev was considering stepping down as general secretary of the Communist Party.

Baker's trip to the Soviet Union to confer with Soviet Foreign Minister Eduard Shevardnadze was postponed for a couple of days until Feb. 8 and 9 by the United States to permit conclusion of the Central Committee of the Communist Party Plenum meeting in Moscow.

The delay in the trip by Baker coincided with a report by Cable News Network that Gorbachev was considering resigning.

Gorbachev said Wednesday he has ''no intention of resigning.''

''No one has said that,'' Gorbachev said. ''I have not said that.''

The State Department, in disclosing the postponement of the Baker trip, said Tuesday that the move had nothing to do with the Gorbachev rumor.

Fitzwater gave few details of Bush's conversation with Gorbachev. He noted however, that Bush still hopes to reach a strategic long-range missile agreement (START) with the Soviets before the superpower summit meeting in Washington in June.

Negotiators in Geneva are grappling with the key proposal to cut arsenals on both sides by 50 percent.

Meantime, the Soviets are protesting the proposal by Bush to increase ''Star Wars'' funding by $1 billion to some $4 billion.

According to the new schedule, Baker will arrive in Moscow Feb. 7 and he and Shevardnadze will meet in Moscow Feb. 8-9, instead of Feb. 7-8.

On Tuesday, Sen. Richard Lugar, R-Ind., a senior member of the Senate Foreign Relations Committee, said he doubted Gorbachev will surrender the party post.

''I am inclined to believe Gorbachev will resist giving up authority,'' Lugar told reporters. ''The whole trend of his career has been to clear away rivals, the consolidation of authority.

''Thus far he has had a fairly good batting average of prevailing.''

Senate Republican leader Robert Dole of Kansas criticized Democrats who have called for cuts in the defense budget because of Gorbachev's policies.

''If anyone is foolish enough to gamble with our national defense based on the political life and death of one man, Mikhail Gorbachev, then we are in deep trouble,'' Dole told the Senate. ''We want Gorbachev to succeed, but there are no guarantees (he will).''

There has been speculation in Washington and in Eastern Europe that Gorbachev may be on the edge of political defeat because of internal dissension within the party and because of potentially explosive nationality problems in the Baltic states and the southern regions of the Soviet Union.

Baker and Bush have both said that it is in the interest of the United States that Gorbachev's economic restructuring policies succeed.

#90031u1112 01/31/1990 ~United Press International

(JAN. 31) UPI - New Englanders utilized crisp, cool weather Wednesday to dig out of a ferocious storm that dumped up to 28 inches of snow in Vermont and caved in the roof of a Maine department store, while Oregon's flooded rivers began receding.

Skies were generally clear throughout the rest of the nation, with temperatures climbing into the 60s in Texas, Oklahoma and Arkansas but diving close to zero in the upper Midwest, the National Weather Service said.

Morning fog hampered commuters Wednesday in central Indiana, western Ohio and western Kentucky before burning away.

Southern New England was mostly sunny Wednesday with highs near 50 but it was variably cloudy in northern New England the day after the worst storm of the season.

Up to 28 inches fell in Vermont and several communities reported more than 20 inches.

A Pacific storm that punished coastal Oregon with high winds and tides dumped up to 10 inches of snow in Utah's northern mountains by Wednesday morning, forecasters said. The weather service issued a snow advisory for southern mountains in Colorado and in Utah.

Northwest Washington had light snow Tuesday night and a storm that passed through northern California dropped 10 to 12 inches of snow in the Sierra Nevada near Lake Tahoe.

Oregon's flooding rivers were receding Wednesday but flood warnings remained for parts of the Nehalem River along the coast and the upper Tualatin River west of Portland.

On Oregon's central coast, an 8-foot tide sent waves crashing into a motel Tuesday, smashing five windows in a banquet room. Guests were moved to interior rooms and buildings were boarded up.

Clear skies prevailed over Texas, Oklahoma, Arkansas, much of New Mexico and Louisiana with temperatures mostly in the 50s and 60s and a few readings in Texas over 70 degrees.

Forecasters issued a dense fog advisory for southeast Louisiana, including New Orleans, as visibility dropped to 1/16 of a mile.

High pressure brought generally fair skies and cool temperatures to the South.Early morning temperatures were 32 at Knoxville, Tenn., 38 in Atlanta, 55 in Charleston, S.C., 59 in Jacksonville, Fla. and 74 in Miami.

Clear skies dominated the Midwest with the exception of Michigan's upper peninsula, where areas reported flurries and snowshowers. Marquette, Mich. saw flurries and the coldest temperature in the state at 7 degrees.

Colder temperatures were also found in Wisconsin, where Eau Claire, in the northwest part of the state, dipped down to 1 degree.

Mostly clear skies prevailed over Pennsylvania, although colder air pushed temperatures into the teens in northeastern areas. Southern New Jersey, Delaware and Maryland also had clear skies, with highs heading for the 40s and 50s.

#90031u1129 01/31/1990 ~United Press International
CAIRO (JAN. 31) UPI - Egypt, responding to a drop in heating oil prices in consumer nations, said Wednesday it was cutting its crude oil export prices by $1 a barrel across the board.

The Egyptian Petroleum Authority said that effective Thursday its premium Suez blend would sell for $18.50 a barrel. The medium Balaim and Ras Badran crudes will be priced at $16.65 and $16.50 a barrel respectively, the announcement added, and the heavy Ras Ghareb would sell for $16.20 a barrel.

Cairo's official Middle East News Agency said the move was prompted by milder winter weather in consumer countries, which was expected to lead to a drop in demand for crude.

Heating oil prices soared earlier this month as a result of the December freeze in northern countries, but have fallen sharply in recent weeks with the warmer-than-normal temperatures. Egypt had raised its exports prices by $2 a barrel in two earlier price changes.

#90031u1156 01/31/1990 ~United Press International
HOUSTON (JAN. 31) UPI - A Continental Airlines 727 came within 30 feet of another Continental jet Jan. 3 moments after an air traffic controller cleared one plane to land on a runway where the other was waiting to take

off, it was reported Wednesday.

''It was really a miracle that he didn't hit us,'' said Continental Capt. Jim Lowry, whose plane was waiting to take off when the incident occurred at Houston Intercontinental Airport. ''He went right over the top of us and all we saw was his tailpipe through the windshield.''

According to a copyright story in the Houston Chronicle, a flight controller cleared Continental Flight 152 from Albuquerque, N.M., to land on the airport's runway nine.

Lowry, pilot of Flight 1045 to Phoenix, said he heard the conversation and advised the controller he was on the same runway awaiting takeoff clearance.

The flight controller acknowledged his message, Lowry said, and he heard no further instructions from the controller. About 20 seconds later, Flight 152 had to veer upward and abort its landing after emerging from clouds and seeing Lowry's plane.

''He probably missed us by 20 or 30 feet,'' Lowry said. ''When I first heard the noise I realized it was the airplane. It had to be full power because it was rattling things in the cockpit.''

Lowry said he taxied off the runway to avoid further problems and then calmed down the passengers startled by the roar of the other jet's engines. The passengers believed ''something had blown up on our airplane because all they heard was the noise. It was terrifying.''

The 25-year Continental pilot said the near collision illustrates the increasing fragility of the air traffic control system and a frustrating pattern of mistakes by controllers at Houston's largest airport.

''My concern is the deterioration of the system,'' Lowry said. ''The number of flights is increasing but the experience level and the number of controllers is decreasing. And they're not sure what they're doing.''

Lowry said he reported the incident to his Continental supervisors and the National Aeronautics and Space Administration's Aviation Safety Reporting System.

Jim Sinon, manager of the Federal Aviation Administration's air traffic control facility at Intercontinental, confirmed the incident is being investigated as a controller's mistake. He refused to provide further details because the matter is under investigation.

Continental spokesman Ned Walker also confirmed details of the incident but said the airline would not give further information about the crew of

either plane.

''We've been told by the FAA that they're investigating this as a possible air traffic control operational error and that the Continental actions and aircraft positions were as they had been instructed,'' Walker said.

''It was not a routine situation and any time there is not a routine situation, we seek an explanation. That is why we've been cooperating fully with the FAA.''

The Chronicle quoted a source at the airport as saying the Jan. 3 incident prompted a directive from managers calling for better tower staffing.

#90031u1176 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - If first-day sales are an indication, The National, a new daily devoted to sports that rolled off the presses Wednesday, is in for a long and prosperous life.

Sports fans and newspaper buffs snapped up the premier edition in New York at a pace that left all but a few vendor boxes sold out before sunrise, said Publisher Peter O. Price.

''The biggest problem was getting enough copies out to sell,'' Price told a news conference at the paper's midtown Manhattan offices. ''People are really upset that they couldn't get enough newspapers.''

The National's initial run of 250,000 copies, available in New York, Chicago and Los Angeles, showed the paper to be a tabloid in the best tradition of alluring headlines, cheeky gossip and lively layouts.

But the meat of the paper - whose nameplate includes the Latin words that roughly translate to ''fair play for all'' and ''fun and games'' - is sports reporting that includes game coverage, statistics and in-depth investigative articles and features.

Editor Frank Deford described the 50 cent-a-copy paper as ''local and national at the same time'' since its cover and various inside pages can be tailored for each market. About 25 percent of The National will be devoted to regional coverage each day, he said.

The 48-page debut included a page of ''real world'' news, editorials and a ''playground'' section filled with puzzles and games.

The National, primarily targeted at men between the ages of 18 and 54, plans to be on the street in Detroit by spring and reach a total of 15 markets by year-end.

The paper's start-up did not come cheap. Deford said it cost between $25 million to $30 million to get the newspaper off the ground and it may lose $100 million over five years before making a profit.

The venture is principally backed by Mexican media entrepreneur Emilio Azcarraga.

Deford, who said the first edition proved to be ''85 to 90 percent of the product I would like it to be,'' conceded there was a mistake or two in Wednesday's premiere.

The paper's full-color weather map, a mini-version of the type used by USA Today, another national daily, ''showed Charleston, South Carolina, where Charlotte, North Carolina, is,'' said Deford. ''The only thing I can imagine is that a hurricane must have blown Charleston over the state line.''

In the days leading up to its debut, the Sunday-through-Friday paper had taken some knocks from widely quoted skeptics who believe the chances for

its survival are slim.

The naysayers predicted The National would have a tough time standing out in the crowd among metropolitan dailies that already have beefed up their sports sections and extended their deadlines to include late game scores. If it does not distinguish itself early, some observers said The National may not draw the advertising that is critical to success.

Deford, a Clark Gable-lookalike who spent 27 years as a star editor and reporter at Sports Illustrated magazine before jumping ship last year to head The National, readily dismissed such talk.

''If we can equal or approximately equal local newspaper deadlines, we will blow them away with everything else that we have,'' he said.

''I predict this will be so successful that there will be a second (daily sports paper),'' he said. ''People will copy us rather our running into financial trouble and having to fold.''

WASHINGTON (JAN. 31) UPI - Eliot B. Brenner of United Press International was elected Wednesday chairman of the Standing Committee of Correspondents which oversees the Senate and House daily press galleries.

Thomas H. Gorey of the Salt Lake Tribune was elected secretary at the year's first session of the committee.

Brenner, Gorey and Mary Deibel of Scripps Howard News Service began the second year of their two-year terms.

Installed as new members of the comittee were Jonathan D. Salant of Newhouse News Service and Myron S. Waldman of Newsday.

They replace Jeffrey H. Birnbaum of the Wall Street Journal and Charles A. Green of Knight-Ridder Newspapers, who completed their two-year terms.

BY HELEN THOMAS

WASHINGTON (JAN. 31) UPI - The U.S. invasion of Panama can be considered a success if measured in terms of the rise in President Bush's popularity and the hopeful turn of events among the Panamanians.

But nothing is without cost. And the price in terms of lives, money and

U.S. hemispheric goodwill may never be known.

On the other hand, there is no clamor to find out what the facts are. Rather there is a sense of relief that Panama's dictator, Manuel Antonio Noriega, is in American custody and out of power.

The figures remain fuzzy on how many Panamanian civilians and soldiers lost their lives during the invasion bombing. How many were women and children. Who were they? Would it have been possible to warn them to clear their homes in the poor section of Chorillo near the military headquarters in Panama City before the bombing began? How many suffered permanent injuries? Could lives have been saved?

The cost of an invasion force and the temporary stay in Panama of thousands of American troops has not been assessed. Nor will it ever be estimated by the Pentagon. The figures are blended into other outlays, making an accounting nearly impossible. But such actions do not come cheap.

Bush has announced he will extend $1 billion in aid to rebuild the parts of Panama that we destroyed. The two years of economic sanctions also played havoc with the nation's once thriving prosperity.

There was, of course, a negative fallout among the Latin American nations that voted 20-to-1 in the Organization of American States to condemn the invasion. For them, it was history revisited with the United States once more throwing its military might around, while at the same time there is no moaning at the bar for Noriega.

But questions remain. Why did the Vatican basically break its own policy of sanctuary by making Noriega's retreat untenable? Why did Gen. Maxwell Thurman, commander of the U.S. forces in Panama, have so much power that he could rough up the Nicaraguan diplomats, and harass the Cuban diplomats? What kind of an image did Americans project to the world when the military officer was given that much leeway?

And there is the question of a news blackout. Neither Americans, nor anyone else, saw the ravages of the first night bombing or the dead or wounded in the first few days of the invasion. The U.S. managed to block such pictures or news reports by inhibiting and frustrating news coverage.

The censorship of the war story is best told by Patrick J. Sloyan of Newsday's Washington office who wrote:

''From President Geoge Bush's invasion of Panama, there is not a single public photograph, video or eyewitness account of the moments when 23 U.S. servicemen were killed and 265 wounded.

''There is, however,'' he added, ''a secret record of what was essentially

a one-day war that also resulted in a still uncertain number of Panmanian dead and injured. But the Bush administration has censored it from public viewing.''

Sloyan quotes an army official, who saw the combat photographs that are being preserved for the military archives, as saying that ''it is really dramatic stuff.''

A media pool of reporters and cameramen, who were alerted in Washington, and taken to Panama during the invasion, was locked up for two days and barred from going to the scene of the fighting.

''The delay in getting journalists to the scene left a void in the record of 'Operation Just Cause' that enabled the Bush administration to control the initial, and, often, the most lasting public perception - a flawless feat of arms on an almost bloodless battlefield,'' he wrote.

The administration followed the credo that the public would tolerate a very short war, but not a long war, lest the people become restive. And like invasion of Grenada, a small country, or an island nation, cannot begin to counter the military onslaught of a superpower.

Except for a handful of congressmen, the president had the wholehearted backing of congressional leaders who signaled their approval.

BRIDGEPORT, CT (JAN. 31) UPI - A 9-year-old boy has sued Nintendo of America and Major League Baseball over a video game he claims fails to live up to its promises, his lawyer said Wednesday.

Lawrence Kanaga said Wednesday that he filed the suit in Bridgeport Superior Court on behalf of Clark Thiemann against Nintendo, LJN Toys Ltd. and Major League Baseball.

LJN makes the game for Nintendo and the Major Leagues endorses it.

The lawsuit, which seeks class action status, aims to stop Nintendo from continuing to produce or sell the game, Kanaga said. A hearing has been scheduled for Feb. 20, the attorney said.

Thiemann also wants a return of the $40 he used to buy the video baseball game, Kanaga said. The Westport boy made the money by returning cans and bottles.

Thiemann claims the video game falsely claimed its users can simulate being a manager of a baseball team by choosing which ballplayers to field.

''Sure, you've always wanted to be a professional ball player, but have you ever thought about being a manager?'' the game label stated. ''Well, here's your chance to prove yourself both on and off the field.''

Shortly after buying the game in October, Thiemann discovered it contained insufficient data to allow him to make the managerial decisions it promised, his attorney said.

''Basically, the game purports to give you things it simply doesn't give you,'' Kanaga said.

''For example, it says, each team has its own roster but it really doesn't '' Kanaga added. ''It just has lists of uniform numbers, rather than names.''

Kanaga said the uniform numbers provided insufficient information for would-be managers to choose which players to use because none of the baseball reference books was based on jersey numbers.

''There's simply no way to correlate a jersey number with a player's name '' Kanaga said. ''So there's no way to verify the statistics included in the game which are really not all that complete.''

The attorney said Thiemann had communicated his dissatisfaction with the defendants but their response had been ''unsatisfactory.''

Nintendo, which is based in Redmond, Wash., had no comment Wednesday.

#90031u1230 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - A federal bankruptcy judge gave Eastern Airlines permission Wednesday to use an additional $50 million of the money raised by asset sales to finance ongoing operations, a company spokesman said.

U.S. Bankrupty Judge Burton Lifland approved the scaled down request during a morning hearing, said Eastern spokesman Robin Matell in Miami.

Eastern, which originally had sought $100 million, halved its request after its creditors recommended the approval of only $50 million, Matell said.

''The court has approved the $50 million. We filed for the $50 million, so obviously we are pleased,'' he said.

The money is part of pool of cash raised by the sale of Eastern assets, including the Northeast Shuttle operation.

The struggling airline, which filed for Chapter 11 bankruptcy protection on March 9, five days after its three unions launched a crippling strike, had previously tapped into the fund for $210 million.

Eastern announced its intention to seek an additional $100 million last week when it disclosed details of its latest reorganization proposal.

The proposal calls for Texas Air to surrender a 40 percent stake in Eastern to unsecured creditors as part of its plan for bringing the airline out of bankruptcy.

Eastern's preferred shareholders responded to the plan and the request for $100 million with a motion calling for the removal of Eastern's management The Miami Herald reported Wednesday.

''The problem is that, by any objective yardstick, the airline is failing '' the motion stated. The airline ''is literally living off the proceeds of its assets sales, funding ever-increasing operating losses, and putting its preferred stockholdrs and unsecured creditors further in a hole.''

Preferred shareholders recommended that Lifland approve only a $40 million draw on the escrow fund, Matell said.

#90031u1235 01/31/1990 ~United Press International

BOCA RATON, FL (JAN. 31) UPI - Thieves dressed as pest exterminators and carrying what appear to be jugs of chemicals have preyed upon dozens of homes recently in a section of south Florida, detectives said.

''They're eating us up,'' said Boca Raton police detective Guy DiBenedetto. ''And I think they have every intention of coming back.''

The thieves, wearing work pants and heavy boots and carry jugs of chemicals that look like pesticide, have talked their way into at least 33 homes in Boca Raton, Delray Beach, Pompano Beach, Tamarac and unincorporated Broward County in the past several weeks, stealing thousands of dollars in cash and jewelry.

''We think there are a lot of unreported cases because the victims are embarrassed,'' Broward County sheriff's spokesman Al Gordon said. ''They feel ashamed because they let these guys into their houses.''

One Boca Raton resident is still upset about her brush with the robbers even though they left her home without stealing anything.

''I should've known better,'' the Fort Lauderdale Sun-Sentinel quoted the unidentified 85-year-old woman as saying. ''I only saw one of them, but he looked like a wonderful person.''

She had withdrawn money from the bank that morning and wondered whether the suspects had been watching her. Investigators said the bandits are casing neighborhoods but they are not sure how.

The thieves work two, three or four to a group and prey on senior citizens especially those who are working in their yards in the afternoon, investigators said.

They approach the victims and offer free services such as driveway repairs roof repairs or pest control.

One distracts the resident while another steals from the house. The thief rifles through jewelry boxes and takes as many valuables as he can stuff into his pockets, police said.

In one recent case in Boca Raton, the suspect asked the resident to pull the canned goods out of her cabinets as he sprayed the insecticide. Police later learned the ''insecticide'' was water.

#90031u1253 01/31/1990 ~United Press International

ISLAMABAD, Pakistan (JAN. 31) UPI - A car bomb exploded Wednesdayin a busy area of the Afghan capital of Kabul, killing at least six people, wounding 122 and causing extensive destruction, official Kabul Radio said.

The radio blamed the explosion on ''extremists,'' the government's term for U.S.-backed guerrillas based in Pakistan fighting an 11-year-old war against the pro-Soviet Afghan regime.

The Pastho-language broadcast said the bomb, placed in a parked car, exploded Wednesday morning in a crowded district in the center of the city. It said the blast left six people dead, 122 wounded and damaged or destroyed many nearby vehicles and buildings.

It was the first major bombing reported by the government in several months in Kabul, where resistance leaders say they have large numbers of infiltrators. Hundreds have died in guerrilla rocket attacks in the capital since last summer.

Kabul Radio also said a tribunal sentenced two ''extremists'' to death for a bombing in Kabul last year that killed one person and wounded several others.

The resistance controls about 90 percent of Afghanistan but has failed to capture any major urban centers since the withdrawal last February of Soviet troops backing the government.

#90031u1255 01/31/1990 ~United Press International

LOS ANGELES (JAN. 31) UPI - Prosecutors said Wednesday they will retry former McMartin Pre-school teacher Raymond Buckey on charges that were not resolved when he was acquitted of 40 child molestation charges in the longest, costliest criminal trial in U.S. history.

District Attorney Ira Reiner made the decision to re-try Buckey on 13 counts that jurors deadlocked on two weeks ago.

''Our present intention is to go forward on all 13 counts,'' Deputy District Attorney Lael Rubin told Judge William Pounders.

Jurors on Jan. 18 acquitted Buckey, 31, of 40 counts of child molestation, and his mother, Peggy McMartin Buckey, 63, of 12 counts.

The jury deadlocked on one count of conspiracy against both Buckeys. It also deadlocked on 12 other molestation counts against Ray Buckey involving the alleged sexual abuse of five former pupils at the now-closed McMartin Pre-School in suburban Manhattan Beach.

Pounders set a March 9 re-trial date.

The County Auditor's Office estimated that the first trial cost taxpayers between $13.2 million and $13.4 million. It lasted nearly three years, the longest and costliest criminal trial in U.S. history.

Buckey has been free without bail since the acquittals. He spent nearly five years in County Jail following his arrest in March 1984. Last February, he posted $3 million in bail to gain his release.

Reiner, a candidate for state attorney general, made his decision after intensive and sometimes heated discussions last week and earlier this week with top members of his staff and McMartin prosecutors Rubin and Roger Gunson.

Reiner decided not to announce the decision himself, instead ordering Rubin to announce it at a Superior Court hearing.

Political observers believe a key factor in Reiner's decision was how that decision would affect his announced bid for the state attorney general's race later this year.

Prior to her discussions with Reiner, Rubin met with parents of the alleged victims. She said Wednesday in court that they would allow their children to once again testify against Buckey. Rubin also met with at least one juror to discuss the case.

The charges against Buckey and his mother stemmed from the alleged sexual molestation of 11 of their pupils at the once-prestigious pre-school from 1978 until 1983.

A majority of the eight-man, four-woman jury said that although they believed some of the children in the case may have been molested, prosecutors were not able to prove beyond a reasonable doubt that the Buckeys were responsible.

The jury's acquittals were met with a hailstorm of shock and outrage by the alleged victims, their parents and the public, who by overwhelming margins in informal media polls, said the verdicts were wrong.

Hundreds of supporters of the alleged victims held a protest march through the streets of Manhattan Beach Saturday and parent groups held news conferences virtually every day to denounce the acquittals.

In response, angry defense lawyers held their own news conference to lambast politicians, members of the news media and the public who have criticized the acquittals.

When initially filed, the case involved seven defendants and was the largest molestation case in U.S. history, with allegations that hundreds of children had been molested at the preschool.

Prosecutors leveled wild allegations at the defendants, accusing them of molesting the children during satanic rituals, slaughtering animals to scare the children into silence and taking millions of child pornography photos.

None of those allegations was ever substantiated.

The case was considerably scaled back when, during an 18-month preliminary hearing, many charges were dimissed for lack of evidence.

It was scaled back even further in January 1986, when Reiner dropped five co-defendants and scores of charges, saying the evidence was ''incredibly weak.''

The dismissed defendants were Ray Buckey's elderly grandmother, Virginia McMartin, who founded the pre-school, his sister, Peggy Ann Buckey, and former teachers Babette Spitler, Betty Raidor and Mary Ann Jackson.

#90031u1288 01/31/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JAN. 31) UPI - President Frederik de Klerk ordered an unprecedented judicial inquiry Wednesday into the death of a reputed African National Congress guerrilla who became the third black prisoner to die in police custody in two weeks.

Clayton Sizwe Sithole, 20, was found late Tuesday afternoon hanging from a shower pipe at the police cells in Johannesburg, a police statement said. It said he died shortly after allegedly confessing before a magistrate to a number of murders.

The afternoon daily Johannesburg Star reported Sithole was believed to be a former lover of Zindzi Mandela, daughter of jailed-for-life ANC leader Nelson Mandela, and the father of her daughter.

The Mandela family was not immediately available for comment.

De Klerk, who rejected in December demands he appoint an independent commission to investigate at least 49 unsolved assassinations of anti-apartheid activists since 1977, announced the inquiry shortly after the police statement was distributed.

His unprecedented order came on the eve of a planned protest march in Cape Town by activists demanding that all of the killings be investigated by an independent judicial commission.

In December, de Klerk vowed to investigate all the unsolved political killings amid a series of embarrassing disclosures of alleged police involvement. But he left the cases in the hands of police investigators in what was denounced by anti-apartheid campaigners as a whitewash.

Also, former South African police Capt. Dirk Coetsee was scheduled to hold a news conference Thursday in Harare outlining his alleged role in leading a police death squad in the early 1980s. It was Coetsee's allegations last year that fueled demands to reopen investigations into the killings.

The police statement on Sithole said, ''The circumstances surrounding his death are being investigated as a matter of urgency.'' Law and Order Minister Adriaan Vlok said in a statement he wished ''to give the assurance that the law will take its course.''

Sithole was arrested on Friday with four other men in the black satellite city of Soweto in connection with the deaths of 10 people, including two policemen, over the past two years. The pro-government daily Citizen identified the suspects as ''alleged ANC terrorists.''

Human rights activists said it was the first time the government had ever announced a judicial commission of inquiry into the death of a prisoner.

On Monday, according to a police statement, a prisoner in Natal province died in the back of a police van, allegedly of strangulation from a shoe lace, and two weeks ago a 19-year-old died in a police station in Carletonville, west of Johannesburg.

In violence in Natal Province, meanwhile, a policeman was shot and killed and two black men were stabbed to death in black townships near the Indian Ocean port of Durban, police said Wednesday.

The policeman was shot by unknown gunmen in KwaMashu township Tuesday, and the bodies of two black men were found with stab wounds and burns at Shembe's Village, the police report said, giving no further details.

At Inanda township in the same area, a group of black men robbed a black policeman of his gun and shot him with it. He was in critical condition in a hospital, police said.

Intercommunal violence in Natal Province between the conservative Zulu Inkatha organization and the more radical United Democratic Front has claimed as many as 3,000 lives since erupting in 1987.

#90031u1307 01/31/1990 ~United Press International

(JAN. 31) UPI - Radio Moscow is quoting Soviet President Gorbachev as saying he has NO intention of resigning his post as general secretary of the Communist Party... contrary to a report yesterday. The earlier report portrayed the Soviet leader as preparing to resign as party leader because of frustration with slow implementation of domestic reforms.

The Commerce Department reports that the government's index of leading economic indicators rose a stronger-than-expected eight-tenths of one percent in December. That brings the annual gain to a modest four-tenths percent. That annual total is the lowest since 1984, when the index declined one-point-five percent. The government uses the index to forecast future economic activity.

President Bush delivers the State of the Union address this evening before a joint session of Congress. In foreign policy, Bush is expected to extol the democratic reforms sweeping Eastern Europe and praise Soviet President Gorbachev's polices of openness and reform. On the domestic side, Bush is expected to again push for a capital gains tax cut.

Budget director Richard Darman returns to Capitol Hill to outline

President Bush's proposed budget for 1991. Today he'll face the Senate Budget Committee after yesterday's scathing session before the House panel. House Democrats condemned Bush for proposing what several called an UNrealistically high defense budget that fails to account for the reduced Soviet military threat.

#90031u1315 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - The remains of 10 U.S. airmen found in a B-24 bomber that crashed in New Guinea during World War II have been identified and relatives are being notified, 47 years after the accident, the Army said Wednesday.

Defense Department officials said, however, that they have been unable to find relatives of four of the men and they appealed to the general public to provide any information that might be helpful.

The crash site was discovered in the jungles of New Guinea in May 1984 by the owner of an aviation company and the manager of a helicopter firm who were working in the area, said Shari Lawrence of the U.S. Army Personnel Command.

Forensic experts from the Army's Central Identification Laboratory in Hawaii conducted three search-and-recovery missions, the last in 1987, before identification of the remains could be confirmed, she said.

Notification of relatives began in 1989.

''They had a hard time after 47 years, because a lot of soldiers weren't married at the time,'' she said. ''There were only parents,'' who have died in the interim, she said. ''So they had to go back and find brothers and sisters, and that takes quite a bit of time.''

The B-24D was part of the 90th ''Jolly Rogers'' Bomber Group, 400th Bomber Squad, based at Iron Range, Australia, Lawrence said.

''On Dec. 20, 1942, the B-24D aircraft left Jackson Field, Port Moresby, New Guinea, on an armed reconnaissance mission over Japanese-held bases in ... the Papua, New Guinea area,'' she said.

''Toward evening, the 'Liberator' contacted the tower and Port Moresby and requested that the field lights be turned on. The B-24 never appeared and it was presumed to have crashed into a mountain in the Owen Stanley Range.''

On Dec. 20, 1943, the men were presumed dead and the search was officially called off in 1949.

The 10 Army Air Corps victims were identified as: Lt. John M. Rafferty of Ambridge, Pa., the pilot; Lt. Eric J. Day of Columbus, Ohio; Lt. Clarence B. O'Beirne Jr. of Dallas; Lt. Willard F. Wright of Stanford, Ky.; Staff Sgt. Robert M. Dorey of Lindsay, Calif.; Staff Sgt. Eddie C. Roseberry Jr. of Houston; Sgt. Conrad W. Wahl, of Kelley, Iowa; Staff Sgt. Alexander Zilbert of New York City; Sgt. Walter P. Szeliga of Detroit; and Sgt. Henry M. Vigneault of Springfield, Mass.

Lawrence said the Defense Department is still looking for relatives of Day O'Beirne, Zilbert and Vigneault.

Defense Department officials said there may be a group burial at Arlington National Cemetery in the spring.

#90031u1316 01/31/1990 ~United Press International

COLOMBO, Sri Lanka (JAN. 31) UPI - Nearly 200 Tamil rebels Wednesday opened fire on shops and offices in an eastern town when shopkeepers refused to open businesses and end a strike protesting rebel kidnappings, police said.

No one was reported killed or wounded in the 90-minute shooting spree but police said a bank clerk running for shelter was beaten by members of the Liberation Tigers of Tamil Eelam, known by their acronym LTTE.

The strike was called to protest the abduction of 27 Moslems on Tuesday. The Tamil rebels claimed responsibility for kidnapping the businessmen and students, who they said were responsible for killing LTTE members.

Hindu Tamils, who are a minority in Sri Lanka but comprise the majority in the north eastern region, have been fighting for independence from the Buddhist Sinhalese-dominated Sri Lankan government.

The rebels arrived in the eastern town of Kalumnai, 125 miles northeast of Colombo, Tuesday morning and began ordering shopkeepers to end the protest strike and reopen their businesses, a senior police officer said.

Apparently enraged when their directives were rejected, the nearly 200 LTTE members went on a shooting spree, peppering shops and offices with automatic weapons fire, he said.

''The few shops that were opened this morning also put up shutters and all of the government offices and banks were closed when the Liberation Tigers of Tamil Eelam cadres began their rampage around 10 a.m.,'' said the official, speaking on condition of anonymity.

''The rampage was on for nearly 1 1/2 hours,'' he said.

A resident contacted by telephone said the rebels were armed with automatic weapons and grenades and that some appeared as young as 14 years of age.

The police officer said there was no word on the 27 Moslems abducted Tuesday when an estimated 500 Tamil rebels sealed off Kalmunai and its suburbs.

Residents reported that 12 businessmen from Kalmunai, 10 youths from nearby Naipathimuni and five others had been abducted, he said.

Local religious leaders and police officials were negotiating with the LTTE for the release of the 27 prisoners. The official said: ''We have information that the men will be released today.''

An LTTE spokesman in Colombo charged the 27 were linked to the Jihad, an Islamic militant group the rebels charge have killed LTTE members.

(JAN. 31) UPI - The Wisconsin state Assembly voted early today in favor of a bill requiring minors to obtain parental consent or judicial bypass to get an abortion. The measure exempts victims of incest. The bill now goes to the state Senate for consideration. The measure also states that a physician who performs an abortion without such consent faces a possible 10-thousand-dollar fine.

A coalition of civic, labor and religious groups is opening a campaign today urging low-income families who owe NO federal income tax to file returns so they can receive a government payment of as much as 910 dollars. Working families with at least one child living at home are eligible for the credit if their earned and adjusted income was less than 19-thousand 340 dollars in 1989.

New Englanders are digging out this morning from a ferocious winter storm that dumped as much as 28 inches of snow and caused the roof of a department store to cave in. The roof and front wall of Reny's store in Dexter, Maine, caved in with a roar under the weight of more than a foot of snow yesterday afternoon, just minutes after firefighters evacuated about 10 people from the store.

Polish Prime Minister Mazowiecki is in Brussels today for three days of talks with the European Community and the Belgian government about his country's relations with Western Europe. Poland, along with Hungary... is one of the countries of Eastern Europe for which the E-C has made a

special effort to assist economic reforms by helping them establish a market-oriented system.

BUCHAREST, ROMANIA (JAN. 31) UPI - A temporary coalition among Romania's provisional government and opposition parties could save the nation from civil war, a National Peasants Party leader said Wednesday.

The interim National Salvation Front, which has governed Romania since the popular revolution last month, bowed to pressure from anti-front protesters and agreed Tuesday to form a power-sharing provisional coalition.

The National Unity Council will govern Romania until elections scheduled for May 20, said Silviu Brucan, a member of the front's executive council.

The three opposition parties that will join the coalition, the National Peasants Party, the Liberal Party and the Social Democrat Party, said the coalition will break the power monopoly the front has held for over a month.

Peasants Party spokesman Gabrielescu Valentin said the country's largest opposition party was suspicious of the front, which will run as a party in the May elections.

''We don't trust them. We know they are very shrewd, changing their minds each day, but we don't want to destabilize the country and push them to civil war,'' Valentin said. ''The only chance to save the country lies in dialogue.''

Valentin spoke at party headquarters for the first time since it was ransacked by front supporters Monday along with 18 other buildings used by opposition groups.

Valentin, who suffered a black eye during the incident, welcomed the front's decision in the wake of the protests, which pitted anti-front demonstrators against pro-government supporters.

The three parties had been pressing the National Salvation Front to back down from a decision to field candidates in the May elections. The front refused that request but agreed to lessen its political power in the agreement, the details of which are to be issued Thursday.

''We believe that it is illegal for the front to hold political power and take part in the election at the same time,'' said Brucan.

But opposition parties have alleged that most of the 30 parties that have sprung up since the pro-democracy revolt in December are fakes manipulated by the front to steal votes and confuse the public.

The trial of four former Communist Party leaders was scheduled to continue in Bucharest Thursday. The trial was postponed Tuesday because a key witness had difficulty making travel arrangements.

#90031u1331 01/31/1990 ~United Press International

GAINESVILLE, FL. (JAN. 31) UPI - Florida Gator running back Emmitt Smith, an All-America and a 1989 Heisman Trophy finalist, announced Wednesday he will forgo his senior season to enter the NFL draft in April.

Smith, a junior from Pensacola, Fla., called it the hardest decision he ever made. He said it was both a business and emotional decision.

''I'm not going to give you some sob story about my family needing the money; we don't,'' Smith said. ''This past season was the best I have ever had in college. I am leaving because, right now, I have the opportunity of a lifetime.''

In the 1989 campaign, Smith established several Gator records, including most yardage in a season with 1,599 on 284 carries, and was named Southeastern Conference Player of the Year. In all, he holds 58 Florida marks, including most yardage in a career at 3,928 yards on 700 carries, yardage in a single game with 316 and career touchdowns with 37.

''I have accomplished almost everything I wanted to, except win the Heisman and a national championship,'' Smith said.

His announcement ended months of speculation that he would part with the Gators for the lure of big money and the NFL.

''It's been very rough these past few months,'' Smith said. ''I haven't enjoyed myself, with reporters and agents knocking on my door, calling my family. I'm glad it's over.''

Smith said he had had mixed emotions since the latter part of the 1989 season and did not reach his final decision until he talked with family and friends last weekend.

He also said he wanted to see what other top college juniors did before sealing his plans. Last week, Alabama linebacker Keith McCants and Georgia running back Rodney Hampton declared themselves eligible for the draft.

Smith did not inform his teammates or head coach Steve Spurrier of his

intentions until moments before the news conference Wednesday at Ben Hill Griffin Stadium.

''You just have to say thanks to the best running back in the history of the University of Florida,'' Spurrier said. ''We are 100 percent behind his decision if that is what he wants to do. We understand the position he's in.''

Smith said the recent turmoil in the Florida athletic department played no role in his decision.

The announcement came the same day as the start of the NFL Scouting Combines tryouts at Indianapolis. Harry Buffington, director of the combine, said Smith was not on the list of players eligible for the drills although it is possible he could join late, since running backs do not begin work until Friday.

Smith did express concern about the possibility of salary caps for NFL rookies, but said he hoped he would not be affected.

''If I am good enough, I will get paid what I'm worth,'' Smith said. ''I don't think it will be a factor.''

Smith said he would like to remain in the state of Florida, and holds special fondness for the Tampa Bay Buccaneers.

''If I stayed in-state, it would be a plus for the Buccaneers,'' Smith said. ''I know I have an 'Emmitt' following, and they could increase their ticket sales. But I would like to play for whoever drafts me. Even Green Bay. Even Dallas.

''I just never dreamed I would be standing up here after three years saying I would be going to skip my final year at UF.''

Smith said he plans to remain in school through this semester, and will continue to get an education during the offseason.

#90031u1337 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - President Bush, who has made public service and voluntarism hallmarks of his political philosophy, saluted the volunteer agency VISTA on its 25th anniversary Wednesday for ''helping move this country forward.''

Bush and his wife, Barbara, presided over a ceremony in the Roosevelt Room of the White House that honored the 100,000 Americans who have served in VISTA, which was created during the Johnson administration as a domestic

Peace Corps.

''Every time a kid learns to read, you make a difference. Every time a homeless family finds shelter, you make a difference, and every time a troubled person stays off drugs, you make a difference,'' Bush said.

Noting that more than 3,000 VISTA volunteers are now at work in more than 650 neighborhoods, Bush called them ''true activists'' who work long hours on short pay and ''work one community, one block, one child at a time.''

''You don't often hear of them, because they're too modest to brag, and you don't often notice them at work, because theirs is a quiet mission,'' he said. ''But together, (they are) helping move this country forward.''

In the fiscal 1991 budget he sent Congress on Monday, Bush proposed doubling from $3 million to $6 million the funding that VISTA - Volunteers In Service To America - receives to promote literacy, which has been a project of Mrs. Bush.

#90031u1345 01/31/1990 ~United Press International

(JAN. 31) UPI - TODAY'S PEOPLE:

MOVIE CRITIC: General Motors Chairman Roger Smith hasn't seen the highly praised movie ''Roger and Me'' but he knows he doesn't like it. ''If you like sick humor, you might like the movie,'' Smith said during a speech this week to the Tower Club in Fort Lauderdale, Fla. ''Whatever 'Roger & Me' is, it's not a documentary.'' The acidic low-budget film documents the hardships that General Motors layoffs caused in Flint, Mich., the hometown of the filmmaker, Michael Moore, and Moore's attempts to confront Smith about the layoffs. Smith says he hasn't seen the movie. ''I read the review in The New Yorker and decided not to go,'' he said. ''I feel mostly sorry for the people in Flint. They don't deserve it. The people in Flint are nice people and I hate to see them made the butt of a sick joke. It's a disservice to them.''

TO ALL THE GIRLS WHO'VE SUED ME BEFORE: A Miami woman is suing Julio Iglesias on the grounds that he defrauded her of royalties from a song they wrote together. Grecia ''Mimi'' Korman wants $50,000 in damages, plus interest, court costs and attorney fees. Korman says that in 1978 Iglesias asked her to help write a Spanish adaptation of the French song ''J'ai Oublie de Vivre'' (''I've Forgotten to Live''). She says she worked with some of his preliminary lyrics and a month later presented him with a finished product. The song appeared on at least seven albums with Korman and Iglesias listed as co-writers but Korman says Iglesias entered into a contract with the French publishers of the song, presenting himself as the sole writer.

HEAVY METAL SUFFERING: Billy Joel says heavy metal music is very appropriate for the Soviet Union. Joel toured the Soviet Union in 1987 and said he noticed that Russian kids have an affinity for heavy metal. ''All of our (pop) music comes from the black experience,'' he said at a seminar Tuesday at the University of the Arts in Philadelphia. ''Their music is from suffering. Heavy metal is the music of frustration. That's a frustrating life over there.'' Joel said the Soviet tour was ''my greatest thrill as a performer'' but he probably won't be going back because foreign performers are paid in rubles, which can not be taken out of the country and ''you can't buy anything with them in the country.''

BILLY'S STORY: The memoirs of the late Billy Carter, the beer-drinking, good ol' brother of Jimmy Carter, will be published this month. The book, ''Billy: Billy Carter's Reflections On His Struggle With Fame, Alcoholism and Cancer,'' was written by Carter, his wife, Sybil, and Ken Estes, director of communications for the National Association of Addiction Treatment Providers. Carter was once so closely associated with drinking that he had a brand of beer named for him, but he went into treatment and was sober for the last nine year of his life.

MISS AMERICA'S RELIGION: Miss America's church is not a cult, her pastor says. The Fox Television program ''A Current Affair'' had a report that said Marantha Christian Ministries of Columbia, Mo., which has Miss America Debbye Turner as the most prominent member of its flock, practiced brain-washing and mind control. But David Hawes, pastor of the ministry, says the report was just a cheap shot at Turner, who lived for a year in a dormitory owned by the church and has been a member of the church for two or three years. ''They're not going to find any dirt on her so they criticize her faith in God,'' Hawes said. ''It was just an outrageous joke. I didn't take note of it. The most obvious thing to me is (Turner) is a black Miss America who is one of the most beautiful, secure and confident and personable Miss Americas in the history of the pageant.''

GLIMPSES: The Grammy ceremonies on Feb. 21 will feature Meryl Streep presenting a lifetime achievement award to Paul McCartney while Miles Davis is similarly honored. The live entertainment will include Grammy nominees Rodney Crowell, Fine Young Cannibals, Don Henley, Billy Joel, k.d. lang, Bonnie Raitt and the team of Linda Ronstandt and Aaron Neville. Lined up to present the awards are Paula Abdul, Natalie Cole, Richard Marx Motley Crue, Olivia Newton-John, Bob Seger, Milli Vanilli and Dwight Yoakum ... Ray Sharkey is the George Raft of his time. Sharkey, who played a Mafia honcho on ''Wiseguy,'' was in a New York court Tuesday to visit John Gotti, who allegedly is the biggest Mafia boss in the country. Gotti, who is accused of ordering thugs to beat up a union leader, knows Sharkey from their days in Brooklyn.

#90031u1379 01/31/1990 ~United Press International
TORONTO (JAN. 31) UPI - Eveready Canada Inc. introduced Wednesday a new ultra low mercury alkaline battery aimed at environmentally-conscious consumers. The new environmentally safer battery, the first of its kind produced and marketed in North America, will have a mercury content lower than 0.025 percent by weight, the company said.

Wayne Uren, director of marketing at Eveready, said "over the past decade we have significantly reduced the heavy metal content in our batteries and will continue our research efforts ... to address environmental needs."

The new Energizer will be priced the same as other alkaline batteries and available in various cell sizes including AAA, AA, C, D, and 9V.

Eveready said the mercury content in its new battery was up to ten times lower than that of their competitors' products. Mercury is used in alkaline batteries to prevent chemical impurities from affecting the overall performance of the battery.

Uren said "if all alkaline batteries sold today met our specifications, the amount of mercury required for their manufacture would be drastically reduced."

#90031u1392 01/31/1990 ~United Press International
COVINA, CA (JAN. 31) UPI - Two pre-schoolers credited with saving their mother's life were commended Wednesday for their quick thinking in notifying paramedics of her apparent heart attack.

Candice Chesterton, 5, and her brother, Ernest, 3, received plaques and $250 each in U.S. Savings Bonds from Westec Security in a ceremony to recognize their fast response to the emergency, Westec spokesman Chris Joseph said.

On Dec. 4, Candice found her mother, Frances, face down on the floor of their home, barely breathing, Joseph said.

''Candice grabbed one of those hand mirrors and put it under her nose and saw she was not breathing,'' Joseph said. He said she then dialed 911 and stayed by her mother as her brother talked with the dispatcher.

The boy told the dispatcher, ''Mommy can't breathe. She's on the floor.''

Paramedics credited the children with saving their mother's life following the mild heart attack, Joseph said.

It was the second time Candice was instrumental in saving a life. When her brother was 2 weeks old, Candice, then 2, saw that he was turning blue and told her mother, who called paramedics, Joseph said.

The company has given out nine Westec Awards for Youth Heroism since last March, Joseph said.

The young recipients, awarded for their bravery in saving lives or preventing injuries in emergencies, are nominated by fire or police departments or individuals, Joseph said.

#90031u1394 01/31/1990 ~United Press International

ANCHORAGE, Alaska (JAN. 31) UPI - The Coast Guard is refusing to turn over documents subpoenaed by the defense for the trial of fired Exxon Valdez skipper Joseph Hazelwood, triggering a new legal battle to be fought in a hearing Thursday.

A battery of Coast Guard lawyers filed legal papers with a long list of reasons why the subpoenaed documents were being withheld - including national security reasons.

Coast Guard lawyers filed a motion asking that the defense subpoena be quashed, claiming immunity from any state court order.

Defense lawyers, in a 5-page subpoena, requested Coast Guard notes, summaries, reports and witness interviews stemming from the March 24 wreck of the Exxon Valdez, especially documents relating to Hazelwood and possible federal violations by other Exxon crewmen.

Hazelwood, 43, of Huntington, N.Y., is on trial in state Superior Court facing seven years, three months in jail and a $61,000 fine if convicted on charges of operating the Exxon Valdez while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief.

The slow process of selecting a jury was in its second day Wednesday, and Judge Karl Johnstone said jury selection Thursday would resume after arguments in the Coast Guard subpoena dispute.

The subpoena, addressed to the commander of the Coast Guard in Alaska, prompted answers from the chief Coast Guard lawyer and eight Department of Justice attorneys asserting the right to withhold subpoenaed documents.

Some of the documents sought are protected by ''national security considerations,'' government lawyers said while acknowledging that this claim concerned ''only a very small group of requested documents.''

The national security claim was in response to Hazelwood's request for documents concerning decisions by federal agencies, including the Departments of Energy and Transportation, to keep the port of Valdez open to tanker traffic after the Exxon Valdez ran aground 25 miles from the oil port, spilling nearly 11 million gallons of crude into Prince William Sound - the worst spill in U.S. history.

It was unclear why Hazelwood and his lawyers believed the information useful for trial, and the government reply to the request did not discuss relevancy.

The reply hinted that documents were being withheld because they involved U.S. plans for oil shipments out of Alaska in wartime. However, there was no direct justification stated for the national security claim.

Rear Adm. Joseph Vorbach, chief counsel for the Coast Guard, said in a 10-page affidavit that the release of the subpoenaed documents also might compromise ongoing regulatory, enforcement and investigative responsibilities.

Vorbach acknowledged that a significant amount of documents have been produced in anticipation of litigation, not for this state criminal case but so the government could ''seek full recovery for its losses from any and all responsible parties, including but not limited to Mr. Hazelwood.''

Release of internal government reports would give Hazelwood an advantage in his captain's license revocation proceeding, now on hold, and in civil suits, the government said.

Justice Department lawyers complained in a 17-page memorandum that the subpoena was vague, ambiguous, oppressive, overly burdensome and that ''the United States cannot be compelled in a state court action to provide documents requested by subpoena.''

The Hazelwood subpoena also requested information on seven other Exxon Valdez crew members, Coast Guard records on Prince William Sound ice conditions and several specific Coast Guard reports identified only by date and author.

Hazelwood's lawyers initially sought the documents through a Freedom of Information Act request. When that was denied, they put their request in a subpoena last month. Government lawyers replied in documents dated Jan. 25. First public disclosure of the dispute came this week in trial, and Johnstone scheduled arguments for Thursday.

#90031u1398 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - Shearson Lehman Hutton Inc. Wednesday named Howard L. Clark Jr. as president and chief executive officer to succeed Peter A. Cohen, who resigned under pressure earlier this week.

The troubled Wall Street brokerage firm also officially announced it was converting its proposed sale of 20 million shares of common stock to a rights offering of about 21 million shares at $12 a share to be made directly to Shearson common stockholders.

Shearson's parent, American Express Co., said in a statement that it planned to buy its pro rata share of about 69 percent of the stock offered as well as any other shares not purchased by other shareholders.

Proceeds of the rights offering would provide approximately $250 million in equity capital, the company said. The public offering had been expected to raise a roughly similar amount as part of Shearson's $850 million recapitalization plan announced late last year.

However, since the Dec. 14 announcement of the proposed stock sale, Shearson's stock fell from $14.75 a share to a record low of $10.50 a share earlier this week on the New York Stock Exchange. The public stock offering was converted to a rights offering due to the recent drop in the price of Shearson stock, the company said.

Under the rights offering, American Express would not take a previously announced charge of $60 million that it would have taken under the common stock offering.

American Express also said that following the stock offering, it planned to reduce its voting stock ownership in Shearson to approximately 45 percent - either through a dividend of Shearson shares to American Express stockholders or a dividend of 100 percent of the shares of a corporation to be formed whose assets would include shares of Shearson. American Express currently owns 61 percent of Shearson, and has expressed its intention to limit its exposure to the ups and downs of the brokerage firm.

Cohen, who resigned under pressure at a Shearson board of directors meeting Tuesday evening, had presided over a management shakeup late last year as well as the plan to raise $850 million to bolster the brokerage house.

Clark, his successor, is chief financial officer and executive vice president of American Express. Prior to joining American Express in 1981, he spent 13 years with Blyth Eastman Paine Webber Inc.

"We know that Howard will provide the kind of management expertise that will enhance the value of the franchise that has been created under Peter Cohen," said American Express Chairman James D. Robinson III in a statement. "Peter has been the principal architect of the dramatic growth

and world-wide positioning of its franchise."

Cohen will continue as chairman until March 1, and retain an advisory role after that date, the company said. Cohen and Robinson had reportedly disagreed over the proposed stock offering included in the recapitalization plan.

Shearson announced the plan to raise capital after Moody's Investors Service said in October that it was reviewing Shearson's debt and commercial paper ratings for possible downgrading. The rating agency affirmed Shearson's credit ratings following the recapitalization announcement.

Also, Shearson announced that F. Warren Hellman, a general partner at Hellman & Friedman, becomes chairman of the board, a non-executive role, also effective March 1.

Hellman & Friedman Capital Partners and Hellman & Friedman Capital Partners International recently agreed to purchase $75 million worth of Shearson convertible preferred stock.

Hellman spent 16 years with Lehman Brothers, including a stint as president from 1973 to 1975, before it was purchased by Shearson in 1984. Hellman's firm became widely known for engineering the 1985 buyout of Levi Strauss.

#90031u1420 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - Backstairs at the White House:

President Bush ''is comfortable'' about going to Colombia for the Andean drug summit, but it is being viewed as a ''war zone'' by the Secret Service and those planning security.

White House chief of staff John Sununu told reporters that the agency has to approve plans before the president goes in, which leaves the onus on the Secret Service.

The four-nation summit will be held Feb. 15 on the Colombian resort peninsula of Cartagena. Colombian President Virgilio Barco is insisting on holding the summit as a show of strength against the violence prone Medellin drug cartel. In addition to Bush, the other nations represented at the largely symbolic summit will be Bolivia and Peru.

The drug kingpins have been sending messages that they will not harm Bush.

The logistics for the trip, expected to last only a few hours, are complicated in terms of where to put the White House traveling press corps which will need modern communication satellites.

It appears certain now that the filing center for the press will not be in Cartagena. The government has already said its only obligation is to protect the president.

President Bush is dieting. Dr. Burton Lee, the White House physician, has advised him to lose 10 pounds. He usually holds at 197.

The day after watching the Super Bowl game and overindulging on Fort Worth barbecue and munchies, Bush told reporters, ''I feel grumpy.''

At times when she diets, Barbara Bush forgoes desserts. But not the president. His chef prepares low cal yummy desserts for him and he even takes second helpings.

Bush, known as the aerobic president, does get plenty of exercise, from horseshoes to racquet ball with friends in the House gym.

The president has in a glass display just outside the Oval office a large slab of the Berlin Wall, a constant reminder of the mind-boggling political changes in Europe in the last days of 1989.

He also has a gag crystal ball that provides hopeful answers to pressing questions.

Bush takes an interest in his surroundings, probably more so than some of his predecessors. The bright blue new carpet for the Oval Office is cheerful and eye catching.

During the Christmas season, the president had his own Christmas tree in the Oval Office. Other presidents have settled for touches of yuletide decorations on the mantle and at the windows.

Bush, who adopted Texas as his home state, has taken on some of the characteristics of his Texas predecessor, Lyndon B. Johnson.

It is well known that LBJ was a man who brooked no obstacles when he got an idea. He was the kind of a man who would look out the window and tell his wife, Lady Bird, ''Let's have Congress over today.'' No sooner said than done. The 535 congressional offices would be called with invitations for the congressman, senators and their spouses.

Bush took on that patina after the Senate upheld his veto of the Chinese students bill. He invited the senators who supported him over to the White House for a beer-and-pretzels celebration.

He is a gregarious man and enjoys having people around him. Socially speaking, he is much more prone to give an impromptu party than his predecessor, Ronald Reagan, who played more by the book.

Planning is already under way for the Economic Summit, which the president will hold in mid-July in Houston. Such events are logistical nightmares since they involve protecting six heads of government and the head of the European Economic Community, as well as all their entourages.

Bush wanted the Texas setting and probably will order up an old fashioned barbecue for his visitors.

The plenary meetings will be held on the campus of Houston's Rice University.

Bush also will play host at the summit meeting in late June with Soviet leader Mikhail Gorbachev. The main meetings will be held in Washington.

But if he takes Gorbachev anywhere it will probably be his seaside summer home in Kennebunkport, Maine, not Houston.

WASHINGTON (JAN. 31) UPI - The U.S. Agency for International Development announced Wednesday that it has signed agreements with ten African nations, wiping out $305 million in debts owed the U.S. government.

As a condition for the debt-forgiveness agreements, the ten nations involved all undertook economic reform programs which were approved by the International Monetary Fund.

The countries are: Benin, Cameroon, Ghana, Guinea, Kenya, Madagascar, Malawi, Mali, Nigeria, and Zaire. Three more countries - Cote d'Ivoire, Niger, and Uganda - are expected to become eligible in the program which is expected to reach a total of $745 million. Total external debt by countries of sub-Saharan Africa has been estimated by the World Bank at about $140 billion.

Pierre Buyoya, President of Burundi, who is visiting Washington, told reporters at the State Department, "I want to salute the United States for what it has done so far in order to reduce the African debt. A lot remains to be done, because many African countries, including Burundi, have debts which are a heavy burden for their economies. This is a start."

Although Burundi has started an economic reform program, it is not among the 13 countries which have fulfilled the IMF standards. AID estimates that sub-Saharan African countries have a total debt to the U.S. government of $6.6 billion, including $1.5 billion in principal and assistance for economic assistance loans.

The U.S. government and European countries are generally moving toward a program of giving new assistance in the form of non-repayable grants. But the past loans and interest remain on the books.

#90031u1453 01/31/1990 ~United Press International

DENVER (JAN. 31) UPI - The union representing more than 40,000 oil workers across the country said Wednesday it would let the deadline for a national strike pass, but walkouts against individual oil companies were possible.

Contracts between the Oil, Chemical and Atomic Workers International Union and most major oil companies were to expire at midnight Wednesday. But the OCAW vice president, Bob Wages, said those contracts would be renewed on a 24-hour basis while negotiations continue.

''We are somewhat encouraged by developments of Tuesday,'' Wages said. ''At least we are beginning to have substantive discussions on some of those remaining issues.

''Therefore, we will not be calling a national strike at midnight tonight. But we may be giving strike notice to certain companies where we are having particular problems.''

Wages said walkouts against individual companies could begin as early as Thursday. He said possible targets include Amoco, Texaco, Chevron, Mobil, Shell, Atlantic-Richfield, and Unical.

Wages said any possible strikes would likely have the most effect on refineries in the Houston-Beaumont-Port Arthur area of Texas or on the West Coast, ''where we have the greatest concentration of our workers.''

The OCAW's National Oil Bargaining Policy Committee Tuesday rejected an offer made by Amoco and several other oil companies, Wages said. The two-year proposal included wage increases of 4 percent in 1990 and 1991, and additional contributions to health care premiums.

''That offer was rejected by the policy committee for the same reason that previous offers were turned down,'' Wages said. ''On those issues that were addressed, mainly a wage increase and an increase in hospital/medical premiums for the next two years, the offer didn't come up to our expectations or our requirements.

''And the offer failed to address a number of key items that we are still engaged in bargaining with the industry.''

Wages said those critical issues include union monitoring of the environment, union and industry cooperation in working for a national health care program, and job security and safety.

The OCAW wants to add to the bargaining unit an employee whose sole responsibility will be monitoring the environment for toxic releases, air quality and water quality, Wages said.

''That issue is on the table because it's the beckoning issue of the 1990s '' Wages said. ''We happen to think this industry is not credible in the environmental area. It's track record is abysmal.''

He said workers need to take part of the responsibility of ensuring environmental quality.

''This industry hasn't been credible with its communities,'' he said. ''We think union folks undertaking the monitoring of the environment within the

plant and outside the plant offers some degree of independence to the process of environmental quality.''

Wages said he is encouraged because there has been some recent movement on these issues in the bargaining talks.

''The industry has started talking about these other issues in some depth, so at least there's some reason to believe that perhaps we can avert a major confrontation with the industry.''

The oil contracts which are expiring were signed two years ago. Oil bargaining frequently has led to local strike actions, and national strikes were called by the union in 1969 and 1980.

#90031u1454 01/31/1990 ~United Press International

CHARLOTTE, NC (JAN. 31) UPI - Charlotte Hornets Coach Dick Harter, whose brother died of cancer Wednesday, faces imminent dismissal with his team saddled with an 8-32 record.

Team owner George Shinn flew to San Antonio, where the Hornets played the Spurs Wednesday night. Harter talked to the players before the game, acknowledging he would not be part of the team much longer.

''If I'm not here tonight, I just want to tell you all goodbye,'' Harter said. ''I thank those of you who have supported me. This is not so much because of how the team has played as it is because of a personal situation in my life.''

Harter said he was informed Wednesday morning his brother died following a long bout with cancer.

''It's been a tough week,'' Harter said. ''My brother was within a day of dying of cancer and you read all these things in the paper. It's very hard.''

Shinn and Hornets General Manager Carl Scheer boarded a plane in Charlotte Wednesday afternoon bound for Texas. A Hornets spokesman said they ''very possibly'' would have an announcement before the 8:30 p.m. EST game began and ''we will definitely have one tomorrow in Charlotte.''

Harter, 57, has coached the Hornets since the NBA granted Charlotte an expansion franchise in 1988, leading the team to a better-than-expected 20-62 season its first year.

But the Hornets stalled early this season, and fans have routinely booed Harter at home games.

Shinn, who has written three books about motivation, said Harter doesn't seem to know when to praise a player and when to discipline him.

''I don't want the decision to just be about wins and losses,'' Shinn said. ''There are other things that are a concern. The fact that he didn't take the blame for some of the losses, the way he motivates people.

''It's not my style to just run people into the ground. I think the way to fire people up is you put your arm around them and get behind them. That doesn't mean you have to coddle them. These are prima donnas, millionaires. You've got to kick them in the butt every now and then.

''But you can't have people perform well for you if they're griping and complaining. I think there are some problems there.''

Forward Kelly Tripucka rose to Harter's defense.

''The whole thing's ridiculous,'' he said. ''We're a second-year team. What do people expect?''

Guard Rex Chapman has criticized Harter, who benched the former University of Kentucky star in favor of Dell Curry.

''Winning would change a lot of things around here,'' said Chapman, who was persuaded to play for the Hornets last year after an evening of drinking milk and eating chocolate chip cookies with Shinn.

Harter said he would not change his coaching decisions, including whether to play Chapman, to save his job.

''Will I start a particular player or change some coaching thing?'' he asked. ''No, I can't do that.''

Before coming to Charlotte, Harter spent two years as assistant coach with the Indiana Pacers, three years as assistant coach with the Detroit Pistons and 18 years coaching at Penn State, Pennsylvania, Oregon and Rider. Over that period Harter had a 295-196 record.

CHICAGO (JAN. 31) UPI - DeSoto Inc., target of a $220 million hostile takeover bid, said Wednesday it has received notification from Sears, Roebuck & Co. of its intention to cancel its consumer paint contract with DeSoto in 1992.

Both DeSoto and Sears spokesmen said the notification was a pro forma response to DeSoto's Jan. 15 announcement it would seek to sell its U.S. consumer paint business. Sears is DeSoto's biggest customer.

"The notification was a formality required under the provision of our contract that we give two years notice," said Sears spokesman Gordon Jones. "It does not change any details of our previous announcement that we supported their decision to sell the paint business and would cooperate in facilitating the sale."

"This was strictly a formality required under the contract and it is not effective for two years," Jones said. "We would anticipate that, in the interim, the new owners would take over and we would seek to work out a new agreement with them." A DeSoto spokesman said Sears was still "supportive of the sale and is looking forward to working with the new owners."

DeSoto, headquartered in suburban Des Plaines, is the target of a hostile $50 a share, $220 million tender offer by Sutton Holding Corp., a New York investment group.

Sutton has extended the expiration of the tender offer until Feb. 5, and said the number of shares tendered Jan. 10, when the extension was announced, represented more than 70 percent of all outstanding shares. Sutton has characterized DeSoto's decision to sell its consumer paint business as a ploy to stall the takeover.

But DeSoto Chairman Richard R. Missar said the sale of the U.S. consumer paint business would permit the company to focus on its profitable detergent, surfactant and industrial coatings businesses.

Missar said DeSoto held extensive discussions with Sears, its largest customer for consumer paint, before deciding to sell off the paint business. DeSoto's U.S. consumer paint business was marginally profitable on an operating income basis in 1988 but incurred operating losses in 1989.

Revenues generated by DeSoto's U.S. consumer paint business in 1989 were estimated at approximately $175 million, about 43 percent of total 1989 revenues.

The decision to sell followed an eight percent reduction, effective Jan. 1 1990, in DeSoto's paint prices to Sears. Under the company's contract with Sears, DeSoto was required to match the lowest comparable bid to Sears for paint products.

Missar said the company would seek a purchaser Sears can work with and that will retain DeSoto's consumer paint employees while providing increased opportunities for growth. The assets offered for sale include DeSoto's facilities in Orlando, Fla.; Greensboro, N.C.; Columbus, Ohio, and Chicago Heights, Ill.

#90031u1467 01/31/1990 ~United Press International

CHICAGO (JAN. 31) UPI - Soybeans were supported by short-covering while grain futures were mostly lower at the close Wednesday on the Chicago Board of Trade.

The rally in soybeans came after Mikhail Gorbachev denied rumors he would resign as chief of the Soviet communist party. Those reports had pressured the markets on Tuesday.

Beans also were supported by active trading in soybean options, although steady selling throughout the day limited the gains. Continued favorable weather in South American soybean growing areas also kept soybean futures on the defensive.

March soybean meal made a contract low of $166.80 per ton early in the session before firming on a pick-up in buying interest.

Soybean oil prices were virtually unchanged.

The grains were mixed in quiet trading. The lack of near-term export business depressed prices, but losses were limited by light country movement and steady basis levels.

At the close, corn was off 1/4 to 1 3/4, soybeans up 2 1/2 to down 1/4, wheat up 1/2 to off 1/2 and oats down 1 1/2 to 2 1/4.

#90031u1485 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - Budgetel Inns Inc., believing it can prosper from corporate America's desire to hold down costs, is catering to the needs of business travelers - including an offer beginning Thursday for free room-service breakfast.

The motel chain's plan to deliver a continental breakfast to each guest by 7 a.m. during the week - and 8 a.m. on weekends - is an industry first, said Stephen Marcus, president and chief executive officer of The Marcus Corp., the owner of Budgetel.

Budgetel, which operates 72 economy lodges in 22 states, now draws about 60 percent of its customers from the ranks of business travelers, and the Milwaukee, Wisc.-based company would like to further expand its corporate trade, said Marcus.

To lure business travelers, Budgetel, where a room costs about $35 a night began offering amenities usually found in higher-priced accommodations, said Marcus. Budgetel provides free incoming facsimile service, desks in every room, extra-long telephone cords, and television remote control devices that aren't bolted to nightstands.

"We have made Budgetel the equal of mid-market hotels such as Holiday Inns and Howard Johnson's," said Marcus, during an interview in New York. "It is a very acceptable alternative product that is very much like what most business travelers are used to." The chain now has 1,900 corporate-account customers whose employees are eligible for ten percent discounts, said Marcus.

By serving a free contintental breakfast - consisting of a Danish and juice delivered in a plastic bag that is hung on a guest's door knob and java from a coffeemaker that is already in every room - Marcus said Budgetel can increase customer loyalty and help boost sales.

Analysts said Budgetel is doing battle in a tough market. Economy motels are the fastest growing segment of the hospitality industry, and occupancy rates - due to overbuilding - have been soft.

For its part, Budgetel, founded in 1973, has long concentrated on filling the gap between full-service hotels and cut-rate motels, Marcus said. "Fancy lobbies and meeting rooms are a drag on profits but a come-on to sell the rooms," said Marcus. "If you just build guest rooms and price them properly you don't need all that other stuff as a come-on."

Marcus conceded that there is still something of a stigma attached to economy lodgings, despite the industrywide upgrading of such accommodations. "In the early days you gave up your dignity to stay in the places that paraded themselves around as budget motels," said Marcus.

But with corporations becoming more and more mindful of reining in the high costs of travel, tight-fisted accounting departments are steering their employees toward economy accommodations, said Marcus.

Budgetel, with its extra-long beds, inside entrances to rooms and satellite television hook-ups, is ready for them, said Marcus. "We've made it so the business traveler who has been used to higher priced facilities doesn't object to the Budgetel product at all."

#90031u1493 01/31/1990 ~United Press International

BEIRUT, LEBANON (JAN. 31) UPI - A power struggle between Christian strongman Gen. Michel Aoun and militia leader Samir Geagea developed into fierce street battles between their loyalists in the Christian enclave Wednesday, inflicting dozens of casualties.

In southern Lebanon, at least one person was killed in renewed fighting between rival Shiite Moslem militias despite recent Algerian peace efforts.

Forces of Aoun and Geagea, vying for the control of the leadership of the Lebanese Christians' heartland inhabited by at least 1 million, engaged in bitter fighting in and outside east Beirut, using tanks, jeep-mounted cannons, anti-armor rockets and heavy automatic arms, witnesses said.

Aoun, 54, regards the Christian enclave as his domain and has shown impatience with any Christian opposition to his claim. Geagea angered the general when he recognized the election of Elias Hrawi, also a Christian, as Lebanon's president last November.

The maverick general, who has refused to relinquish his post as commander in chief of the armed forces and has pledged to oppose Hrawi until all Syrian soldiers leave Lebanon, controls 15,000 troops.

The U.S. State Department criticized Aoun for the latest outbreak of violence and reiterated demands for him to step aside from power.

''The latest outbreak of fighting must be laid at the feet of Gen. Aoun. It follows his earlier outrageous decisions to cut the water to West Beirut and to clamp down on the press,'' the State Department said in a statement.

''Gen. Aoun must realize that his bellicose behavior does not advance the interests of the Christian or any other community, but only benefits those who want to see Lebanon continue in anarchy and turmoil,'' it said. ''For the good of Lebanon, we reiterate our call for Gen. Aoun to step aside and do it now.''

Witnesses said Aoun's forces and members of Geagea's Lebanese Forces militia battled on many streets in east Beirut and surrounding regions, using tanks, jeep-mounted cannons, anti-armor rockets and heavy automatic weapons.

Black smoke from fires raging out of control appeared over multi-story buildings in east Beirut as civilians huddled in corridors and underground basements, the witnesses said.

Aoun's army in a statement said the troops gained the upper hand and took control of several militia barracks, but the Lebanese Forces militia said it beat back all attacks and captured dozens of soldiers.

The violence inflicted dozens of dead and wounded, security officials said in an initial report. Many houses and cars were destroyed or burned, the officials said.

Christian political sources said the Vatican mission contacted both Aoun and Geagea and attempted to arrange a settlement to stop the violence. The Vatican maintains good offices with the two sides.

One of the fiercest confrontations raged around the militia headquarters in the seaside region of Karantinah where Geagea maintains his heaviest military presence in east Beirut, security sources reported.

The fighting occurred a day after Aoun threatened a shoot-to-kill policy if his troops were attacked by gunmen in the Christian enclave.

On Tuesday, Lebanese Forces militiamen fired on Aoun's troops, who attempted to take control of a school in the area of Furn Al Shubbak. The soldiers returned the fire and the battle lasted for more than an hour. Four people were wounded, including one soldier.

In southern Lebanon Wednesday, the Iranian-backed Hezbollah and pro-Syrian Amal militia engaged in rocket and artillery fighting east of the port city of Sidon, 24 miles south of Beirut, security sources said.

In the artillery exchanges, one person was killed and eight people were wounded, the sources said.

It was the worst Amal-Hezbollah confrontation after a three-day lull, mediated by an Algerian envoy. The envoy, Mohammed Al Taher, arrived in Beirut last week to mediate between the two rivals after Iran failed to end the violence. At least 89 people have been killed and 313 others wounded since the fighting began Dec. 23.

The situation in Lebanon became chaotic since the Christians and Moslems first battled in 1975. Since then more than 135,000 people have died.

MOSCOW (JAN. 31) UPI - Tens of thousands of Muscovites lined up all the way down Gorky Street Wednesday for the opening of Moscow's first and the world's biggest McDonald's - and all were served with courtesy that left them in disbelief.

"We opened the doors and literally 500 people came through; it's very exciting, ecstatic," said George Cohon, 52, president of McDonald's Canada, who worked 14 years to realize his dream of bringing McDonald's to Moscow.

As tens of thousands waited in line, 50 youngsters sponsored by children's charities were the first through the doors and the first to eat hamburgers and drink milk shakes in a decision by Cohon, who is admired by his staff, which he trained. He insists his employees call him George.

"Half the proceeds go to the children's funds, and we thought it would be keeping with what we do around the world to allow those 50 kids in, and that's what we did," said Cohon. "And then we opened the doors for everyone."

Beginning at 10 a.m., the Russians kept arriving, eating and leaving shocked at the courtesy shown by polite young Russians who waited on them from behind 27 automatic registers. "They told us thank you, come again," people repeated as they left.

Klavdiya Degtyareva, a 67-year-old World War II veteran, said she stuffed herself with an apple pie and a Big Mac followed by a cheeseburger - and was on her way back to try the fish fillet. "It was all wonderful - soft. Even people like me without teeth can eat it, and the apple pies were exceptional," she enthused.

"I'm thinking of coming back with my children and grandchildren. I think everyone will come back. These restaurants shouldn't just be in Moscow. We must get the pleasure and the owners will get the profits," she added.

Outside, other Russians waited, but not for long. "The lines are moving unbelievably well," said Cohon, who had promised no long waits. "I was just at the end of the line, and people can't believe it. The Soviets are moving along slowly. They are used to standing so they are now just walking along slowly."

With the familar golden arches high above the restaurant, Muscovites could in no way recognize the old cafe Lira, a watering hole known for its rowdiness with brawls spilling out late at night onto Pushkin Square.

Instead, what Cohon calls the world's most modern and biggest McDonald's now graces the spot, with 700 seats inside and 200 outside, ready to serve 15,000 people each day - certainly to be exceeded Wednesday. In the end, Moscow is slated to get 20 McDonald's.

Residents of 51 other countries feasted on Big Macs before they became a symbol in the heart of the communist world, to some, of Soviet leader Mikhail Gorbachev's program of economic and political restructuring - perestroika.

It took 14 years of planning and bargaining for the golden arches to vie with the colored cupolas of St. Basil's Cathedral in Red Square as the country's chief landmark.

His staff of Russians were trained at McDonald's schools abroad. Cohon assembled the serving staff from among students, in a city where part-time work for students previously was unthinkable.

Cohon said McDonald's Moscow-style hopes to break the McDonald's opening day record of 9,100 transactions set in Budapest, Hungary, and, possibly, the all-time record for any single day, 14,000 in Hong Kong.

Unlike nearly all foreign food ventures in the Soviet Union, McDonald's is selling Big Macs with fries and milk shakes for rubles, not dollars, breaking what Russians cynically call perestroika's "ruble apartheid."

Those dollars-only establishments keep most Russians out, their mouths watering, while foreigners or privileged Soviets with dollars eat or load their cars with groceries.

Nearly all the food, from the crispy French fries to the meat, comes from the Moscow region and is processed in a plant built by McDonald's.

#90031u1502 01/31/1990 ~United Press International

SOFIA, Bulgaria (JAN. 31) UPI - Opposition leader Zhelyu Zhelev rejected Wednesday an invitation to join the communists in a coalition government that would rule until May elections, calling the offer pure propaganda.

Zhelev, who heads the leading pro-democracy group Union of Democratic Forces, said his organization did not want to be made to share the blame for the nation's economic woes.

''We think this was done with the aim of giving the regime a more democratic facade,'' the soft-spoken Zhelev said in an interview at party headquarters. ''This is purely for propoganda purposes.''

He said the communists also wanted to try to discredit the opposition by linking it to the difficult economic problems faced by Bulgaria.

Zhelev spoke after opposition leaders met to consider the invitation made by Bulgarian communist leader Peter Mladenov during Tuesday's session of an extraordinary Communist Party congress.

Mladenov, who has been maneuvering to improve the party's tarnished image in advance of democratic elections promised for May, proposed that opposition leaders join the communists in a government of national unity to guide the country through the polls.

The communists, facing mounting pressure to reform, have already renounced their guaranteed monopoly on political power and ended official persecution of the ethnic Turkish minority. They also agreed to create a multi-party democratic system.

Zhelev gave the communists high marks for their efforts at reforming what he described as one of the most Stalinist states in Eastern Europe.

But he said much more extensive reforms are needed before his opposition group would agree to a partnership with the communists, including the complete separation of church and state, the disbanding of party organizations in the workplace and the elimination of middle-level bureaucrats associated with the hard-line government of Todor Zhivkov, Bulgaria's Neo-Stalinist leader from 1954 until his ouster last November.

Zhelev predicted reform-minded communists would leave the party before the three-day congress was over.

But leaders of the Communist Party's radical left said at a news conference they have no intention of splitting from the party.

''We will stay until the end if the Stalinists don't throw us out,'' said Lyubonir Dragonov, a spokesman for a faction known as the Democratic Forum.

The reformists said they would await the outcome of the congress before deciding what steps to take to encourage further reform.

The nearly 2,800 delegates are expected to vote Thursday on a new party charter and a socialist manifesto spelling out the new aims and goals of the party.

Deep divisions over the pace and direction of reform within the Communist Party were evident during Wednesday's session of the emergency congress, with several speakers accusing radical reformists of trying to disband the party.

''We have no grounds for being ashamed of being communists,'' said one middle-aged delegate who took his turn in an endless parade of speakers alloted six minutes apiece at the microphone.

Georgi Vasilev, a 70-year-old retiree and longtime communist from the town of Brazigora, said the infighting that has characterized the congress made him fear for the party's future.

''Let there be criticism with the party, but let it be constructive, not destructive,'' Vasilev said. ''If we weaken the party it will be the end of us.''

#90031u1521 01/31/1990 ~United Press International

JERUSALEM (JAN. 31) UPI - A day after the U.S. State Department called on Israel to ease residency requirements for Palestinians, Israel announced Wednesday it was postponing deportation proceedings against Arabs who do not have proper permits to live in the West Bank and Gaza Strip.

Defense Minister Yitzhak Rabin told Army Radio that the deportation policy has not been changed, but said that cases would be handled more delicately in the future.

''We will not allow every visitor that comes to visit the territories, Jordanian residents or Saudi residents or Iraqi residents, to remain

without a permit,'' Rabin said.

''Imagine a tourist comes to the United States and receives a visa for a particular period. Will the United States allow him to stay after the period of the visa has expired?''

On Tuesday, the State Department called on Israel to ease regulations restricting family reunions.

''We hope that the government of Israel would apply residence requirements with sensitivity and flexibility,'' said spokeswoman Margaret Tutwiler. ''We continue to discuss these requirements with the Israeli government. They are well aware of our concern, particularly with regard to divided families.''

The controversy was sparked by a front-page article in The Washington Post Tuesday that said Israel was pursuing a tough policy to expel Palestinians who did not meet proper residency requirements.

The Post said many of the people expelled last year for failing to meet residency requirements were women, most of them from Palestinian families who fled the territories during the 1967 war. The Post said the women later married men who lived in their ancestral villages in the occupied territories.

The newspaper cited Red Cross figures that said 140,000 residency petitions were filed in such cases between 1967 and 1987, but only 9,000 spouses had been granted permission to live in the territories.

Palestinians organizations quoted by the Post claimed that the expulsions were part of a policy of forcing Arabs to leave the territories. But Israeli military sources denied Wednesday that the army was attempting to force a mass exodus of Palestinians.

A total of 251 Arabs were deported in 1989 because their visitors' permits had expired, military sources said. Many of those deported were the wives and children of Palestinian residents of the occupied territories.

Most visitors are given 30-day permits that could be extended for up to 90 days. The sources said an estimated 5,000 people are residing in the territories illegally.

B'tselem, an Israeli human rights group, charged that the deportations were often carried out without sufficient warning and during the night.

The military sources acknowledged there had been complaints about short notice given to deportees and of the breaking up of families.

''We felt there was a need to check the system and minimize cases that cause humanitarian problems,'' one source said.

The left-wing Citizens Rights Movement said it was not satisfied with the moratorium and demanded an end to all expulsions.

Citizen Rights Parliament member Dedi Zucker said beyond the suffering caused to Palestinian families by the deportation policy was ''the fear that it will disturb efforts for immigration to Israel from the Soviet Union and Ethiopia, immigration that is based on the principle of family unification.''

In the occupied territories Wednesday, Palestinians observed a general strike in support of the Palestine Liberation Organization.

In the Gaza Strip, masked youths Wednesday stabbed to death a taxi driver suspected of collaborating with Israeli authorities. Atwa Al Masri, 35, was attacked in his home in the Rafah refugee camp, Palestinian sources said. A police spokesman said Masri had a criminal record and the killing was under investigation.

Israeli soldiers shot and wounded six Palestinians during clashes in the Gaza Strip, Palestinian sources said.

DETROIT (JAN. 31) UPI - Ford Motor Co. said Wednesday its new Mercury Tracer subcompact car to go on sale in May will be priced in the $8,000 range, while its Australian-built Capri roadster will start just below $13,000.

The pricing of the Tracer, billed as a 1991-model and a sister car to the new Escort to debut April 26, means the nation's No. 2 automaker may forego any substantial price increases from the previous Tracer, sold as a 1989-1/2 model.

"It is conceivable that the new Tracer will be priced about the same as the old one," company spokesman Bill Carroll said. The current Tracer starts at $8,672, with the station wagon costing $9,842. Ford has been giving its Lincoln-Mercury dealers price estimates during a three-week national tour that ends next week, Carroll said.

The four-seater Capri, due in late spring or early summer after a delay of about two years, will cost at least $800 less than the Mazda Miata, a small two-seater viewed as its closest competition. A sporty model of the Capri, dubbed the XR2, will be priced in the $15,000 range for a well-equipped version, Ford said.

A fully equipped Miata costs $18,325, although a spokeswoman for the Japanese carmaker said overall strong demand for Miatas has some dealers charging buyers up to $5,000 above the sticker price.

Prices for the 1991 Escort are expected to be between $9,000 and $10,000, while the GT model will cost over $12,000. Current versions of the Escort range from about $8,000 for a typically equipped Pony model to just over $11,000 for the GT version.

The new Tracer, to debut at the Chicago Auto Show next week, will be built at Ford's Hermosillo, Mexico, plant under a $2-billion program in conjunction with Mazda, of which it owns 25 percent.

Both the Tracer and Escort, the latter to be built at Hermosillo as well as Ford's Wayne, Mich., plant, are heavily based on Mazda's 323

subcompact. Total sales are pegged at over 500,000 cars annually.

Both new models are part of a Ford strategy to provide it with a broad sales base of fuel-efficient cars to help it meet corporate average fuel economy (CAFE) standards, now set at 27.5 mpg.

That means Ford expects to make little or no money on the program, although these cars will allow it to continue selling its larger, profitable models.

(JAN. 31) UPI - The Commerce Deparment released the latest figures on the Index of Leading Economic Indicators, giving another sign that the nation's economy is slowing. The index jumped eight-tenths of one percent in December... to bring the annual gain to a modest four-tenths of one percent. The annual total was the lowest since 1984, when the index declined one and one-half percent.

Radio Moscow quotes Soviet leader Gorbachev as saying he has NO intention of resigning as Communist party chief and that rumors saying he is are false. Gorbachev says he has been at his country home all week, preparing for a key Communist Party Central Commitee plenum, but he has NOT been considering resigning. At a Moscow news conference, Foreign Ministry spokesman Gennadi Gerasimov describes Gorbachev as annoyed by reports in the West he is stepping down.

Lebanese security sources report another outbreak of fierce fighting between rival Christian factions in Christian east Beirut. There was NO immediate word of casualties in the large-scale street battles between Christian militias and troops loyal to Christian military leader Michel Aoun. The fighting comes one day after Aoun vowed to disarm militias in the enclave under his control.

-30- 1409

#90031u1549 01/31/1990 ~United Press International

COVE NECK, NY (JAN. 31) UPI - Investigators completed their on-site probe of the crash of Avianca Flight 52 that killed 73 people, paving the way Wednesday for the cleanup of the wreckage piled atop a Long Island hillside.

The probe by the National Transportation Safety Board ended Tuesday at the crash site in Cove Neck, where investigators spent five days sifting through the wreckage of the aircraft that went down last Thursday, apparently due to lack of fuel.

In Washington Wednesday, NTSB investigators continued to focus on radio communications to determine whether the pilot of the doomed flight had adequately informed air traffic controllers of the plane's dwindling fuel supply, officials said.

On Long Island, a funeral mass was held at a Port Washington church for Capt. Laureano Caviedes Hoyos, the pilot who was killed along with 72 of the 158 people aboard the ill-fated jetliner.

Completion of the on-site investigation cleared the way for Avianca Airlines to begin removing the wreckage of the Boeing 707, which plowed into a hilltop about 17 miles northeast of the John F. Kennedy International Airport, said NTSB spokesman Michael Benson.

The jet, traveling to New York from Bogota, Colombia, with a stop in Medellin, had aborted a first landing approach to Kennedy after falling below its proper glide path and was flying toward another approach when it crashed.

Investigators believe the aircraft, which had been circling the airport in a holding pattern for nearly two hours, probably crashed because it ran out of fuel.

Benson said tapes of cockpit conversations show the pilot failed to specifically request an ''emergency'' landing, telling regional air traffic controllers less than an hour before the crash that his plane was low on fuel and ''may need a priority.''

When pilots declare a ''fuel emergency,'' the situation is considered very serious and the plane is given priority to land over all other waiting planes.

The NTSB is looking into why local controllers, who took over guidance of the aircraft some 45 minutes before the crash, were not informed of the pilot's earlier conversation with the regional controllers, Benson said.

Avianca Airlines could not be reached about the cleanup plans, but Sam Tissenbaum, a retired lithographer who owns the property where the plane went down, said officials have told him removal of the wreckage would begin later this week.

''No one's really started anything yet. They still have the area blocked off,'' he said.

In a related development, two victims of the crash filed the first lawsuit against the airline Tuesday in federal court in Brooklyn, their lawyer said.

The $102 million complaint filed seeks damages on behalf of Jesus Pinzon, 31, a knitting factory worker from Elizabeth, N.J., and his 2-year-old son Brian. Both were injured in the crash, the father seriously, said the attorney, Robert Solomon.

Avianca Airlines could not be reached for comment on the suit.

#90031u1554 01/31/1990 ~United Press International

(JAN. 31) UPI - Budget chief Richard Darman goes back to Capitol Hill to face the wrath of senators over a nearly one and one-quarter-TRILLION-dollar spending plan offered by President Bush. Darman faced criticism in an appearance yesterday before House Budget Committee, as some members accused the White House of avoiding tough choices, like adding new taxes to cut the federal budget deficit. Today, Darman goes before the Senate Budget Committee.

Wisconsin's state Assembly voted early today to make it more difficult for minors to get abortions. The state Senate will now consider the bill that would require minors to get the consent of one parent to get an abortion, with the exception of incest. If a minor claims incest, the doctor performing the abortion would have to report the case to authorities. The assembly rejected a portion of an amendment that would have exempted rape victims.

Detectives in Boca Raton, Florida, say men posing as exterminators are proving to be the real pests. The men wearing work pants and heavy boots and hauling what looks to be jugs of chemicals have looted dozens of homes throughout Palm Beach and Broward counties. Police say the thieves have talked their way into at least 33 homes, stealing thousands of dollars worth of cash and jewelry.

-30- 1454

#90031u1567 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - A poll of 5,000 American school kids from the fourth to the 12th grades shows that Mom and Dad and God still rate high, but many say they would be willing to have sex with their steady or cheat on an important test.

The survey was commissioned by the Girls Scouts of the U.S.A., and conducted in October and November last year by Harris-Scholastic research, a division of Louis Harris and Associates.

In it, 65 percent of the high school students said they would cheat on an important exam.

Fifty-four percent of the boys and 22 percent of the girls in junior and senior high school said they would have sex with someone they love.

Seventeen percent of the boys and 30 percent of the girls said they would insist on waiting until marriage.

Seventy percent said they believe a girl should have the final say about getting an abortion. Fifty-seven percent said they would advise a pregnant friend to have the baby.

Fifty-three percent of junior and high school students said they would lie to protect their best friend.

Forty-six percent of the teenagers said if they were at a party and somebody handed them a drink they would probably refuse. Twenty-five percent said they would drink it.

Twenty-one percent said they would be willing to go ''far beyond kissing'' on their third date, and 39 percent said they would be willing to go ''some beyond kissing.''

Thirty-five percent of the teenage boys said they would be willing to fight for their country under any condition. Another 35 percent said they would fight under some conditions.

Harvard University and the Williamsburgh Charter Foundation also participated in the project under the direction of child psychiatrist Robert Coles.

Coles said the youngsters questioned showed confidence in social institutions, particularly in the family and education, but showed little confidence in business and the press.

''In a sense ... our research reveals a nation whose children are divided morally - by virtue of their ongoing personal development, their sex, their race, their social and economic background - and very important, their underlying ethical assumptions all combine to give shape to their notion on what is right and wrong,'' he said.

Asked who were the special adults in their lives, 94 percent said their parents. Twenty-three percent said a minister, priest or rabbi.

Sixty-four percent said they would turn to their parents for help and advice, 43 percent said they would turn to friends their own age.

Eighty-two percent said they believed in God. Thirty-four percent said they had had a religious experience that changed the direction of their life. Thirty-nine percent said they prayed daily.

Thirty-four percent said a minister, priest or rabbi had been an important influence in their lives.

Asked to categorize the heroes and celebrities they admired, 38 percent named actors, actresses and models, 19 percent musicians, 11 percent athletes, 11 percent comedians, 6 percent said politicians and 1 percent businessmen.

Forty-five percent said the most believable authority in matters of truth was their own personal experience. Twenty percent said their parents or teachers, 16 percent said scriptures, 2 percent said science, and 2 percent said the media.

Fifty-seven percent said the most important reason for helping people in their community was because ''it makes you feel a good person.'' Seven percent said ''it might help you get ahead,'' and 21 percent said ''everyone has a responsibility to help others.''

Seventy-two percent of those asked said they believe there were more opportnities today than when their parents grew up. But 53 percent said they thought growing up is harder now.

Asked about their most important problems, 24 percent named pressure to do well in school or sports, 17 percent said what to do with their lives, 13 percent said drugs, 8 percent said lack of close friends, 6 percent said teenage pregnancy and 5 percent said said lack of job opportunities.

#90031u1621 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - Negotiations opened Wednesday between management of the New York Daily News and union representatives for the paper's printers in the first round of talks that all agree could make or break the ailing tabloid.

The News began contract talks with the first of its ten unions, the International Typographical Union Local 6, at the office of federal mediators Wednesday morning. Negotiations with mailers and drivers also start this week. Both management and union members agree that the outcome of formal bargaining talks could determine the survival of the 71-year-old newspaper.

On Tuesday, the News made a one-year contract proposal to the New York Newspaper Guild, the largest of the ten unions with nearly 800 members, that called for extending the workweek by 2 1/2 hours and eliminating seniority as a protection against economic layoffs.

The 57-page proposal seeks to extend the workweek of editorial staff from 35 hours to 37 1/2 hours; allow newer employees to be kept as workers with more experience are laid off; permit random drug testing of all employees, not just new hires; limit paid sick leave; and end requirements that regular days off be consecutive. The Guild secretary-treasurer, Thomas Pennachio, called management's proposals "a slap in the face."

Contracts for the ten unions, which represent some 3,000 employees ranging from photographers to printing press operators to reporters, are set to expire on March 30. Talks with the newspaper's mailers union were scheduled to start on Thursday and with the drivers union on Friday.

The News - which last year was slightly unprofitable despite its 1.2 million readers, the largest circulation for a metropolitan daily in the country - has said it plans to seek cuts in jobs and tens of millions of dollars in other labor costs.

The tabloid's executives claim union featherbedding and anachronistic work rules have cost the company dearly, eating up nearly 50 percent of the

News' entire revenue, or double what most newspapers pay.

George McDonald, president of the Allied Printing Trades Council, the union's umbrella organization, said that although the newspaper's written proposals to his union "looked like a setback" he remained hopeful about the formal talks.

"My own feeling is until I see them across the table I feel optimistic," McDonald said. "We sent out proposals too. I suppose they laugh at ours. We laugh at theirs."

A spokesman for the News said tabloid executives also anticipated progressive talks with the unions. "We feel optimistic. We're going to work for a settlement," said the newspaper spokesman, John Canpi.

DETROIT (JAN. 31) UPI - A team of 27 surgeons, technicians and nurses working around the clock Wednesday reattached eight fingers severed from the hands of an industrial machine operator.

Doctors said chances were good that Robbie Johns, 19, of Warren would regain the use of six and possibly seven of the fingers, although it would be at least a year before he could return to work.

Johns' fingers were severed by a metal brake press he was operating Tuesday afternoon at Progressive Metal Co. in Ferndale, a Detroit suburb.

Medical teams began the microsurgery about 6 p.m. Tuesday at Harper Hospital and finished about 12:30 p.m. Wednesday.

The microsurgery involved reconnecting the severed veins and arteries, tendons, muscles and tissues of each finger. The procedure is done largely through microscopes.

Doctors said Johns would lose the little finger on his left hand, while the prognosis for keeping the index finger on his right hand was 50-50. Chances for keeping the remaining six fingers were described as ''excellent.''

Johns was listed in stable condition after the surgery.

''We do a lot of finger and hand surgery here - usually on a same-day basis,'' said Laura Roscoe, who led the nursing team during surgery. ''But reattaching all eight fingers at once - working on both hands at the same time is very, very rare.''

A night supervisor at Progressive Metal, who requested anonymity, told The Detroit News that Johns, who operates a large brake press, ''must've put his fingers in the wrong place at the wrong time and the press pinched them right off.

''Nobody knows exactly what happened - except him.''

WARSAW, Poland (JAN. 31) UPI - Interior Minister Czeslaw Kiszczak ordered a halt to the destruction of secret police archives across the country Wednesday after Solidarity officials obtained documents indicating that authorities spied on the nation's 20,000 Catholic priests.

The documents, shown to reporters by a Solidarity official, indicated that police had questioned a number of priests and had offered them cars and other payoffs to spy on their fellow clerics. A Solidarity official said some of the priests had been recruited as police agents.

The revelation that police were destroying archives prompted an outcry by the Solidarity officials in Parliament. Kiszczak ''ordered the suspension of the destruction of the archives until further notice following the protests of the Solidarity parliamentary caucus,'' the officials news agency PAP said.

Jan Rokita, a Solidarity official who chairs the parliamentary commission supervising the police, said at a news conference that police departments in Warsaw and across the country have been destroying documents since September.

Rokita said police brought two trucks filled with documents to a paper mill at Jeziorna, outside Warsaw, in October. He said most of the papers were ground up at the mill, but some were acquired intact by Solidarity.

The Solidarity official said the documents shed light on the operation of the police force's recently disbanded 4th Department, which monitored the operation of all 20,000 Catholic priests in Poland.

It was four secret police agents from the 4th Department who assassinated the Rev. Jerzy Popieluszko, a pro-Solidarity priest, in 1984 because of his sermons calling for the revival of the then-banned union.

Edward Krasowski, another Solidarity official, showed reporters copies of the police documents acquired by Solidarity on the basis that journalists would not use the names of the priests involved.

The documents included reports on talks between police agents and priests in which the authorities tried to recruit the clerics as agents or police informants. One policeman offered a car to the priest in exchange for his cooperation, but he refused.

''There were some priests who worked with police,'' Rokita said.

Rokita said the 4th Department even kept files on elementary school students who planned to become priests in the future.

Another parliamentary source said the detailed information collected about the priests was an indicated how much communist authorities feared the power of the Roman Catholic church in Poland.

Rokita said the police burned the secret archives despite regulations requiring that the files be kept.

''One police chief in Starachowice, southeastern Poland, recently burned his archives and died of a heart attack,'' the parliamentary source said.

The source said police destroyed documents that revealed their abuse of power because they were aware that political reforms being initiated by the Solidarity-led government would curb their undemocratic mode of operation.

While the police operated independently of the communist government in the past, Solidarity has pressed to have police operations placed under tighter control.

On the eve of the current parliamentary session, Solidarity unveiled a series of reform measures that included an eight-person oversight council appointed by Prime Minister Tadesz Mazowiecki. The reforms also called for

the disbanding of the SB security police which monitored dissident groups.

In the Solidarity government, police and army are still controlled by the Communist Party, which split into two left-wing parties.

WASHINGTON (JAN. 31) UPI - An Army private who allegedly deserted his military outfit in West Germany 30 years ago to live in East Germany was arrested Tuesday night after returning to the United States, officials said Wednesday.

He was the second Army deserter to return from East Germany in a week.

''Now that the (Berlin) Wall's down, all that's left is speed bumps to stop them,'' one Defense Department official joked.

Army Pvt. Arnold J. Kephart, 54, was arrested by police at Epley Airfield in Omaha, Neb., Tuesday night after he returned from East Germany with his son, believed to be about 12. Police turned Kephart over to military authorities.

Kephart was assigned to the 503rd transportation company in Heidelberg, West Germany, when he went AWOL and was listed as a deserter on Nov. 7, 1960, an Army Personnel Command spokesman said.

He had lived in East Germany for 30 years, Army officials said. They could not confirm a West German news report that Kephart had tried to escape from East Germany three or four times after moving there.

Kephart was being taken to Fort Sill, Okla., until authorities determine what to do with him.

On Friday, Army Spec. 5 Claude Dell Swain surrendered at the U.S. Embassy in East Germany, the Army Personnel Command said. Swain was listed as a deserter from his unit in West Germany on Jan. 25, 1965.

Swain has not been returned to the United States, officials said.

DERBY, CT (JAN. 31) UPI - A judge ruled Wednesday that a 72-year-old squatter living on a state-owned beach can be evicted, but the ailing woman vows to remain in the ramshackle sheds she has called home for nearly 20 years.

''I lost, but it's not over,'' said Doris Gagnon, who has lived in Silver Sands State Park in Milford since the state razed her home in 1971 to make way for the park which has yet to be developed.

She planned to appeal the decision of Derby Superior Court Judge Karen Nash Sequino, who upheld the state's right to evict her from the property.

Gagnon also said she would not move from the compound of trailers and sheds she shares with a menagerie of animals, including 50 chickens, three dogs, three cats, ducks and geese.

''I'm staying where I am. My lawyer's going to appeal,'' said Gagnon, 72. ''I think the public will stand behind me in this. This is America.''

Gagnon, who suffers from cancer, said she has no interest in moving to Milford's public housing for the elderly because she would not be able to keep her animals. She also said she believes the lifestyle in a complex for the elderly would be too confining.

''I'm not a bingo player,'' Gagnon said.

The state attorney general's office, acting on behalf of the Department of Environmental Protection, has been trying to evict Gagnon because officials claim her home stands in the way of developing the park and is unsanitary. Gagnon has no electricity or running water.

#90031u1722 01/31/1990 ~United Press International

PRISTINA, YUGOSLAVIA (JAN. 31) UPI - Thousands of Serbs and Montenegrins demonstrated Wednesday against the government's failure to control unrest by ethnic Albanians and volunteered to go to Kosovo province to help troops and police control the situation.

Thousands of ethnic Albanians exchanged fire or threw stones at riot

police inKosovo, 190 miles south of Belgrade, demanding more autonomy from Serbia state in the eighth day of anti-Serbian demonstrations.

Four demonstrators were killed Wednesday, raising the death toll to 16 since the start of the recent spate of ethnic violence, police said. Unofficial estimates put the death toll at 21.

Witnesses said at least 10 ethnic Albanians were injured in clashes in Podujevo near Pristina Wednesday.

In Podujevo, 20 miles north of the Kosovo provincial capital of Pristina, about 5,000 ethnic Albanians rampaged in the streets Wednesday, and riot police used tear gas to disperse the protesters, who then withdrew to the outskirts and blocked all roads leading to the town, witnesses said.

In Pec, 50 miles west of Pristina and close to the Yugoslav-Albanian border, police threw tear gas grenades from helicopters as ethnic Albanian demonstrators blocked the streets with burning tires.

It was calm in Pristina, however, as police in full riot gear mingled with pedestrians.

The protests began Jan. 24 when 40,000 ethnic Albanians in the Kosovo provincial capital of Pristina demanded the resignation of pro-Serbian Kosovo leaders and asked for free elections and a multi-party system. They also demanded the release of political prisoners and the abolition of emergency measures that were imposed in Kosovo in February last year.

In the Montenegrin capital of Titograd, about 100,000 people, many of them firing pistols in the air, attended a rally Wednesday demanding the resignation of the Yugoslav leadership for failing to install peace and order in Kosovo and protect Serbs from the ethnic Albanian violence. A speaker at the rally, televised live to Serbia and Montenegro states in eastern Yugoslavia, said thousands of volunteers were enlisting to go to Kosovo to help stop Albanian ''separatists and terrorists.''

In Pristina, Kosovo Prime Minister Jusuf Zejnulahu told reporters the police force in the province, where 1.7 million ethnic Albanians outnumber 200,000 Serbs, was strong enough to protect all Serbs in villages from possible assaults by Albanian separatists.

Zejnulahu said authorities are ''determined to prevent ethnic conflicts'' but they did not intend to impose a curfew. He announced about 15,000 ethnic Albanians were on strike in about 20 municipalities in Kosovo, a province in the south of Serbia, the largest of Yugoslavia's six republics. Some 8.5 million Serbs are a majority in multi-national Yugoslavia's population of 23 million, but they are a minority in Kosovo.

A winter vacation for schools and universities in Kosovo that was to end Thursday was extended until Monday. Witnesses said many Serbs, fearing attacks by ethnic Albanians, have evacuated their women and children from Kosovo to other parts of Serbia. In many Kosovo villages, Serbians set up vigilantes to watch houses overnight.

Witnesses said Albanians hurled stones on trucks, buses and cars with license plates registered outside Kosovo. Passenger trains passing through Kosovo were attacked with stones, which shattered windows and injured one passenger.

In cities throughout Serbia and Montenegro, including the Yugoslav and Serbian capital of Belgrade, Serbs held mass rallies accusing the leaderships of Slovenia and Croatia of siding with and supporting the Albanian demonstrators.

In Belgrade on Wednesday, Radmila Andjelkovic, president of the communist-led Serbian Socialist Alliance, accused the Communist Party leaderships of Slovenia and Croatia of supporting ''Albanian separatists'' during the special Yugoslav Communist Party congress in Belgrade Jan. 20-22.

Andjelkovic said the Albanian, Slovenian and Croatian sides have the same goal - ''separatism and breaking up Yugoslavia.''

#90031u1735 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - Two women demonstrators splashed the marble steps and columns of the House and Senate Wednesday with what their leader called ''blood that represents the innocent'' in a protest of the plight of homeless people.

The steps, leading to the restricted members' entrances to both chambers,

are guarded by Capitol Police, but each woman rushed behind an officer to toss the red liquid.

The incident occurred about noon, while scores of tourists were on the grounds, and hours before President Bush was to deliver his State of the Union address to a joint session of Congress.

Rep. Dan Burton, R-Ind., drove past the scene and promptly went to the floor of the House to call for firm punishment.

''We ought to be indignant,'' Burton told the House. ''I think this body and the other body (Senate) ought to let the people who perpetuate these crimes on our symbols know that they will have to pay a severe price.''

Mitch Snyder, director of the Community for Creative Nonviolence, said the two women demonstrators, associated with his group, had containers holding a total of about six pints of blood.

''It was their own blood, and the blood of their friends,'' Snyder said, and was thrown at the site of Bush's address on behalf of ''the pain and impoverishment of the poor and the destitute and the innocent.''

The Capitol, a symbol of America, was chosen for the protest because it is the site of the address of a president who has an indifferent view of the suffering of homeless people, Snyder said.

''We consider human life more sacred and have far less respect for inanimate objects,'' he said. ''This blood will in fact be washed clean. We will not be able to wash that blood away, the blood that represents the innocent.''

The liquid splattered two 1850s-era marble columns to the left of the main door of the House, facing the East Capitol Plaza, and flowed down the base and onto the steps. One column to the left of the Senate entrance was hit, with the steps bearing the worst damage.

Officer Dan Nichols of the Capitol Police identified the two demonstrators as Elizabeth Mastropierro, 22, and Rachel Frankel, 30, both of the District of Columbia.

They were charged with two felonies: injuring government property and committing an act of physical violence upon the Capitol grounds. The first charge carries a maximum penalty of a $10,000 fine and 10 years in prison, and the second a maximum fine of $500 and six months in prison.

A third demonstrator who apparently did not participate in the defacing of the Capitol was arrested later on a misdemeanor charge of unlawful entry because he refused to leave the House steps. He was identified as Charles

O'Lare, 22, of the district.

(JAN. 31) UPI - Radio Moscow says don't look for Soviet leader Gorbachev to step down as Communist Party chief. Gorbachev today denied that he's considered resigning. He spoke to reporters at a reception for the visiting president of Brazil. A report yesterday said Gorbachev was considering resignation from his Communist Party post because of frustration in implementing domestic reforms.

The Communist Party in Czechoslovakia has lost its majority in parliament as a result of new elections based on talks with the main opposition group the Civic Forum. The official Czech news agency says the Communist Party agreed to cut its delegates in proportion to its political strength.

Experts say numbers released by the government today are an indication of a sluggish economy. The Commerce Department's index of of leading economic indicators rose eight-tenths of one percent last month, bringing the annual gain to a modest four-tenths of one percent- the lowest in five years.

The National Association of Realtors says declines in mortgage interest rates made buying a house somewhat easier in December. But the group says overall housing affordability in 1989 remained below that of the year before. The N-A-R's chief economist says conditions will remain tough for many first-time home-buyers.

(JAN. 31) UPI - Anti-Serbian protests continued for a seventh day in southeastern Yugoslavia, where two protesters were killed as ethnic Albanians exchanged gunfire with police. Belgrade Radio says Albanian

separatists are trying to push the Albanian minority into an armed rebellion. The Albanians want greater autonomy from Serbia, which has ruled the region since World War Two.

Another day of violence in the divided city of Beirut. Troops loyal to rival Christian leaders traded heavy weapons fire in the Lebanese capital today... just one day after Christian strongman Michel Aoun announced plans to disarm the militias.

The Teamsters union says it will appeal an election loss in which eight-thousand U-S-Air service workers rejected their union representation. The union says the airline interferred in the mail ballot election involving baggage and cargo workers at 140 airports nation-wide.

Two medical teams at a Detroit hospital are trying to re-attach eight fingers to the hand of a 19-year-old man. Officials say Robbie John apparently severed his fingers yesterday while operating a metal brake press at a Ferndale plant. Seven surgeons began the microsurgery last night, with the operation expected to be completed by this afternoon.

SANTA FE, NM (JAN. 31) UPI - Burned into the cement floor of a cell block at the Penitentiary of New Mexico, in the shape of the body that fell there, is an indelible reminder of the 33 inmates hacked, burned and tortured to death during one of the most horrific prison riots in U.S. history.

By all accounts, conditions inside the prison have dramatically improved in the 10 years since the Feb. 2 and 3, 1980, riot. But some inmates say some of the administrative mistakes that led to the riot are being made again.

''Someone needs to tell the citizens of New Mexico these guys are leaving a mess for the next administration,'' said Reilly Johnson, an inmate active in the federal court order on prison conditions known as the Duran consent decree. ''We're on a train headed downhill at 100 miles per hour, with no one at the wheel and no one at the brakes.''

Johnson and other inmates say tensions are rising and the inmate population is dominated by stronger, more aggressive inmates. One inmate predicts imminent racial violence.

Don Caviness, Corrections Department spokesman, said the complaints are not typical of the inmate population.

''Other inmates have been supportive,'' he said.

The images left by the 1980 riot were dramatic - photos of blood-smeared walls, iron bars cut by blow torches, national guardsmen carrying stabbed prison officers to medical helicopters; stories of an inmate found headless, another found with a metal rod driven through his head and another, his face missing after being shot with a tear gas launcher.

But the first strokes of the picture were being drawn long before drunk inmates in an overcrowded dorm jumped poorly trained, grossly outnumbered officers.

The attorney general's report on the riot concludes the uprising was the result of a half-decade of mismanagement. An 80 percent turnover among guards meant that less than half of the 25 officers on duty that night - including the 15 inside for 1,057 inmates - had any training. Overcrowding and poor inmate classification put highly volatile inmates in a claustrophobic dormitory.

But the report says the living conditions had always been bad, the staff always poorly trained and outnumbered and the opportunity for an inmate takeover ever present.

The primary motivating factor, it says, was the elimination of positive incentives for inmates to behave. In an attempt to increase security, the prison administration ended programs that allowed inmates to interact with the community and establish legitimate inmate leaders. The power vaccum was filled by violent inmates who built their reputations on disruption.

At the same time, transfers to lower security prisons, one of the last positive incentives and a way to reduce overcrowding, were greatly reduced.

The staff was forced to use informants and coercion to control the population. Yearly upheavals in prison administration led to inconsistent policy and additional hostility between staff and inmates.

''Attempts ... to establish and maintain control of the penitentiary have had the opposite effect,'' the report says, ''have, in fact, contributed to the steady loss of control, culminating in a complete loss of control on the morning of Feb. 2, 1980.''

Some inmates say administrators are again tightening security at the expense of positive incentives and the strongest inmates have returned to control.

''I'd rather do time in a system like that but it's not good for newcomers '' said Rocky Shiflett, an inmate leader in programs until the past few years. ''They either go PC (to protective custody) or they become predators.''

Shiflett, who recently transferred to a lower security prison, said inmates need legitimate leaders.

''People aren't getting into the groups like they used to,'' he said. ''The club leaders could be helping control but they aren't. Once leadership stops, then people just react.''

Echoing comments in the attorney general's riot report, Shiflett said administrators can have greater control over inmates through programs.

''If you can get leaders, then you're controlling the inmates,'' he said. ''(George) Sullivan (the previous warden) could get an idea of how inmates felt by talking to the leaders. I never saw Tansy.''

Caviness said programs are still active but are being managed more strictly.

''Warden (Robert) Tansy was hired as a security-minded warden. He wanted to get rid of the notion of inmates running the prison,'' he said.

''At the end of the (last) administration, no inmates ran anything here,'' said inmate Johnson.

Johnson, who is housed at a satellite to the Main Facility of the Penitentiary of New Mexico, said he has seen Tansy only once - when officers stormed the recreation yard in an incident later described by a federal court monitor as an overreaction by prison administrators.

''Warden Tansy walks through the institution every day,'' Caviness said. ''He responds to every letter sent by an inmate. It is not his job to spend large ammounts of time with the inmates.''

Shiflett said programs may improve with the recent hiring of a new director but it's still too early to tell.

''They, the prison administration, are afraid to let the inmate body pull together,'' he said. ''The groups brought in the community. They worked together for goals.''

Inmates said work and school opportunities also have declined.

Caviness said all the inmates have jobs or are in school. Administrators have expanded corrections industries and other programs and all but a few inmates work 5 or 6 hours a day, he said.

''The inmate work programs are a joke,'' Johnson countered. ''They work 30 minutes a day. Every morning, you have 25 people looking for cigarette butts on the baseball field.''

Inmates say the lack of positive incentives has led to a resurgence of ''tough'' inmates.

The inmates, who asked not to be identified, report new cliques inside two cell blocks. They say some guards are afraid to work in those cell blocks.

''Instead of putting young guys in with older guys to calm them down, they're sticking them into tough guy units,'' said one inmate.

Caviness denied that any cliques are forming or races are being isolated, saying, ''We have a very fluid inmate population. Classification changes, jobs change, people move.''

But the population may not be as fluid as Caviness contends.

Shiflett said a cutback in privileges at minimum-security prisons has discouraged inmates from transferring.

The state recently created a new custody level called minimum-restrict for inmates who are housed in minimum-security prisons but do not have work and school release and furlough privileges.

Caviness said release privileges have been cut back because of security concerns.

While inmates are critical of the current administration, they are quick to say conditions today cannot be compared to those prior to the riot.

But Shiflett said many of the changes are the result of the administration in place before 1987.

''Things are better now. We have recreation. We have yard functions events that allow visitors to spend the day in the prison recreation yard with the inmates. We never had any of that before. But those are left over,'' he said.

''We made some real improvement in the mid-'80s,'' he said.

And, the inmates note, even though the riot ignited a decade of reform, the fire might have gone out without the Duran consent decree, a federal court order similar to those guiding prison operations in 40 other states.

Kay Monaco, a national prison consultant and a former deputy of the New Mexico Corrections Department, said prison conditions would deteriorate without the decree.

''The single, most effective tool in prison reform in the last 20 years has been federal court intervention. Without that, you wouldn't see change riot or no riot,'' she said.

BONN, WEST GERMANY (JAN. 31) UPI - West German Chancellor Helmut Kohl exchanged emotion-charged letters with Yitzhak Shamir after the Israeli prime minister said a reunified Germany could threaten Jews, the letters revealed Wednesday.

The Munich-based daily Sueddeutsche Zeitung reported that Shamir's remarks to a U.S. television station had started the bitter exchange of letters, copies of which were obtained from Kohl's office Wednesday by United Press International.

Shamir had said in the November interview that Jews feared a reunified Germany could become the strongest nation in Europe and could persecute Jews as it did before and during World War II.

Eduard Ackermann, a spokesman for Kohl's office, Wednesday confirmed the letter exchange, but denied that it had soured relations between the two countries.

He said Kohl had only expressed his ''disturbance'' over some of Shamir's remarks in the interview.

Shamir on Wednesday also denied that the letter exchange had hurt his relations with Kohl.

West Germany has been promoting a possible reunfication with East Germany, which peacefully overthrew its Stalinist government last year. The West German government hailed Wednesday statements by Soviet President Mikhail Gorbachev acknowledging the inevitable reunification of the two German states.

But Shamir said in the television interview that such a prospect was frightening to Jews.

''All of us remember what the German people - what the Germans did to us - when they were united and strong,'' Shamir said in the interview. ''The great majority of the German people decided to kill millions of Jewish people, and any of us could think that if they will have the opportunity again, and they will be the strongest country in Europe ... they will try to do it again.''

An estimated 6 million Jews were killed by the Nazis during World War II.

Kohl fired off a letter of protest, in which he said Shamir's comments had caused a ''strain in our otherwise good and tension-free relations.''

In his letter, Kohl told Shamir that Germans will never allow the horrors of the Holocaust to be forgotten and said that four decades of democracy have shown that ''Germans have learned from history.''

''I am convinced that you have misjudged Germans in both German states and that (your statements) deny them justice,'' Kohl said in his letter.

Shamir's response to Kohl on Dec. 10 did little to sooth Kohl's outrage,

the Sueddeutsche Zeitung quoted unnamed government sources as saying.

While Shamir noted the ''breakdown of walls and the removal of barriers'' in Germany, he repeated lingering Jewish fears over the reunification issue.

''We cannot forget the images of the cheering crowds in the 1930s and what they produced,'' Shamir wrote. ''We carry with us the memories of the Jews who were massacred in the Holocaust that followed.

''Had those millions survived, the situation of our people and of Israel would have been radically different today,'' he continued. ''As the prime minister of this state, I have the duty to voice our doubts and express our anxieties.''

But Shamir concluded that the dispute should not damage the ''special relationship that has been painstakingly built over the years'' between Israel and West Germany.

Shamir said Wednesday his letter to Kohl was an attempt to explain his earlier remarks on the issue.

The Sueddeutsche Zeitung quoted unnamed government sources as saying that Kohl was ''not particularly pleased'' with Shamir's response.

''Israel is continually rapping at our door about cooperation ventures that cost money,'' the newspaper quoted one government official as saying. ''You can't propose increased cooperation on the one side while continually kicking us in the shins on the other.''

Heinz Galinski, head of West Germany's Jewish Community, said Wednesday that the letter exchange was unfortunate, but added that relations between the two countries were ''so stable'' that such disputes were not damaging.

#90031u1838 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - Members of the Cabinet-level board that oversees the agency charged with cleaning the nation's thrift mess said Wednesday they need more money, but don't know how much, to rescue the ailing savings industry.

The Resolution Trust Corp. is seeking to borrow at least $50 billion in working capital to help it dispose of the assets of failed thrifts. The money would be in addition to the $50 billion approved by Congress in August as part of President Bush's $164 billion thrift bailout bill.

"The $50 billion was seen as solving the whole problem. I get the sense that we may be looking at something more than that," said Sen. Donald Riegle, D-Mich., chairman of the Senate Banking Committee.

Deputy Treasury Secretary John Robson, who also serves as acting chairman of the RTC's oversight board, told the committee that it is "extremely difficult" to predict how much working capital the agency will need.

Robson said "rough estimates" by the RTC suggest it will need between $40 billion and $100 billion, including between $27 billion and $44 billion this year alone. "We have no intention to trying to hide the peanut under the walnut shell," he said.

The working capital is needed to replace high-cost funds at the 293 savings institutions taken over by the government. By reducing these high-cost funds with less expensive financing, the government stands to save about $300 million annually, said William Seidman, chairman of the RTC and the

Federal Deposit Insurance Fund. Thrifts under conservatorship are costing the government $14 million a day to maintain, Seidman said.

Seidman told the panel the $50 billion originally authorized for the RTC was adequate to fund the agency but not for the purposes of supplying working capital for the thrifts under the government's control. He said the agency had $4.3 billion left over at the end of 1989 and only $2.9 billion by Jan. 19.

Robson said the agency is studying proposals to borrow money from the Federal Financing Bank and the Federal Home Loan Banks. A decision on where to borrow the money is expected in two-to-three weeks.

Alan Greenspan, chairman of the Federal Reserve Board and a member of the RTC oversight board, agreed that the agency currently has enough money to move forward.

But he added no one will know how much money eventually will be needed to rescue the savings industry because the data to base such a calculation is inadequate.

On another matter, Greenspan defended last week's sale of $5 billion worth of 40-year bonds to finance the RTC. The offering sparked a wild day of trading on Wall Street and elsewhere in the financial world after investors balked at buying the bonds.

Because of the lukewarm response from investors, the RTC was forced to pay higher-than-expected interest rates on the bonds, a move that will cost the governemnt at least $200 million and possibly as much as $400 million.

"I think what the problem was, the market, in evaluating how a 40-year issue would sell misjudged," Greenspan said. "I don't think it should be characterized as a failure."

#90031u1839 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - The Defense Department awarded more than $1 billion in contracts Wednesday for a host of weapons programs ranging from M-1 Abrams tanks to AV-8B Harrier jets.

The largest single contract, for $260.3 million, was awarded to General Dynamics Land Systems Inc. of Sterling Heights, Mich., for 328 M-1 Abrams tanks for the Army. Work is to be completed by Sept. 15, 1991.

The M-1, a mainstay of NATO defenses in Western Europe, has been designated for cancellation by Defense Secretary Dick Cheney in his defense budget for fiscal 1991, which begins Oct. 1.

A $258.6 million contract was awarded to McDonnell Douglas Corp. of St. Louis for 21 AV-8B Harrier jets and three TAV-8B trainers for the Marines in 1990 and to purchase long-lead items necessary to produce 24 Harriers in 1991.

A $205.2 million contract was awarded to the General Electric Co., Aircraft Engine Business Group, of Lynn, Mass., for 132 jet engines for F/A-18 Hornet strike fighters for the Navy.

A total of $251 million was awarded in two separate contracts for MK-48 torpedoes for the Navy.

Of that amount, $131 million went to the Hughest Aircraft Co., Ground Systems Group, Fullerton, Calif., for 108 torpedoes, fuel tanks and warhead add-on sensors and $120 million was awarded to the Westinghouse Electric Corp., Naval Systems Division, Cleveland, for 132 torpedoes.

#90031u1896 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - The Treasury announced Wednesday it plans to auction $30 billion in notes next week to refund $18.1 billion of privately held notes maturing Feburary 15 and to raise about $11.9 billion of cash. The securities to be offered are:

- $10 billion in 3-year notes maturing Feb. 15, 1993, auctioned on a yield basis February 6 in minimum demoninations of $5,000.
- $10 billion in 10-year notes maturing Feb. 15, 2000, auctioned on a yield basis February 7 in minimum denominations of $1,000.
- $10 billion in 30-year notes maturing Feb. 15, 2020, auctioned on a yield basis February 8 in minimum denominations of $1,000.

Robert Glauber, the Treasury's undersecretary for finance, said the Treasury will accept noncompetitive tenders of up to $1 million for each of these issues.

If the auction of the three-year notes results in an average yield of between 8.25 percent and 8.37 percent, Glauber said the Treasury will reopen the 8.25 notes of Feb. 15, 1993.

The quarterly financing is called a "refunding" because in the past, government frequently used the money to pay earlier buyers of its securities. Now, with the government's huge deficit, the refunding auctions tend to raise new cash for the government as well as to pay off old government debt. Glauber said the government needs to borrow $41.6 billion, assuming a $10 billion cash balance at the end of March.

The Treasury's market borrowing estimates do not include any allowances for financing the working capital needs of the Resolution Trust Corp., the government agency charged with rescuing the ailing thrift industry, Glauber said.

NEW YORK (JAN. 31) UPI - Average yields for money market mutual funds fell or were unchanged in the latest reporting week, while rates at competing savings and loan institutions were mostly higher, two organizations that track the funds said Wednesday.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds were 7.70, unchanged, while 30-day simple yields fell to 7.75 percent from 7.83. The average maturity of fund portfolios rose to 42 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions were mostly higher in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.12 percent, down from 6.13; Super-Now accounts 5.01 percent, unchanged; six month certificates of deposit, 7.67 percent, up from 7.66; one-year CDs 7.71 percent, up from 7.69; 2 1/2-year CDs 7.70 percent, up from 7.67; and five-year CDs 7.72 percent, up from 7.68.

The average rate for a one-year adjustable rate mortgage rose to 8.48 percent from 8.45 percent last week.

The average rate on a 15-year fixed-rate mortgage rose to 9.78 percent from 9.59 percent and the average rate on a 30-year fixed-rate mortgage was up to 10.03 percent from 9.84 percent.

The average rate for a four-year automobile loan fell to 12.10 percent from 12.11 percent.

#90031u1947 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - Lyndon Johnson won the 1948 Democratic U.S. Senate primary in Texas by stealing thousands more ballots than previously thought, and urged a lawyer he later named to the Supreme Court to help protect his victory, according to a report published this week.

In his account of Johnson's election to the Senate, prize-winning biographer Robert Caro writes in the Jan. 29 edition of The New Yorker that Johnson stole considerably more than the 87 votes generally attributed with giving him the nomination.

Caro's article includes evidence from court transcripts and interviews with several people in the Johnson high command who are still living, and those in his opponent's, legendary former Texas governor Coke Stevenson, as well as key figures in the Texas counties where much of the massively orchestrated vote-stealing took place.

In the four decades since the hotly contested race was decided, writers have focused on how, out of a million votes cast, Johnson won by a mere 87 ballots reported six days after the election after one voting precinct ''found'' 200 previously unreported votes for Johnson.

Johnson's margin of victory has become known as ''the 87 votes that changed history,'' but Caro argues the then congressman stole several thousand ballots and not just the final 200 that put him over the top.

Caro, whose first volume of his projected four-volume biography of the former president won the National Book Critics' Circle Award as the best non-fiction book of 1982, also discloses how Johnson devised a legal strategy with Abe Fortas, whom he later appointed as a Supreme Court justice, to protect his victory in court.

The latest Caro article is the fourth and final installment to appear in The New Yorker. It was excerpted from the second volume of the Johnson biography, ''The Years of Lyndon Johnson: Means of Ascent,'' to be published in March.

#90031u1975 01/31/1990 ~United Press International
NEW YORK (JAN. 31) UPI - The stock market ended January the same way it began the month, as a break from the recent jump in interest rates fueled the market's biggest rally since its surge to record highs Jan. 2.

The Dow Jones industrial average, which fell 10.14 Tuesday, its fifth straight decline, surged 47.30 to close at 2590.54, its sharpest rise since a 56-point burst Jan. 2 to a new all-time high.

Among broader market gauges, the New York Stock Exchange composite index rose 3.07 to 181.50 and Standard & Poor's 500-stock index gained 6.08 to 329.06. The price of an average share jumped 57 cents.

Advances pounded declines 1,111-446 among the 1,966 issues crossing the NYSE tape. Big Board volume totaled 189,660,000 shares, compared with 186,030,000 shares traded Tuesday.

The rally was fueled by a rebound in bond prices after their steep January declines. Especially heartening to investors was that bonds gained despite a government report early Wednesday that the index of leading economic indicators, a gauge of future economic activity, rose 0.8 percent in December. Economists had expected the index to rise only 0.5 percent.

Analysts said Treasury bonds, which were lower, dipped slightly on the news but then turned higher at midmorning. In late trading, long-term issues were up as much as 1 1/8 points.

They said the bond market's firm reaction to a stronger-than-expected economic report, which would normally be bearish for bonds, may be a signal that interest rates have seen their highs for now.

"The bond market's behavior in managing a stronger-than-expected number was positive," said Hugh Johnson, chief economist at First Albany Corp. in Albany, N.Y. "It suggests the (bond) market might be reaching a level where it's turning. Stock folks saw this and I think that was the catalyst for the gains," he said. "This was great to see, a good sign, an encouraging sign," said Johnson.

Johnson also noted that stocks have had five straight down days and said he felt the market was also simply due for a rebound. He also said Wednesday's statement by Soviet President Mikhail Gorbachev that he has no intention of resigning as chief of the Communist Party was a supportive factor.

Radio Moscow said Gorbachev made the denial in remarks to reporters at a reception for visiting Brazilian President Fernando Collor de Mello. A report carried by the Cable News Network Tuesday said Gorbachev was preparing to resign as general secretary of the party because of frustration with implementation of domestic reforms. The report briefly sent stocks tumbling Tuesday before they rebounded.

On the trading floor, Occidental Petroleum was the most active NYSE issue, unchanged at 26 5/8. Bank of New England followed, up 1/4 to 4 7/8. AT&T was third, up 1 1/4 to 39.

Among the other blue chips, IBM jumped 1 3/8 to 98 5/8 after announcing a joint venture Tuesday with Motorola to market a wireless data communications service, Union Carbide rose 1 1/8 to 22 1/8, and Dow components reporting earnings helped boost the blue-chip average. Philip Morris gained 7/8 to 37 7/8, USX rose 1 1/8 to 33 1/2 and Coca-Cola surged 2 5/8 to 68 7/8 after reporting steep gains in profits.

Other companies that were sharply higher after favorable earnings reports were Xerox, up 2 3/8 to 55 1/2; Asarco, up 1 5/8 to 28 1/2; and Ogden Projects, up 2 5/8 to 24.

Takeover issues rebounded after their recent shellacking. Hilton Hotels surged four to 61 3/4 amid talk that its board may approve the sale of the company. Aristech Chemical jumped 1 1/4 to 26 1/2. Its board has reportedly approved a $27-a-share management buyout. And Georgia Gulf soared 4 5/8 to 40 7/8 after NL Industries said it planned a $45-a-share bid for the company.

Interest-sensitive issues gained on the relief from the rise in interest rates. Federal National Mortgage Association jumped two to 31 1/4, Federal Home Loan Mortgage Corp. climbed 2 5/8 to 61, and Student Loan Marketing Association added 1 5/8 to 43 3/8.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 221,763,750 shares, compared with 215,386,740 shares traded in the previous session.

Prices closed sharply higher in moderately active trading on the American Stock Exchange. The Amex Market Value index rose 4.57 to close at 350.07. The price of an average share gained 17 cents. Advances led declines 320-258 among the 817 issues traded. Composite volume totaled 15,553,100 shares, compared with 19,383,100 traded Tuesday. Hillhaven led the Amex issues, unchanged at 1 7/8.

The National Association of Securities Dealers composite index gained 5.09 to 415.81.

#90031u2000 01/31/1990 ~United Press International

LOS ANGELES (JAN. 31) UPI - A judge denied a request Wednesday to appoint a conservator for actor Gary Coleman in a case involving allegations of failing mental health, parental greed and stolen money.

Coleman's mother, Edmonia Sue Coleman, sought to have a conservator take over the estate and personal affairs of her son, the diminutive former star of ''Diff'rent Strokes,'' because she believes that prolonged use of prescribed drugs and his dependance on dialysis machines has had a ''debilitating effect'' on him.

She also alleged in court papers that her son - who was one of Hollywood's highest-paid child actors - is being ''brainwashed'' by his former chauffeur.

But based on Coleman's court appearances, the investigation of a court-appointed lawyer and her own private 30-minute interview, Superior Court Judge Martha Goldin denied the request, ruling that the 21-year-old actor ''does not come close'' to requiring a conservator to look after his affairs.''

''I do not see any basis whatsoever for proceeding any further for conservatorship,'' Goldin said.

Coleman entered and left the courtroom through a rear door and did not speak to reporters.

At a court hearing earlier this month, he said his mother's effort to place him under a court conservatorship was an ''attempt to control my life.''

After Wednesday's hearing, his mother, who lives in Illinois, said she had not spoken to her son for three months and remains concerned about his health.

''Gary is my son and I love him very much,'' she said.

Her lawyer, James Turken, said: ''We are obviously evaluating our options at this point.''

Coleman's mother filed the petition seeking a conservator for her son late last year, arguing that her son was under the influence of a Michael Jackson impersonator named Dion Mial and that he was not caring for his lifelong kidney ailment. As a result, the petition said, Coleman was putting his nearly $7 million estate at risk.

The actor's lawyers countered that he needs no conservator and that the petition was a ploy stemming from a separate dispute between the actor against his parents.

Coleman filed suit last June accusing his parents, whom he fired as his personal managers, and his business manager of stealing at least $1

million from the actor's estate from 1985 to 1988, said Charles Wake, Coleman's attorney.

Coleman is ''pleased that this thing is over,'' Wake said after Wednesday's hearing.

Dressed in a blue suit, the actor appeared healthy and smiled at an associate when the judge ruled that a conservator was not needed.

Arne Lindgren, the court-appointed lawyer, said his investigation of Coleman found that ''Gary can take care of himself.''

At the hearing, Turken argued that a trial was needed to determine the issue of whether Coleman needed a conservator and sought to bring in medical records and testimony from doctors about Coleman's kidney condition.

Goldin said no expert testimony was needed to determine whether a person is capable of looking out for himself. The judge said all Turken could offer was expert testimony on what might happen if Coleman did not look after the condition.

The judge said she and Coleman discussed both the financial allegations and the questions about his health. After the interview Goldin said she found Coleman ''quite capable of making sure that he follows a medical regimen.''

#90031u2001 01/31/1990 ~United Press International

(JAN. 31) UPI - The Soviet news agency Tass says President Bush called Mikhail Gorbachev today, but there's NO word whether they talked about the Soviet president's future. Tass says the two leaders discussed ''international issues,'' including Europe and arms control. Earlier, the Kremlin dismissed as groundless a report that Gorbachev is considering resigning as chief of the Communist Party. Said Foreign Ministry spokesman Gennady Gerasimov- ''These rumors are ill-intentioned.''

President Bush is putting the final touches on the ''State of the Union'' address he will deliver tonight before a joint session of Congress. Bush is rehearsing the speech at the White House theater, focusing on what he views as the themes for the last decade of the 20th century. House Speaker Tom Foley of Washington will deliver the Democratic rebuttal after the Bush address.

Richard Darman is back on Capitol Hill today, defending President Bush's fiscal 1991 spending blueprint before a hostile Senate Budget Committee. The budget director is fending off accusations from Democrats that the

administration's one-pointTRILLION-dollar spending plan contains lies and gimmicks.

The government has joined with labor and religious groups to ask low-income families who owe NO federal income taxes to file returns to take advantage of the earned income credit. Officials say families of the working poor may be missing out on payments of up to 910 dollars. Working families with at least one child living at home are eligible for the tax credits if their earned and adjusted income was less that 19-thousand 340 dollars in 1989.

GREENFIELD, MA. (JAN. 31) UPI - A man mistakenly released from a jail after he posed as another inmate was back behind bars Wednesday after he was recognized on the street by the police officers who originally arrested him.

Antonio Vasquez, 19, of Holyoke escaped Jan. 5 from the Franklin County House of Correction, where he was being held in lieu of bail on drug and weapons charges, said Joseph Martino, deputy superintendent of the jail.

Officials said Vasquez was arrested in his neighborhood Monday after the two Holyoke officers who arrested him on drug and firearms charges one month ago recognized him. He was scheduled to be arraigned Thursday on a fugitive charge, a court clerk said.

Vasquez fooled jail guards by posing as another inmate, Ruben Pagan, 19, of Holyoke, officials said. The jail guards did not have a photograph of Vasquez or Pagan when the switch occurred.

Jail guards said Vasquez fit a written description of Pagan, which was the only identification available at the time of the inmate's release. Sheriff Donald McQuade has since implemented a new policy that requires instant photos be taken of all inmates upon their arrival.

Vasquez was released to people posing as Pagan's family members, who posted the $200 bail that had been set for Pagan, officials said. Bail for Vasquez had been set at $5,000.

Although officials initially suspected Pagan was involved in the scheme, he was not charged in Vasquez' escape. Pagan remained in the jail while his fellow inmate was freed.

Vasquez was being held at the Franklin County jail pending arraignment on possession of a sawed-off shotgun and possession of cocaine with intent to distribute when he escaped, police said.

He was arrested this week by the same two officers who apprehended him Jan. 4 on the weapons and cocaine charge, said Holyoke police Lt. Richard Page.

''The officers recognized him,'' Page said.

#90031u2026 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - The House ethics committee Wednesday dismissed a complaint against Rep. Gerry Sikorski, D-Minn., that stemmed from his alleged misuse of professional staff members.

The committee said it had ''dismissed complaints which had been filed'' against Sikorski and another congressman, Rep. Roy Dyson, D-Md.

According to House records and former aides, Sikorski had members of his staff perform such personal chores as shoveling the snow off the sidewalk of his Capitol Hill townhouse, washing dishes, driving his daughter to school, and assisting his wife in her dog-breeding business.

Sikorski also reportedly dispatched several full-time employees from his Washington office and a subcommittee on which he serves to Minnesota to campaign in 1986 while they continued to draw government salaries.

House ethics rules prohibit members from using public funds to compensate staff for campaign activities.

Sikorski, 41, of Stillwater, could not be reached for comment Wednesday and neither could his press secretary, Linda Marson.

Sikorski was elected in 1982 after unseating Republican incumbent Arlen Erdahl. He is a member of the Energy and Commerce and Post Office and Civil Service committees as well as the Select Committee on Children, Youth and Families.

Sen. David Durenberger, R-Minn., is tentatively scheduled to testify before the Senate ethics committee next week regarding allegations that he violated ethics rules by his participation in a book publishing and promotion deal, a real estate deal and taking expense paid trips in 1985 and 1986.

#90031u2059 01/31/1990 ~United Press International

TRENTON, NJ (JAN. 31) UPI - The state Supreme Court Wednesday upheld the use of Breathalyzer devices in a case that could set a national precedent, rejecting arguments that the devices are not a reliable means of determining whether a motorist is driving under the influence of alcohol.

The court ruled 5-1 against four motorists charged with drunken driving who sought to introduce expert testimony on the accuracy of the devices at their trials. The cases will now proceed in Municipal Court.

''The Breathalyzer reads alcohol with unimpeachable accuracy,'' Justice Marie Garibaldi wrote for the majority. ''We hold that the Breathalyzer ... is not only the best practical tool, but the tool the Legislature intended to carry out its will,'' she wrote.

The case had been watched by prosecutors and defense lawyers across the nation, with the National Association of Criminal Defense Lawyers filing a friend of the court brief. A pre-trial hearing last year drew experts from as far Sweden, and the attorney general's office said it had received many calls from states with similar challenges pending in their own courts.

''We are hoping the court's rejection of the blood-breath ratio defense sets a national precedent for rejecting this in other states,'' said Deputy Attorney General Boris Moczula. ''There has been a lot of interest in this nationally and internationally.''

The Breathalyzer, invented in 1954 and manufactured by National Draeger Corp. in Pittsburgh, is an electronic device that measures the amount of alcohol in a person's breath and translates the reading into a percentage of alcohol present in the person's bloodstream.

A reading of 0.10 percent or higher is considered evidence of drunken driving in New Jersey and most other states, leading to license suspension fines, increased insurance costs and a possible jail sentence.

The Breathalyzer multiples the breath alcohol reading by a factor of 2,100 to obtain the blood alcohol reading, based on scientific evidence that alcohol in the bloodstream is 2,100 times more concentrated than alcohol present in a person's breath.

Lawyers for the motorists presented expert witnesses at last year's hearing who said the differences between breath and blood alcohol concentrations varies from person to person, sometimes matching the 2,100 figure and sometimes being higher or lower.

Garibaldi acknowledged in the opinion that the 2,100-to-1 ratio ''does combine with other physiological factors to underestimate blood alcohol in a significant number of cases. This results, however, only in giving suspects an added benefit of the doubt.''

The Breathalyzer produces accurate results in 97.7 percent of cases, a record that is ''not unreasonable,'' Garibaldi wrote.

#90031u2071 01/31/1990 ~United Press International

(JAN. 31) UPI - The government reports that sales of new single-family houses dropped nearly 10 percent last month... and sales for all of 1989 fell to the lowest level since 1984. The 1989 figure of 650-thousand new-home sales is the lowest in five years when sales totalled 639-thousand. The median price of a new home last year was 120-thousand dollars compared to 125-thousand dollars in 1988.

Sources in Lebanon tell of new fighting between rival Shiite Moslem groups that left one person dead and eight people injured. Sources indicate that the pro-Iranian Hezbollah and pro-Syrian Amal militias exchanged rocket and heavy artillery fire in a bid to control the Tufah region in south Lebanon. The battle follows a three-day lull in the fighting after an Algerian-mediated cease-fire ended clashes in the area.

Relatives of an American airman who disappeared during World War Two say U-S officials indicate that the remains of the airman and eight others have been found in the jungles of New Guinea. Don Dorey of Camp Nelson,

California, says Defense Department officials told him the remains of his brother Robert and the other men were found in the wreckage of a B-24 first discovered by New Guinea natives in 1984. Dorey says military experts have made three expeditions to the remote crash site... the last time in 1987.

Another sign heralding the end of the cold war- this one in the form of golden arches familiar to fast-food-eating Americans. The world's biggest McDonalds opened today in Moscow, with tens of thousands of Soviets lining up for hamburgers, milkshakes and fries. All were served. Residents of 51 other countries feasted on Big Macs before they became a symbol of capitalism in the heart of the communist world.

#90031u2083 01/31/1990 ~United Press International

LOS ANGELES (FEB. 1) UPI - Defense giant Northrop Corp., in a move to cut its massive $1.2 billion debt, said Wednesday it sold its headquarters complex and an electronics plant in two separate deals for more than $250 million cash.

Proceeds from the sales will be applied to reduce Northrop's debt, which has grown in recent years as a result of its heavy investments in the B-2 Stealth Bomber and the Air Force Advanced Tactical Fighter.

Northrop had said last year that the two-building headquarters complex in the upscale Century City area of West Los Angeles and the Electronics Systems Division plant in Anaheim, Calif., were on the block.

Northrop did not disclose the price of each property, but analysts have said the headquarters complex - purchased by the California State Teachers' Retirement System - would be worth about $185 million.

Northrop sold the Anaheim facility to Taiyo Development U.S.A. of Torrance Calif., formerly Taiyo Investments U.S.A. Inc.

''I think Northrop has gotten a reasonable price,'' said Lawerence Harris, an analyst with Bateman Eichler, Hill Richards. ''The sale is positive news for Northrop, since their debt level is fairly serious.''

Northrop shareholders currently have equity of less than $900 million. Harris said Northrop's level of debt compared to equity is high but not unusual for a major defense contractor.

Analyst Michael Rosen of Smith Barney said the sales will give the company some breathing room while it discovers the fate of federal funding for the B-2 and the Advanced Tactical Fighter.

''The property sales are sort of a stop-gap measure for Northrop for the next year,'' Rosen said. ''But it's not a great situation to have that much debt.''

Northrop has invested about $1 billion in the B-2, the most expensive aircraft ever built, and the Air Force estimates the purchase of 132 B-2s would cost $68 billion.

Northrop and its key subcontractors have invested another $650 million in the Advanced Tactical Fighter. Northrop and Lockheed Corp. are leading teams to develop two prototypes of the plane for the Air Force as part of the $67 billion program .

The headquarters complex consists of a 15-story office building and a 19-story office building with 540,000 square feet of space. Northrop's corporate staff of about 300 employees will continue to occupy about seven floors of the taller building through a lease-back agreement.

The deal is expected to close next month.

The electronics plant, which employs 1,300 workers, went on the block last year after the company decided to consolidate its operations with facilities in nearby El Segundo and Hawthorne.

The facility produces missile test equipment and adavnced sensors for aircraft, helicopters and missiles.

Northrop said the facility will be vacated by the end of the year and the sale will be completed by next year. It said it will retain a machining operation in Anaheim as part of its Aircraft Division.

Northrop first announced at its annual meeting in May that it would consider selling properties and Harris said he expects the company to announce further asset sales from time to time.

Kent Kresa, Northrop's chief executive officer, confirmed earlier this year that the company may sell its corporate jet, but would not disclose other assets that may be on the block.

#90031u2117 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - The World Bank Wednesday said it will provide $2 billion in financing to Mexico to help the country reduce its $48 billion commercial bank debt. The bank also said it will lend $6.3 billion through 1992 to support Mexico's economic reform program.

The organization is joining an international effort to help Mexico reduce

its debt to commercial banks. The country's total debt is $100 billion, the developing world's second-largest after Brazil's $115 billion. The International Monetary Fund and Japan will provide additional resources to support Mexico's debt reduction.

The Mexican government and its Bank Advisory Committee were scheduled to sign a debt reduction pact Feb. 4 in Mexico City. Treasury Secretary Nicholas Brady and IMF Managing Director Michel Camdessus also will subscribe to the accord.

The World Bank's $2 billion in financing includes a $1.26 billion loan to finance collateral for interest payments on restructured debt. The $1.26 billion loan accounts for 20 percent of the bank's projected $6.3 billion lending in the July 1989-June 1991 period in support of Mexico's economic reforms.

The bank's $2 billion package for debt reduction also includes $750 million in funds set aside from six previously approved loans, which will help create collateral for discounted bonds to be issued by Mexico in the debt reduction operations.

Under Mexico's pact with its creditors, commercial banks had the option of lending Mexico new money, reducing debt principal by 35 percent or cutting interest payments by 35 percent in exchange for guarantees that Mexico would provide with IMF, World Bank and Japanese support.

The loans provided by the World Bank, IMF and Japan will be added to Mexico's own resources so that the Latin American nation can pledge over $7 billion in collateral for the principal or interest payments on the restructured debt. Part of the collateral will be an escrow account and part will be U.S. Treasury bonds. The debt restructuring will slash Mexico's net transfer to commercial banks by $4 billion a year from 1989 through 1994, the World Bank said.

WALTHAM, Mass. (FEB.1) UPI - Cabot Corp. said Wednesday it is forming a joint venture with a venture capital unit of Manufacturers Hanover Corp. that will combine two safety product makers in a new company.

The divisions to be combined are Cabot's E-A-R business, based in Indianapolis, and the AO Safety division of American Optical Corp. in Southbridge.

The new joint venture plans to acquire the assets of AO Safety for an undisclosed price, Cabot said.

Also, Cabot said it would contribute its E-A-R business to the joint venture and receive $100 million in cash, $30 million in securities and a significant minority interest in the as yet unnamed partnership.

No layoffs are expected, said Mario J. Cornacchio, a spokesman for Cabot.

''We anticipate to need all the people at the Indianapolis and Southbridge locations,'' he said. ''We think the business is going to grow.''

The Indianapolis plant employs about 500 people and the one in Southbridge has about 800 workers, Cornacchio said.

WASHINGTON (JAN. 31) UPI - President Bush will travel to California and Nebraska next week to tour defense facilities and also will attend GOP fundraisers in those two states and in Ohio, the White House announced Wednesday.

Announcing the Feb. 6-8 trip, the White House said Bush and his wife, Barbara, first would visit the National Training Center at Fort Irwin in Barstow, Calif., on Tuesday before attending an evening fund-raiser in Los Angeles for Sen. Pete Wilson, R-Calif., who is running for governor.

On Wednesday, the president was scheduled to address the Commonwealth Club in San Francisco, before heading to Omaha, Neb., where he will attend a breakfast for Gov. Kay Orr the next morning, tour the Strategic Air Command and then head to Columbus, Ohio, for an evening fund-raiser.

WASHINGTON (JAN. 31) UPI - The new non-communist leaders of Czechoslovakia and Poland have scheduled official visits to the United States, the White House announced Wednesday.

White House press secretary Marlin Fitzwater said Czech President Vaclav Havel will meet with President Bush on Feb. 20 at the White House and also visit New York for an unspecified schedule of meetings.

Fitzwater also said Polish Prime Minister Tadeusz Mazowiecki will make a similar visit to Washington in March.

#90031u2155 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - The dollar traded mostly lower Wednesday in New

York after Soviet leader Mikhail Gorbachev scotched a rumor that he would resign his leadership of the country's communist party, and the currency settled into a narrow price range awaiting its next cue.

The Gorbachev rumor which roiled New York markets the previous day, sending the dollar sky-high against other currencies, was almost entirely discounted by players who nonetheless remained wary. Earlier in Moscow, Gorbachev and a Soviet government spokesman denied he would leave.

''People are going to be cautious,'' said Morris Armstrong, a vice president of the Girozentrale Vienna bank in New York. ''It is now known what will happen if he leaves,'' he said, referring to Tuesday's chaos.

Late in the New York trading session the dollar was quoted at 1.6840 German marks, off from 1.6990 late the day before. The dollar also eased against the Japanese currency, trading at 144.42 yen against 145.15.

As the Gorbachev effect faded, the dollar surrendered some gains from the day before. But when participants tried to bring the U.S. currency below the 1.68 mark level the downward trend stalled, Armstrong said.

The foreign exchange market was unimpressed by U.S. Commerce Department data showing leading economic indicators up 0.8 percent in December for a 1989 gain of 0.4 percent. Economists saw this as encouraging because they had been expecting a monthly gain of just 0.5 percent.

But the market has already written off the possibility of the Federal Reserve Board bringing down interest rates any time soon. So it didn't really need any reassurance on the Fed's no-easing-for-now policy, said economist Jim Merrill of McCarthy, Crisanti & Maffei in New York.

Traders were looking to President Bush and his State of the Union speech for clues to the dollar's next move. He was expected to propose deeper U.S.-Soviet troop cuts in Europe than those under negotiation.

In New York the British pound rose to $1.6795 from $1.6675.

Other dollar rates: 1.50 Swiss francs, off from 1.5030; 5.7190 French francs, down from 5.7725; and 1,251.25 Italian lire, off from 1,263.50.

In Europe the dollar was lifted by the Gorbachev resignation rumor despite a strong disclaimer by the Soviet leader and a spokesman. It rose in Frankfurt to 1.6885 German marks against 1.6780, and also moved up in Zurich trading to 1.4970 Swiss francs compared with 1.4880.

The dollar gained as well in Paris, Brussels and Milan to finish at 5.7160 French francs against 5.7000, 35.23 Belgian francs against 35.05 and 1,253 Italian lire against 1,248.50.

In London, the pound eased to $1.6805 against $1.6810.

Republic National Bank in New York closed cash gold at $412.50 an ounce, off from $418 Tuesday. The New York Commodity Exchange settled gold at $412.40 an ounce, down from $418.10. In Zurich gold eased to $415.50 an ounce from $417.50, and in London it fell to $412.75 an ounce from $419.

Gold prices were depressed by a U.S. Treasury proposal that some 3.1 million ounces of gold held by the International Monetary Fund, worth about $1.2 billion, be sold to defray debtor nations' arrears. Fifteen IMF nations are $4 billion in arrears on payments to the institution.

Republic closed cash silver at $5.205 an ounce, off from $5.23. Comex spot silver declined to $5.194 from $5.207. Zurich silver closed lower at $5.20 an ounce against $5.25. London silver fell to $5.20 an ounce from $5.23.

#90031u2168 01/31/1990 ~United Press International

DETROIT (JAN. 31) UPI - The National Highway Traffic Safety Administration proposed Wednesday that corporate average fuel economy (CAFE) standards for light-duty trucks be set between 20.2 and 21.0 mpg, starting with the 1992-model year.

The government agency also proposed that CAFE standards for pickup trucks, vans and sport utility vehicles rise to 22 mpg for the 1994-model year.

The agency previously established CAFE standards of 20 mpg for the 1990-model year and 20.2 mpg for the 1991-model year.

NHTSA also announced plans to discontinue the alternative standards for separate two-wheel-drive and four-wheel-drive fleets, since nearly all manufacturers have opted for the combined fleet standard.

Under federal law, NHTSA must set CAFE standards for light trucks each year and provide vehicle manufacturers at least 18 months notice before the model year begins.

Both General Motors Corp. and Chrysler Corp., which will meet this year's fuel economy levels, expressed concern over the CAFE rulings in general. They said they are studying the proposal to respond within the 30-day comment period now in effect.

''But we hope the government keeps in mind that ours is a market-driven economy,'' Chrysler spokesman John Guiniven said. ''With gasoline at such low prices in the United States, consumers are placing more priority on the utility of a light truck than on fuel economy.''

Ford Motor Co. had no immediate comment.

About a third of all U.S. vehicle sales fall into the light truck category as buyers choose them over passenger cars.

Automakers, allowed to carry unused CAFE credits from other model years, currently must meet a 27.5 mpg standard for their 1990-model U.S. car sales or pay civil fines.

''We have taken a careful look at the manufacturers' fuel economy capabilities and have analyzed their current porjections and underlying product plans,'' NHTSA Administrator Jerry Curry said.

NHTSA will write a final ruling on the new CAFE standards after the 30-day comment period.

The first CAFE standards for cars were set at 18.0 mpg for 1978, largely as a measure to conserve fuel. CAFE standards for light trucks were set one year later, with a combined average of 17.2 mpg.

Earlier this month, NHTSA asked automakers to extend the current requirements for passive safety restraints like automatic seat belts or air bags in cars to light trucks under a program to be phased in starting with the 1994-model year.

In December, it asked that automakers extend the current side door strength standards - in effect for cars since 1973 - to all light trucks beginning with the 1993-model year.

#90031u2192 01/31/1990 ~United Press International

TORONTO (FEB. 1) UPI - Noranda Forest Inc. Wednesday reported fourth-quarter earnings of $23 million, or 19 cents a share, down 57 percent from $54 million, or 51 cents a share, in the same 1988 quarter.

Revenues in the fourth quarter edged upward to $1.06 billion from $986 million in the 1988 period.

For the year, Noranda Forest reported earnings of $161 million, or $1.46 a share, down from $224 million, or $2.14 a share, in 1988. Revenues inched up to $4.2 billion from $4.05 billion in 1988.

Noranda Forest said its fourth-quarter results were depressed by continued high Canadian interest rates and the strength of the Canadian dollar on foreign exchange markets.

Also, weak markets in newsprint extended to other paper grades and cut into earnings, the company said.

Noranda Forest, a subsidiary of diversified natural resource giant Noranda Inc., operates pulp and paper and panelboard mills, sawmills and paperboard plants in Canada, the United States and Scotland.

The Toronto-based company's principal subsidiaries include James Maclaren Industries Ltd. and Fraser Inc.. Noranda Forest has a 50 percent interest in Island Paper Mills, MacMillan Bloedel Ltd. and Northwood Pulp and Timber Ltd.

#90031u2246 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - The farm price index, showing the effects of the Christmas freeze in Florida and higher cattle and broiler chicken

prices, is up 2.7 percent this month, the government said Wednesday.

It was the fourth month in a row the index has risen. The index measures the prices farmers are paid for their crops and livestock. With a measurement of 153, the index was four points higher than one year ago.

''Tomato prices more than doubled due to short supplies brought on by the freeze in Florida in December. Lettuce prices were nearly double for the same reason,'' the Agriculture Department said, describing a 68 percent rise in its index of commercial vegetable prices.

Broiler chicken prices were up 2.1 cents from last month for an average of 30.7 cents a pound. Cattle prices rose 60 cents to average $70.60 per 100 pounds. Wheat was up 3 cents from December to average $3.83 a bushel.

The increased prices were offset partially by lower prices for soybeans, strawberries, oranges, hogs and corn.

At $2.26 a bushel, corn prices were down 1 cent a bushel from last month. Soybeans were down 12 cents for an average of $5.52 a bushel. Hog prices dropped $2.10 per hundredweight to average $46.90 this month.

Milk prices, which surged last fall due to healthy demand for milk and an unexpected slump in output, was unchanged this month from its December average of $16.10 per 100 pounds.

#90031u2275 01/31/1990 ~United Press International

(JAN. 31) UPI - The White House says President Bush called Mikhail Gorbachev today to talk about arms control in advance of Secretary of State Baker's trip to Moscow. Spokesman Marlin Fitzwater says there were NO direct references to rumors about Gorbachev's future during the conversation. The Soviet president earlier denied a report that he's considering stepping down as head of the Communist Party.

Medical sources in Poland say Cardinal Jozef Glemp is ''seriously ill'' after emergency surgery for massive bleeding in his digestive system. A medical source says Glemp spent a critical night in the hospital and his condition ''is far from stable''. The official news agency says Glemp is ''seriously ill'' and the best Polish doctors are taking care of him. Glemp has headed the Roman Catholic Church in Poland since 1981.

Doctors in London say they ventured into uncharted territory in performing heart surgery on a fetus still inside his mother's womb. The baby boy remains seriously ill following his premature birth earlier this month. Doctors say the infant underwent two separate operations in December to fix a heart defect that would have proved fatal if NOT corrected.

The British coast guard says 285 people may have to be evacuated from a ferry drifting in gale-force winds in the Irish Sea. The vessel's engine room was damaged by a fire that was quickly doused... but left the ferry floundering. The passengers and crew may be taken off the ferry by helicopter, and a tugboat is standing by in the waters 370 miles northeast of London.

#90031u2291 01/31/1990 ~United Press International

BINGHAMTON, NY (JAN. 31) UPI - Operation Rescue, the militant anti-abortion group whose members barricaded hundreds of Planned Parenthood offices across the country, announced Wednesday that it is closing its national headquarters.

Kathy Robinson, an Operation Rescue spokeswoman, said the group's founder Randall Terry, 30, of Binghamton, made the decision to shut down the headquarters and cut staff from 18 to one.

''The national office, as it has existed, will be closed,'' Robinson said. ''We will be concentrating on strengthening the local movements in the various cities throughout the United States.''

Terry returned Wednesday to upstate New York after spending nearly four months at a work camp near Atlanta for organizing anti-abortion demonstrations in July 1988 at the time of the Democratic National Convention.

He was freed Tuesday by an anonymous donor and promptly headed to Washington to address religious broadcasters.

The announcement prompted a prominent abortion rights advocacy group to immediately claim victory in the battle over abortion.

''Now it is clear that Operation Rescue is financially as well as morally bankrupt,'' said Kate Michelman, executive director of the National Abortion Rights Action League. ''This office closing is another sign of the increasing public repudiation of anti-choice extremists.''

Robinson said the decision to close Operation Rescue headquarters was made in part because the group had become the target of many lawsuits filed by groups opposed to its demonstrations outside Planned Parenthood and other health clinics.

''It was (Terry's) decision to do this at this time ... so we wouldn't be such an obvious target for lawsuits that are coming this way,'' Robinson said. ''Randy still has work to do. We all have work to do. We'll be just

doing what we can to strengthen the local rescue communities.''

Michelman called Terry a ''bully'' and said Operation Rescue ''terrorizes women in crisis pregnancies, and the closing of his headquarters is evidence of how morally repugnant the public finds his activities.''

Operation Rescue spokeswoman Mary Ann Baney said Terry was released from Fulton County's jail in Georgia after a donor paid his $2,000 fine.

Terry was convicted last October of criminal trespass and unlawful assembly for blocking the entrance to an Atlanta women's clinic in 1988. He was fined $2,000 and sentenced to two years in jail.

Fulton County Court Judge John Bruner said Terry could forgo the jail time if he would pay the $2,000, but Terry refused on what he called moral grounds.

Baney said Terry did not say why he reversed himself and allowed the fine to be paid.

#90031u2337 01/31/1990 ~United Press International

(JAN. 31) UPI - The United States has asked Mexico to board and search a ship believed to be a Cuban freighter that was chased and fired on by a U-S Coast Guard cutter. A Coast Guard spokesman says the cutter chased the 250-foot freighter Hermann in international waters yesterday morning after receiving permission from Panama to board the vessel. The freighter was flying a Panamanian flag. The ship refused to stop this morning- even after warning shots were fired across its bow- and it fled into Mexican territorial waters.

The leader of Haiti's largest opposition group asked Haitians to mobilize against the ruling military government. In a radio broadcast from a secret hide-out, Sylvio Claude asked the international community to help the Haiti fight tryranny. Claude and key opposition leaders went into hiding last week when General Prosper Avril announced a state of siege and arrested some opposition politicians. Avril lifted the state of siege on Monday.

Police say the ex-governor of Guam apparently committed suicide hours before he was scheduled to fly to California to begin serving a three-year jail term for corruption. Highway workers told police that Ricardo Bordallo wrapped himself in Guam's flag, chained himself to a statute on a main road, and shot himself in the head. Bordolla was convicted of extorting campaign funds and witness tampering while governor of the U-S territory in the South Pacific.

#90031u2352 01/31/1990 ~United Press International
WASHINGTON (JAN. 31) UPI - President Bush's proposal to negotiate U.S. and Soviet troop strength in Europe significantly below current levels won prompt and bipartisan praise in Congress Wednesday as an overdue move that can benefit both superpowers.

The move, which brought prompt calls for deeper cuts in the Pentagon's $307 billion budget for 1991, could ease pressure both on the defense budget and on Moscow, which is facing a rising tide of democracy in its Warsaw pact allies.The proposal would aim to get U.S. and Soviet forces down to to 195,000 in Central Europe.

''I am delighted and hope this will lead to even greater reductions in the near future,'' said Sen. Claiborne Pell, D-R.I., chairman of the Senate Foreign Relations Committee, which passes initial judgment on treaties for the Senate.

Pell was told in advance of Bush's State of the Union proposal of the change in the proposal for European troop strength by Secretary of State James Baker, who will detail the idea futher Thursday morning before Pell's committee.

Defense Secretary Dick Cheney likewise was expected to discuss the matter Thursday morning when he and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, appear before the Senate Armed Servcies Commitee

Sen. Richard Lugar, R-Ind., a senior Republican on Pell's Committee, said that Bush ''now sees new opportunities to negotiate with the Soviet Union on substantial troop withdrawal from Central Europe and to guarantee that newly found political and economic freedom in Eastern Europe will not be reversed.''

Lugar sadded, ''The American people overwhelmingly approve of his ideas, his style, and they will applaud his goals for education, the environment and drug contrnate Democratic leader Alan Cranston of California, who wants to kill the B-2 stealth bomber program, said, ''This is a good proposal and I'm all for it.''

''But in view of the reduced threat from the Soviet Union and the Warsaw Pact nations, we should go beyond mere reciprocity in reducing our military spending.'' said Cranston.

Cranston - aware of domestic pressures to curb military spending and the Pentagon's move to save money by closing bases both in Europe and the United States - said the United States should cut its spending based on its own evaluation of defense needs, not just in response to Soviet issues.

What money is saved, he said, should be directed to education, health, housing, the environment and crime and the drug war.

Chairman Les Aspin, D-Wis., of the House Armed Services Committee, a student of the arms control process, said negotiating lower limits on forces in Europe ''is clearly a good idea. The president should be congratulated.''

Aspin said the proposal brings the U.S. position in the Vienna talks on reducing conventional forces in Europe ''more in line with the reality of what is happening in Eastern Europe and what is likely to happen with defense budgets in the United States.''

But Aspin injected one note of caution, saying, ''We should be careful in this whole process not to give the Soviet Union a reason to keep more troops in Eastern Europe than it would without an agreement. For both sides, it should be a ceiling, not a floor.''

Moscow, which has its own domestic economic troubles, is starting to get pressure from its Warsaw Pact allies to return Soviet troops to Soviet soil.

''This is a very constructive step. I hope it is a sign that the administration is also prepared to take bolder steps than we have seen so far in other areas of military spending,'' said Sen. Edward Kennedy, D-Mass., a member of the Armed Services Committee.

''Certainly the defense budget they sent to Congress earlier this week is a major disappointment and a major missed opportunity. If we can cut troops significantly in Europe we can also make signficnat cuts in 'Star Wars,' MX missiles and B-2 bombers,'' said Kennedy.

Rep. William Broomfield, R-Mich., the senior Republican on the House Foreign Affairs Committee, cautioned against ''overnight cuts in the military'' and said that for 40 years U.S. arms ''have maintained world peace. This is not time to lay them down.'' But he also said he was confident Bush would ''say 'yes' to gradual defense reductions. ... Everyone knows the world is changing, but no one knows where the changes are leading.

#90031u2354 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - NBA Commissioner David Stern Wednesday denied the Chicago Bulls' protest of their Jan. 15 loss to the New York Knicks, saying the referees showed poor judgment but did not misapply the rules.

The Bulls claimed the Knicks' Trent Tucker could not have made a shot with one-tenth of a second left in the game. Tucker made the 3-pointer after taking an inbounds pass from Mark Jackson, giving the Knicks a 109-106 triumph.

''The question before me is not whether Tucker received Jackson's pass and released his shot within one-tenth of a second - plainly he did not,'' Stern said in his statement.

''The question presented by Chicago's protest, rather, is whether the referees' failure to disallow Tucker's shot constitutes a sufficient basis for overturning the result of the game. The NBA has consistently denied protests based on errors in judgment by the game officials.''

Stern went on:

''The unfortunate irony of this case, of course, is that the league implemented the tenths-of-a-second clock to assist the referees in officiating exactly the type of split-second, end-of-game sequence which occurred here.

''And although the new clocks have otherwise served their intended purpose here, because of the error by the officials, the clock had the unintended effect of highlighting an injustice to Chicago which would have otherwise occurred without notice under the 'old' system.

''Last season the clock would have shown one second, the field goal would have counted and we would have had to assume there had been up to nine-tenths of a second remaining in the game, instead of merely one-tenth of a second.''

Jerry Krause, the Bulls vice president of basketball operations responded: ''We believed we had a meritorious case, and the commissioner didn't, thus the matter is closed.''

To avoid such situations in the future, Stern has directed referees to allow only tip-ins or alley-oops with when there is less than three-tenths of a second showing on game clocks.

The last time a protest was allowed was Nov. 30, 1982 when the leauge decided a misapplication of a rule involving a double lane violation during a free throw affected San Antonio's opportunity to beat the Los Angeles Lakers.

#90031u2388 01/31/1990 ~United Press International

CHERRYVILLE, N.C. (JAN. 31) UPI - Carolina Freight Corp. said Wednesday it

lost $3.5 million in the fourth quarter, compared with earnings of $5.1 million in the same period a year ago.

Revenues rose to $211.3 million from $207.3 million in 1988.

For the year ended Dec. 31, earnings were $1.1 million, compared with $10 million in 1988. Revenues rose to $670.4 million from $650.2 million in 1988.

Kenneth E. Mayhew Jr., president and chief executive officer of Carolina Freight, said an after-tax adjustment to self-insurance reserves of $3 million contributed to the fourth-quarter loss.

Mayhew also cited a 4 percent drop in freight prices in three of the company's three carriers and higher pay rates, employee benefits costs and fuel prices.

#90031u2408 01/31/1990 ~United Press International

NEWTON, Mass. (FEB. 1) UPI - Four times as many U.S. makers of electronic components cut inventories as increased them in January, suggesting the industry is stuck in a slowdown with no sign of recovery, a report released Wednesday said.

Fully half of those surveyed said they trimmed inventories in January, up from 46 percent in December, said Electronic Purchasing magazine.

In contrast, the number of manufacturers adding to inventories plunged to only 12 percent in January from 23 percent in December, the magazine said in its February issue due out next week.

''It means times of weak orders for all makers of components out there,'' said John Kerr, chief editor of the trade publication.

Purchasing agents reported that their factories have been running at 80 to 81 percent of capacity since fall, the magazine said. Meanwhile, almost a quarter of those polled expect to reduce their orders from current levels and nearly half expect to keep them steady.

The magazine surveys a random sample of 500 buyers nationwide each month, Kerr said.

#90031u2469 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - Anybody out there who's tired of all that garbage on television can turn to Children's Television Workshop for a new

experience in trash TV.

It's ''The Rotten Truth: A 3-2-1 Extra,'' a half-hour special to air on PBS Sunday, Feb. 4 (check local listings).

CTW's ''3-2-1 Contact,'' a science and technology series aimed at 8-to-12-year-olds now in its 10th season, has devised a special to get kids - and their parents - interested in the problems of garbage.

The show is a fast-moving, fact-filled but humorous half-hour look at the growing waste disposal problem in the United States.

The show starts out with its hostess, Stephanie Yu, a ''3-2-1'' regular, showing a group of kids around the Museum of Modern Science. There are three displays. The first has a plastic bag, a banana peel and a pair of socks. The second consists of a newspaper, a leather purse and a disposable diaper. The third is made up of a wooden chair, a glass container and the real Statue of Liberty.

Stephanie's question - how long will it take these items to disintegrate. The banana peel will be gone in a two to five weeks, the newspaper in less than a year, the Statue of Liberty in 1,500 years.

But the diaper will be around for 300 to 500 years and the glass container for 1 million years.

The problem, as Stephanie explains it to a magician named Svengali (''Call me Sven'') is, ''You can't make something into nothing.''

What we can do with our garbage is store it in landfills, incinerate it, recycle it and reduce it.

The show has some graphic scenes of vast landfills, explaining how they work and that they cause problems because toxic wastes from them can leach into our water, because they are sealed and thus even biodegradable items such as newspapers can be readable after five years, and because they fill up and no one wants new ones in their own backyard.

Incineration is an imperfect method of disposal because some toxic gases may escape into the atmosphere.

The answer is to imitate nature where possible and recycle some of the fast action photography of fruits and an animal biodegrading are graphic and slightly revolting and reduce the amount of garbage we produce.

How much is that? The average family of four, the show says produces 100 pounds of garbage a week.

''The Rotten Truth'' is an amusing look at a serious problem, which CTW has proved in the past is a good way to grab its audience's attention.

#90031u2509 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - The text of President Bush's State of the Union address Wednesday:

Mr. President, Mr. Speaker, members of the United States Congress: I return as a former president of the Senate and former member of this great House. Now, as president, it is my privilege to report to you on the State of the Union.

Tonight, I come not to speak about the ''state of the government'' - not to detail every new initiative we plan for the coming year, nor to describe every line item in the budget.

I'm here to speak to you and to the American people about the State of the Union - about our world - the changes we've seen, the challenges we face. And what that means for America. There are singular moments in history - dates that divide all that goes before from all that comes after. Many of us in this chamber have lived much of our lives in a world whose fundamental features were defined in 1945. The events of that year decreed the shape of nations, the pace of progress, freedom or oppression for millions of people around the world.

1945 provided the common frame of reference - the compass points of the post-war era we've relied upon to understand ourselves. That was our world. Until now. The events of the year just ended - the revolution of '89 - have been a chain reaction - change so striking that it marks the beginning of a new era in the world's affairs.

Think back, just twelve short months ago, to the world we knew as 1989 began.

One year ago, the people of Panama lived in fear, under the thumb of a dictator. Today, democracy is restored. Panama is free.

Operation ''Just Cause'' has achieved its objective. The number of military personnel in Panama is now close to what it was before the operation began. And tonight, I am announcing that - well before the end of February - the additional numbers of American troops - the brave men and women of our armed forces who made this mission a success - will be back home.

A year ago in Poland, Lech Walesa declared that he was ready to open a dialogue with the communist rulers of that country. Today, with the future

of a free Poland in their own hands, members of Solidarity lead the Polish government.

A year ago, freedom's playwright, Vaclav Havel, languished as a prisoner in Prague. Today, it's Vaclav Havel - president of Czechoslovakia.

And one year ago, Erich Honecker of East Germany claimed history as his guide. He predicted the Berlin Wall would last another hundred years. Today - less than one year later - it's the Wall that's history.

Remarkable events - events that fulfill the long held hopes of the American people. Events that validate the long-standing goals of American policy - a policy based on a single, shining principle: the cause of freedom.

America - not just the nation - but an idea, alive in the minds of people everywhere. As this new world takes shape, America stands at the center of a widening circle of freedom - today, tomorrow and into the next century.

Our nation is the enduring dream of every immigrant who ever set foot on these shores - and the millions still struggling to be free. This nation - this idea called America - was and always will be - a new world. Our new world.

At a workers' rally - in a place called Branik on the outskirts of Prague - the idea called America is alive. A worker, dressed in grimy overalls, rises to speak at the factory gates. He begins his speech to his fellow citizens with these words - words of a distant revolution:

''We hold these truths to be self-evident. That all men are created equal, that they are endowed by their creator with certain unalienable rights, (and) that among these are life, liberty and the pursuit of happiness.''

It's no secret that, here at home, freedom's door opened long ago. The cornerstones of this free society have already been set in place: Democracy. Competition. Opportunity. Private investment. Stewardship. And of course, leadership.

Our challenge today is to take this democratic system or ours - a system second to none - and make it better.

A better America, where there's a job for everyone who wants one.

Where women working outside the home can be confident their children are in safe and loving care - and where government works to expand child care alternatives for parents.

Where we reconcile the needs of a clean environment and a strong economy.

Where ''Made in the U.S.A.'' is recognized around the world as the symbol of quality and progress.

Where every one of us enjoys the same opportunities to live, to work, and to contribute to society. And where, for the first time, the American mainstream includes all of our disabled citizens.

Where everyone has a roof over his head, and where the homeless get the help they need to live in dignity.

Where our schools challenge and support our kids and our teachers, and where all of them make the grade.

Where every street, every city, every school and every child is drug free.

And finally, where no American is forgotten. Our hearts go out to our hostages - our hostages who are ceaselessly on our minds and in our efforts.

That's part of the future we want to see - the future we can make for ourselves. But dreams alone won't get us there. We need to extend our horizon - commit to the long view. Our plans for the future start today.

In the tough competitive markets around, America faces great challenges and great opportunities. We know that we can succeed in the global economic arena of the 90s, but to meet that challenge we must make some fundamental changes - some crucial investments in ourselves.

Yes - we are going to invest in America. This administration is determined to encourage the creation of capital - capital of all kinds. Physical capital: Everything, from our farms and factories to our workshops and production lines, all that is needed to produce and deliver quality goods and quality services. Intellectual capital: The source of ideas that spark tomorrow's products. And, of course, our human capital: The talented workforce we'll need to compete in the global market.

And let me tell you: If we ignore human capital, we lose the spirit of American ingenuity, the spirit that is the hallmark of the American worker. And the American worker is the most productive worker in the world.

We need to save more - expand the pool of capital for the new investments that mean more jobs, more growth. That's the idea behind a new initiative I call the Family Savings Plan, which I will send to Congress tomorrow.

We need to cut the tax on capital gains - encourage risk-takers - especially those in our small businesses - to take those steps that translate into economic reward, jobs, and a better life for all of us.

We'll do what it takes to invest in America's future. The budget commitment is there. The money is there. It's there for research and development, R&D - a record high. It's there for our housing initiative - HOPE, to help everyone from first-time homebuyers to the homeless. The money's there to keep our kids drug free: 70 percent more than when I took office in 1989. It's there for space exploration - and it's there for education: another record high.

And one more thing: Last fall at the education summit, the governors and I agreed to look for ways to help make sure kids are ready to learn - the very first day they walk into that classroom. I've made good on that commitment - by proposing a record increase in funds - an extra half a billion dollars - for something near and dear to all of us: Head Start.

Education is the one investment that means more for our future because it means the most for our children. Real improvement in our schools is not simply a matter of spending more. It is a matter of asking more - expecting more - of our schools, our teachers, of our kids, and our parents and ourselves. That's why tonight I am announcing America's education goals - goals developed with the nation's governors:

-By the year 2000, every child must start school ready to learn.

-The United States must increase the high school graduation rate to no less that 90 percent.

-And we're going to make sure our schools' diplomas mean something: In critical subjects - at the 4th, 8th, and 12th grades - we must assess our students' performance.

-By the year 2000, U.S. students must be first in the world in math and science achievement.

-Every American adult must be a literate worker and citizen.

- Every school must offer the kind of disciplined environment that makes it possible for our kids to learn - and every school in American must be drug free.

Ambitious aims? Of course. Easy to do? Far from it. But the future's at stake. This nation will not accept anything less than excellence in education.

These investments will keep America competitive. And I know this about the American people: We welcome competion. We'll match our ingenuity and energy - our experience and technology - our spirit and enterprise - against anyone. Let the competition be free - but let it be fair. America

is ready.

Since we relly mean it - and since we are serious about being ready to meet that challenge - we're getting our own house in order. We've made real progress. Seven years ago, the federal deficit was 6 percent of our gross national product. In the new budget I sent up two days ago, the deficit is down to 1 percent of GNP.

That budget brings federal spending under control. It meets the Gramm-Rudman target, brings that deficit down further, and balances the budget by 1993 - with no new taxes.

And let me tell you, there's still more than enough federal spending. For most of us, $1.2 trillion is a lot of money.

And once the budget is balanced, we can operate the way every family must when it has bills to pay. We won't leave it to our children and grandchildren. We will start paying off the national debt.

And there's something more we owe our generations of the future: stewardship - the safekeeping of America's precious environmental inheritance.

As just one sign of how serious we are, we will elevate the Environmental Protection Agency to Cabinet rank. Not more bureaucracy, not more red tape - but the certainty that here at home, and in our dealings with other nations, environmental issues have the status they deserve.

This year's budget provides over $2 billion in new spending to protect our environment, with over $1 billion for global change research. And a new initiative I call ''America the Beautiful'' - to expand our national parks and wildlife preserves and improve recreational facilities on public lands.

And something else: something that will help keep this country clean, from our forestland to our inner cities, and keep America beautiful for generations to come - the money to plant a billion trees a year.

And tonight, let me say again to all the members of Congress: the American people did not send us here to bicker. There's work to do - and they sent us here to get it done. And once again, I offer my hand to all of you. Let's work together to do the will of the people. Clean air. Child care. The educational excellence act. Crime and drugs. It's time to act. The farm bill. Transportaiton policy. Product liability reform. Enterprise zones. It's time to act together.

And there's one thing I hope we'll all be able to agree on. It's about our commitments. I'm talking about Social Security.

To every American out there on Social Security, to every American supporting that system today, and to everyone counting on it when they retire: We made a promise to you - and we are going to keep it.

We rescued the system in 1983 - and it's sound again. Our budget fully funds today's benefits - and it assures that future benefits will be funded as well. The last thing we need to do is mess around with Social Security.

There's one more problem we need to address. We must give careful consideration to the recommendations of the health care studies now under way. That's why tonight I am instructing Dr. Louis Sullivan, secretary of health and human services, to lead a Domestic Policy Council review of recommendations on the quality, accessibility and cost of our nation's health care system. I am committed to bring the staggering costs of health care under control.

The ''state of the government'' does indeed depend on many of us in this very chamber. But the State of the Union depends on all Americans. We must maintain the democratic decency that makes a nation out of millions of individuals. I have been appalled at the recent mail bombings across this country. Every one of us must confront and condemn racism, anti-semitism, bigotry and hate. Not next week, not tomorrow, but right now.

The State of the Union depends on whether we help our neighbor - claim the problem of our community as our own. We've got to step forward when there's trouble - lend a hand, be what I call a point of light to a stranger in need. We've got to take the time after a busy day to sit down and read with our kids, help them with their homework, and pass along the values we learned as children. That's how we sustain the State of the Union.

Every effort is important. It all adds up - it's doing the things that give democracy meaning. It all adds up to who we are - and who we will be.

And let me say, that so long as we remember the American idea - so long as we live up to the American ideal - the State of the Union will remain sound and strong.

And to those who worry we have lost our way - well, I want you to listen to parts of a letter written by James Markwell - Pfc. James Markwell, a 20-year-old Army medic of the 1st Battalion, 75th Rangers. It's dated December 18th - the night before our Armed Forces went into action in Panama. It's a letter servicemen write - and hope will never be sent. Sadly Private Markwell's mother did receive the letter. And she passed it on to me.

Here is some of what he wrote: ''I have never been afraid of death, but

now he is waiting in the corner. ... I have been trained to kill and to save, so has everyone else. I am frightened of what lays beyond the fog, yet ... do not mourn for me, revel in the life that I have died to give you. ... But most of all, don't forget that the Army was my choice. Something that I wanted to do.

''Remember I joined the Army to serve my country and insure that you are free to do what you want and live your lives freely.''

Private Markwell was among the first to see battle in Panama, and one of the first to fall.

He knew what he believed in. He carried the idea we call America in his heart.

(FEB. 1) UPI - WEDNESDAY'S SPORTS TRANSACTIONS

BASEBALL

Chicago (NL) - Agreed to terms with pitcher Mike Bielecki on a 1-year contract.

Chicago (AL) - Agreed to terms with outfielder Daryl Boston on a 1-year contract.

Cleveland - Agreed to terms with outfielder Chris James on a 1-year contract.

Houston - Agreed to terms with pitcher Juan Agosto on a 1-year contract.

Los Angeles - First baseman-outfielder Franklin Stubbs agreed to a 1-year contract.

New York (AL) - Agreed to terms with pitcher Jimmy Jones on a 1-year contract.

Pittsburgh - Signed free-agent infielder Wally Backman to a 1-year contract.

Seattle - Agreed to terms with outfielder Henry Cotto on a 1-year contract.

Basketball

Charlotte - Fired Coach Dick Harter; named Gene Littles interim coach.

NBA - Denied Chicago's protest of its 109-106 loss to New York Jan. 15.

College

Florida - Running back Emmitt Smith announced he will pass up his final year of eligibility and apply for the NFL draft.

Susquehanna - Named Steve Briggs football coach.

Football

Denver - Running back Tony Dorsett announced his retirement.

Hockey

Hartford - Recalled right wing Jody Hull from Binghamton of the American Hockey League; assigned goaltender Kay Whitmore to Binghamton.

New York Islanders - Returned center Rob Dimaio to Springfield of the American Hockey League.

#90031u2515 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - Lawyers for John Gotti suggested Wednesday at the reputed Mafia leader's assault trial that it may have been internal union squabbling that led to the attack on a labor leader.

Gotti is accused of ordering the May 7, 1986, shooting of John O'Connor, business agent for Local 608 of the Carpenters Union, to retaliate for the trashing of a mob-linked restaurant built with non-union labor.

But defense lawyer Gerald Shargel, during cross-examination of Frank O'Hara, an investigator for the state Organized Crime Task Force, painted a picture of dissention within the ranks of the union. Shargel repeatedly asked O'Hara whether he realized there was ''bad blood'' between O'Connor and Paschal McGinness, the head of union's district council.

''Did you know that a week before (O'Connor) was shot there was a fistfight between O'Connor and McGinness?'' Shargel asked O'Hara.

''No,'' O'Hara replied.

Outside state Supreme Court in Manhattan, defense lawyer Bruce Cutler said his team is trying ''to suggest there is a veritable plethora of other people who may have (ordered the shooting.)''

Earlier Wednesday, Cutler accused Organized Crime Task Force investigator

Edward Wright of trying to ''read Mr. Gotti's mind'' by surmising that the reputed mob boss ordered the shooting of a union leader with the words ''bust him up.''

Bugging devices hidden at the Gotti's hangout, the Bergin Hunt and Fish Club in the city's borough of Queens, picked up a comment by the reputed head of the Gambino crime family in the winter of 1986: ''We're gonna, gonna bust him up.''

O'Connor was shot four times in the buttocks on May 7, 1986, as he entered the union headquarters.

Prosecutors say Gotti, 49, ordered the shooting because O'Connor arranged the trashing of a mob-linked restaurant that hired non-union labor.

Cutler asked Wright if by using the words ''bust him up,'' Gotti could have been referring to one of his alleged crime gangs?

''Do you know what was in Mr. Gotti's mind?'' Cutler asked.

''Yes,'' Wright replied.

Feigning shock, Cutler asked, ''You can read Mr. Gotti's mind? He's sitting right over there,'' the lawyer said, pointing to Gotti. ''What's on his mind?''

The middle-aged, grizzled investigator deadpanned, ''I wish I knew.''

Gotti and the rest of the courtroom burst into laughter.

Wright said that ''taken in the context of the whole conversation, I think it's fairly obvious what (Gotti) meant.''

Later, another defense lawyer, Gerald Shargel, grilled Wright on his changing interpretation of the tapes over the past four years. Wright acknowledged that he had to listen to some tapes at least 50 times before he was able to come up with a final transcript.

''Isn't it true that since the spring of 1986 you have been listening to these tapes, hoping to fit the tapes to the theory of your case?'' Shargel asked.

''No,'' Wright snapped.

#90031u2518 01/31/1990 ~United Press International

NEW YORK (JAN. 31) UPI - ''Murder in Mississippi'' tells the story of

three civil rights workers who were shot to death by a gang of police and Ku Klux Klansmen in 1964 - but it is as much about friendship as about death.

It is a tough, moving film that relatives of two of the dead men believe sets straight the distorted picture painted by the film ''Mississippi Burning.'' Coretta Scott King found it moving and realistic. It airs on NBC Monday, Feb. 5, 9-11 p.m. Eastern time.

Blair Underwood plays James Chaney and Tom Hulce is Mickey Schwerner, the two principal actors in this drama set amid ''Freedom Summer'' when young volunteers from the north traveled to Mississippi to help blacks register to vote.

The third victim, Andrew Goodman, 20, arrived on the scene late - just in time to die.

Schwerner, 24, a white social worker from New York, comes to Mississippi with his wife, where he meets Chaney, 21, a black man risking his life in the voter registration drive.

Their relationship begins in prickly fashion but blossoms as they grow to know and trust each other, as Ben Chaney, James's younger brother, explained in an interview at an advance screening of the film.

''I think this movie is a true representation of what took place in Mississippi,'' Chaney said. ''It's about the relationship between two people that was sort of shaky in the beginning and developed into a true, loving friendship - a friendship that epitomizes the relationship between the white people who came to the South and the blacks who lived in the South all the time.''

He said his brother often had to babysit him, so everywhere James went, 12-year-old Ben tagged along.

Chaney said black people in Mississippi had been risking their lives for years to secure their civil rights. His brother had been kicked out of high school for wearing an NAACP button. He was chased by police and Klansmen many times.

''My brother had been in the movement in Mississippi for a long while, and here's this white guy coming down who hasn't been on the battle line yet, who hasn't been out there.

''Mickey Schwerner had to prove himself. There was a lot of doubt about people who came south to help but at the first sign of danger or action, they ran back north. There was a lot of doubt whether or not he had staying power - and he proved that he did.''

Chaney calls ''Mississippi Burning'' a ''fraud'' that ''misrepresented history and the truth'' because it incorrectedly portrayed black people in Mississippi as ''passive, easily intimidated and not involved.''

As for the FBI role in the case, Chaney said, ''This movie shows that J. Edgar Hoover himself said the FBI was not a police organization and would not protect movement people.''

There is a film clip in ''Murder in Mississippi'' showing Hoover saying just that.

Dr. Carolyn Goodman, the mother of Andrew Goodman, agreed with Cheney, saying:

''I think the film is a portrayal of what happened in the summer of 1964 and it certainly shows one very important part of it - the tensions that had to be overcome between the blacks and whites before they could work together.

''I think it leaves room for another film to show young people what the volunteers were like, those hundreds and hundreds of volunteers. The film can't do everything. But in order to really motivate young people I think it's very important to let them know that there were kids from far away who just felt such an affinity to the important issues of the day.''

In the audience for the screening was Coretta Scott King, who said she was very touched by the film.

''How could you not be?'' she asked. ''How could you see someone - even someone you didn't agree with - how could you see someone shot down like those three young men were, three innocent young men, for no just reason, for no reason at all.''

In the scene in which the civil rights workers are shot after a harrowing chase through fog on the roads between Meridian and Philadelphia, Miss., the murderers first kill Schwerner and Goodman, then tell Chaney he can try to run for it. He does not and is killed.

''The men who actually committed the crime,'' she said, ''they hated the whites but they never thought that the black was their equal ... They felt he was probably a nice little fellow but these people corrupted him.''

Tom Hulce said in a later interview that the film was shot in Georgia, not in Mississippi. The central players did go to Meridian and Philadelphia for the ceremony memorializing the 25th anniversary of the killings, where people who had worked in the movement spoke about Chaney and Schwerner. It helped Hulce since the Schwerner family was not involved in the project.

''I talked with Ben a lot,'' he said, ''and tried to climb into the part by filling myself up with the same approach that Mickey had.

''He was cool, very cool. In his mid-20s he decided his life work would be to work for an integrated society. He went down to Mississippi where things were worst. He planned to come back to New York and put what he learned to use. He knew he was risking his life but he felt it was the right thing to do.''

#90031u2542 01/31/1990 ~United Press International

LOS ANGELES (JAN. 31) UPI - Six men, including a former director of the Mexican Federal Judicial Police, were indicted Wednesday in the 1985 torture-murder of U.S. drug agent Enrique Camarena in Mexico.

The federal indictments bring to 19 the number of people charged in a web of crimes surrounding the killing of Camarena, a Drug Enforcement Administration agent whose body was found buried in a shallow grave outside Guadalajara.

The most prominent figure among those newly charged with Camarena's murder is Manuel Ibarra-Herrera, the former director of the Mexican Federal Judicial Police, the Mexican law enforcement agency equivalent to the FBI.

Besides Ibarra, Miguel Aldana-Ibarra, the former director of Interpol in Mexico, and convicted drug kingpin Juan Ramon Matta-Ballesteros were indicted on charges related to Camarena's murder.

Two others charged were alleged drug trafficker Miguel Angel Felix-Gallardo and Dr. Humberto Alvarez-Machain, whom prosecutors contend was present during Camarena's long torture.

A sixth defendant, Antonio Vasquez-Ochoa, is charged with the murders of John Walker and Alberto Radelat, two U.S. tourists killed after being mistaken for drug agents the same year that Camarena and his pilot, Alfredo Zavala Avelar, were slain.

Matta, now serving a life sentence for his drug trafficking conviction in Los Angeles earlier this month, is the only one among the newly indicted defendants in custody, Assistant U.S. Attorney Manuel Medrano said. The others are believed to be in Mexico and are considered fugitives, he said.

Three other men, including prominent Mexican businessman Ruben Zuno-Arce, a brother-in-law of former Mexican president Luis Echeverria, alao are in custody and awaiting trial next month on charges of committing violent crimes in connection with the case.

So far, three men have been convicted and sentenced to prison after a 1988 trial in Los Angeles; two others have been convicted and sentenced to long prison terms in Mexico.

The statue of limitations for filing all but murder charges in connection with Camarena's death expires Feb. 7, and authorities had indicated Wednesday's indictments would be forthcoming.

Camarena, a special agent assigned to the DEA's office in Guadalajara, was tortured in an effort to make him reveal which drug traffickers and Mexican government officials were under investigation by the DEA. His investigations were believed to disrupt the flow of narcotics from Mexico and cost drug traffickers billions of dollars.

Camarena, 37, and Zavala were killed in a house outside Guadalajara on Feb. 7, 1985. Camarena was tortured more than 24 hours before he was finally killed with several blows to the head. Both men's bodies were found about a month later on a ranch 60 miles outside of Guadalajara.

The five defendants charged Wednesday with his murder also are accused of conspiracy, kidnapping and committing other violent crimes in aid of racketeering. If convicted, all five as well as Vasquez-Ochoa face a maximum term of life in prison.

The Camarena case has strained U.S.-Mexican relations, with DEA officials alleging foot-dragging by Mexican authorities. The killing was recently the subject of an NBC television miniseries, ''Drug Wars: The Camarena Story.''

WASHINGTON (JAN. 31) UPI - With election-year wrangling sparking the most heated partisan battles to date between President Bush and the Democrat-led Congress, Bush asked lawmakers Wednesday for a new truce, reminding them the ''American people didn't send us here to bicker.''

The Republican president, in his first State of the Union address, revived phrases from his inaugural speech of a year ago, symbolically offering his hand to his political opponents.

''And tonight, let me say again to all the members of Congress: The American people did not send us here to bicker. There's work to do and they sent us here to get it done,'' Bush said in the nationally televised speech delivered before a joint session of Congress in the House of Representatives.

''And once again, I offer my hand to all of you. Let's work together to do the will of the people,'' he added, ticking off a list of priority items such as clean air and child care legislation.

''It's time to act,'' he said. ''It's time to act together.''

Bush's plea came at a time relations between him and the Democrats who lead the House and Senate have become increasingly dominated by partisan fighting.

Democrats, frustrated by Bush's 80 percent approval rating, a postwar record, have tried several ways to punch a hole in his armor.

Last week, in the first days of the new congressional session, Democrats tried for a quick win by attempting to override Bush's veto of a bill involving Chinese students currently in the United States.

However, even though the bill sailed through Congress last year with virtually no opposition and a majority of the House and Senate wanted the legislagtion, Bush prevailed, convincing enough Republican senators to support him and sustain his veto.

Bush complained at the time that Democrats were pushing for the override because of ''crass politics'' and a desire to embarrass him. But he also conceded that he used bare-knuckle partisan politics to convince enough of the Republicans to support him out of personal loyalty.

The partisan bickering, expected to be especially noticeable this year because 34 senators and all 435 House members are up for election, was also extremely heated in the past two days when Democrats in both the House and Senate attacked Bush's 1991 budget proposal for being inadequate.

#90031u2647 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - President Bush leveled one of his most blunt attacks Wednesday against a Democratic plan to cut the Social Security tax arguing in his State of the Union address that ''the last thing we need to do is mess around with Social Security.''

Bush has been stung in recent weeks by a proposal from Sen. Daniel Moynihan, D-N.Y., who has suggested that the payroll tax be cut - a step that would give a tax break to mostly middle-class workers.

The trust fund that holds the money for Social Security is currently operating with a huge surplus and while the money is not supposed to be used for general federal programs, the government has been counting the surplus as a way to mask the true size of the federal deficit.

Moynihan has argued that his plan, by cutting the surplus, would force the government to cope with the deficit. But Bush and many Republicans have strongly opposed the idea and have argued that it could endanger the solvency of the Social Security system in years to come.

The president Wednesday used his nationally televised speech to argue that the idea is dangerous.

''There's one thing I hope we'll all be able to agree on. It's about our commitments,'' Bush said. ''I'm talking about Social Security.''

''To every American out there on Social Security, to every American supporting that system today, and to everyone counting on it when they retire: We made a promise to you - and we are going to keep it,'' the president said.

''We rescued the system in 1983 - and it's sound again. Our budget fully funds today's benefits and it assures that future benefits will be funded as well,'' he added. ''The last thing we need to do is mess around with Social Security.''

Moynihan's plan has not yet been endorsed by Democratic leaders, but the quick tax cut it would provide the middle class has political appeal to them, especially since they are trying to paint Bush as favoring the wealthy with his proposed capital gains tax cut.

The battle is, however, somewhat ironic because Democrats have traditionally tried to portray themselves as fighters for Social Security and have often attacked Republicans for trying to cut or freeze benefits. Bush, in his speech, was attempting to convince Americans that the Democratic plan was the one that could endanger the entire future of the Social Security system.

The president also used his speech to reiterate his support for the

capital gains cut, which would reduce tax rates on profits from the sale of items such as stocks and real estate held for more than a year.

A version of the plan last year had majority support in Congress but died in a Senate filibuster conducted by Democrats who argued it would give too much to the wealthy.

''We need to cut the tax on capital gains, encourage risk-takers - especially those in our small businesses - to take those steps that translate into economic reward, jobs and a better life for all of us,'' Bush said.

He also made a plug for his proposed Family Savings Plan, which would allow families who put away $5,000 for seven years to receive the interest tax free.

''We need to save more, expand the pool of capital for the new investments that mean more jobs, more growth,'' said Bush, who outlined the plan in his budget and planned to send the specific legislation to Capitol Hill Thursday.

#90031u2662 01/31/1990 ~United Press International
WASHINGTON (JAN. 31) UPI - Highlights of President Bush's State of the Union speech:

-Bush stressed the new changes in the world, especially the move to democracy in the communist bloc, and declared, ''America stands at the center of a widening circle of freedom - today, tomorrow and into the next century.''

-Declaring ''the time is right'' to reduce troops in Europe, Bush proposed a sharp reduction in the number of both Soviet and U.S. troops in Europe that would bring each side down to a level of 195,000.

-Saying the U.S. invasion of Panama has achieved its objective, Bush promised to have all U.S. troops who participated in the operation home by the end of February.

-While welcoming the period ''of great transition'' among communist nations, Bush argued the United States must continue to moderinize its strategic offensive weapons and press ahead with the ''Star Wars'' Strategic Defense Initiative.

-Bush outlined an ambitious set of education goals, including getting the high school graduation rate to 90 percent by the year 2000 and that American students are ''first in the world'' in math and science

achievement by that date.

-He endorsed making the Environmental Protection Agency a Cabinet-level department and urged support for his ''America the Beautiful'' initiative to expand the nation's national parks and wildlife preserves.

-Bush promisd a study of the nation's health care system, including quality, accessibility and cost and said he was ''committed to bring the staggering costs of health care under control.''

-Sharply criticizing Sen. Daniel Moynihan's proposal to cut Social Security payroll taxes, he said ''the last thing we need to do is mess around with Social Security.''

-Bush called on Congress once again to approve a cut in the capital gains tax, reducing profits from the sale of such items as stocks and bonds as a means of encouraging entrepreneurial risk-takers.

-Repeating his pledge daof ''no new taxes,'' Bush promised to balance the federal budget by 1993.''

#90031u2749 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - President Bush, declaring that ''Panama is free,'' pledged Wednesday that the extra troops sent into the country for the Dec. 20 invasion will be withdrawn no later than the end of February.

In his State of the Union address before a joint session of Congress, Bush for the first time set a deadline for withdrawal of the additional manpower he ordered to Panama to oust Gen. Manuel Noriega.

''One year ago, the people of Panama lived in fear, under the thumb of a dictator. Today, democracy is restored. Panama is free,'' he said to the applause of the legislators. ''Operation 'Just Cause' has achieved its objective.''

The promise, aimed at reassuring concerned leaders in Latin America and repairing damage caused by the U.S. intervention in Panama, came two days after Vice President Dan Quayle returned from a three-nation goodwill mission in the region where he had predicted the move by Bush would come sooner than later.

''The number of military personnel in Panama is now very close to what it was before the operation began,'' Bush said in promising to bring troops down to the pre-invasion level of 13,600.

''And tonight, I am announcing that - well before the end of February -

the additional numbers of American troops, the brave men and women of our armed forces who made this mission a success, will be back home.''

Bush, who with that pledge won a second round of applause from lawmakers who have generally supported his decision to send the troops in, also invoked the words of a young soldier killed in Panama to prove that American ideals remain ''strong and sound.''

''He knew what he believed in,'' Bush said of Army Pfc. James Markwell, 20 of Cincinnati. ''He carried the idea we call America in his heart.''

The Pentagon reported on Wednesday that there were 16,500 U.S. troops in Panama. Though there were 13,600 troops in the country when the invasion was actually ordered, only about 10,000 of them were permanently stationed there and the rest had been sent in gradually as the situation worsened.

Quayle, on the trip to Honduras, Panama and Jamaica, heard the overwhelming sentiment from hemispheric leaders that the U.S. troops must leave Panama promptly.

From Panama, however, where he offered Bush's proposal for a $1 billion economic aid package to help rebuild the nation's stricken economy, Quayle heard cries that a strong U.S. presence must be kept in the country and the contention that a newly reorganized police force was not yet ready to keep order.

Quayle also got the message that other countries will be slow to recognize the new democratic government of Panamanian President Guillermo Endara if the U.S. intervention continues, and heard further calls that the Panamanians be allowed to vote on whether they want the new government.

The vice president, however, maintained that the invasion had not harmed U.S. relations in the region and said he was sure other countries soon would fall into line in recognizing the government of Endara, who was widely considered the winner of Panamanian elections in May, the results of which were annulled by Noriega. Endara was installed during the U.S. invasion.

#90031u2785 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - Seeking to ''take the lead in forging peace,'' President Bush proposed sharper superpower troop cuts Wednesday night, spurring U.S. policy to catch up with the ''Revolution of '89'' that has changed the shape Europe.

In his first State of the Union address, delivered to a joint session of Congress and a nationwide broadcast audience, Bush offered to cut from

275,000 to 195,000 a troop limit now under negotiation in East-West talks in Vienna.

In a 36-minute speech that offered a optimistic assessment of the nation's well-being and role in world affairs, Bush portrayed the troop cut proposal as evidence of ''our new relationship with the Soviet Union'' and declared:

''Today, with communism crumbling, our aim must be to ensure democracy's advances, to take the lead in forging peace and freedom's best hope: a great and growing commonwealth of free nations.''

America, he said, ''stands at the center of a widening circle of freedom.''

Weclomed into the House chamber where he once served by hearty applause and handshakes, Bush was all smiles and enthusiasm. He greeted Vice President Dan Quayle and House Speaker Thomas Foley, D-Wash., on the speaker's stand and smiled up to his wife, Barbara, watching from the gallery.

Except for the troop proposal and an announcement that U.S. invasions forces would be out of Panama within four weeks, the address was largely philosophical - it emphasized education goals and environmental aspirations, concern for children and the nation's needy, rooting out crime and drugs, and guaranteeing a continued economic expansion.

The arms control overture, however, was timely, offering a benefit not only to the United States but also to Soviet President Mikhail Gorbachev, who Bush has supported in recent weeks in the face of ethnic unrest and internal dissension.

Bush renewed his inaugural pledge of cooperation with Congress, but also put the majority Democrats on notice that his ''no new taxes'' campaign pledge stands and renewed his call for a capital gains tax cut - one of the most bitterly contested issues of the last session of Congress.

The president was interrupted by applause about 30 times, winning a standing ovations for his arms proposal. Some of the loudest applause greeted his denunciation of recent hate-inspired mail bombings as Bush exhorted Americans to ''confront and condemn racism, anti-semitism, bigotry and hate - not next week, not tomorrow, but right now.''

Among the topics missing from the speech was China, where Bush's policy of renewing relations with Beijing despite the bloody suppression of pro-democracy students generated a bruising veto battle last week.

Likewise, the president did not mention several topics he has promoted in the past as worthy of constitutional amendments - abortion, school prayer,

a balanced budget, a line-item veto and protection of the flag.

At the outset of the address, Bush marveled at ''the Revolution of '89'' - the dramatic events he likened in impact to the end of World War II - ''change so striking that it marks the beginning of a new era in the world's affairs'' and produced a wave of freedom from Poland to Panama.

With a U.S.-backed government installed in Panama, Bush sought to repair Latin American resentment to the use of force that ousted Manuel Noriega in power by announcing U.S. invasion troops would be home ''before the end of February.''

The Pentagon reported earlier that 16,500 troops remained in Panama and would be withdrawn to the level of 13,600 stationed there before the invasion.

One year into office and riding a wave of near-record popularity, Bush again extended a familiar hand of cooperation to Congress even while alluding to election-year fights in the offing over taxes and budget priorities.

''Let's work together to do the will of the people: clean air, child care, the Educational Excellence Act, crime and drugs. It's time to act: the farm bill, transportation policy, product liability reform, enterprise zones. It's time to act together,'' he said.

His boldest political stroke, however, was again on the foreign policy front, where Bush has claimed a string of successes over the last year even as key parts of his domestic agenda have languished before Congress.

Calling this ''a period of great transition, great hope, yet great uncertainty,'' Bush reaffirmed the U.S. commitment to the defense of Western Europe but said in view of changed circumstances, ''troop levels can still be lower.''

''The time is right to move forward on a conventional arms control agreement to move us to more appropriate levels of military forces in Europe,'' he said, ''a coherent defense program that ensures the United States will continue to be a catalyst for peaceful change in Europe.''

A senior administration official said Gorbachev, informed of the offer by Bush by telephone early in the day, was ''very appreciative and thought that this was the kind of attitude that was very conducive for good relations.''

U.S. allies, secretly notified in the previous 72 hours by Bush and a pair of emissaries who secretly visited four NATO capitals, were ''very pleased '' the official said.

As he returned to the White House after his speech, Bush said Gorbachev had been ''receptive'' to his arms initiative, ''but I don't know whether he's supportive or not. I just told him about it and so we have to wait.''

The proposal, which Bush wants incorporated into the Western position at East-West troop talks in Vienna, received bipartisan praise on Capitol Hill, where Democrats have attacked Bush on defense matters in recent days.

''I am delighted,'' said Senate Foreign Relations Committee Chairman Claiborne Pell, D-R.I., ''and hope this will lead to even greater reductions in the near future.''

With the collapse of communist regimes in Eastern Europe, Bush has been under pressure to speed the disarmament process, but as recently as the Dec. 2-3 Malta summit seemed resistent to going beyond the current negotiating stance.

Because of ''the dramatic changes'' in Europe, which have moved faster than expected and seen former Soviet satellites demand that Soviet troops leave their soil, the senior official said Bush decided to enrich his earlier offer.

''Events were running ahead of the negotiations,'' the official said. The new proposal, he said, ''not only gets us out again in command of events, but it does give us a base which we think is sustainable through this current period.''

NATO and Warsaw Pact negotiators are working to conclude a treaty by fall that would limit the United States and Soviet Union to 275,000 troops each in the whole of Europe, as Bush proposed eight months ago to a summit of NATO leaders.

The decision to pare that figure came amid demands for a bigger ''peace dividend'' from lowered tensions in Europe and a perceived U.S. desire to help Gorbachev show conservative critics in the Kremlin that his reforms have rewards.

While blunting accusations that he has failed to recognize the lessened risk of war in Europe, Bush could have trouble now preventing Democrats from seeking premature savings from troop cuts still on the bargaining table.

As the administration all but ruled out near-term savings, Sen. Edward Kennedy, D-Mass., expressed hope the troop-cut proposal was ''a sign that the administration is also prepared to take bolder steps than we have seen so far in other areas of military spending.''

The Bush proposal would apply to 260,000 of the 305,000 U.S. troops in Western Europe and all 565,000 Soviet troops in Eastern Europe. It envisages overall cuts of 65 percent for Moscow and 26 percent for Washington.

Above the 195,000 limit for Central Europe, the United States would be allowed to retain 30,000 other troops now stationed outside that zone in Britain, Italy, Turkey and Greece.

The move came amid a swirl of speculation about Gorbachev's fate in the face of ethnic violence in Azerbaijan and threats of secession from dissident Lithuania that have raised doubts about his political survival.

Although White House press secretary Marlin Fitzwater said there had been ''only an oblique reference'' to Gorbachev's political crisis in the call from Bush, that alone seemed intended to signal support for the Kremlin leader.

The White House worked to dampen suspense before the speech by trickling out Bush's legislative agenda ahead of time, culminating in Monday's proposed $1.23 trillion budget for fiscal 1991.

That strategy, intended in part to pre-empt some of the partisan sniping that might otherwise undercut his appearance on Capitol Hill, also reflected Bush's own desire not to dwell on ''state of government vs. state of the union.''

It was his ''invest in America'' theme for the 1990s that Bush trumpeted on the domestic side, adding to the four C's at the heart of his agenda - crime, clean air, child care and capital gains - a fifth: competitiveness.

After seeing budget director Richard Darman bombarded for a second day with congressional doubts about his budget, Bush defended it as one that attacks the deficit and national needs with ''more than enough federal spending.''

As is his nature, Bush maintained a conciliatory tone, but alluded to a brewing battle over taxes by promoting his proposed cut in the capital gains tax and criticizing a call by Sen. Daniel Moynihan, D-N.Y., to cut Social Security taxes used to mask the size of the deficit.

Because those taxes were raised to ensure future retirement benefits would be paid, Bush said, ''The last thing we need to do is mess around with Social Security.''

-30- 10054

#90031u2787 01/31/1990 ~United Press International

WASHINGTON (JAN. 31) UPI - House Speaker Thomas Foley, D-Wash., signaling the Democrats' readiness to challenge President Bush on domestic issues, said Wednesday the president's actions do not support his words.

Giving the official Democratic response to Bush's State of the Union address to Congress, Foley said Democrats ''will work with the president wherever and whenever we can,'' but ''will stand our ground when that is the only way to stand for'' the nation's working families.

On foreign affairs, Foley said this country has ''a continuing obligation ... to those who struggle on, from South Africa to China,'' and criticized Bush's veto of a bill to protect Chinese students in the United States.

''No Congress and no president should be timid in the defense of freedom '' Foley said in his televised remarks following Bush's address.

Foley devoted most of his remarks to domestic issues, saying that ''well into the next century, the central challenge for America will be economic, not military. The greatest test of our strength will be in our classrooms, not our missile silos.''

Outlining the Democrats' priorities, Foley said the nation ''must renew our economic capacity and regain control of our economic destiny.'' He warned the country is ''falling dramatically behind'' in new technologies.

Foley said Democrats ''will set a national goal of making our schools once again the best in the world by the year 2000.''

''On this issue, the president's words seem to agree with us, but his actions say something else. You can't become the education president, with all the problems we face in this area, by proposing a meager 2 percent increase in the education budget,'' as Bush did, Foley said.

The speaker accused Republicans of backing policies that have encouraged the wave of corporate mergers and buy-outs rather than reinvestment in America. ''Their policies have encouraged debt and quick profit instead of investment and long-term growth.''

Noting the fight over Bush's plan to cut capital gains, Foley said Democrats will insist that ''the greatest part of any tax cut, of any kind goes to those of you who live on a paycheck - not just the few who have the highest incomes, the largest stock portfolios.''

''This issue goes to the heart of the reason we are Democrats: Above all else, we stand with you, the people who go to work and pay the taxes. It is your cause to which we are committed, and your side on which we fight.''

Foley said the Democrats will fight for ''the most effective'' clean air

bill, campaign finance reform, and child care legislation.

He attacked the administration on the Social Security issue, accusing them of ''misusing the Social Security Trust Fund to hide the size of the federal budget deficit.''

''Social Security has been the Democratic Party's proudest achievement. We reject the suggestion of some Republicans to privatize the system ... another version of the repeated Republican attempt to undermine Social Security,'' Foley said.

Concerning abortion, Foley said Democrats ''will continue to defend a woman's right to choose - for we are convinced that politicians cannot and should not attempt to make the choice.''

Summing up the Democrats' position, Foley said, ''Today, we Democrats stand, as we have before, for working families. We stand for both economic justice and economic opportunity; For protecting the environment; For senior citizens and the soundness of Social Security.''

#90031u2863 01/31/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - President Bush's proposal to negotiate even lower superpower troop levels in Central Europe won bipartisan praise in Congress Wednesday but also brought calls for cuts in his defense budget.

Bush both surprised and gratified a Congress watching events unfold almost too quickly to follow in Eastern Europe with his proposal for negotiated levels of 195,000 troops each for the United States and the Soviet Union.

''I'm delighted,'' said Senate Armed Services Committee Chairman Sam Nunn, D-Ga., who earlier in the month advocated a reduction to about 200,000.

''I think it takes an arms control position much more revelant to the real world, and the changing world. I think the East Europeans don't want 275,00 Soviet troops. They want less. ... I think this proposal will help us deal both on the budget side as well as help reduce Soviet pressure in the Eastern bloc,'' said Nunn, noting that Moscow faces some '''throw the bums out' type of pressure from the East Europeans.''

Sen. John Warner, R-Va., the senior Republican on Nunn's panel, said that Bush ''seized the element of surprise and the opportunity to put the United States into the forefront of negotiations to reduce conventional forces. If his initiative is a success, it should bring about increased stability in Central Europe, greater economic opportunity on both sides of the ocean and pave the way for an eventual peace divident.''

''I am delighted and hope this will lead to even greater reductions in the near future,'' said Sen. Claiborne Pell, D-R.I., chairman of the Senate Foreign Relations Committee.

Senate Republican leader Robert Dole of Kansas said, ''The president's bold proposal for further reductions in U.S. forces in Europe keeps us on the offensive at the negotiating table. The ball is now in Gorbachev's court. So, we'll see how serious the Soviets are about cutbacks. Until then, the president has sent the right signal: America must stay strong.''

Chairman Les Aspin, D-Wis., of the House Armed Services Committee said negotiating lower limits ''is clearly a good idea. The president should be congratulated.''

The proposal, he said, puts the U.S. position in conventional arms talks ''more in line with the reality of what is happening in Eastern Europe and what is likely to happen with defense budgets in the United States.''

Sen. Alan Cranston, D-Calif., the assistant Democratic leader in the Senate, lauded Bush. But Cranston, who wants to kill the B-2 stealth bomber, also said the proposal must lead to further cuts in the $307 billion defense budget for fiscal 1991 that Bush has proposed, cuts that should be allocated to domestic programs.

''This is a good proposal and I'm all for it. But in view of the reduced threat from the Soviet Union and the Warsaw Pact nations, we should go beyond mere reciprocity in reducing our military spending,'' said Cranston.

''This is a very constructive step. I hope it is a sign that the administration is also prepared to take bolder steps than we have seen so far in other areas of military spending,'' said Sen. Edward Kennedy, D-Mass.

Sen. Pete Dominici, R-N.M., top Republican on the Senate Budget Committee, said the troop withdrawal proposal ''will save us about $12 billion in 1993 and '94.''

Rep. David McCurdy, D-Okla., a spokesman for the House Democratic Caucus on defense issues, said, ''I commend the president for his words tonight, but his defense budget is a chip off the old Cap Weinberger block.''

''It is a major achievement and I think it is a very very big breakthrough for the president to announce tonight,'' said Assistant House Republican leader Newt Gingrich of Georgia.

House Foreign Affairs Committee Chairman Dante Fascell, D-Fla., said, ''I think if we can get a quality reduction in Central Europe, that's a good idea. We'll have to see what the Soviet response will be.''

Armed Services Committee member Rep. Patricia Schroeder, D-Colo., said Bush should have made the reduction proposal ''a long time ago. I only wish he would do more.''

One senior congressional foreign policy figure who asked not to be identified said 195,000 was an admirable start for Bush but said ''175,000 might be more appropriate.''

On Social Security, House Republican leader Robert Michel of Illinois said that Bush ''made it abundantly clear that we're just not going to let ourselves get trapped again into ... monkeying or fooling around with social security. We made a commitment in 1983 to adequately fund it with tax revenues and you can't monkey with that revenue base without talking about reducing the benefits.''

Sen. Patrick Moynihan, D-N.Y., who has proposed taking the Social Security trust fund off budget and roll back the payroll tax, said Bush referred to going back to a pay-as-you-go arrangement and added, ''Our position is we are messing around with Social Security now. We're using it as general revenue.'' He indicated a compromise could be reached. ''We'll have to. ... We'll work this out.''

Rep. Charles Rangel, D-N.Y., said Bush outlined a state of the union that is ''outstanding if you are wealthy or involved in military maneuvers, but unfortunate if you are poor or in need of help from society.''

''We don't need - and can't afford - to keep pouring billions into fighting a superpower nuclear war that's not going to happen. What we do need is affordable health care, better schools and free access to drug rehabilitation programs,'' said Rep. James Scheuer, D-N.Y.

#90031u2934 01/31/1990 ~United Press International

(JAN. 31) UPI - President Bush prepares to sum up the ''State of the Union''... Gorbachev denies any plans to quit Communist Party... re-trial for McMartin Pre-school defendant... and drama on the high seas. The top world and national stories, next, from U-P-I:

Although aides to President Bush say his ''State of the Union'' address tonight will NOT be a forum to present new ideas, a report indicates otherwise.

C-B-S News says Bush will use his first speech before a joint session of Congress to announce a proposal to reduce U-S and Soviet troop levels in Europe to 195-thousand each.

The unconfirmed report follows a less dramatic measure introduced by Bush last June when he met with Soviet President Gorbachev in Malta. Bush then proposed that each side slash its troop numbers to 275-thousand.

When queried about his planned comments during a photo session with his Cabinet, Bush responded- quote- ''There's going to be a lot of surprises maybe.''

Aides say other elements of Bush's nationally broadcast this evening will most likely include a challenge to Congress to sustain peace and prosperity in a rapidly changing world.

Critics on Capitol Hill have questioned what has been termed Bush's foot-dragging pace with regard to funneling assistance to the reforming governments of Eastern Europe.

#90031u2970 01/31/1990 ~United Press International

(JAN. 31) UPI - Mikhail Gorbachev says reports of his impending resignation as head of the Soviet Communist Party are greatly exaggerated. In fact, the Soviet president dismisses such talk as ''groundless suppositions.''

Gorbachev says he's been holed up for a week in his country home, preparing for next week's important Communist Party Central Committee. The Kremlin leader says he has NOT considered resigning.

Foreign Ministry spokesman Gennady Gerasimov describes his boss as ''annoyed'' by the report that Gerasimov dismisses as ''ill-intentioned'' rumors.

Yesterday's report that Gorbachev planned to resign as head of his party while retaining his presidency came as James Baker delayed a trip to Moscow.

The Secretary of State's talks with Soviet Foreign Minister Eduard Shevardnadze were delayed by one day due to the Communist Party meeting.

In Washington, the White House says Baker was at Bush's side when the president phoned Gorbachev today to talk about the coming talks. Baker says Bush wanted to fill Gorbachev in on some of the things he will say in his ''State of the Union'' address.

As for the talk about Gorbachev's future, Baker says the report ''proved to be a rumor'' just as the administration had thought.

#90031u3015 01/31/1990 ~United Press International
(JAN. 31) UPI - There will be another chapter to add to the longest, most expensive criminal trial in U-S history.

Prosecutors in Los Angeles say they will re-try Raymond Buckey on charges NOT resolved when Buckey was acquitted of 40 child molestation charges on January 18th.

District Attorney Ira Reiner made the decision to re-try the former McMartin Pre-school teacher on 13 counts that jurors deadlocked on two weeks ago.

Buckey had NO visible reaction to today's courtroom announcement. But the judge did, telling both sides to work for a speedy trial. In his words- ''We should do it quickly to end the turmoil this case has brought.''

The first trial- which ended in aquittal for Buckey and his mother, Peggy McMartin Buckey- lasted nearly three years and cost taxpayers more than 13-Million dollars.

Prosecutors say Buckey will be re-tried on charges involving the alleged molestation of five children, all of whom will testify.

The re-trial in the emotional case is scheduled to begin on March 9th.

The U-S Coast Guard is NOT giving up in its efforts to search what's believed to be a Cuban freighter possibly carrying drugs.

A spokesman says a Coast Guard cutter chased and shot at the vessel flying a Panamanian flag off Mexico after the freighter's crew refused to stop.

U-S officials say the Coast Guard cutter began the pursuit early yesterday in international waters after getting permission to board the freighter from Panama's government.

The Coast Guard says it first fired warning shots across the Hermann's bow. It then fired at the Hermann's engine compartment and rudder post, but the vessel fled into Mexican waters, escaping U-S jurisdiction. It docked at Tampico, about 205 miles northeast of Mexico City.

The Hermann remained in Mexican waters this afternoon, with the U-S government asking Mexico to board and search the ship.

-30- 2067
#90031u3046 01/31/1990 ~United Press International
(JAN. 31) UPI - A 25-year Continental Airlines pilot says- quote- ''It

was a miracle'' that a mistake by an air traffic controller on January 3rd at Houston's Intercontinental Airport did NOT result in disaster.

A copyright story in the Houston Chronicle today reports that the control tower O-K'd Continental Flight 152 to land on the airport's runway nine after clearing another Continental craft to takeoff from the same strip.

What resulted was a near disaster.

Continental Captain Jim Lowry, pilot of the jet cleared to taxi, says he questioned the tower after hearing it tell another plane to land on his runway. Lowry says the flight controller acknowledged his message but offered NO further instructions.

About 20 seconds later, Flight 152, the craft the tower cleared to land, aborted its approach after spotting Lowry's plane in its path.

Lowry says the incoming jet- quote- ''probably missed us by 20 or 30 feet.''

The manager of the Federal Aviation Administration air traffic control facility at Intercontintental Airport confirms that the incident is being investigated as a controller's mistake.

Defense Department officials say they have completed the process of identifying 10 World War Two U-S airmen whose plane crashed 47 years ago in the jungles of New Guinea.

But Army officials say they have been unable to find relatives of four of the men, despite searching since last year.

The reason for this, says a military spokeswoman is- ''because a lot of soldiers weren't married at the time. There were only parents.'' She adds that the death of the parents in the nearly five decades since the crash leaves investigators to- quote- ''go back and find brothers and sisters.''

The 10 airmen were part of the 90th ''Jolly Rogers'' Bomber Group, 400th Bomber Squad, based at Iron Range, Australia.

The BD bomber is presumed to have crashed into a mountain in the Owen Stanley Range after completing an armed reconnaissance mission over Japanese-held bases in the Papua, New Guinea, area.

#90031u3059 01/31/1990 ~United Press International

(JAN. 31) UPI - The nation's economy continued to flirt with recession

during the last year as the nation's index of future economic growth fell to its lowest point since 1984.

The government's index of leading indicators- a combination of 11 statistical components- posted a modest four-tenths of one percent gain in 1989. Many economists say the figure reflects a general sluggishness in the economy.

But NOT to worry says an economist at Data Resources Incorporated in Lexington, Massachussetts. In the words of David Wyss- ''Generally, the leading economic indicators have been flat for the past year and we think that's what the economy will be for this year- a bit of bobbling around but NO recession.''

His assessment echoes that of Federal Reserve Chairman Alan Greenspan. Speaking yesterday to a congressional panel, Greenspan said the probablity of a recession within the next six months has declined.

Thousands of people head to the Golden Arches for fast food each day for a quick fix of hamburgers and fries. Today, Muscovites joined the capitalist lunch bunch.

Tens of thousands of people lined up for the opening of Moscow's first- and the world's biggest- McDonald's.

Despite the wait, those who came were NOT disappointed. One elderly woman stuffed herself with a Big Mac, cheeseburger and an apple pie... then headed back to try a fish fillet. In the woman's words- ''It was all wonderful- soft. Even people like me without teeth can eat.''

The president of McDonald's Canada worked 14 years to bring the chain to Moscow. George Cohon says that in the end, the Soviet capital will have 20 McDonald's.

Cohon says he's hoping McDonald's Moscow-style will break the opening day record of 91-hundred sales set in Budapest Hungary. Or, even better, the all-time record for any single daythousand in Hong Kong.

#90031u4258 01/31/1990 ~United Press International
(JAN. 31) UPI - President Bush delivers his first State of the Union address... that story and other top news of the day next, from United Press International.

A senior administration official confirms that President Bush will use his State of the Union address tonight to propose drastic cuts in superpower troop strength in Central Europe.

Responding to earlier reports, the offical says Bush came up with the initiative as a means of placing the United States at the forefront of events reshaping Europe's political structure.

The source says the plan met with ally approval when Bush secretly presented it during the last three days. It's also reported Soviet President Gorbachev gave a thumbs up when Bush informed him in a phone call this morning.

The reported proposal calls for each side to reduce military personnel in Central Europe to 195-thousand. This represents an additional cut of 80-thousand troops from a proposal put forth by Bush eight months ago.

A Cuban-chartered freighter suspected of carrying illegal drugs was disabled today after being shot at by a U-S Coast Guard cutter in the Gulf of Mexico.

The Coast Guard says the skipper of the Panamanian-registered freighter... the M-V Hermann... had refused, since yesterday, to allow a search even though the Panamanian government had given the U-S permission to board the

vessel.

The Coast Guard says the Hermann refused to acknowledge the Panamanian order and kept going... even after the Coast Guard cutter signaled the ship and fired warning shots across the bow.

The official Cuban news agency reports the ship's captain was following orders of the Cuban government to prevent the boarding and- quote- ''fight until the end.''

A Coast Guard spokesman says to his knowledge there was NO prior intelligence indicating the ship was carrying narcotics, but the vessel fits the profile of ships drug-runners typically use.

After the shooting, the freighter fled into Mexican territorial waters. It's now docked at Tampico, Mexico, where U-S officials are trying to arrange a boarding by Mexican authorities.

-30- 2299

#90031u4274 01/31/1990 ~United Press International

(JAN. 31) UPI - In Yugoslavia, thousands of Serbs and Montenegrins demonstrated today against the government's failure to control unrest by ethnic Albanians.

Many demonstrators volunteered to go to Kosovo province to help troops and police control the situation.

Thousands of ethnic Albanians exchanged fire or threw stones at riot police in Kosovo. The province is 190 miles south of Belgrade.

The ethnic Albanians... who outnumber the Serbs in Kosovo... are demanding more autonomy from Serbia state.

Four demonstrators were killed today. It was the eighth day of anti-Serbian demonstrations. Police say the recent round of ethnic violence has claimed 16 lives since January 24th. Unofficial estimates put the death toll at 21.

President Bush has repeatedly made clear that one of the legacies he wants to be known for is his environmental record.

He hasn't harmed his chances with an idea in his fiscal 1991 budget that calls for Millions of trees to be planted in America over the next several years, but his efforts also have NOT relegated Congress to a backseat role.

The Senate today O-K'd legislation to phase out an industrial cleaning solvent that studies say contributes 16 percent of the ozone-depleting

chlorine now in the atmosphere due to human activities.

Proposed by Rhode Island Republican John Chafee, the legislation would halt production of methyl chloroform by the year 2000.

The Environmental Protection Agency estimates that phasing out methyl chloroform by the turn of the century would prevent almost four-Million cases of skin cancer, 65-thousand cancer deaths and 364-thousand cases of cataracts among Americans born before the year 2075.

#90032b0005 02/01/1990 ~Business Wire

CLEVELAND (FEB. 1) BUSINESS WIRE - The board of directors of Parker Hannifin Corp. (NYSE:PH) Thursday increased the quarterly dividend to 23 cents per share from 21 cents per share, of common stock payable March 2, 1990, to shareholders of record as of Feb. 21.

This brings the annualized rate to 92 cents.

''This 10 percent increase reflects the continuing soundness of Parker's business and available cash flow, and is consistent with our dividend payout policy,'' said Paul G. Schloemer, president and chief executive officer.

This is Parker's 159th consecutive quarterly dividend and involves a distribution of $11.2 million. For 34 consecutive fiscal years Parker has increased its dividends paid to stockholders, a record equalled by only six non-utility companies listed on the New York Stock Exchange.

Parker Hannifin is a leading producer of motion-control components and systems for a wide range of industrial and aerospace markets. Parker employs 31,000 people in approximately 200 plants around the world, making hydraulic, pneumatic and electromechanical products. Sales from

continuing operations for the year ended June 30, 1989, were $2.4 billion. Reported net income for the year was $124.5 million.

KANSAS CITY, MO (FEB. 1) BUSINESS WIRE - Randy W. Osler has been named president of United Telephone Co. of the Northwest, according to an announcement Thursday by Curtis G. Fields, executive vice president of United Telecommunications Inc.

Osler, 42, vice president of administration at United Telephone Co. of Florida since 1987, replaces Michael B. Fuller, who was recently named president of United Telecom's Midwest Group. United Telephone Co. of the Northwest serves more than 100,000 subscriber lines in Washington and Oregon.

Osler began his telephone career in 1969 as a communications representative at United Telephone Co. of Ohio. In 1978 he was named assistant director of tariffs and rates at United Telephone System Inc. (UTSI), director of local revenues at the Midwest Group in 1981, and vice president of access services at UTSI in 1982.

Prior to joining United of Florida, he was vice president of administration at the Southeast Group for two years.

LOS ANGELES (FEB. 1) BUSINESS WIRE - C. Shelby Coffey III, editor and executive vice president of the Los Angeles Times, has announced the following editorial department management appointments.

Narda Zacchino, editor of The Times' daily Orange County Edition, has been named associate editor of the newspaper and Noel Greenwood, deputy managing editor, has been named to the new position of senior editor.

John Brownell, assistant managing editor, has been named deputy managing editor, and Carol Stogsdill, executive editor of the Orange County Edition has been named editor of the edition and an assistant managing editor of The Times.

''These appointments will strengthen the Los Angeles Times as we move into the 90s and will showcase the talents of four of the paper's most innovative editors,'' said Coffey.

Zacchino replaces Jean Sharley Taylor, who retired in May 1989. As associate editor, Zacchino will oversee the feature sections of the paper, including View, Calendar, Travel, Real Estate, Food, the Book Review, Fashion, the Los Angeles Times Magazine and TV Times magazine. She will also be involved in formulating a new zoning strategy for The Times. She reports to Coffey.

Zacchino, 42, has been Orange County Edition editor since March 1983 and was named a deputy managing editor of The Times in January 1989. She has held numerous other positions during her 20 years with The Times, serving as a reporter, an assistant Metro editor and as Sacramento bureau chief.

Zacchino's awards include news-writing honors from the Los Angeles Press Club, the Orange County Human Relations Award for community service and selection as a Woman of the Year by the International Women's Forum. She earned a bachelor's degree in English from the University of California at Los Angeles.

In his new position, Greenwood retains responsibility for local and regional news operations in California. His new duties will include supervision of a number of major initiatives for The Times, including development of the fax newspaper currently being sent to top Soviet officials in Moscow, editorial development of new sections and expansion into other areas of California. He reports to Coffey.

Greenwood, 52, has served as deputy managing editor since 1983. He

directed The Times' series on the Southern California Latino community that won the Pulitzer Gold Medal for Public Service in 1984. He joined The Times as a Westside section reporter in 1967 and has also worked as an education writer in the Metro section, assistant Metro editor, senior assistant Metro editor and Metro editor.

Previously, he was a reporter and editor at newspapers in Banning and Goleta, Calif., and Reno and Las Vegas, Nev. He attended San Jose State University, Santa Barbara City College and the University of California at Santa Barbara.

As deputy managing editor, Brownell retains his responsibility for Column One stories and The Times Poll. His new duties include coordinating enterprise reporting among the newspaper's various news departments. He reports to George Cotliar, managing editor of The Times.

Brownell, 33, joined The Times as a copy editor in 1980. He worked as assignment editor at the newspaper's Washington, D.C., bureau, senior editor of the Los Angeles Times Magazine and editor of the View section before being named an assistant managing editor in January 1989.

Brownell previously worked for the Minneapolis Star and the Milwaukee Journal. He has a bachelor's degree in journalism from Northwestern University.

As Orange County Edition editor, Stogsdill will oversee the editorial operation of The Times' largest daily regional edition. Her duties will include supervision of the edition's 200-member news staff and working with non-editorial departments, including advertising, marketing and production. She reports to Coffey.

Stogsdill, 40, was named executive editor of the Orange County Edition in January 1989 after joining The Times as the edition's executive news editor in 1987.

She had previously worked at the Chicago Tribune, the Orange County Register, the Rocky Mountain News in Denver, the Arkansas Democrat and the Pine Bluff (Arkansas) Commercial. She has a bachelor's degree in journalism from Arkansas State.

#90032b0021 02/01/1990 ~Business Wire

IRVINE, CA (FEB. 1) BUSINESS WIRE - Albert C. Wong, former AST Research co-founder, Thursday formally introduced his new corporate venture, AMKLY

Systems Inc.

Wong formed AMKLY Systems in August of 1989 to increase business productivity by developing high-quality memory expansion and professional systems products.

According to Wong, a key ingredient for success is a strong management group, and he has assembled a team that provides a solid blend of extensive experience in all phases of the personal computer business, including engineering, research and development, manufacturing and marketing. ''This team is ideally suited to bring high-quality products to market, now and in the future,'' said Wong.

With more than 15 years of industry experience, Wong's expertise in the PC market is well chronicled. As the executive vice president of advanced technical development at AST Research, he directed daily manufacturing and engineering operations.

He conceived the ideas for AST's original board products and helped orchestrate the company's transformation from a producer of enhancement boards to a $450 million, internationally recognized leader in the PC arena.

Key management positions at AMKLY Systems include: Don Williams, vice president, operations; Kristen M. Onken, vice president, finance, and chief financial officer; Robert D. Kutnick, vice president, strategic business development; and Mary Sato, manager, product marketing.

AMKLY's new product line, designated AMpac, includes boards with a new SIMM (Single In-line Memory Module)-based design that provides maximum flexibility and easy upgradability, as well as lowering suggested list price up to 50 percent for fully populated boards over current competitive offerings.

In addition, AMKLY offers a selection of memory expansion boards comparable with the standard Compaq offering, with a suggested list price savings of 7 to 8 percent.

AMKLY Systems Inc., Irvine, was founded in August 1989 by Wong, former founding partner of AST Research, to develop and market personal computer memory enhancement and systems products.

SAN FRANCISCO (FEB. 1) BUSINESS WIRE - Bay 511, a San Francisco-based corporation, has purchased Autumn Ridge Apartments, a 410-unit garden-style apartment complex in the Sacramento area for $21.5 million, according to Jack S. Cooper, managing director of Bank of America's Investment Real Estate (IRE) Group.

IRE serves as investment advisor and trustee to Bay 511 Corp., a U.S. real estate investment company, said Cooper.

Including the Autumn Ridge Apartments transaction, during the past 15 months, IRE has invested more than $45 million in Sacramento-area apartment properties as advisor to its clients.

In January 1989, Bay 511 Corporation purchased Woodside Oaks Apartments, a 162-unit complex in the Arden Arcade district of Sacramento, for $10.4 million. In the fall of 1988, a Japanese institutional investor acquired Riverview Ranch Apartments, a 262-unit garden-style complex located in South Natomas, for $14.1 million.

Autumn Ridge Apartments was built in 1985 by Pacific Scene Properties, Inc., a development and property management company. Pacific Scene Properties Inc. is also the general partner of the two California limited partnerships, First Transcoastal Group Ltd. and The Greenback Investors Group, which were the sellers in this transaction.

The complex is situated on 20 acres of beautifully landscaped grounds, Cooper stated. Among its many attractive features, Autumn Ridge Apartments has two lighted tennis courts, three barbecue areas, three swimming pools, an exercise room with spa, plus a clubhouse and planned activities for residents.

Built using wood siding and pitched composite roofs, Autumn Ridge Apartments offers its residents luxury one- and two-bedroom units, which range in size from 639 to 920 square feet. The apartments feature such amenities as wood-burning fireplaces, air-conditioning, all electric kitchens, washer/dryer hookups, as well as private decks or patios.

Bank of America's Investment Real Estate Group was established in the early 1970s. In the past two years, IRE has acquired more than $300 million in properties in the United States for institutional clients around the world.

Currently, in its fiduciary capacity, IRE manages a portfolio valued at more than $650 million for clients around the world. The portfolio consists of approximately 50 properties across the United States, including office buildings, shopping centers, apartment complexes,

warehouses, and research and development facilities.

DENVER (FEB. 1) BUSINESS WIRE - Cellular Inc. (NASDAQ: CELS), inaugurates commercial service for one of the first free-standing rural service area (RSA) cellular telephone systems in the United States. Thirty-six additional Cellular Inc. RSA systems are planned for completion during the next 18 months.

Located in southeastern Idaho, the cellular telephone system will service the area anchored by the cities of Pocatello, Blackfoot, Idaho Falls and Rexburg, with a combined population in excess of 260,000.

Cellular Inc. said that it had activated more than 127 customers as the system went operational, which is an indication of the robust demand for cellular technology in rural America.

In addition to servicing portable and mobile telephone users, the system will be handling fax communications, data transmission and long distance services.

"We are extremely pleased with the results of our sales efforts which demonstrate the need for cost-effective cellular telephone service for business and residential telephone users, and our ability to serve population centers which historically have had limited, if any, alternative telephone service," said Arnold Pohs, president and chief executive officer of Cellular Inc.

Cellular Inc., founded in 1983, provides management, financing and operational services for the cellular interests of independent telephone companies (TELCOS).

Currently the company has affiliations with 156 TELCOS in 17 states; has interests in 11 operational metropolitan statistical area (MSA) markets; and interests in 69 rural service area (RSA) markets, the majority of which will become operational during 1990.

LOS ANGELES (FEB. 1) BUSINESS WIRE - Georgiana Francisco has been named

director of public relations for the Regent Beverly Wilshire, Alain Longatte, general manager of the luxury Beverly Hills property, announced Thursday.

Prior to joining the Regent Beverly Wilshire, Francisco headed the West Coast office of Middleton & Picower, a New York-based public relations firm.

From 1984 to 1989, she was public relations director for the Century Plaza Hotel & Tower where she received the Top Ten Women of Achievement Award in 1988 from the Century City Chamber of Commerce.

She has also served as a public information specialist and legislative liaison for the U.S. Department of Agriculture, director of public relations for the American Meat Institute and director of public relations for the Sheraton Plaza La Reina Hotel. She was honored with the Superior Service Award and a special award from President Jimmy Carter for her contributions as a speechwriter and press liaison during her tenure at the White House on the President's Reorganization Project.

Francisco holds a degree in English from Good Counsel College and a master's degree in speech and drama from the Catholic University of America.

The Regent Beverly Wilshire was acquired in December 1985 by Regent International Hotels who operate luxury hotels worldwide, including the Regent Hong Kong, the Regent Sydney, the Regent Bangkok and the Mayfair Regents in New York and Chicago.

OVERLAND PARK, KS (FEB. 1) BUSINESS WIRE - Puritan-Bennett reported record orders, sales, and earnings for the year and record orders for the quarter ended Dec. 31, 1989, chairman and president Burton A. Dole Jr., announced Thursday.

For the year, orders, sales, and earnings were $234.3 million, $226.8 million, and $16 million ($1.42 per share), respectively. These results represent increases of 13.1 percent, 11.0 percent, and 13.1 percent, respectively, over the prior year.

''When 1988 results are adjusted for the impact (net of other charges) of the sale of our marketing rights to the Datex product line, orders, sales, and earnings for our continuing business grew 15.6 percent, 14.1 percent,

and 28.3 percent, respectively,'' Dole said.

For the fourth quarter, orders, sales, and earnings were $64.6 million, $57.9 million, and $3.6 million (32 cents per share), respectively. ''When fourth quarter 1988 results are adjusted for the Datex transaction, orders, sales, and earnings for our continuing business grew 10.7 percent, 10.2 percent, and 53.4 percent, respectively, over the same period last year,'' Dole added.

''Fourth quarter revenues and earnings were somewhat lower than expected. Aviation shipments were down somewhat from second and third quarter levels, which were exceptionally strong. We expect aviation shipments to grow from fourth quarter levels as that sector of our business remains robust.

''Additionally, while orders for 7200a ventilators and for Boston Division products were very strong in December, there was not enough time for most of these orders to be shipped in 1989. On the other hand, the $6.7 million growth in order backlog occurring during the fourth quarter augurs well for the future.

''We enter 1990 with a healthy backlog, excellent products and good momentum. Moreover, as previously announced, we continue to invest in and make good progress toward a major new business opportunity -- in-dwelling arterial blood gas technology for real-time continuous monitoring of critically ill patients,'' the chairman concluded.

Puritan-Bennett is a world leader in products related to respiration. These products are used in multiple health care settings and on aircraft.

MOUNTAIN VIEW, Calif. (FEB. 1) BUSINESS WIRE - ASK Computer Systems Thursday announced that Robert H. Waterman Jr. has joined the company's board of directors.

The appointment was effective on Jan. 23. His appointment increases the board to six members.

Bob Waterman, 53, is co-author of ''In Search of Excellence: Lessons from America's Best Run Companies'' and author of ''The Renewal Factor: How the Best Get and Keep the Competitive Edge'' and of a new book entitled ''Adhocracy: The Power to Change.''

''I joined ASK's board because the company is in the 'renewal' process; it's becoming reinvigorated,'' commented Waterman. ''As the leader in the growing market for manufacturing information systems, ASK is in the right place at the right time. Not only is the industry exciting, but ASK is full of fun, talented people.''

Waterman is chairman of Waterman & Miller Inc., a consulting, research and venture management firm based in San Francisco. He is on the board of directors of Applied Energy Services, Armor All, Boise Cascade, the Scleroderma Research Foundation and the U.S. Ski Team. He also serves as an adviser to the boards of the San Francisco Fine Arts Museum, the Asian Art Museum and the San Francisco Symphony.

Waterman spent 21 years at McKinsey and Co., leaving the firm in 1986 as senior director. He is a graduate of the Colorado School of Mines where he obtained a degree in geophysical engineering, and of Standford University where he earned a master of business administration.

ASK Computer Systems is the leader in management information systems for manufacturing companies. There are 900 ASK employees worldwide supporting nearly a million ASK system users. Over 300,000 ASK software products operate at customer manufacturing sites worldwide.

#90032b0080 02/01/1990 ~Business Wire

HOUSTON (FEB. 1) BUSINESS WIRE - Shell Oil Co. announced Thursday a program to study methanol-gasoline fuel in partnership with the California Energy Commission (CEC).

As part of a 10-year program, Shell will market ''M85'' fuel, a blend of 85 percent methanol and 15 percent unleaded gasoline, at four California service stations in areas where flexible fuel vehicle fleets are present.

In addition, the company will purchase up to 10 flexible fuel vehicles for use in Southern California and has loaned a Shell chemical engineer to work with the California Energy Commission for six months.

Beginning in approximately three months, Shell will purchase M85 directly from the California Energy Commission for dispensing at designated service stations.

To gain firsthand knowledge of the fuel's performance, some Shell employees will drive flexible fuel vehicles. Initially, two vehicles will be purchased by Shell for use in its car fleet at the Wilmington Manufacturing Complex near Los Angeles.

Approximately 500 flexible fuel vehicles are on California's highways, and some 5,000 are forecast to be in use by 1992. Many of these vehicles are in governmental and company car fleets. To obtain the M85 fuel, drivers of flexible fuel vehicles must use a cardlock, similar to a credit card, to activate the electronic dispenser and charge the transaction.

Shell's loaned chemical engineer, Chuck A. Lieder, began working for the CEC in Sacramento Sept. 1. His assignments include assisting in technical economic and marketing analysis for the methanol demonstration project. He is working on fuel sampling and testing, conducting economic and technology reviews of methanol manufacture, and trying to predict how the refining industry would be impacted by regulations affecting gasoline formulation. SAN MARCOS, CA. (FEB. 1) BUSINESS WIRE - Amistar Corp. (OTC:AMTA) Thursday announced sales and earnings for the three months and the year ended Dec. 31, 1989.

Net sales for the three months ended Dec. 31, 1989, were $4,395,000, as compared with $6,048,000 for the fourth quarter in 1988. Net sales for the year ended Dec. 31, 1989, were $18,504,000, as compared with $21,717,000

for the like period in 1988.

Net loss for the three months ended Dec. 31, 1989, was $344,000, or 10 cents per share, as compared with a net income of $260,000, or 7 cents per share, for the fourth quarter of 1988. Net loss for the year 1989 was $1,075,000, or 31 cents per share, as compared with net income of $698,000 or 20 cents per share, for 1988. All per share figures are based on 3,437,500 shares outstanding.

#90032b0089 02/01/1990 ~Business Wire

NORTHRIDGE, CA (FEB. 1) BUSINESS WIRE - Pacific Southwest Corp. (OTC) Thursday announced a net loss of $71,480, or 4 cents per share, for fiscal 1989 ended July 31, 1989, on revenues of $2,823,719, compared to net income of $581,101, or 31 cents per share, on revenues of $3,164,964 for fiscal 1988.

President Jerry Fraschilla said that the decline in revenues from the company's land banking and real estate development operations, which benefitted in fiscal 1988 from a $1,233,000 gain on the sale of a parcel of land in Ramona, Calif., to K-Mart Corp., offset revenue gains from the company's mortgage banking and equipment leasing businesses during fiscal 1989. He noted that Pacific Southwest sold none of its real estate holdings in fiscal 1989.

Fraschilla said that the decline in net income for the year was due primarily to the expansion of staff, legal, accounting and other related costs associated with the growth of the company's mortgage operations and the acquisitions of two California mortgage brokers, Midland Pacific, with seven offices in the San Francisco Bay area, and Santa Ana-based Consumer Mortgage.

The year-to-year earnings comparison also was affected by the gain from the Ramona land sale in fiscal 1988.

The acquisitions of Midland Pacific and Consumer Mortgage took longer to complete than had originally been anticipated, closing in July and December 1989, respectively, Fraschilla explained, so the costs related to these acquisitions were not offset in fiscal 1989 by the incremental profits anticipated to flow from the enhanced mortgage banking capabilities of the combined operations.

''We expect substantial growth in revenues and corresponding increases in earnings from these businesses to add significantly to Pacific Southwest's

operating results for the second half of fiscal 1990 and beyond,''
Fraschilla said.

Since its formation in 1980, Pacific Southwest Corp. has increased shareholders' equity more than 20-fold by identifying and purchasing real estate and other assets on favorable terms. The company also has built, largely through acquisition, complementary mortgage banking and financial service businesses that provide the medium to further enhance and unlock the value of Pacific Southwest's growing asset base.

VANCOUVER, BRITISH COLUMBIA (FEB. 1) BUSINESS WIRE - Trimin Resources Inc. (TSE, VSE:TRM) is pleased to announce that Trimin and Cameco - A Canadian Mining and Energy Corporation have signed a formal agreement to acquire a 51 percent interest in the Balsam Lake property, jointly owned by Granges Exploration Ltd. and Troymin Resources Ltd.

Furthermore, Trimin/Cameco can earn up to a 100 percent interest in the Balsam property, subject to a 10 percent net profits interest royalty,

by funding a total of $2.5 million in exploration if Granges/Troymin elect not to participate in a joint venture. The Balsam Lake property adjoins the Trimin/ Cameco Hanson Lake property to the southeast and is comprised of five claim blocks totalling 15,000 acres.

The acquisition of the Balsam Lake property will cover approximately two miles of favourable geologic structure which hosts the Hanson Lake/McIlvenna Bay copper-zinc deposit. A $335,000 exploration program to include geophysics and diamond drilling has now commenced to test the Balsam Zone. Previous drilling by Granges in 1984 intersected 21 feet grading 3.3 percent copper, 3.3 percent zinc, 1.5 oz/T silver and 0.10 oz/T gold.

#90032b0093 02/01/1990 ~Business Wire

BEAUMONT, TX (FEB. 1) BUSINESS WIRE - Gulf States Utilities Co. Wednesday reported an (unaudited) loss of $1 per share of common stock for 1989, compared to earnings of 37 cents per share for 1988.

Results for 1989 were adversely affected by four significant accounting charges (net of their related income tax effects):

- In the first quarter, a charge to earnings of $15 million (14 cents per share) was taken to reflect the Louisiana regulatory treatment of the cancelled River Bend 2 unit.

- In the third quarter, a charge to earnings of $37 million (34 cents per share) was taken to reflect the write-off of River Bend deferrals related to activities governed by the Federal Energy Regulatory Commission (FERC).

- Also in the third quarter a charge to earnings of $18 million (17 cents per share) was taken to reflect the write-off of abandoned lignite leases.

- In the fourth quarter, a charge to earnings of $22 million (20 cents per share) was taken to reflect the write off of River Bend deferrals related to GSU's steam department electric operations.

The write-offs of River Bend deferrals were the result of the company's competitive pricing of FERC rates and the anticipated reduction in killowatt-hour sales to the steam department's electric operations, which cause the deferrals to be unrecoverable.

These four charges totaling $92 million reduced 1989 per share earnings by 85 cents.

During 1989, GSU recorded $41 million of earnings (38 cents per share) attributable to accounting order deferrals and phase-in plans compared to $128 million of earnings ($1.19 per share) recorded for those items in 1988.

The Beaumont-based utility company also reported that 1989 kilowatt-hour sales of electricity totaled 27.5 billion for the 12 months ended Dec. 31, 1989, compared to 27.2 billion for the 12 months ended Dec. 31, 1988. Officials said the 1 percent increase in sales came from the residential, commercial, and industrial sectors.

Gulf States serves an estimated 563,000 electric customers in a 28,000-square-mile area spanning the Gulf Coast between Houston and New Orleans.

VANCOUVER, WA (FEB. 1) BUSINESS WIRE - Pacific Telecom Cable Inc. (PTC)

and Dennis W. Elliott announced Thursday that Elliott has resigned as president and chief executive officer and a director of PTC, effective Feb. 1, 1990.

Elliott plans to develop new business ventures in telecommunications and to consult in the area of telecommunications business strategy.

Charles E. Robinson, chairman of Pacific Telecom Cable, stated that he had accepted Elliott's letter of resignation following a period of discussions during which Elliott had indicated his desire to pursue new business interests.

Robinson noted, ''Mr. Elliott has a wealth of experience in many areas of telecommunications, and I extend to him my best wishes for the future.''

Elliott said, ''I've always been excited about business strategy and starting new telecommunications ventures, and now is the time in my life to go out on my own. I wish Pacific Telecom Cable great success.''

Pacific Telecom Cable is an 80 percent-owned subsidiary of Pacific Telecom Inc. (NASDAQ:PTCM), a company of PacifiCorp's (NYSE:PPW) family of companies.

INDIANAPOLIS (FEB. 1) BUSINESS WIRE - Eli Lilly and Co. Thursday announced its 29th consecutive year of sales and earnings growth. Sales for the year were $4.176 billion, an increase of 16 percent from 1988. Net income rose 23 percent, to $939.5 million. Earnings per share increased 20 percent, from a total of $2.67 in 1988 to $3.20 in 1989.

The company also reported record fourth-quarter sales and earnings. Sales during the quarter totaled $1.146 billion, an 18 percent increase from the same period a year ago. Net income rose 28 percent, to $225.3 million. Earnings per share were $0.77, an increase of 24 percent.

In 1989, worldwide sales of pharmaceutical products had its highest growth rate of the past decade--a 16 percent increase, to $2.934 billion. Sales of the antidepressant Prozac and antiulcer agent Axid increased significantly as they continued to gain worldwide market acceptance. These two new products, along with the antibiotic Ceclor, the biosynthetic human insulin Humulin, and the human growth hormone product Humatrope led the growth in pharmaceutical sales.

The Medical Instrument Systems Division reported sales of $697.6 million, an 18 percent increase from 1988. Cardiac Pacemakers Inc., and Advanced Cardiovascular Systems Inc., were the main contributors to the growth of this division. Worldwide sales of animal health products in 1989 were $337.3 million, a slight increase over 1988 sales, as major products continued to experience significant competitive pressures.

International sales benefited significantly from the consolidation of several international affiliates, which became majority-owned in 1989. However, this consolidation had no effect on net income.

Research and development expenses for the year were $605.4 million, representing an 18 percent increase over 1988. Approximately 14 cents of each sales dollar were reinvested in research and development programs.

Net income grew faster than sales as the company benefited from increased productivity in its manufacturing operations and only a slight increase in its general administrative expenses.

Axid (nizatidine, Lilly) Ceclor (cefaclor, Lilly) Humatrope (somatropin of recombinant DNA origin, Lilly) Humulin (human insulin of recombinant DNA origin, Lilly) Prozac (fluoxetine hydrochloride, Dista)

SEATTLE (FEB. 1) BUSINESS WIRE - Seafirst Bank has appointed Tishman West Cos. as the exclusive management and leasing agent for Seattle's Columbia Seafirst Center, announced Joan Enticknap, senior vice president and facilities manager for Seafirst.

Completed in 1985, Columbia Seafirst Center is owned by and is headquarters to Seafirst Bank, which purchased the building for $350 million from Seattle developer Martin Selig in December of 1989. The bank occupies 19 percent of the building and is its largest tenant.

Tishman West has appointed Matthew Sato as marketing manager of Columbia Seafirst Center. Sato is currently responsible for the leasing and marketing of the 1.3 million square foot 1900/1901 Avenue of the Stars project in Century City. Prior to joining Tishman West, Sato had leasing responsibilities for the Skyline Tower in Bellevue.

Columbia Seafirst Center, which contains 1.4 million square feet, is located in the core of Seattle's central business district with close proximity to all major traffic arteries. The project features 34-foot

high glass windows all at entrances. Its exterior is characterized by a grey-tinted double pane glass window wall with insulated glass spandrels on both sides. The lobbies and interior areas feature carnelian granite. The project is equipped with 24-hour security, a computerized energy management system, and a fire protection system designed in unison with the Seattle Fire Marshall. Additionally, Columbia Seafirst Center is home to more than 53,000 square feet of retail space.

Tishman West Cos., an award-winning commercial real estate firm headquartered in Los Angeles, is engaged in the development, leasing, consulting, management and construction of commercial and retail property across the nation. In addition to Seattle, Tishman West has regional operations in Albuquerque, N.M., Atlanta, Dallas, Denver, the District of Columbia metropolitan area, Orange County, Calif., Phoenix, San Diego, San Francisco, San Jose, Calif., Tucson, Ariz., and London, and has a current building management portfolio that exceeds 25 million square feet.

Seafirst Corp. is a Seattle-based bank holding company that engages in commercial banking through its principle subsidiary, Seafirst Bank, which has 183 branches in Washington state and two offices in Portland, Ore. With total assets of $12.4 billion, total loans of $10.2 billion and deposits of $9.7 billion, Seafirst is the largest bank in the state of Washington. Seafirst also offers mortgage banking, leasing and credit-related insurance underwriting services. Seafirst is a wholly owned subsidiary of BankAmerica Corp., functioning with an independent board of directors.

#90032b0105 02/01/1990 ~Business Wire

SACRAMENTO, CA (FEB. 1) BUSINESS WIRE - McClatchy Newspapers Inc. (NYSE: MNI) Thursday reported fourth-quarter earnings of $10.3 million, or 36 cents per share, up 8.0 percent over the $9.5 million, or 33 cents per share, earned in the fourth quarter of 1988. Earnings for the year were $33.9 million, or $1.19 per share, vs. $28.8 million, or $1.02 per share, in 1988.

Total revenues for the fourth quarter grew 7.5 percent to $101.6 million from $94.6 million in 1988. Advertising revenues were $81.3 million, up 7.4 percent.

The gain in advertising revenues is due, in part, to modest growth in

advertising lineage over the level achieved in 1988 and rate increases implemented in earlier quarters. Led by record-breaking circulation growth at The Sacramento Bee, circulation revenues increased 9.3 percent to $16.3 million.

Operating income for the fourth quarter was up 11.1 percent to $17.2 million from $15.5 million in 1988. Much of the increase in operating income was attributed to higher earnings at The Tacoma News Tribune and the Anchorage Daily News. The company also benefited from favorable newsprint pricing.

Net income for the full year rose 17.9 percent, largely due to improved results at The Sacramento Bee, the Tacoma News Tribune and the Anchorage Daily News. Total revenues rose 7.0 percent to $380.8 million. Advertising revenues were $303.0 million, up 6.6 percent, while circulation revenues posted a 9.4 percent improvement to $63.1 million.

Operating income for the full year grew 15.1 percent to $55.5 million from $48.2 million as the company benefited from lower newsprint prices and cost-containment measures.

Operating income was reduced by the incremental costs associated with the recent plant expansions at The Sacramento Bee and The Modesto Bee, and product enhancements at two of the company's recent acquisitions. Nonetheless, total operating expenses were held to a 5.7 percent increase over 1988.

Headquartered in Sacramento, McClatchy Newspapers Inc. operates 11 daily newspapers, eight non-daily community newspapers and a group of senior citizen tabloids in California, Washington, Alaska and South Carolina. The three daily newspapers and three non-daily newspapers located in South Carolina were acquired on Jan. 1, 1990.

BURBANK, CA (FEB. 1) BUSINESS WIRE - Matthews Studio Equipment Group (NASDAQ: MATT) Thursday announced that revenues for the three months ended Dec. 31, 1989, had increased 45 percent to $4,170,200, compared with revenues of $2,883,100 for the same quarter of the prior year.

Net income for the period, said Co-Chairman and Chief Executive Officer Carlos De Mattos and Co-Chairman and Chief Operating Officer Edward Phillips, reached a record $137,600, or two cents per share, compared with a net loss of $296,500, or six cents per share, for the same three months

in 1988.

"These results," De Mattos and Phillips said, "confirm our belief that we were on the right track when we set out to build the company both through internal growth and acquisition of companies in the same industry.

"The substantial improvement in operating results," De Mattos and Phillips pointed out, "are a result of continued growth in our manufacturing group, combined with the synergistic effect of the addition of Hollywood Rental Inc. and its subsidiary, Expandable Supply Store Inc. We are fully confident," they said, "that these favorable results are going to continue in the months ahead."

Matthews Studio Equipment Group and its subsidiaries design, manufacture, lease, rent and sell lighting support equipment and related materials used in the production of motion pictures, TV films, and studio photography.

MATTHEWS STUDIO EQUIPMENT GROUP SUMMARY OF OPERATIONS (Unaudited)

Three Months Ended Dec. 31,	1989	1988
Total revenues	$4,170,200	$2,883,100
Income (loss) before income taxes	$ 252,600	$ (282,500)
Net income (loss)	$ 137,600	$ (296,500)

#90032b0111 02/01/1990 ~Business Wire

INDIANAPOLIS (FEB. 1) BUSINESS WIRE - Hybritech Inc. announced Thursday that its 1989 sales and gross profits achieved record levels. Sales increased 39 percent from last year, to a total of $104.1 million. Gross profits rose 53 percent, to a record $67.0 million.

Hybritech's growth in 1989 was the result of increased unit volume in both the U.S. and international markets. The company's prostate cancer test, Tandem PSA, and pregnancy test, Icon HCG, were the main contributors to sales growth. Hybritech's continued commitment to research and development resulted in the introduction of new diagnostic products in 1989, including the Icon QSR CK-MB, a rapid test for heart attack diagnosis.

Gross profits for the year grew at a faster rate than sales as the company continued to benefit from improved productivity in its manufacturing operations and from the one-time impact of a litigation settlement of $12 million reported as sales in the third quarter.

Based on Hybritech's 1989 total revenues and gross profits, no payment was earned under the terms of the Contingent Payment Obligation Unit (CPU). The CPU is traded on the American Stock Exchange.

Sales in the fourth quarter totaled $24.1 million, a 21 percent increase from 1988. Gross profits were up 16 percent during the same period, to $14.6 million. Hybritech, a leading biotechnology innovator, is a subsidiary of Eli Lilly and Co.

FRESNO, CA (FEB. 1) BUSINESS WIRE - Pacific Agricultural Holdings Inc. has completed the preliminary phase of ground water exploration in Piute Valley with two test holes drilled to depths of 400 feet and 860 feet.

Ground water encountered in both test holes is of quality suitable for human consumption and certain agricultural applications. Additional exploratory drilling is being planned to test for increased well yields.

In anticipation of positive results from future exploration, the company has renewed for an additional 18 months its options to purchase 5,500 acres of fee land from the Southern Pacific Land Co. in the Piute Valley and Homer areas. The agreement with Southern Pacific provides for potential acquisition of an additional 7,500 acres of federal land in the area by way of property trades.

The Piute Valley property is located approximately 15 miles from Laughlin, Nev., which is the fastest-growing casino/resort area in the United States. Twelve major casino/resort complexes are currently in place or under construction, representing a total of approximately 9,000 hotel rooms. Future growth at Laughlin is limited by the 10,000-acre-foot annual allocation of Colorado River water granted by the state of Nevada.

TUSTIN, CA (FEB. 1) BUSINESS WIRE - South Coast Group (SCG) Thursday announced that it has agreed to expand the scope of public relations services it provides to East Hanover, N.J.-based The Ultimate Corp. (NYSE:ULT), a leading international supplier of integrated computer-based business solutions.

The new agreement awards Ultimate's extensive marketing communications to SCG, which replaces the New York office of Manning Selvage & Lee on the account.

Ultimate, with more than $200 million in annual revenues, dominates systems sales in several vertical niches in wholesale distribution and is a leading remarketer of systems from premier hardware companies such as IBM, Hewlett-Packard, Bull HN and Sequoia Systems Inc.

''This agreement builds on our ongoing relationship with Ultimate,'' said Joseph Allen, SCG president. ''We've been providing investor and corporate public relations and crisis communications services to Ultimate for some time and we're very pleased to expand our role with this exciting company.''

Allen said that SCG will now provide communications services and media relations for product introductions, trade shows and dealer meetings and vertical niche awareness programs.

''This agreement approximately doubles the scope of our services,'' said Rene Caron, SCG's vice president/client service. ''We have substantial experience in a variety of technologies, including the software, hardware and field maintenance industries and look forward to working with Ultimate for many years to come.''

Caron said that SCG will add a staffer to work from Ultimate's headquarters offices in East Hanover.

South Coast Group offers a full range of investor relations, public relations, marketing communications, crisis management and consulting services to clients in a variety of industries.

WOODLAND HILLS, CA. (FEB. 1) BUSINESS WIRE - Richard H. Savage, chairman of the board and chief executive officer of Amwest Insurance Group Inc. (ASE/PSE:AMW) Thursday announced that the board of directors made several changes in senior management.

Effective immediately, John E. Savage will become president and chief operating officer with responsibility for the underwriting, court and human resource functions.

He will also become vice chairman of both of the company's wholly owned subsidiaries, Amwest Surety Insurance Co. (Amwest Surety) and Far West Insurance Co. (Far West).

Gary R. Peterson will become executive vice president with responsibility for marketing and the branch offices. He remains president of Amwest Surety and will become executive vice president of Far West.

Robert C. Goodell will become executive vice president and chief financial officer with responsibility for the finance, claims, subrogation, data processing and training and operations functions. He will also become executive vice president of Amwest Surety and president of Far West. John Savage, Gary Peterson and Robert Goodell will continue to report directly to Richard Savage, who remains chairman of the board and chief executive officer.

In making the announcement, Richard Savage stated: ''The board's action in implementing these changes allocates responsibilities allowing the same management team that led the company to record net income levels for each year from 1984 to 1988 to effectively manage the company's continuing growth.

''During 1989, the company's premiums written increased approximately 27 percent to approximately $46 million and the company increased the number of its branch offices from 28 to 32.''

Amwest Insurance Group is a Woodland Hills-based insurance holding company engaged through its wholly owned subsidiaries, Amwest Surety and Far West in writing surety bonds in California, District of Columbia, Guam and 48 other states. The company specializes in writing surety bonds, including contract performance, court, contractors license and sales tax bonds.

WALNUT CREEK, CA. (FEB. 1) BUSINESS WIRE - Central Banking System Inc.'s common stock will continue to be included for quotation in the National Association of Securities Dealers' Automated Quotation System (NASDAQ) via an exception from the capital and surplus requirement.

While Central Banking System Inc. failed to meet this requirement as of Jan. 5, the NASD has granted a temporary exception from this standard, subject to Central Banking System Inc. meeting certain conditions.

Although the company believes that it can meet those conditions, there can

be no assurance that it will do so. If, at some future date, the company's securities should cease to be quoted on the NASDAQ System, they should continue to be quoted in the over-the-counter market. For the duration of the exception, the company's NASDAQ symbol will be CSYSC.

SAN JOSE, CA (FEB. 1) PR NEWSWIRE - SJNB Financial Corp. (NASDAQ:SJNB), holding company for San Jose National Bank, San Jose, and Tri-Valley National Bank, Dublin, Calif., reported a net loss of $512,000, or 35 cents per share, for the fiscal year ended Dec. 31, 1989.

SJNB President James P. McDermott stated the net loss resulted primarily from a loss previously reported on the sale of U.S. Government agency equity securities in June of 1989 of approximately $1.4 million.

Despite the loss, shareholders' equity increased by $593,000 from $13,273,000 at Dec. 31, 1988, to $13,866,000 at Dec. 31, 1989, principally because the decline in market value of the equity securities sold in 1989 had been periodically charged against shareholders' equity in prior years.

The net loss for the year compares with net income of $1,003,000, or 69 cents per share for the year ended Dec. 31, 1988, and the net loss for the fourth quarter of 1989 of $191,728, or 12 cents per share, compares with net income of $316,000, or 22 cents per share, for the like period in 1988.

McDermott attributed the loss in the fourth quarter primarily to additional income tax expense, based upon year-end determination of taxable income. The loss on the sale of securities did not provide a current income tax benefit to the company, but will be available to offset any capital gains recognized in the future.

Total consolidated assets at Dec. 31, 1989 increased 21 percent to $122 million from $101 million at Dec. 31, 1988. Total consolidated loans of $72 million at Dec. 31, 1989 reflect an increase of 7 percent from $67 million in 1988, and liquid assets increased $16 million during 1989, including an increase of $14 million in Federal Funds sold.

Total consolidated deposits increased 30 percent from $82 million at Dec. 31, 1988 to $107 million at Dec. 31, 1989, and book value per share increased from $9.17 at Dec. 31, 1988 to $9.53 per share at Dec. 31, 1989.

DALLAS (FEB. 1) BUSINESS WIRE - The Oryx Energy Co. board of directors Thursday appointed Fred E. Meisenheimer as general auditor of the world's largest independent oil and gas company.

Meisenheimer has been assistant comptroller of the Dallas-based company. Over the past 10 years, he has managed financial reporting, financial policies and procedures, and international, general and joint-interest accounting functions.

Meisenheimer is a native of Jefferson, Texas, and earned a batchelor of business administration degree in accounting in 1967 from Stephen F. Austin University.

He received a CPA certificate in 1972 and, in 1987, earned a master's in business administration in finance from Southern Methodist University. Previous to his employment with Oryx Energy, Meisenheimer was an audit manager for Deloitte, Haskins and Sells.

Meisenheimer is a member of the Texas Society of Certified Public Accountants, the American Institute of Certified Public Accountants, and the Petroleum Accounting Society and the American Petroleum Institute.

Meisenheimer is married to the former Sidney Morris of Jefferson. They have two children and live in Garland.

Oryx Energy Co. conducts its domestic operations through Sun Energy Partners L.P. Oryx Energy, the managing general partner and 98-percent owner of the partnership, has assets in excess of $5 billion and proved reserves of more than 1 billion equivalent barrels. KANSAS CITY, MO. (FEB. 1) BUSINESS WIRE - US Sprint announced Thursday it has signed an agreement with U.S. Intelco Networks Inc. (USIN) to provide billing and collection services.

The agreement will go into effect during the first quarter of this year.

On Jan. 15, US Sprint announced it would give its customers the option of having long-distance charges appear as part of their monthly bill from their local telephone company. USIN has now joined a team of service providers who will administer those billing and collection service agreements to more than 1,300 independent telcos.

US Sprint also announced that it will honor a new independent telephone company calling card called ''Telcard.'' U.S. Intelco is assisting the independent telephone industry with the issuance and implementation of the card.

Under the terms of the Telcard agreement, US Sprint would permit subscribers of independent telcos to use the new calling card over the US Sprint long-distance network and be billed on their local telephone company bill. The card will enable Telcard customers to have their calls go over US Sprint's all-digital, fiber-optic network.

US Sprint and U.S. Intelco have indicated additional exploratory discussions are taking place regarding the introduction of other new jointly provided services.

U.S. Intelco is a consortium of independent telephone companies providing specialized services to over 600 independent telcos in 46 states.

US Sprint is a unit of United Telecommunications Inc., a diversified

international telecommunications company based in Kansas City.

SAN JOSE, CA (FEB. 1) BUSINESS WIRE - Silicon General Inc. (NASDAQ:SILN), a leading producer of semiconductors and telecommunications systems, Thursday reported results of operations for the second quarter of fiscal 1990.

The second quarter ended on Dec. 31, 1989.

Revenues for the three-month period for the semiconductor business (continuing operations) were $8.9 million, compared with $9.6 million for the like period in fiscal 1989. Earnings were $268,000, or 2 cents per share, compared with $453,000, or 3 cents per share, in the like period last year.

Revenues for the six-month period which ended on Dec. 31, 1989, were $17.9 million, compared with $18.3 million for the like period in fiscal 1989. Earnings for the six-month period were $693,000, or 5 cents per share, compared with $679,000, or 5 cents per share, in the like period last year.

Results are for the semiconductor business only. Silicon General is in the process of making its telecommunications business a separate company.

Revenues for the ''new'' telecommunications business for the quarter were $5.5 million, with earnings of $25,000. These figures include products sold under the ''Analog Solutions'' name.

Silicon General designs, manufactures and markets linear bipolar integrated circuits and CMOS digital integrated circuits. The ''new'' telecommunications business designs, manufactures and markets telecommunications equipment for telephone companies, and data conversion sub-systems and components.

BEVERLY HILLS, CA (FEB. 1) BUSINESS WIRE - Eric M. Hilton has been elected president of Conrad Hotels, the international subsidiary of Hilton Hotels Corp., by the board of directors, according to Barron Hilton, president and chief executive officer of Hilton.

Eric Hilton previously held the position of executive vice president of Conrad Hotels.

Additionally, Eric Hilton retains his current position as senior vice president -- international real estate development for the Hilton Hotels Corp. He also is a member of the board of directors.

''Eric, who literally came through the ranks in our company, knows the hotel business from top to bottom. Moreover, his contacts and abilities at the international level have been instrumental in developing Conrad Hotels, the name chosen for the international subsidiary which honors our father,'' said Barron Hilton.

''Existing Hotel Conrad projects, along with those which he has brought to the planning or negotiating stage, have lifted Conrad Hotels to an important level of competition on the global lodging scene.''

Eric Hilton began his career with Hilton in 1949 at the El Paso Hilton, where he served in various capacities in several departments. He then held a number of management positions at Hiltons throughout the country until 1966, when he was promoted to southwest sales manager for the company.

Hilton was then elected senior vice president of the company's franchise division, Hilton Inns Inc., in 1969.

In 1983, Hilton joined Conrad Hotels as senior vice president --

development, and was elected executive vice president in 1986.

Hilton is a director of the Conrad Hilton Foundation, Conrad International Hotels and the Little League Foundation. In addition, he serves on the advisory boards of the Conrad Hilton College of Hotel and Restaurant Management at the University of Houston and the Future Business Leaders of America/Phi Beta Lambda Inc., of Washington, D.C.

Hilton's office is located at Hilton World Headquarters in Beverly Hills.

Hilton Hotels Corp. is a publicly owned international lodging company with 270 properties in the United States. In all, more than 93,000 rooms in 220 U.S. cities are operated under the Hilton name. The company's growing overseas subsidiary, Conrad Hotels, operates properties in Queensland, Australia; St. Martin in the Caribbean; Monaco, Monte Carlo; Dublin, Ireland; and Chelsea Harbour in London.

Additional properties in Cancun, Mexico; Hong Kong; Brussels, Belgium; and Istanbul, Turkey, will open in 1991 and 1992.

#90032b0212 02/01/1990 ~Business Wire

CINCINNATI (FEB. 1) BUSINESS WIRE - National Sanitary Supply Co. (NASDAQ:NSSX) Thursday reported that its income for the year ended Dec. 31 1989 was $4,315,000, an increase of 10 percent over the $3,910,000 reported for the prior year.

Earnings per share for the year ended Dec. 31, 1989 were 71 cents, 9 percent above the 65 cents earned in 1988. These income and earnings per share comparisons exclude a gain of $830,000 recorded in the first quarter of 1988 from the cumulative effect of two changes in accounting principles.

National's sales for the year ended Dec. 31, 1989 were $262,351,000, 46 percent above prior-year sales of $179,191,000. This sales increase reflects the impact of acquisitions made during 1988, particularly Century Papers Inc. which was acquired by National in the third quarter of 1988.

For the fourth quarter ended Dec. 31, 1989, National's sales were $64,266,000, 4 percent above sales of $61,865,000 in the fourth quarter of 1988. Net income for the fourth quarter of 1989 was $839,000, or 14 cents per share, which compares with the $888,000, or 15 cents per share, reported in the fourth quarter of 1988.

Commenting on the company's performance, Paul C. Voet, vice chairman and

chief executive officer, stated: ''Our 1989 performance reflects National's continued market penetration in existing locations, evidenced by our 13 percent sales increase excluding the impact of acquisitions, as well as the successful integration of Century Papers, National's largest acquisition to date.''

Commenting further, Voet stated: ''Significant progress was made by Century Papers in the introduction and promotion of National's proprietary chemicals and equipment, which helped to elevate National's fourth-quarter gross profit margin from 30.1 percent in 1988 to 30.5 percent in 1989.

''Income in the fourth quarter was supressed, however, by increased selling and promotional expenses, higher medical insurance costs, and additional administrative expenses that were required to manage and control our rapid expansion. We expect these expenses to increase more in line with gross profit growth in 1990.''

Commenting on the outlook for 1990, Voet stated: ''We plan to resume our expansion activity in 1990 and make further progress toward our ultimate goal of becoming the first nationwide distributor of janitorial supplies. The combination of consistent internal growth and selective geographic expansion should continue to provide National with a balanced program of growth in 1990 and beyond.''

National Sanitary Supply Co. is the largest distributor of sanitary maintenance supplies in the United States.

Through its sales force of over 600 representatives and its network of 53 sales and distribution facilities located in 14 Western, Southwestern, and Midwestern states, National distributes cleaning chemical compounds, paper and packaging products and other maintenance supplies and equipment to a wide variety of customers.

VANCOUVER, British Columbia (FEB. 1) BUSINESS WIRE - David Patterson, president of Steelhawk Resources Ltd. (VcSE:SWU; COATS:STLH), announced that the company has entered into a research agreement with a U.S. nuclear engineering firm to review the test results and documentation of the Nucell technology developed by Paul Brown.

Brown is vice president of research and development for both Steelhawk Resources and Nucell Inc. Steelhawk owns a 49 percent equity interest and Peripheral Systems Inc., an Oregon corporation trading on the NASDAQ

systems, owns a 51 percent equity interest in Nucell. Nucell is an Idaho corporation that owns all of the rights to both the Resonant Nuclear Battery and the Ionic Battery.

In addition, the engineering firm will be participating in future experiments and developing a theory of operation for the Resonant Nuclear Battery and the Ionic Battery.

The research program has been structured to give third-party validation to Brown's theory that electricity can be generated from the decay of radioactive isotopes without first converting the energy to heat.

Further, Steelhawk Resources announces the granting of an incentive stock option for 500,000 common shares of the company at a price of $1.50 per share, to expire Feb. 1, 1992. The option price calculation was based on the last trade of the company's shares on the Ontario Over-The-Counter Market (COATS).

COOS BAY, OR (FEB. 1) BUSINESS WIRE - Georges C. St. Laurent Jr., chairman of the board and chief executive officer of Western Bank, Thursday announced that application had beed filed with the Federal Deposit Insurance Corp. for approval of a convertible debenture offering tentatively scheduled to be made in March.

Although the specific terms of the offering were not disclosed, St. Laurent advised that the offering would be limited to shareholders of the bank as of a future record date to be announced and the aggregate amount

of debentures offered would not exceed $10 million in principal amount.

The debentures will be convertible into common stock at a conversion price to be determined shortly before the offering is made. St. Laurent stated: ''The board of directors has approved the offering and initial preparations are underway to secure requisite approvals and to prepare the offering documents.'' He advised that additional information regarding the offering would not be made available until final pricing terms were decided upon and the offering had commenced.

Western Bank has 31 branches in 24 communities in Oregon with total assets of $420 million. Western Bank added a branch in Myrtle Point as a result of its recent acquisition of Bank of Myrtle Point.

Western Bank completed the year with a 54 percent rise in income before taxes from normal bank operations; a record $5,292,000 for the year ended Dec. 31, 1989, compared to $3,432,000 in 1988.

Net income for 1989 was $3,361,000, or $1.57 per share, compared to $4,098,000, or $1.89 per share, for 1988, a year when earnings were strengthened by about $2.1 million in litigation recoveries and the sale of surplus property, and a $555,000 tax benefit.

Fourth quarter 1989 net income was up 18 percent, to $729,000, or 34 cents per share, compared to $620,000, or 29 cents per share, in 1988.

ENGLEWOOD, COL (FEB. 2) BUSINESS WIRE - Tektronix Inc. finalized its acquisition of Colorado Data Systems Inc. (CDS) on Jan. 31.

CDS, based in Englewood, is a manufacturer of VXIbus C-sized cards as well as other modular instruments. CDS will operate as a wholly owned subsidiary of Tektronix under the company's Measurement Systems Division.

Tektronix and CDS were two of the founding members of the VXIbus Consortium. The combination of the two leaders in the VXIbus and card modular marketplace maximizes each company's strengths and solidifies Tek's position within the VXIbus marketplace.

Dick Knight, vice president of the Test and Measurement Group at Tektronix said, ''Tek's strong commitment to open industry standards, such as the VXIbus architecture, is enhanced by our acquisition of CDS. With this combination, Tek can offer its customers the widest range of testing solutions.''

Phil Mueller, general manager and founder of CDS, is optimistic about the market potential within the VXIbus arena. He explained, ''VXIbus is the fastest growing segment of the test and measurement market. This rapid growth demanded that CDS implement changes to achieve our long-term growth plans. Our relationship with Tektronix will help ensure CDS' continued growth.''

The acquisition plan allows CDS to operate as a wholly owned subsidiary guided by the general manager of Tektronix Measurement System Division, Larry Moulton. ''We feel Tektronix has established a leadership position in VXIbus. The CDS acquisition allows Tek to offer the broadest market coverage with CDS focused on C-size instrumentation and Tek concentrating on advanced D-size capabilities,'' explained Moulton.

Moulton noted that the combined strengths of the companies will provide for a greater choice of application solutions in such areas as testing, data acquisition, remote monitoring, process control, education, research and development.

Tektronix is a leading manufacturer of electronic products and systems in the areas of test and measurement, computer grahics and communications. Revenues in fiscal year 1989 totaled $1.4 billion from worldwide sales. The company employs about 15,000 workers.

CHICAGO (FEB. 1) BUSINESS WIRE - Information Resources Inc. (NASDAQ:IRIC) Wednesday announced fourth quarter revenues from continuing operations of $36.6 milion vs. $34.6 milion in the third quarter.

For the entire year, the company recorded revenues from continuing operations of $136.4 million, up 16 percent over 1988's comparable revenues of $117.7 million.

After the effects of discontinued operations, including reserves for the expenses of spinning off VideOcart, the company reportd a loss of $3.9 million for the quarter, or 23 cents per share.

For the entire year, the company reported a loss of $10.5 million, or 61 cents per share, reflecting, in addition to the above actions, restructuring charges taken at the end of the first quarter of 1989 and the implementation of FASB 96, an accounting change manadated by new accounting standards.

Chicago-based Information Resources Inc. develops and maintains computerized proprietary data bases, decision support software and mathematical models to assist clients, primarily in the consumer packaged good industry, in testing and evaluating their marketing plans for new products, media advertising, pricing and sales promotions.

EAST HANOVER, NJ (FEB. 1) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT), Thursday announced that former Inmet Chief Execuitve Officer Robert P. Gardner has joined the company as vice president for North American Operations.

Gardner will oversee Ultimate's United States-based vertical marketing subsidiaries, including sales, support, product development, and administration; North American dealer sales; and the operations of the company's Canadian subsidiary. He will be based at Ultimate's East Hanover headquarters.

Gardner became Inmet Inc. chief executive officer in 1987. The Pine Brook N.J. firm manufactures and distributes commercial imaging systems based on optical disk and PC technology. He managed the development of proprietary hardware and software; was instrumental in attracting outside investment to the public firm; and completed a successful merger with Communications & Cable during his tenure.

Prior to Inmet, Gardner was president and chief executive officer of EnMasse, a start-up company that developed and marketed a 68020, UNIX-based transaction processing system. He tripled the firm's installed base in less than a year, completed two new products, and raised financing needed to implement his strategic plans.

As managing partner for Bedminster Capital Group during 1985 and 1986, he served as an outside financial advisor and investment banker to other high-technology organizations.

Gardner was named Prime Computer's vice president for eastern operations in 1976. He was responsible for all facets of marketing Prime's products in three regions, seven districts and 17 branches stretching from Maine to Miami.

Markets included the federal government, distributors, OEM's, end users and major accounts. During his seven-year tenure, his territory's revenue

grew from $1 million to $95 million. It was the largest Prime marketing unit and accounted for more than 21 percent of company revenue. He was considered a key player in Prime's dramatic growth from a small company with limited field marketing experience to its position as a major competitor today.

The firm also provides education, training, consulting and field-maintenance services to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France, Australia and New Zealand.

CULVER CITY, CA (FEB. 1) BUSINESS WIRE - Showscan Film Corp. (NASDAQ:SHOW) reported results for its fiscal third quarter and nine months ended Dec. 31, 1989.

According to the announcement made by Showscan President Roy Aaron, the quarter's results when compared to the same period last year showed an increase in revenue to $1.9 million from $1.08 million and a comparable loss of $1.5 million (52 cents loss per share).

Aaron noted that Showscan had positive operating cash flow for the nine months and remains solidly ahead for the year-to-date period, with revenues up to $19 million from $4.7 million, and losses narrowed from last year's $3.3 million ($1.11 loss per share) to this year's $1.4 million (47 cents loss per share).

In commenting on the results, Aaron said: ''While we are not satisfied with the level of our financial results for the quarter, we can report several major accomplishments during the period in non-revenue areas. We succeeded in increasing our manufacturing capability by establishing production-line procedures during the quarter.''

Aaron added that the company continued to participate in advanced research programs for High Definition Television (HDTV) during the quarter. ''The selection of the Showscan film process and technology by the MIT Media Lab to demonstrate and test the future potential of Very High Definition Television (VHDTV) was another example of the growing recognition of the unique benefits of Showscan in a broad range of visual entertainment media '' he said.

Aaron pointed out that Showscan's agreement with Victor Sound Equipment (announced Dec. 21) was important to support the company's thriving Japanese markets. Victor, a subsidiary of Tokyo-based JVC Co. Ltd., is providing installation and maintenance services for Showscan products in Japan.

Showscan Chief Financial Officer James Sorenson said: ''Royalties and licensing fees for the nine months more than tripled, to approximately $1.6 million, an important indicator for our company. This increase re-affirms our progress towards our goal of fixed-cost coverage by royalties and licensing fees within the next 18 months.''

Showscan Film develops and markets worldwide a broad range of leisure-time attractions based on its patented 70mm/60-frames-per-second Showscan film process and related technologies.

#90032b0618 02/01/1990 ~Business Wire

SAN DIEGO (FEB. 1) BUSINESS WIRE - Jack White & Company Inc. of San Diego has become the first stock brokerage firm in the country to enable its

clients to buy and sell mutual funds on the secondary market, in the same way that many stocks are traded, according to Jack White, the firm's chairman.

''Up to now, the only way someone could trade open-end mutual fund shares was to buy from or sell to the mutual fund itself,'' White said. ''The trouble is, this is a very rigid system. It gives the customer almost no freedom or flexibility.''

White said that under the system in use today, potential mutual fund traders can either deal with the fund personally or have a broker who maintains a highly specialized trading operation do it for them. In both cases, traders can buy only at a price fixed once each day, and only for a very limited time.

Many funds insist that redemptions (orders to sell) be done in writing. Such a transaction can take days to complete. Many funds also have restrictions on how many shares may be sold and how long they must be held before selling.

His firm's new ''CONNECT'' program does away with all that, said White.

''We were the first of those specialized firms buying and selling no-load mutual funds for our clients since 1984,'' White said. ''For a small fee, we place their orders and take delivery of the shares, just like stocks.

''In the five years since then, we've built up quite an inventory of shares -- enough so that now, when one person wants to buy and another wants to sell the same fund, we can often cross the orders, transfer the ownership and not get the mutual fund involved at all.''

By making a secondary market in this way, White said, his firm can allow clients to trade shares for many more hours (currently from 5 a.m. to 6:30 p.m. Pacific Time, Monday through Thursday, 5 a.m. to 5 p.m. Friday, and even 3 p.m. to 6:30 p.m. Sunday evenings) and at any price the buyer and seller can agree on.

Though the mechanics of the trade are slightly different, from the client's point of view it's virtually identical to trading stocks -- including the flexibility to put in ''limit'' and ''good-till-canceled'' orders.

As a discount broker, White charges a small fee for each transaction. The minimum is $33 and the maximum is $100.

#90032b0620 02/01/1990 ~Business Wire

ANTWERP, Belgium (FEB. 1) BUSINESS WIRE - OSHAP TECHNOLOGIES, LTD. (NASDAQ Symbols: OSHUF, OSHSF, OSHWF) Thursday announced estimated preliminary financial results for the fiscal year ended Dec. 31, 1989.

The company stated that the preliminary results are subject to audit and end year adjustments, and that final audited results may vary from the preliminary report.

Net sales for the fiscal year ended Dec. 31, 1989 are expected to be approximately US $32 million, a 15 percent increase over 1988 net sales of approximately US $28 million.

The company further said it expects that overall net profit for its recently completed fiscal year will exceed US $2.5 million compared with a net loss of approximately US $1.3 million a year ago. In the nine months ended September 30, 1989, the company reported a net profit of approximately US $1.3 million or US $0.24 per share.

The company anticipates the operating profit for the recently completed fiscal year will exceed US $500,000 compared with an operating loss of approximately US $3.6 million in the fiscal year 1988. For the nine months ended September 30, 1989, the company reported an operating loss of approximately US $1.4 million. The company management noted that the fourth quarter was the best quarter ever for the company.

The management also noted that the results reflect the growth in the sales of the ROBCAD workstation as well as strong sales of the Medical division and continued improvement of productivity in Pegard. The company anticipates reporting its audited year end results by the end of March 1990.

Note: All figures have been converted from Belgian Francs to U.S. Dollars based on an exchange rate of BF 35.61 to US $1.00 as of Dec. 31, 1989.

OSHAP TECHNOLOGIES, LTD. provides flexible machining systems, standard automation products and advanced computer aided engineering workstations to major worldwide industrial concerns. OSHAP is also a manufacturer of hyperthermia and medical imaging equipment.

BEAVERTON, OR (FEB. 1) BUSINESS WIRE - Timberline Software Corp. (NASDAQ: TMBS), producer of software for the construction and property management industries, Thursday reported its highest annual net income in corporate history.

For the year ended Dec. 31, l989, Timberline's earnings increased 72 percent to $769,000 or $.31 per share compared to $446,000 or $.18 per share for the year 1988. Total revenue for 1989 rose to $10,741,000 from $8,980,000 the year before.

Net earnings for the fourth quarter were $306,000 or $.12 per share on sales of $3.0 million compared to net earnings of $86,000 or $.03 per share on sales of $2.6 million in the fourth quarter of 1988. In 1988, full year and fourth quarter earnings were reduced by a one-time $235,000 or $.10 per share charge due to the write-off of development costs of a discontinued tax preparation software product.

''Timberline continued to set annual records in 1989 in the core part of our business,'' said John Gorman, president. ''Personal computer software sales for the year hit a record $7.4 million and fees for maintenance and support also set a new high of $2.3 million. We also achieved the highest operating income in the company's history - $1.1 million.

''In December we released an enhanced version of our Medallion Construction package,'' Gorman added. ''The demand for this product, together with strong sales of Precision Estimating and Homebuilder packages, were the major factors in making December the highest software sales month in the company's history.''

Personal computer software sales for the quarter were $2.1 million, an increase of 12 percent over 1988. Revenue from maintenance and support services in the fourth quarter increased 24 percent to $648,000. Increased product development, customer support and marketing expenses pushed fourth quarter operating expenses to $2.1 million compared to $1.7 million in the like quarter a year ago.

Founded in 1971, Timberline Software Corp. is a leading international supplier of industry specific software for the construction, architect/engineering, property management and property-related banking industries.

SUNNYVALE, CA (FEB. 1) BUSINESS WIRE - MIPS Computer Systems Inc. (NASDAQ:MIPS) Thursday announced financial results for the fourth quarter and the fiscal year ended Dec. 31, 1989.

For the fourth quarter ended Dec. 31, 1989, revenue was $31,742,000 compared with $15,663,000 for the fourth quarter of 1988; 1989 fourth quarter net income was $2,339,000 compared with income from continuing operations of $918,000 and net income of $573,000 for the fourth quarter of 1988; earnings per share for the fourth quarter of 1989 were 12 cents compared with 5 cents from continuing operations and net income per share (including discontinued operations) of 3 cents in the fourth quarter of 1988.

For the fiscal year ended Dec. 31, 1989, revenue was $101,862,000 compared with $39,383,000 in 1988; 1989 income from continuing operations was $6,996,000 compared with a loss from continuing operations in 1988 of $2,982,000; 1989 income per share from continuing operations was 36 cents compared with a loss per share from continuing operations in 1988 of 19 cents; 1989 net income was $2,931,000 compared with a loss in 1988 of $3,718,000; and 1989 net income per share was 15 cents compared with a net loss per share in 1988 of 24 cents.

''We are pleased that both the fourth quarter and full year financial results met our expectations,'' said David G. Ludvigson, MIPS chief financial officer. Commenting further, Ludvigson stated: ''In October 1989, we introduced two new products; the RC3240 deskside system and the RC3260 departmental system. Both products were shipped in volume and contributed to the growth of revenue in the quarter.''

Robert C. Miller, MIPS chairman and chief executive officer stated: ''Our 1989 financial goals were to exceed $100 million in revenue, increase profitability in each sequential quarter, and complete a successful initial public offering. We have achieved these objectives.

MIPS Computer Systems Inc., headquartered in Sunnyvale, is a world leading supplier of RISC (Reduced Instruction Set Computer) technology for the computer system and embedded control markets. The company markets a family of computer systems, subsystems and board products based on its binary- compatible RISC architecture and industry standards, including MIPS UNIX-based RISC/os operating system.

#90032b0627 02/01/1990 ~Business Wire

SUNNYVALE, CA (FEB. 1) BUSINESS WIRE - Silvar Lisco (NASDAQ/NMS:SVRL) Thursday announced a net loss of $147,000 on revenue of $2,845,000 for the third quarter of fiscal 1990 ended Dec. 31, 1989, compared with a net loss of $1,377,000 on revenue of $4,567,000 during the last year's third quarter.

Net loss per share was 2 cents, based on 7,403,199 shares during this year's third quarter, compared with a net loss per share of 18 cents, based on 7,552,139 shares during last year's third quarter.

The net income for the nine months ended Dec. 31, 1989 was $1,570,000 on revenue of $9,874,000, or 21 cents per share, based upon 7,407,495 shares, compared to a net loss of $3,311,000 on revenue of $15,065,000, or 44 cents per share, based on 7,497,206 shares, in the comparable period last year.

Anothony Wainwright, president of Silvar-Lisco, said: ''In the third quarter we met our most important target -- increasing revenues from the sale of software licenses over the previous quarter.

''Since the sale of the engineering group in Belgium, the company no longer receives research and development contract revenues, which accounted for $740,000 of revenues in the previous quarter. With the company now relying solely on product sales and maintenance revenues, this was our most critical short-term objective.

''We have also focused intense effort on changing our corporate culture to emphasize that listening to our customers -- and meeting their needs -- is the overriding strategic objective of all of our activities.

''Our customers are responding favorably to this new attitude,'' Wainwright added, ''Our new willingness to listen, improved customer support, strengthened marketing, and several new additions to our United States sales force have greatly expanded our pool of potential sales opportunities.''

Silvar-Lisco is a leading vendor of advanced CAE (Computer-Aided-Engineering) software products for the design of semi- and full custom integrated circuits. The firm's products are marketed both domestically and internationally to integrated circuit manufacturers and large electronic systems manufacturers.

WALLINGFORD, CT (FEB. 1) BUSINESS WIRE - NOVAMETRIX MEDICAL SYSTEMS INC. (NASDAQ/NMS Symbol: NMTX) Thursday announced that the U.S. Court of Appeals has reversed a U.S. District Court decision that the Company's pulse oximeters infringed a patent owned by the BOC Group Inc.

The Company also stated that it has achieved revenues of approximately $4,800,000 for the third quarter ended January 28, 1990.

The U.S. Court of Appeals remanded the patent action to the U.S. District Court for the District of Connecticut for additional proceedings. Based upon the decision of the U.S. Court of Appeals, the Company believes that the action will be dismissed.

William J. Lacourciere, President and Chief Operating Officer of NOVAMETRIX MEDICAL SYSTEMS INC., stated, "We are extremely pleased by the decision of the U.S. Court of Appeals. We have always believed that the Company would ultimately prevail in this action and this decision bears out the Company's firm position."

In addition, NOVAMETRIX stated that it has achieved revenues of approximately $4,800,000 for the third quarter ended January 28, 1990. The Company expects to report a loss for the quarter due to the expenses associated with restructuring of the Company. NOVAMETRIX anticipates that it will report final results for the quarter by the end of February.

Commenting on the preliminary results, Louis Pellegrino, Chairman and Chief Executive Officer, stated, ''We are extremely pleased and gratified with the significant improvement in sales for this quarter, which demonstrates our customers' confidence in the quality of our products.''

NOVAMETRIX MEDICAL SYSTEMS INC. is a leading designer, developer, manufacturer and marketer of medical electronic instruments which non-invasively and continuously assess a critically ill patient's oxygen and carbon dioxide status. The Company's products are primarily used in operating rooms, intensive care units and respiratory therapy departments.

TUSTIN, CA (FEB. 1) BUSINESS WIRE - CMS Enhancements Inc. (NYSE:CME) Thursday announced higher net sales and lower net income for the second quarter of fiscal 1990 ended Dec. 31, 1989.

Net sales for the quarter were a record $64,838,000, compared with $56,659,000, for the same quarter a year ago. Net income for the second quarter ended Dec. 31, 1989 was $874,000, or 28 cents per share, compared with $1,339,000, or 55 cents per share for the same quarter last year.

Net sales for the first half of fiscal 1990 were $107,771,000, compared with $104,678,000, for the comparable period last year, while net income for the first six months of fiscal 1990 was $1,731,000, or 55 cents per share compared with $2,467,000, or $1.06 per share, for the same period a year ago.

Per share results have been computed with 29 percent more shares outstanding for the current year's second quarter and with 36 percent more shares outstanding for the first six months of fiscal 1990 than in prior comparable periods, and have been adjusted to reflect the one-for-four ''reverse'' split of the company's common stock on Dec. 5, 1989.

The company's determination to gain market share during the last quarter resulted in increased sales of commodity products including low-end disk drives at low margins. While sales of established value-added enhancement product lines such as Apple and PS/2 also increased during the quarter, the company experienced increasing competitive pressures on these and other higher margin product lines.

Jim Farooquee, president and chief executive officer of CMS stated, ''While this quarter's results are disappointing to us, our corporate strategy should enable us to expand our current product lines and lead us into new product areas which are complimentary to our core enhancement business, while giving us the opportunity to significantly improve our profit margins.''

CMS Enhancements is a producer and global marketer of mass data storage devices and accessories for personal and laptop computers manufactured by Apple, IBM, Digital Equipment, Compaq, AST, Commodore, AT&T, Zenith, Tandy Toshiba and others. The company markets its products through dealers and distributors in 56 countries worldwide.

#90032b0631 02/01/1990 ~Business Wire
PHOENIX (FEB. 1) BUSINESS WIRE - Pinnacle West Capital Corp. has

successfully completed the restructuring of more than $650 million in debt with existing lenders, Chairman Keith Turley said Wednesday.

In addition to the modified debt agreements, Turley said Pinnacle West has signed a definitive agreement with a four-bank consortium providing up to $312 million in interim financing to satisfy the company's agreement with the Office of Thrift Supervision (OTS).

Banks involved in the consortium are Citibank, Chase Manhattan Bank, Chemical Bank and Morgan Guaranty Bank and Trust Company.

On Wednesday, federal regulators placed MeraBank into receivership. Turley said that action will not impact the debt restructuring or a capital infusion agreement previously reached with the OTS.

Under the agreement with the OTS, the capital infusion includes $300 million in cash plus accrued interest of approximately $12 million and an unsecured note payable in 12 years for $150 million plus accrued interest.

Upon payment of the $450 million, Pinnacle West will be released from further obligations under a ''keep-well agreement'' required by the former Federal Home Loan Bank Board in conjunction with the 1986 purchase of MeraBank.

The restructured debt agreements, which include $624 million of existing debt and $52 million in letter of credit guarantees and other contingent obigations, extend original maturity dates by two years, Turley said.

He said existing interest rates will be maintained under the debt agreements, excpet for certain interest rate options available to lenders during the two year extension period.

As part of the restructuring and as previously disclosed, Pinnacle West pledged Arizona Public Service Company (APS) common stock as security, Turley said. He stressed that none of APS assets are included as part of the stock pledge, nor will the pledge affect of APS, a wholly owned Pinnacle West subsidiary.

Pinnacle West subsidiaries include APS, SunCor Development Co., Malapai Resouces Company and El Dorado Investment Company.

MONROEVILLE, PA (FEB. 1) BUSINESS WIRE - RESPIRONICS INC. (NASDAQ/NMS

Symbol: RESP) Thursday announced results for the second quarter and six months ended December 31, 1989.

The Company reported record net sales for the second quarter of $4,832,120 compared to $4,221,038 recorded in the second quarter last year. Net income increased 25 percent to $396,479, or $0.23 per share, compared to $318,008, or $0.19 per share, for the quarter ended December 31, 1988.

For the six months ended December 31, 1989, net sales were $9,256,016 compared to $8,113,124 reported in the comparable six month period in fiscal 1989. Net income was $757,569, or $0.44 per share, an increase of 37 percent compared to net income of $551,273, or $0.33 per share, for the six months ended December 31, 1988.

Dennis S. Meteny, Vice President and General Manager of RESPIRONICS, INC. stated, ''We are extremely pleased with the increased growth in sales of our product lines, resulting in record results for our second quarter. In keeping with our commitment to cost control, gross margins improved to 46 percent in the second quarter from 42 percent for the comparable quarter last year.''

''Our BagEasyR product, introduced in May 1988, attained record sales levels in the quarter and indications are that this increasing sales trend will continue,'' Meteny continued. ''The BiPAPTM Ventilatory Support System, co-developed with Dr. Mark Sanders of Presbyterian University Hospital of Pittsburgh, was released to the marketplace late in the quarter.

''Initial market response to this product has been favorable. We are hopeful that the proprietary technology of this unique product will enable RESPIRONICS to address a broad variety of respiratory disorders and enhance our reputation and recognition within the industry.

''We achieved these results in spite of higher research and development and manufacturing expenses associated with this product introduction. These investments will provide RESPIRONICS with significant growth opportunities for increased revenues and earnings in the near future.''

RESPIRONICS INC. designs, develops, manufactures and sells respiratory medical products for use in the home, hospitals and in emergency medical situations.

LOS GATOS, CA (FEB. 1) BUSINESS WIRE - ShareBase Corp. (NASDAQ/NMS:SHBS) announced Thursday a return to profitability for its fourth quarter ended Dec. 31, 1989.

Based on preliminary and unaudited results, the company anticipates net income of $108,000 for the fourth quarter ended Dec. 31, 1989 on revenues of $7,294,000 compared to a net loss of $812,000 on revenues of $7,179,000 for the fourth quarter, 1988.

For the year ended Dec. 31, 1989, the company anticipates a net loss of $7,466,000 on revenues of $28,717,000, compared to a net loss of $1,676,000 on revenues of $28,661,000 for the like period in 1988.

The anticipated net income per share is 1 cent for the fourth quarter, 1989, with a net loss of 84 cents for the year ended Dec. 31, 1989, compared to a net loss per share of 9 cents and 19 cents for the comparable periods in 1988.

The 1989 net loss included restructuring costs amounting to approximately $3.6 million, or 40 cents per share, which the company incurred in the third quarter, related to a work force reduction, a write off of all capitalized software development costs and accruals for excess facilities.

''We are extremely pleased that we were able to return to profitability in the fourth quarter,'' said ShareBase predident and chief executive officer John Cavalier. ''The restructuring plan we implemented late last year has paid off as we were able to lower our break-even by nearly $1 million in the fourth quarter, which accelerated our return to profitability.''

According to Cavalier, ShareBase sold approximately 30 of its new Server/8000 SQL database systems in 1989 and looks ''forward to increasing that total in 1990 as we continue to upgrade our current customers and add new Fortune 500 customers.''

Cavalier added that the company continues to negotiate with prospective partners to raise working capital, but added that the company might have to seek protection under Chapter 11 if the financing is not completed in a timely manner.

SAN DIEGO (FEB. 1) BUSINESS WIRE - Molecular Biosystems Inc. (NASDAQ/NMS:MOBI) Thursday announced a profit of $1,317,782 and $4,156,913 or 13 cents and 43 cents per share, respectively, for the three- and nine-month periods ended Dec. 31, 1989, as compared with $1,214,969 and $1,601,642, or 13 cents and 17 cents per share, respectively, for the like periods last year.

Total revenues, including interest income, for the three- and nine-month periods ended Dec. 31, 1989, were $5,408,881 and $15,991,020, respectively compared with $3,021,387 and $6,136,460 in the corresponding periods last year.

''We are very pleased to continue the trend of increasing revenue and profit for MBI,'' said Dr. Kenneth J. Widder, Molecular Biosystems' chairman. ''This past quarter witnessed record high revenue and earnings for the company. This financial strength will help position the company for long-term growth,'' he said.

Molecular Biosystems Inc. of San Diego is a leading biomedical firm developing proprietary medical products that diagnose human disease, including Albunex, an injectable contrast agent for use in ultrasound imaging. In addition, the company is a leading developer of direct, non-radioactively labeled genetic probe products.

SAN FRANCISCO (FEB. 1) BUSINESS WIRE - The Gap Inc. Thursday reported sales of $94 million for the four-week period ended Jan. 27, 1990, an increase of 34 percent over sales of $70 million in January 1989.

Comparable store sales increased 24 percent in January 1990, compared with a 6 percent increase a year ago. The company's 1989 fiscal year will end on Feb. 3, 1990, and results of that 53rd week will be included in the fourth-quarter operating results.

Sales of $1.564 billion for the 52 weeks ended Jan. 27, 1990, represent an increase of 25 percent over sales of $1.252 billion for fiscal 1988. Year-to-date comparable store sales were up 15 percent, compared with an 8 percent increase in the prior year.

At Jan. 27, 1990, The Gap Inc., operated 962 stores, compared with 900 at Jan. 28, 1989, an increase of 7 percent.

#90032b0646 02/01/1990 ~Business Wire

MILFORD, Conn. (FEB. 1) BUSINESS WIRE - BIC Corp. for the fourth quarter ended Dec. 31, 1989 reported net income of $3,251,000, or 27 cents per share, compared with $3,190,000, or 26 cents per share, in the same period last year.

Sales for the quarter were $69,851,000 compared with $59,208,000. Net income for all of 1989 was $23,022,000, or $1.90 per share, compared with $29,562,000, or $2.44 per share, in 1988. Net income in 1988 included an extraordinary credit of $2,800,000, or 23 cents per share.

Sales for 1989 increased to $330,262,000 from $294,878,000 last year. ''In our U.S. operations, combined profits from our core businesses - writing instruments, lighters and shavers - recorded improvements in both the fourth quarter and full year,'' Bruno Bich, president, said.

''Fourth-quarter results showed substantial sales, earnings and unit gains in shavers, with solid, but smaller improvements in writing instruments. Lighters, with flat dollar sales, had a decline in earnings. All three groups maintained or improved market share.

''The major factor contributing to the operating earnings decline for the full year was the expenses associated with the introduction of BIC perfumes, which resulted in an after-tax loss of approximately $5 million. To date, perfume sales have been well below expectations and, as previously indicated, we are in the process of developing a new marketing strategy. This product line should have a considerably smaller negative impact on our 1990 earnings.'' -0- T

SAN RAFAEL, CA (FEB. 1) BUSINESS WIRE - International Microcomputer Software Inc. (NASDAQ:IMSFC) Thursday announced that the company has selected Feb. 12, 1990, as the record date for shareholders for the company's previously announced rights offering filed with the Securities and Exchange Commission last December.

The company expects the offering price to be 3 cents per share.

According to Geoff Koblick, president of IMSI, each shareholder as of the record date will be able to purchase as a basic subscription privilege one share of the company's common stock for every two shares owned on Feb. 12, 1990.

In addition, each shareholder who has fully exercised the basic subscription will be able to subscribe for an unlimited number of offered shares pursuant to an oversubscription privilege, with such additional shares to be allocated pro-rata among those existing shareholders who exercise their oversubscription privilege.

If all of the shares offered by the rights offering are exercised, IMSI will issue an additional 60,557,696 shares of the company's common stock.

Shareholders will have approximately 20 days to exercise these rights. At the end of the 20-day period these rights will expire.

International Microcomputer Software Inc. publishes and distributes graphics and desktop publishing software products for IBM and IBM-compatible microcomputers, and distributes hardware products that are complementary to its software products.

#90032b0649 02/01/1990 ~Business Wire
RIVERSIDE, Calif. (FEB. 1) BUSINESS WIRE - Fleetwood Enterprises Inc. (NYSE/PSE:FLE) Thursday announced preliminary sales of approximately $345 million for the third fiscal quarter ended Jan. 28, 1990.

This sales volume represents the second strongest winter quarter in the company's history, behind only the record $346.8 million achieved in the similar period of fiscal 1989.

''We are pleased with the company's performance during the quarter considering the sluggish economic environment we have been operating in,'' said Fleetwood President Glenn Kummer. ''Moreover, our market share in both recreational vehicles and manufactured housing is up over last year.''

Preliminary sales for the first three quarters of fiscal 1990 totaled about $1.12 billion, a decline of 6 percent from the record $1.19 billion achieved in the first nine months of fiscal 1989. In reporting the year-to-date numbers, the company noted that last year' s initial three quarters contained 40 weeks compared with this year's 39 weeks.

Final sales and earnings as well as unit shipments by product line will be announced in about four weeks.

Recreational vehicle sales for the third quarter were nearly $213 million compared with $213.1 million recorded last year. Motor home sales were about $140 million compared with $141.3 million recorded in the same period last year.

Travel trailer sales were about $71 million compared with last year's sales of $71.8 million. Sales for the company's recently acquired folding trailer division were approximately $2 million.

For the first nine months of fiscal 1990, recreational vehicle sales totaled nearly $693 million, a 9 percent decline from the $763.4 million recorded last year. Motor homes accounted for $466 million of current year RV sales, and travel trailers $225 million.

Manufactured housing sales for the quarter were approximately $124 million compared with $126.7 million reported last year. For the first three quarters, sales were off 4 percent to about $394 million compared with last year's sales of $409.4 million.

The company's supply and finance subsidiaries together contributed additional revenues of about $8 million for the quarter and $29 million for the nine-month period.

Fleetwood is the nation's leading producer of motor homes, travel trailers

and manufactured housing. The company operates 21 recreational vehicle and 26 housing plants in 17 states and Canada.

#90032b0653 02/01/1990 ~Business Wire

HOUSTON, Texas (FEB.1) BUSINESS WIRE - Compaq Computer Corp. (NYSE: CPQ) Thursday announced sales of $2.9 billion and net income of $333 million, or $7.76 per share on a fully diluted basis, for the year ended Dec. 31, 1989.

Sales for 1989 increased by 39 percent over 1988, when the company reported revenues of $2.1 billion. Net income increased by 31 percent compared with net income of $255 million, or $6.27 per share on a fully diluted basis, in 1988.

For the fourth quarter of 1989, sales were $788 million, an 18 percent increase over the $668 million reported in the same period of 1988. Net income for the fourth quarter of 1989 was $79 million, or $1.84 per share, which compares to net income of $92 million, or $2.18 per share in 1988, a decrease in net income of 14 percent.

''In 1989, the U.S. PC market experienced a slowing growth rate. However, significant new products combined with strong growth in the European and international sales of our products made 1989 a good year for Compaq,'' said Rod Canion, president and chief executive officer, Compaq Computer Corp.

''Compaq's European and international sales grew 62 percent in 1989 over 1988 and exceeded $1 billion in annual revenue for the first time. This significant increase in sales moved Compaq to the number two market share position in the European business PC market according to Paris-based market researcher IEE Dataquest. Our North American revenues increased by 24 percent in 1989 over 1988, reinforcing Compaq's number two market share position in business PCs.

''The small decline in net income in the fourth quarter reflects the slowing growth rate of the PC market, coupled with an increased level of expenditures related to Compaq's entry into the PC Systems market with the SYSTEMPRO product line,'' said Canion. ''We expect this slower market growth to continue in 1990.''

The successful introduction of new products significantly contributed to the company's success in 1989. In April, Compaq introduced the COMPAQ DESKPRO 286e, a small footprint, 286 microprocessor-based desktop computer

with integrated Video Graphics Array (VGA), five expansion slots, room for four storage devices and standard interfaces. This product was one of Compaq's highest volume products during 1989.

The COMPAQ DESKPRO 386/33, introduced in May, utilizes the 33-MHz Intel 386 processor and features the high-performance COMPAQ Flex architecture, integrated VGA graphics and a streamlined desktop design that still allows for eight expansion slots and five storage devices. According to market researcher InfoCorp, based in Santa Clara, California, the COMPAQ DESKPRO 386/33 is the largest selling 33-MHz 386-based PC in the world.

In October, Compaq introduced the COMPAQ LTE and COMPAQ LTE/286 notebook-sized laptops. Customer orders exceeded supply throughout the fourth quarter of 1989 and into the first quarter of 1990. Compaq does not currently anticipate that demand will be completely met for these products until the second quarter of 1990.

These 6-pound laptops measure just 8 1/2 by 11 inches and offer more than 3 1/2 hours of battery life. The COMPAQ LTE/286 incorporates a 12 MHz 80C286 microprocessor; the COMPAQ LTE a 9.54-MHz 80C86 microprocessor. They were the first laptops of this size to offer a 40- or 20-megabyte fixed disk drive and a standard 3 1/2-inch, 1.44 MB diskette drive. The COMPAQ LTE family was quickly recognized for its outstanding design and quality by being named to several prestigious ''Product of the Year'' lists.

On November 6, Compaq announced the COMPAQ SYSTEMPRO and COMPAQ DESKPRO 486/25, both incorporating the Extended Industry Standard Architecture (Extended ISA or EISA). EISA is a compatible extension of the 8-/16-bit industry standard bus design which can also accommodate high-performance 32-bit expansion boards.

The COMPAQ SYSTEMPRO, which began shipping in late December, features a tower design and is the world's first PC system to support ''multiprocessing'' tasks and applications. Its primary market is as a network server. With 8 to 40 MIPs of computing power, depending on product configuration and number of processors, the COMPAQ SYSTEMPRO delivers performance that is comparable to minicomputer class systems. It is also the first PC system to offer drive array technology - previously found only on mainframes - which delivers significantly higher disk subsystem performance than standard PC products.

The COMPAQ DESKPRO 486/25 is the world's most powerful desktop personal computer, powered by the new Intel 25-MHz, 15 MIPs, 486 microprocessor. It has the same streamlined design as the COMPAQ DESKPRO 386/33 and features the COMPAQ Flex architecture, a new, second-level cache controller and an interleaved memory architecture. The COMPAQ DESKPRO 486/25 is expected to begin shipping in the first quarter of 1990.

COMPAQ LAN MANAGER 386/486, which was also announced on November 6, is the highest performance OS/2-based LAN operating system and takes advantage of the performance benefits of 386 and 486 technology. The COMPAQ LAN MANAGER 386/486 is expected to ship in the first half of the year.

COMPAQ sales outside North America contributed 46 percent of the Company's revenue in 1989. To support growing international sales, two new Compaq subsidiaries were opened during 1989 in Norway and Denmark. Compaq also entered the South American market by authorizing sales of COMPAQ products through Authorized COMPAQ Computer Dealers in Chile, Venezuela and Colombia.

In addition, the Company's manufacturing facility in Erskine, Scotland began the second phase of expansion since its opening in 1987. The additional 230,000 square feet of space, which will be operational by the second half of 1990, will bring the plant to 490,000 square feet. In September, Compaq acquired the former Wang Laboratories facility in Stirling, Scotland to serve as a center for service and repair operations. Together the Stirling and Erskine facilities will bring the total Compaq Scottish operation to 625,000 square feet.

In December 1988 work began on a Compaq-owned 366,000 square foot facility in Singapore to allow the Company to move its administrative operations and printed circuit board manufacturing from a leased building. Construction progressed throughout 1989 and is expected to be complete in April 1990.

The Company's Common Stock and 6 1/2% Convertible Subordinated Debentures are listed on the New York Stock Exchange under the symbols CPQ and CPQ 13 respectively.

Compaq Computer Corp. is a world leader in the manufacture of PC systems, and desktop, portable and laptop personal computers. COMPAQ products are sold in 61 countries through a network of more than 3,000 Authorized COMPAQ Computer Dealers.

COMPAQ and DESKPRO are registered trademarks (registered U.S. Patent and Trademark Office) and COMPAQ SYSTEMPRO, COMPAQ LTE, COMPAQ LTE/286 and COMPAQ DESKPRO 486/25 are trademarks of Compaq Computer Corporation.

Product names mentioned herein may be trademarks and/or registered trademarks of their respective companies.

#90032b0665 02/01/1990 ~Business Wire

AUSTIN, Texas (FEB. 1) BUSINESS WIRE - Healthcare International Inc. (ASE PSE:HII) Thursday announced results for the second fiscal quarter ended Dec. 31, 1989.

Net operating revenues for the period increased 4 percent to $80.3 million compared with $76.9 million in the second quarter of fiscal 1989. The company reported a net loss for the quarter totaling $12.0 million, or $1.61 per share, vs. a loss in the like period last year of $18.2 million, or $2.43 per share.

The net loss for the period ended Dec. 31, 1989, included losses from operations of $3.9 million related to Pali Momi Medical Center, which was sold in December 1989. Also, the company realized a loss on the sale of Pali Momi of approximately $3.4 million in excess of the amount previously reserved for its disposition.

The net loss in the prior-year period included unusual and extraordinary items of approximately $12 million.

For the six months ended Dec. 31, 1989, Healthcare reported net operating revenues of $160.8 million compared with $151.0 million last year, representing an increase of 6 percent. The net loss for the year-to-date period, including the non-operating and extraordinary items discussed above, totaled $22.2 million, or $3.02 per share, vs. $18.0 million, or $2.42 per share, last year.

Jean P. Smith, president, noted that utilization statistics for the company's hospitals were lower in the second fiscal quarter of 1990 compared with the like period last year, reflecting continued strong competition in many of the company's markets, and the impact on operations of the overall financial position of the company.

Nevertheless, she pointed out that benefits from the company's restructuring program are beginning to be realized. ''An example of this progress is a reduction in our operating expenses, which totaled $61.9 million this past quarter compared with $66.0 million in the first fiscal quarter of 1990 and $62.9 million in the second quarter last year,'' said Smith.

''If the impact of Pali Momi were removed from these figures, our operating expenses would be down more than 8 percent from last year.'' Smith also noted that Healthcare's sale of Pali Momi reduced liabilities by more than $70 million.

''The company continues to pursue its restructuring plan outlined last summer, under which Healthcare will concentrate on its core psychiatric and Brown Schools hospitals,'' Smith said. ''As further steps in this plan are accomplished, including the restructuring of debt and certain leases, more resources are being directed to improving the competitive position of our remaining hospitals.''

Healthcare International provides a wide range of health care products and services to both local and national markets through 24 facilities in 7 states. The company's Class A common stock is listed for trading on the American and Pacific Stock Exchanges under the symbol HII.

SAN FRANCISCO (FEB. 1) BUSINESS WIRE - William & Clarissa Inc. (NASDAQ:

WMCL) announced it is now selling its new product line, "Kids William & Clarissa" to mass market retailers. The products will be available to the consumer by April.

Kids is a complete line of premium quality products formulated especially for children aged 1-12. The product line, all of which is hypoallergenic and dermatologically tested, includes hair care, skin care, sun care, and specialty items.

To support William & Clarissa's entry into the mass retail market, the company has appointed Mary George, president of its Kids William & Clarissa division, to the additional positions of executive vice president and chief operating officer.

William A. Meyer, president and chief executive officer of William & Clarissa, commented: "This move is consistent with our recent focus on bringing high quality children's products to the mass market. Ms. George has extensive experience in this area, having served most recently as president of VLI Corporation." George succeeds Terry L. McGovern, who has resigned as an officer and director of the company.

Meyer recognized a niche for a children's line of personal care products when he introduced William & Clarissa in department stores in late 1988. In October 1989 the company decided to extend the market by branching out to drug and food stores, and hired George and her management team to launch Kids.

A national market study of the Kids line showed substantial consumer interest and purchase intent in the new products and the company has now shifted its focus to the larger opportunity in the mass market.

The company also reported that its board of directors has authorized its officers to negotiate bank credit lines needed to support its accelerated entry into the mass retail market. William & Clarissa Inc. designs, develops and markets personal care products and accessories primarily for children in the 1-12 age group.

#90032b0667 02/01/1990 ~Business Wire

LOS ANGELES (FEB. 1) BUSINESS WIRE - Caesar's World Inc. Thursday said it estimates that its earnings per share will range between three and ten cents for the fiscal 1990 second quarter ended Jan. 31.

In the comparable quarter of fiscal 1989, Caesars World's net income was

$10,383,000, or 42 cents per share, on approximately the same number of common and common equivalent shares outstanding.

The company said its estimates indicate earnings per share for the first six months of fiscal 1990 ended Jan. 31, 1990, will range between 74 and 81 cents. For the comparable period of fiscal 1989, Caesars World's net income was $33,096,000, or $1.35 per share.

The company said the primary factor in its expected earnings decline for the fiscal 1990 second quarter was substantially lower win percentages at both of its Nevada hotel/casino operations in Las Vegas and Lake Tahoe, despite the fact that business remained strong and the volume of casino play increased significantly over the same prior-year quarter.

In fact, both Caesars Palace in Las Vegas and Caesars Tahoe in northern Nevada each established records for table-game activity for any quarter in their respective histories. The company emphasized that the table-game record at Caesars Palace was achieved even though there was a substantial increase in casino capacity on the Las Vegas Strip during the most recent quarter.

The company also announced Thursday that it intends to proceed with its previously authorized program to repurchase shares of its common stock on the open market or in negotiated purchases. The company's board of directors previously authorized the repurchase of up to three million shares, and, to date, the company has repurchased 55,000 shares. The timing and actual completion of any further purchases will depend on market conditions.

SECAUCUS, NJ (FEB. 1) BUSINESS WIRE - ComputerLand announced Thursday that its Secaucus franchise has opened the first computer store in the Soviet Union.

The new Moscow store is a franchise of ComputerLand of Europe, a wholly owned subsidiary of ComputerLand Corp.

According to store owner Michael Tseytin, a Russian immigrant who owns ComputerLand stores in Secaucus and Dresher, Pa., the Moscow operation will carry products from major vendors, including IBM, Compaq, Epson, AST and Hewlett-Packard. The store will comply with all Department of Commerce trade regulations.

''I'm thrilled to have the opportunity to own and operate a store in my homeland,'' said Tseytin. ''When my family moved to the West in 1980, I never dreamed I'd return to open a business in the heart of Moscow.''

The grand opening was held in anticipation of the International Computer Technology Exposition, to be held in Moscow March 6-13. ComputerLand is a sponsor of COMTEK '90, which will be the largest computer trade show to date held in the Soviet Union.

''COMTEK '90 represents a tremendous marketing opportunity for the computer industry,'' said Vic Leventhal, ComputerLand executive vice president. ''It will provide manufacturers with the means to present their product lines firsthand, and to make them available through the Moscow store.''

ComputerLand Corp. is the world's largest franchised chain of computer retail stores.

#90032b0672 02/01/1990 ~Business Wire

MINNEAPOLIS (FEB. 1) BUSINESS WIRE - Dayton Hudson Corp. today reported that its net retail sales for the four weeks ended Jan. 27, 1990, increased 12.2 percent to $711 million from $634 million a year ago.

Comparable-store sales were up 5.2 percent from the same period a year ago.

Kenneth A. Macke, chairman and chief executive officer, said that the corporation's results were as expected. ''We are especially pleased with the strength of Target's sales increases,'' Macke said. ''All three companies were comparing against very strong January increases in 1989 when the corporation's comparable sales growth was up 10.4 percent. Inventories in all our companies are in good shape and all were light on clearance.''

Macke said the corporation continues to expect to report strong profit performance for the fourth quarter and the year.

January sales by business segment for the four weeks were as follows:

o Target's total sales rose 19 percent while comparable-store sales were up 8 percent for January.

o Mervyn's total sales increased 4 percent and comparable-store sales increased 1 percent for January.

o Dayton Hudson Department Store Co.'s total and comparable-store sales were down 1 percent in January.

Sales for the 52 weeks ended Jan. 27 were $12.78 billion, up 14.0 percent from $11.21 billion in the same period a year ago. Comparable-store sales for the 52 week period were up 6.4 percent compared to the same period last year.

Dayton Hudson will end its 1989 fiscal year on Feb. 3, 1990. It is one of the major retail companies on a 53-week year in 1989.

As of Jan. 27, Dayton Hudson operated 657 stores in 33 states.

BERKELEY, CA (FEB. 1) BUSINESS WIRE - TENERA L.P. (AMEX:TLP) announced Thursday revenue of $41.8 million and earnings of $5.8 million, or 63 cents per unit for the 12 months ended Dec. 31, 1989.

This compares with revenue of $31.8 million and earnings of $6 million, or 66 cents per unit in fiscal 1988. After elimination of depreciation and amortization, cash income was 80 cents per unit, compared to 67 cents for the prior year.

During 1989 TENERA paid quarterly cash distributions at the rate of 20 cents per unit, or 80 cents for the year, resulting in a pre-tax yield of 12.8 percent. Taxable income for 1989 is estimated at 35 cents per unit, for an after-tax yield of 10.6 percent (at unit year-end trading price and assuming a combined maximum federal and state tax rate of 40 percent).

TENERA L.P. provides information based services and software products for utilities and large industrial corporations through offices in Arizona, California, Idaho, Maryland, Michigan, New York, North Carolina and Tennessee.

LOS ANGELES (FEB. 1) BUSINESS WIRE - Westwood One's new daily entertainment news program, MTV News, is slated to begin airing exclusively on the Westwood One Radio Networks on Monday, April 2.

The program is expected to debut on more than 150 affiliated radio stations nationally.

MTV News will be fed via satellite to radio stations for airing twice each weekday, once in the morning, followed by an updated version every afternoon.

Each 2-1/2 minute segment will carry one minute of advertising which will provide highly desirable inventory to sell to national advertisers and in turn contribute significant revenue to the company.

MTV News will be written and reported by respected music news journalists, Kurt Loder. The program will provide listeners with the latest news and information from the world of entertainment and the music industry.

Westwood One is America's largest producer and distributor of radio programming and the parent company of the Mutual Broadcasting System and the NBC Radio Networks. Westwood One's award-winning news, talk, sports and entertainment programming is heard on more than 6,000 radio stations around the world.

#90032b0677 02/01/1990 ~Business Wire

LA PUENTE, CA (FEB. 1) BUSINESS WIRE - Southwest Water Co. (NASDAQ:SWWC)

Thursday announced increased revenues and earnings for the year and the fourth quarter ended Dec. 31, 1989.

Revenues for the year increased 6 percent to $37,802,000, compared with $35,827,000 in 1988. Net income for 1989 was $2,693,000, 10 percent above $2.44 million in 1988. Earnings per share were $1.19 (primary) and $1.15 (fully diluted) vs. $1.10 (primary) and $1.05 (fully diluted) for the same period a year ago.

For the three months ended Dec. 31, 1989, revenues were $9,397,000 and net income was $739,000, or 32 cents per primary share and 31 cents per fully diluted share. This compares with revenues of $8,996,000 and net income of $357,000, or 16 cents per primary share and 15 cents per fully diluted share, for the same three-month period in 1988.

Both the year-end and fourth-quarter results include approximately 5 cents per share gained from the sale of real estate.

Commenting on the company's performance, Anton C. Garnier, president, said: ''We are extremely pleased with the year-end results.

Our increased revenues and earnings resulted primarily from the excellent performance of our utility subsidiaries. In addition, our improved net income signals the beginning of a turnaround in our service business that we have been working toward for two years.''

Southwest Water Co. is the parent company of Suburban Water Systems (water service in parts of Los Angeles and Orange counties); New Mexico Utilities Inc. (water supply and sewage disposal services northwest of Albuquerque); ECO Resources Inc. and SOCI Inc. (operational and maintenance services for water supply and wastewater treatment facilities in Texas, Mississippi and California).

#90032b0680 02/01/1990 ~Business Wire

ENGLEWOOD, CO (FEB. 1) BUSINESS WIRE - The following was issued Thursday by Dr. Pierce D. Parker, president of Pierce International Gold Inc.:

To the shareholders of Pierce International Gold Inc.

It has come to my attention that confusion exists as to the intent and

mechanics of the proposed one for ten reverse-split of common stock outlined in the shareholder proxy dated Dec. 20, 1989. We have identified a Canadian underwriter interested in listing the company on the Vancouver Stock Exchange and in underwriting a secondary offering to raise $300,000.

In order to comply with the rules of the Vancouver Exchange, a one for ten reverse split is necessary if we are to list the company on the exchange and initiate the secondary offering. It is management's intent to only implement the proposed reverse split if we receive adequate assurance a secondary offering would be successful.

The offering proceeds, if the secondary offering is successful, would be used to acquire a joint venture interest in gold and gravel property in Como, Colo., referred to as the APAN Joint Venture. Pierce International, the holding company of Pierce International Gold Inc. (PIGI), currently has a joint venture interest in the property and would utilize approximately $200,000 of PIGI's offering proceeds to complete its joint venture commitment.

If we can complete a secondary offering on PIGI in a timely fashion, the property would be placed into production in the spring of 1990.

Finally, please note two typographical errors in the shareholder proxy dated Dec. 20, 1989. First, the second paragraph on page three, third sentence, should read ''the company intends to sell 600,000 shares at no less than $.50 U.S. per share.''

Secondly, the fourth paragraph on page three, second sentence, should read ''Each new unit will consist of 40 shares of common stock and 80 warrants.''

If you have any additional questions feel free to contact Nancy Parker, vice president of investor relations. Sincerely, Dr. Pierce D. Parker, president

#90032b0681 02/01/1990 ~Business Wire
NEW YORK (FEB. 1) BUSINESS WIRE - Cellular Information Systems Inc. (NASDAQ: CALLA) announced Thursday that the company has entered into contracts to acquire RSA cellular telephone markets in Montana, North Dakota and Wisconsin for an aggregate sum of $19,116,750.

Combined, these markets have a total of 291,022 effective pops. In addition, on Friday, Jan. 26, 1990, the company completed the acquisition

of the permit to serve Maui, Hawaii.

President and Chief Financial Officer Robert F. Broz, commented, ''These acquisitions are indicative of our growth policy to continue to expand our cellular systems. These locations are proximate to existing CIS service areas and will allow us to spread our existing marketing, sales and administrative overhead over a larger operating region. We look to further expand our cellular operations during 1990.''

Cellular Information Systems is a cellular telecommunications company that owns controlling interests in and operates cellular telephone systems. The company owns controlling interests in cellular systems serving fourteen markets and has under contract an option to acquire eight more. With the addition of these markets, the company's cellular interests will represent 2,349,141 effective pops.

#90032b0682 02/01/1990 ~Business Wire

SACRAMENTO, CA (FEB. 1) BUSINESS WIRE - The completion of the merger into Supermail International Inc. (NASDAQ:SPML) of General Check Cashing Services Inc. is expected to result in a 30 percent increase in 1990 revenues over 1989 levels, as well as in significant profitability improvements, according to Christine A. Umbertino, Supermail president and chief executive officer.

General Check Cashing has an asset value of approximately $1 million and operates two locations in Huntington Park and Los Angeles.

The merger was accomplished in two separate transactions. One of the check cashing operations was acquired outright for cash. The other was merged into a general partnership in which the company is the general partner and Michael Stein, formerly chief executive officer of General Check Cashing Services, is the limited partner.

The transaction entailed the payment of cash and the issuance of 190,000 shares of Supermail common stock, but made it possible for the company to avoid the assumption of debt. In the partnership structure, Supermail records the operation's revenues and earnings and has the option of purchasing the limited partnership contributions at any time within the next 44 months, Umbertino said.

The new operations are expected to generate around $1 million in annual revenues and $300,000 in annual cash flow income, which should return Supermail to a profitable cash flow position.

Supermail International Inc. operates 19 retail money centers in California and Nevada that offer a variety of financial services, including money transfer, check cashing, Peso exchange, utility payments, lottery and lotto tickets, food stamps, facsimile and data transmission, as well as packaging, shipping and other postal services.

The company is also the largest independent Western Union agent in the West.

#90032b0684 02/01/1990 ~Business Wire

SAN FRANCISCO (FEB. 1) BUSINESS WIRE - Enable Software announced it has delivered a new gateway between its Higgins electronic mail products and the Message Handling Service (MHS) of Novell NetWare.

Called Higgins To:MHS, the new gateway allows users of any E-mail system that links to MHS to communicate with Higgins users.

Higgins is an integrated office system of electronic mail, group scheduling and groupware functions for people using personal computers on a local area network.

MHS is a store-and-forward message handling service that allows program-to-program transfer of data. MHS is included with NetWare, Novell's industry-leading LAN operating system software. Novell provides specifications that software developers can use to link to MHS.

Howard Case, marketing vice president at Enable Software Higgins Group, said, ''For a company that has installed mail systems from different vendors, MHS is a convenient interconnect that lets users on those systems communicate.''

Ron Peri, president of Computer Support of North America, a large LAN systems integrator in New Jersey, is an early user of the gateway. He said: ''We use Higgins here at my company, but I communicate via E-mail with suppliers who use another mail product. Formerly I had to load the other software each time I sent or checked for mail. Now I can use Higgins for all my electronic mail.''

According to Case, Enable Software will continue to develop wide-area

networking transport mechanisms for Higgins, as well as to provide gateways to other mail systems.

The company also offers gateways to PROFS, SNADS, 3+ Mail and facsimile. ''This gateway makes it possible to communicate with products that use MHS but we have no plans to offer a product based on MHS.''

Higgins To:MHS is now available through computer dealers and value-added resellers specializing in local area networking. The product is priced at $495.

Enable Software is a dominant supplier of software products to the federal government and is installed in more than 100 Fortune 500 companies, including AT&T, NBC, Xerox and General Electric. Enable and Higgins, Enable Software's two product families, form a complete suite of complementary PC office automation tools.

There are over 100,000 Higgins users at such companies as U.S. West, Merrill Lynch, Pillsbury and Coca-Cola, as well as substantial government installations.

Enable Software, based in Ballston Lake, N.Y., has 10 sales offices throughout the United States and Canada. Its products are distributed in 30 countries worldwide. The privately held company was founded in 1983 and employs close to 200 people.

NEW ORLEANS (FEB. 1) BUSINESS WIRE - Freeport-McMoRan Inc. (NYSE:FTX) announced Thursday that, in accordance with the terms of its Special Redemption Agreement dated April 26, 1985, it has commenced an offer to purchase any and all Special Redemption Privileges (SRPs) issued by FTX, that are accompanied by an equivalent number of depositary units of Freeport-McMoRan Energy Partners, Ltd. (NYSE:FMP), for $9.05 in cash per each SRP and accompanying FMP unit.

FTX's offer is being made in accordance with the terms of the Special Redemption Agreement related to the original issue of the FMP units and the SRPs. The offer price was calculated pursuant to a formula specified in the Special Redemption Agreement. The offer and withdrawal rights will

expire at 12:00 midnight, New York City time, Friday, March 2, 1990, after which all untendered SRPs will expire. There are 5,478,000 SRPs outstanding.

The closing price of the FMP units on the New York Stock Exchange on Jan. 31, 1990, was $9.50.

#90032b0687 02/01/1990 ~Business Wire

DENVER (FEB. 1) BUSINESS WIRE - Bond International Gold Inc. (NYSE:BIG)(TSE:BG) Thursday reported a net loss of $26.4 million, or 46 cents per share, for the six month period ended Dec. 31, 1989.

The net loss included writedowns in the second quarter of the Colosseum Mine and certain royalty interests totaling $24.7 million. The company reported a loss from operations of $19.3 million. Gold production was 267,989 ounces of gold, including 100 percent of production from the El Indio Mine.

The average cash production cost for the company, net of byproduct credits was $223 per ounce of gold.

In December, the company changed its fiscal year end from June 30 to Dec. 31. Consequently, the results of operations are for a six month period and therefore are not comparable to the fiscal year results reported for the twelve month period ended June 30, 1989.

For the quarter ended Dec. 31, 1989, the company reported a net loss of $24.4 million compared to net income of $13.3 million for the like period last year. Loss from operations for the quarter, including the writedowns was $24.2 million compared to income from operations of $13.6 million for the quarter ended Dec. 31, 1988.

Bond International Gold's share of production for the six month period was 249,721 ounces of gold, 596,556 ounces of silver and 11,133 tons of copper. Average realized sales prices were $384 per ounce for gold, $5.25 per ounce for silver and $1.14 per pound for copper.

Operations were expanded with the Bullfrog Mine beginning commercial production on Sept. 1, 1989. At the El Indio Mine, production of direct smelting ore declined, resulting in lower total gold production from the operation. Gold production improved at Golden Patricia and Richmond Hill, but declined at Colosseum due to lower grades and harder ore.

In November 1989, Dallhold Investments Pty. Ltd. and a related company sold their approximate 65 percent interest in the company to LAC Minerals Ltd., a major Toronto-based gold company.

#90032b0691 02/01/1990 ~Business Wire

HUNTSVILLE, AL (FEB. 1) BUSINESS WIRE - SCI Systems Inc. (NASDAQ:SCIS), announced Thursday operating results for the second quarter of fiscal year 1990, ending Dec. 31, 1989.

Sales for the second quarter and first six months of 1990 were $307,108,000 and $596,005,000, respectively, as compared with $223,944,000 and $449,526,000 for the like period of the previous year. Net income for the quarter and the first six months of 1990 was $2,094,000 and a loss of ($7,120,000) respectively as compared with $4,383,000 and $9,182,000 for the 1989 fiscal year.

Earnings per share for the quarter and the first six months were 10 cents and a loss of (34 cents) respectively, compared to FY 89's second quarter and six month earnings per common share of 21 cents and 44 cents.

The primary cause contributing to the loss as reported for the first six months was the declaration in the first quarter of bankruptcy under

Chapter 11 by a disc drive industry customer which caused SCI to reserve for a related multimillion dollar loss exposure.

Additional factors affecting profitability include start-up expenses of new plant and equipment to support increasing customer demand, below plan profit performance of certain plants, and higher interest expense associated with working capital expansion to support rapid sales growth.

Backlog for the quarter ended Dec. 31, 1989 reached a new record high of $851 million. Second quarter sales of $307 million and bookings of $411 million represent the first quarter in the history of the company that sales exceeded $300 million, or bookings exceeded $400 million.

SCI Systems Inc., is a vertically integrated electronics manufacturer whose products and systems are supplied to a variety of aerospace, industrial and commercial customers.

#90032b0693 02/01/1990 ~Business Wire

ST. LOUIS (FEB. 1) BUSINESS WIRE - Emerson Electric Co. announced Thursday that it has extended the expiration date in connection with the proposed acquisition of McGill Manufacturing Co. Inc. by Emersub XXVI Inc. a subsidiary of Emerson, until 12 midnight (EST) on Feb. 7.

The tender offer was originally scheduled to expire on Jan. 17 and was extended to Jan. 31.

Emersub XXVI has commenced a cash tender offer for all outstanding shares of common stock of McGill for $93 per share of common stock.

Emerson reported that as of Jan. 31 approximately 1.17 million shares of McGill common stock had been tendered which, when combined with the approximately 279,000 shares not yet tendered but subject to option agreements, represent 99 percent of the McGill shares outstanding.

The extension of the tender offer is due to the previously announced extension of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 in connection with the acquisition of McGill.

McGill, based in Valparaiso, Ind., manufactures bearings and electrical products primarily for industrial use.

Emerson Electric Co., based in St. Louis, manufactures a broad range of electronic, electrical and other products for consumer, commercial,

industrial and government and defense markets.

TOLEDO, Ohio (FEB. 1) BUSINESS WIRE - Dana Corp. Thursday announced the election of Southwood J. Morcott, 51, to the position of chairman of the board, succeeding Gerald B. Mitchell who retired from both the company and the board on Feb. 1, 1990, after completing 45 years with Dana.

Morcott, who becomes the fifth chairman in Dana's 86-year history, will continue as chief executive officer, president, and chief operating officer. Morcott's election to chairman of Dana Corp. is in accordance with a previously established succession plan adopted by the board of directors.

Mitchell, 62, served as chairman, chief executive officer, president, and chief operating officer from 1984 until 1986. Morcott, who during that time was president of Dana's North American Operations, was elected president and chief operating officer in December 1986. He was elected a director of Dana Corp. in 1985 and on Aug. 1, 1989, when Mitchell publicly announced his long-standing plans to retire early in 1990, Morcott was given the additional responsibility of chief executive officer.

Morcott joined Dana as a sales engineer in 1963 after completing undergraduate studies at Davidson College, two years as a U.S. military officer in Europe, and a master's degree in Business Administration at the University of Michigan.

He served as manager of Dana's piston ring manufacturing plant in Tipton, Ind., and was later named president of Dana World Trade Corp. In 1975 he moved to Dana's Canadian subsidiary, Hayes-Dana, as vice president-operations. He was later elected a director of Hayes-Dana and in 1978 was promoted to president of Hayes-Dana.

Morcott returned to the United States in 1980 as a group vice president of Dana Corp. responsible for service parts and distribution in North America and in 1984 became president of Dana's North American Operations.

Morcott is a member of the board, a member of the executive committee, and treasurer of the Highway Users Federation, and is a member of the Society of Automotive Engineers. He serves as a director of Brazeway Inc., the Blue Bird Body Co., and Spicer, S.A. of Mexico. He is on the Board of Visitors of the School of Business Administration at both the University of North Carolina and the University of Michigan. In his home community

of Toledo, he serves as a director of The Toledo Hospital, The Toledo Museum of Art, and the Toledo Committee of One Hundred.

Commenting on Morcott's election to chairman, Mitchell said, ''Woody Morcott and his career are typical of the Dana Style in action. He is a career Dana person with wide experience in all facets of the company's operations. Woody and I have worked closely together, especially since he became president and chief operating officer, and I have the utmost confidence in his managerial ability. He is very well qualified to lead Dana in the 1990s.''

Mitchell joined Hayes-Dana Inc. in 1944 and progressed steadily through a number of increasingly responsible assignments to become president of Hayes-Dana in 1963. He was named executive vice president of Dana in 1967 and president in 1972. He became chief executive officer in 1979 and was elected chairman of the board in 1980.

Commenting on Mitchell's retirement, Morcott said, ''The shareholders and the people of Dana are greatly indebted to Gerry Mitchell. Seldom in the history of our company have we seen a time of greater change and challenge than the decade of the 1980s. Gerry has led the Dana Corp. with great vision, skill, and integrity through this period. Because of his efforts we are very well positioned to meet the future demands and opportunities of our global marketplace. We will miss him, and I know that all the people of Dana join me in wishing him well as he ends his 45- year career with Dana.''

MOBILE, AL (FEB. 1) BUSINESS WIRE - QMS Inc. (NYSE:AQM) announced that the company's board of directors has authorized a repurchase of up to an additional 500,000 shares of QMS common stock by the corporation.

The company's board previously authorized a stock repurchase of up to 500,000 shares in August of 1988. As of Dec. 29, 1989, the company had 11,019,000 shares outstanding.

According to Charles D. Daley, QMS executive vice president, finance and administration and chief financial officer, ''QMS Inc. has repurchased approximately 450,000 shares under the previous authorization.

''We believe that QMS stock has been an excellent value and that these stock repurchases have benefited both QMS shareholders and the corporation. The authorization to repurchase additional QMS stock will

permit us to continue to take advantage of this value for the benefit of the shareholders and the company.''

QMS is a leader in the rapidly expanding non-impact print systems market and is a major producer of enhancement products for impact printers.

The company offers the broadcast selection of laser and thermal transfer printers available for electronic publishing, office automation, advanced imaging and automatic identification applications.

SEATTLE (FEB. 1) BUSINESS WIRE - Expeditors International of Washington Inc. (NASDAQ: EXPD), an international freight forwarder and customhouse broker, announced Thursday that Rommel Saber has joined the company as its new director, Middle East.

Saber will be responsible for directing the company's operations and expanding its agency relationships in the Middle East, Greece, Turkey, India and Pakistan.

Saber, 32, joins Expeditors after 12 years with Circle Freight International Ltd., a subsidiary of The Harper Group, the large San Francisco-based international freight forwarder, where he was managing director, Middle East.

''We are very excited about Rommel joining our team,'' said Peter J. Rose, president of Expeditors International. ''Many of us at Expeditors have known Rommel since our days working together at Harper. His drive, initiative and integrity are well known throughout the forwarding community in the Middle and Near East, and his contacts and experience in that part of the world present excellent opportunities to expand business to and from our offices in the U.S. and Canada, Europe and the Far East. Rommel will begin establishing agency relationships immediately throughout the region.''

Expeditors International of Washington Inc., an international freight forwarder and customhouse broker specializing in airfreight consolidation, currently maintains offices in 13 U.S. cities, as well as offices in Taiwan, Hong Kong, Singapore, Malaysia, the Philippines, Australia, England and Canada. Expeditors International had total revenues and net

earnings of $147.5 million and $7.2 million, respectively, for the year ended Dec. 31, 1988, and $144.7 million and $6.9 million, respectively, for the nine months ended Sept. 30, 1989, and is the largest U.S.-based freight forwarder in certain Far East markets.

BEVERLY HILLS, CA (FEB. 1) BUSINESS WIRE - Qintex Entertainment Inc. (QEI) (NASDAQ:QNTQE) reported Thursday that an application for a temporary restraining order brought by the creditors' committee in Federal Bankruptcy Court was approved yesterday by Judge Geraldine Mund.

The court order prevents SCS Communications, Inc. and Stephen Swid from attempting to obtain or exercise rights with respect to the governance of QEI and its subsidiaries.

The application of the creditors' committee for the restraining order was supported by QEI's secured lenders.

The order includes a restraint on the assignment to SCS Communications and Stephen Swid of the power to call a shareholders' meeting, to elect directors, to alter the composition of the present boards of directors of QEI and its subsidiaries, and to alter or change the management or management policies of QEI.

As announced on Oct. 19, 1989, QEI filed for protection under Chapter 11 of the Federal Bankruptcy Code when Qintex Australia Ltd. (QAL), the prinicpal source of QEI's working capital requirements, could not provide financing to meet a material obligation.

SCS Communications has been in negotiations with a subsidiary of QAL to obtain a proxy and purchase option on QEI shares held by the QAL subsidiary. According to court records, SCS also intends to propose an internal plan of reorganization. Further details of the proposed transaction between SCS and QAL were not released.

According to the court filing, the creditors' committee applied for a restraining order due to concern that possible actions by SCS Communications and Stephen Swid could have an adverse effect on discussions with other parties who have expressed or will express interest in EQI.

EQI recently named the firm of Donaldson, Lufkin & Jenrette to act as investment banker on behalf of the company. The investment banking firm

is currently actively engaged in supporting QEI's efforts to submit a plan of reorganization.

The court set the date of Feb. 7, 1990 to hear further arguments regarding the application of the creditors' committee for a preliminary injunction on this matter.

AUSTIN (FEB. 1) BUSINESS WIRE - The CompuAdd Corp. Thursday reported worldwide 1989 revenues of $400.1 million, compared to $240.7 million in 1988, an increase of 66 percent. The privately held company also said its earnings set a record for the eighth consecutive year.

CompuAdd, which employs more than 1,300 people, designs, manufactures, and markets a wide range of personal computers and is a major reseller of add-on products and software from leading vendors.

"Customer acceptance of CompuAdd's products and services resulted in a growth rate that continues to outpace the industry, and we believe the company is well positioned for future growth," said Bill H. Hayden, CompuAdd's chief executive officer.

In 1989, CompuAdd introduced a widely accepted new line of space-saving personal computers, expanded its mail order operations and attained prominence as a retailer by expanding its computer store network to 84 outlets in the United States and Canada. In 1990, the company expects to

continue aggressive growth in the United States and broaden its presence in international markets.

Plans also call for an expanded systems product line and new peripheral products, the latter of which will include Macintosh- compatible hardware marketed by a newly formed Macintosh division.

PALATINE, IL (FEB. 1) BUSINESS WIRE - Square D Co. (NYSE:SQD) announced Thursday that it has concluded the sale of its Yates Industries copper foil operations in Europe to Arbed S.A. of Luxembourg and its 50 percent ownership of the Furukawa Circuit Foil Co. Ltd. joint venture in Japan to Furukawa Electric Co. Ltd. of Japan.

Jerre L. Stead, chairman, president and chief executive officer of Square D, said that after agreement was reached to sell the European and Japanese operations, Square D negotiated and reached agreement to sell the Yates United States copper foil operations in Bordentown, N.J., to a new company to be formed by Arbed and Furukawa.

He said Square D expects total proceeds from the three transactions involving Yates operations will be approximately $175 million U.S.

Stead said the European sale includes Yates facilities in Wiltz, Luxembourg, and Silloth, England. The Japanese sale involves the Square D portion of a copper foil joint venture established by Yates and Furukawa Electric in 1970.

Yates Industries, acquired by Square D in 1980, manufactures copper foil for printed circuit boards. It had 1988 sales of approximately $130 million.

Square D is a worldwide leader in industrial control and electrical distribution products, systems and services. Its 1989 sales from continuing operations were $1.63 billion.

Arbed, a major European steel producer, is part of an international corporate group which had 1988 sales of $5 billion. Furukawa, a leader in electric wire and cable, optical-fiber cable and nonferrous metals had 1988 sales of about $4 billion.

#90032b0720 02/01/1990 ~Business Wire

IRVING, TX (FEB. 1) BUSINESS WIRE - ShowBiz Pizza Time, Inc. (NASDAQ:SHBZ) Thursday announced that strong increases in comparable period sales by its ShowBiz/Chuck E. Cheese restaurants led the company to significantly increased revenues and improved earnings for the fourth quarter and year ending Dec. 29, 1989.

Revenues for the three months ended Dec. 29, 1989 increased to $37.3 million from $36.0 million during the fourth quarter of 1988. Operating income improved to $1.6 million in the fourth quarter of 1989 as compared to an operating loss of $1.3 million in the fourth quarter of 1988.

The company's improved performance was largely a result of a 5.3 percent increase in comparable period sales from company-owned ShowBiz and Chuck E. Cheese restaurants in operation throughout the fourth quarters of 1988 and 1989 and improved operating margins. The fourth quarter of 1989 was the 16th consecutive quarter in which the company's ''same store sales'' have increased over the comparable period of the prior year.

The company reported net income of $483,000 for the fourth quarter of 1989 as compared to a net loss of $2.4 million for the fourth quarter of 1988.

Revenues for the year ended Dec. 29, 1989, increased by 10.6 percent to $167.4 million from $151.4 million in 1988. Operating income more than quadrupled to $10.6 million in 1989 from $2.3 million in 1988. The increases in revenues and operating income are largely attributable to an increase of 8.3 percent in comparable period sales from the company's ShowBiz and Chuck E. Cheese restaurants between the two years and improved operating margins.

Despite a $4.5 million extraordinary charge against earnings in the third quarter of 1989 related to the closing of 29 Monterey House restaurants, the company reported net income of $2.5 million in 1989 as compared to a $225,000 net loss in 1988.

Notwithstanding a 27 percent increase in weighted average shares outstanding related to recognition of common stock equivalents, the company's primary earnings per share increased to 39 cents per share in 1989 from a 13 cents per share loss in 1988.

ShowBiz operates a system of 257 ShowBiz Pizza Place and Chuck E. Cheese restaurants, of which 131 are company operated in 22 states, and 26 Mexican restaurants operating as Monterey's Tex-Mex Cafe restaurants in

Texas and Oklahoma.

MANCHESTER, NH (FEB. 1) BUSINESS WIRE - James E. Bachman has been named president and chief executive officer of the New Hampshire Insurance Group. Bachman succeeds Thomas F. McCann, who has become a senior advisor to The New Hampshire and its parent company, American International Group (AIG).

Bachman, who becomes the 12th president in the 120-year history of The New Hampshire, comes to The New Hampshire from the St. Paul Insurance Co., where he most recently was president of its commercial insurance division.

Bachman had been with The St. Paul since 1973. He served as controller of The St. Paul Fire & Marine Co. before being promoted to senior vice president of finance for the parent company. In 1984, he was named senior vice president of underwriting, where he headed The St. Paul's Commercial Insurance Division. He was promoted to president of the division in early 1989.

During his tenure with The St. Paul, Bachman oversaw the company's underwriting, risk management and loss prevention, and finance functions as well as assisting in the development and implementation of specialization groups involving synthetics, construction and electronics.

McCann had been president and chief executive officer of The New Hampshire since September, 1986, after having joined AIG a year earlier. He had

retired from The St. Paul in 1984, after 35 years of service.

The New Hampshire Insurance Groups is the agency marketing arm of American International Group Inc. (AIG). Through its subsidiaries, AIG is the largest source of commercial and industrial insurance in the United States. AIG is also a leading international insurance organization whose member companies write property, casualty, marine, life, and financial services business in more than 130 countries and jurisdictions.

TARRYTOWN, NY (FEB. 1) BUSINESS WIRE - Keishi Toda has been selected as the new president of Hitachi America Ltd., the wholly owned U.S. subsidiary of Hitachi Ltd.

Toda will replace the current president, Tsuneo Tanaka, on Feb. 21.

Toda, 56, was most recently general manager of Hitachi's International Sales Division I, which handles the export of power systems and equipment and industrial machinery and components. A graduate of Hitotsubashi University in economics, he joined Hitachi in 1960. Following a transfer to the International Operations Group in 1982, Toda became vice president of Hitachi Europe Ltd. He served as president of Hitachi Europe Ltd. from 1983 to 1988. He has a wife, Yoshiko, and one son, Shiro.

Tanaka has been promoted to group executive of Hitachi's International Operations Group, which oversees all sales outside of Japan.

Tanaka became president of Hitachi America in Feb. 1985 and has been with the parent firm for more than 30 years. Last June, he was elected to Hitachi Ltd.'s board of directors, the first person in Hitachi's 80-year history to serve on the board in an overseas capacity.

During his tenure at Hitachi America (1985-1990), net sales increased from approximately $750 million to $1.66 billion (Fiscal 1989 estimate). He spearheaded a strong effort to Americanize the company, through promotion of native executives to top management positions, expansion of U.S.-based manufacturing facilities, establishment of U.S. research & development laboratories and strong philanthropic activities supporting American universities and local communities hosting Hitachi facilities nationwide.

Hitachi America Ltd., a wholly owned subsidiary of Hitachi Ltd., Japan, markets and manufactures electrical and electronic goods throughout the United States. The firm employs approximately 3,000, including personnel from 11 sales divisions and 11 manufacuturing subsidiaries spread

throughout the country.

Hitachi Ltd. is one of the world's largest electronics and electrical equipment manufacturers with operations extending to computers, semiconductors, consumer products, power generating equipment and industrial machinery. The company, founded in 1910, had annual sales of $48.4 billion in the year ending March 31, 1989.

DALLAS (FEB. 1) BUSINESS WIRE - Caspen Oil Inc. (ASE:CNO), a Dallas-based oil and gas exploration, production and acquisition company, announced Thursday that it has reached an agreement with Yates Unit Inc. (now called Sixx Holdings Inc.) for Yates Unit Inc. to exercise its option to puchase Caspen's 30 percent interest in Yates for approximately $1,938,000, which, after adjustments, (including a payable to Yates Unit Inc.), was a net payment of $1,246,000.

In connection with Yates Unit Inc.'s purchase of Caspen's interest, Jack D. Knox, chairman and chief executive officer of Yates Unit Inc., has resigned as a director of Caspen Oil Inc. and Caspen Oil Plc, and has also sold his shares in Caspen Oil Inc.

Sixx Holdings Inc. will begin trading on NASDAQ, under the symbol ''SIXX '' in early February. Sixx Holdings was created from certain spun out assets from Summit Energy Inc., which changed its name to Caspen Oil Inc. in 1988. Delo Caspary, chairman and CEO of Caspen Oil Inc., has resigned from the board of Sixx Holdings Inc., in connection with the transaction.

LAWRENCEVILLE, NJ (FEB. 1) BUSINESS WIRE - The appointments of three new senior executives at First Fidelity Bancorporation, the superregional bank holding company, were announced Thursday by Anthony P. Terracciano, chairman, president and chief executive officer.

Named vice chairman and chief credit officer was Peter C. Palmieri, who most recently served as senior executive vice president of the Bank of New York and formerly was vice chairman and director of Irving Trust Co. and chairman of its credit policy committee. Palmieri begins his new assignment Monday, Feb. 5.

Appointed senior vice president and director of audit and policy development was Michael L. LaRusso, who is presently senior national bank examiner in the Office of the Comptroller of the currency's multinational and regional banking division. He begins at First Fidelity Feb. 16.

Named senior vice president and project director for the consolidation and enhanced productivity of all of First Fidelity's transaction processing and systems was Doanld C. Parcells, managing director of the institutional products group for Marine Midland Bank. Parcells begins Feb. 15.

The three appointments came on Terracciano's first day as chief executive officer of First Fidelity. The three executives will report directly to Terracciano. ''I am delighted that these three experienced banking executives have agreed to join First Fidelity,'' Terracciano said.

First Fidelity Bancorporation is the parent company of the First Fidelity banks and Morris Savings Bank of New Jersey and Fidelity Bank and the Mercahnts banks of Pennsylvania.

First Fidelity, with more than 500 offices in New Jersey and eastern Pennsylvania and $30.7 billion in assets, is among the 25 largest banking companies in the United States.

CINCINNATI (FEB. 1) BUSINESS WIRE - Omnicare Inc. (NYSE:OCR) Thursday announced that its net income and earnings per share from continuing

operations more than doubled in the full year 1989.

On a continuing operations basis, net income for the 12 months ended Dec. 31, 1989, reached $1,654,000, or 18 cents per share, as compared with th $676,000, or 7 cents per share, earned in 1988.

Revenues, from continuing operations, for the full year 1989 rose 15 percent to $95,125,000 from the $82,895,000 recorded in 1988.

On a total net income basis, including income from discontinued operations Omnicare earned $4,226,000, representing an increase of 50 percent over the $2,815,000 earned in 1988 (excluding the one-time gain of $330,000, or 3 cents per share, related to a change in accounting for inventory costs taken in the first quarter of 1988).

On a per share basis, total net earnings increased 59 percent to 46 cents from the 29 cents earned in 1988 (excluding the inventory gain).

The average number of shares outstanding for 1989 declined over 6 percent owing to the company's repurchase in the open market of 977,600 shares of its common stock, or 10 percent of its total outstanding shares, during the year.

On a total net income basis, the 1989 results benefited from the inclusion of an aftertax gain on the previously announced sale of Omnicare's hospital pharmacy management business, HPI Health Care Services Inc., totalling $1,090,000, or 12 cents per share. This gain, along with HPI's aftertax earnings through July 31, 1989 (the effective date of the sale) are included in Omnicare's financial statements as ''discontinued operations.''

For the three months ended Dec. 31, 1989, Omnicare earned, on a continuing operations basis, $232,000, or 3 cents per share, as compared with a loss of $303,000, or 3 cents per share, in the fourth quarter of 1988.

Revenues rose 24 percent in the fourth quarter of 1989 to $25,469,000 vs. the $20,613,000 recorded in the same quarter of 1988.

Total net income for the 1989 quarter was essentially even with the prior year quarter at $549,000 vs. the $568,000 earned in the 1988 quarter owing to the 64 percent decline in income from discontinued operations (i.e. the absence of operating income from HPI). On a per share basis, Omnicare's total net earnings for the 1989 quarter were 7 cents per share, 17 percent higher than the 6 cents per share earned in the 1988 quarter.

Commenting on the results for the year, Joel F. Gemunder, president of Omnicare, stated, ''We are gratified by the strong growth achieved in 1989 -- a year in which major structural change transformed the business

composition of Omnicare. In total earnings for the year, we benefited substantially by the one-time gain associated with the sale of our hospital pharmacy management business.

Moreover, our earnings from continuing operations grew significantly, bolstered by the incremental earnings from our nursing home pharmacy business, Home Care Pharmacy Inc., acquired in Dec. 1988.

''Our favorable results were achieved despite the year-to-year decline in sales of latex examination gloves which hampered the growth of our Veratex Group. Prices for latex gloves fell dramatically during 1989 vs, 1988; however, beginning in the second quarter of 1990, we should begin to experience more normalized pricing comparisons.

''Partially offsetting the impact of declines in the sales and profits of latex gloves on the Veratex Group's results were solid increases in its disposable medical products enhanced by the acquisition of the ACCO medical and dental gauze sponge business of Sterile Products Corp. in October 1989.

''The performance of Home Care Pharmacy was in line with our expectations for its first year of operations as part of Omnicare and was highlighted by a 10 percent increase in the number of nursing homes patients served. Also positively impacting Omnicare's growth was the reduced operating losses of our Bunn/Xorbox Group.''

Commenting on the outlook for the company' Gemunder said, ''The transformation of Omnicare begun five years ago is now producing increasingly positive results. Omnicare's capital has been withdrawn from businesses which no longer have bright prospects in today's health care environment and is now being redeployed in order to increase profitability and financial rewards to our stockholders.

''As we enter the 1990's we are confident that we will see a continuation of the upward trend in our sales and earnings and a decade of significant growth and achievement.''

Omnicare Inc., headquartered in Cincinnati, is a health care company with leading positions in medical and dental supplies for the private practice market, pharmacy management services for the long-term care market, and specialized respiratory equipment for the home care market.

#90032b0759 02/01/1990 ~Business Wire

BOSTON (FEB. 1) BUSINESS WIRE - The Gillette Company (NYSE:GS) announced Thursday that it has signed a Memorandum of Intent with a major group in Leningrad, U.S.S.R., which could lead to a substantial joint venture project to manufacture razor blades, shaving systems and disposable razors to meet developing consumer demands in the Soviet Union.

Gillette's partner in the joint venture would be the Central Scientific-Production Association 'Leninets,' which employs some 40,000 people in the manufacture and sale of a wide range of consumer and other products, as well as in scientific, ecological and research activities.

Mr. Anatoliy Turchak, Director-General of Leninets, said, ''I think that the Leninets and Gillette joint experience will help solve the supply problem in our market with such vital products and Leningraders will be among the first to have access to these goods.''

Mr. Turchak recently visited Gillette at its facility in London and also visited one of its blade manufacturing facilities. After the visit he pointed out the high technical and organizational level of production processes which guarantees a steady flow of high quality Gillette products.

Mr. Gaston Levy, Executive Vice President, Gillette International, said, ''We view this project as another major step in Gillette International's strategy of expanding its presence in foreign markets with significant growth potential.''

Under the Memorandum of Intent, various steps will be taken to establish the feasibility of an independent joint venture project, including a facility with phased capacity of 800 million units per year. Gillette would hold a majority of the equity in the project.

The preparatory studies and other activities will be carried out jointly by Leninets and a Gillette London-based project team with the aim of completing all necessary stages and signing a definitive agreement later this year.

Mr. Levy said, ''We are fortunate to have a resourceful and motivated partner with whom we can work toward a mutual goal of meeting the large and growing market needs of the Soviet Union.''

CINCINNATI (FEB. 1) BUSINESS WIRE - The board of directors of Omnicare Inc., (NYSE:OCR) Thursday declared a quarterly cash dividend of 2.5 cents

per share on its common stock, representing a 25 percent increase over the quarterly cash dividend rate of 2 cents per share paid in the fourth quarter of 1989.

The indicated annual dividend rate for 1990 is 10 cents per share, 25 percent higher than the 8 cents per share paid in 1989. This is the first dividend increase since Omnicare resumed paying dividends in March of 1989.

The newly declared dividend is payable on March 9, 1990, to stockholders of reccord on Feb. 23, 1990.

Commenting upon the dividend increase, Joel F. Gemunder, president of Omnicare Inc., stated, ''By increasing Omnicare's dividend rate, we have in turn increased the financial reward to our stockholders reflecting the company's strong financial position and earnings growth.''

Omnicare Inc., headquartered in Cincinnati, is a health care company with leading positions in medical and dental supplies for the private practice market, pharmacy management services for the long-term care market, and specialized respiratory equipment for the home care market.

LONDON (FEB. 1) BUSINESS WIRE - The following announcement concerning the appointment of Nigel Lawson, the former Chancellor of the Exchequer, to the Barclays Bank Board of Directors was made Thursday in London.

Inquiries regarding this announcement should be directed to: Marion J. Cotrone, Vice President Corporate Communications, 212/412-4018.

The board of Barclays PLC has appointed Nigel Lawson, the former Chancellor of the Exchequer, a non-executive director of Barclays Bank PLC and Barclays PLC.

Lawson will undertake an advisory role within the Barclays Bank Group, including in particular Barclays de Zoete Wedd, in addition to his duties as a director. He will spend approximately two days a week on Barclays Group business.

Welcoming Lawson to the board, Barclays chairman, Sir John Quinton, said:

''My colleagues and I are delighted that Nigel Lawson is joining us as both board member and part-time advisor. His international experience and distinguished record at the helm of economic and financial policy in the U.K. make him a noteworthy addition to our board.''

NOTE FOR EDITORS: The Rt Hon Nigel Lawson MP (Blaby, Leics) was Chancellor of the Exchequer from 1983 until his resignation in October 1989, and previously Secretary of State for Energy and before that Financial Secretary to the Treasury.

A former distinguished journalist before his election to the House of Commons in 1974, Lawson was editor of the Spectator Magazine, and prior to that City Editor of the Sunday Telegraph newspaper, and a columnist for the Financial Times. He is a former fellow of Nuffield College Oxford.

His appointment to the Board of Barclays PLC is his first directorship since leaving Ministerial office.

#90032b0771 02/01/1990 ~Business Wire
DALLAS (FEB. 1) BUSINESS WIRE - E-Systems (NYSE:ESY) Thursday reported record 1989 year-end sales, earnings, new order bookings, and backlog of

unfilled orders and in addition a 50 percent increase in cash dividends.

Fourth quarter sales and earnings also set new records.

Annual sales for 1989 amounted to $1.626 billion compared to 1988 sales of $1.439 billion. Net income for the year was $83.0 million, or $2.65 a share, compared to 1988 net income of $74.6 million, or $2.40 a share.

Fourth quarter sales reached $433.8 million versus sales of $388.0 million a year ago. Fourth quarter net income was $23.2 million, or 73 cents a share, compared to fourth quarter 1988 net income of $20.4 million, or 65 cents a share.

Orders (bookings) for 1989 totaled $1.887 billion and year-ending firm backlog rose to $2.506 billion from $2.245 billion at the end of 1988.

Additionally, E-Systems Board of Directors approved a 50 percent increase of the first quarter dividend to 18.75 cents a common share (or 75 cents a share on an annualized basis), up from a quarterly rate of 12.5 cents a share paid previously. The dividend will be paid April 4 to stockholders of record March 16.

Fourth quarter and total year net income included a $7 million after-tax gain from the proceeds of an insurance policy. Separately, pre-tax reserves were established amounting to $6 million against operations and $3 million for legal fees and other costs associated with our previously terminated VRC-12 contracts in Florida.

E-Systems, is a major worldwide developer and producer of defense electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

#90032b0774 02/01/1990 ~Business Wire

LA GUARDIA AIRPORT, NY (FEB. 1) BUSINESS WIRE - Record earnings and revenues for the fourth quarter and full year ended Dec. 31, 1989 were reported Thursday by FlightSafety International (NYSE:FSI).

Net income for the fourth quarter rose 37 percent to $18,915,000, equal to 56 cents per share of common stock from $13,819,000, or 41 cents per share a year ago.

Fourth quarter revenues increased 12 percent to $63,149,000 from $56,517,000 in 1988. The 1988 fourth quarter revenues included a one-time government contract.

Revenues in the 1989 fourth quarter would have increased 25 percent vs. 12 percent if this contract had not been included. This contract had no material effect on net income.

For all of 1989, earnings increased 31 percent to $65,607,000, equal to $1.93 per share from $50,014,000, or $1.48 per share in 1988.

1989 revenues amounted to $231,297,000, a 27 percent increase over 1988 revenues of $182,732,000.

Depreciation and amortization expense in the 1989 fourth quarter rose 9 percent to $7,256,000 from $6,682,000. For all of 1989, depreciation and amortization increased 15 percent to $26,548,000 from $23,099,000 in 1988.

Gains were achieved in all areas of the company, according to A.L. Uoltschi, FlightSafety president and chief executive officer. Continuing growth in trunk and regional airline crew training was particularly outstanding.

The company also had the benefit of a full year of earnings and revenues from the July 27, 1988 acquisition of FlightSafety Services Corp. which trains U.S. Air Force C-5 cargo transport crews and controllers of the U.S. Air Force Space Command.

The company operates aviation learning centers in the United States, Canada and Europe. A subsidiary, MarineSafety International, provides ship training.

#90032b0780 02/01/1990 ~Business Wire

ELGIN, IL (FEB. 1) BUSINESS WIRE - Jacob Saliba, chairman of Katy Industries Inc. (NYSE:KT) announced that Katy expects to sell 25 percent of its Schon & Cie AG subsidiary next month.

The sale is expected to be accomplished by means of an initial public offering of Schon shares in Germany, scheduled to commence on or about Feb. 14. Katy has entered into an agreement with Commerzbank AG to act as lead manager of the offering.

Based on the anticipated offering price for the Schon shares and estimated

transaction expenses, Katy presently expects to realize net proceeds of approximately 34,000,000 DM. At current exchange rates, this would result in a gain to Katy of approximately $12 million after taxes.

Completion of the offering is subject to various conditions, including conditions which may affect the pricing of the shares to be sold.

Saliba also noted that Katy is reviewing certain other of its international activities and may consider establishing reserves relating to those activities if warranted by the results of such reviews. Any such reserves could partially offset the gains from the sale of Schon shares.

Schon, a wholly owned subsidiary of Katy based in Pirmasens, West Germany, is a leading manufacturer of shoe lasting and die cutting machinery. Katy will retain ownership of the remaining 75 percent of Schon shares, which will be listed in the ''Geregelter Markt'' (regulated market) on the Frankfurt Stock Exchange.

Saliba commented that the offering will give recognition to the outstanding performance of the management of Schon, and will provide Katy a vehicle to expand its European operations in anticipation of the economic integration of the European Community in 1992.

Katy Industries Inc is a major diversified corporation with interests in consumer products, industrial machinery, industrial components and energy resources. Katy common and preferred shares (Class B) are listed on the New York Stock Exchange.

NEW ORLEANS (FEB. 1) BUSINESS WIRE - Hibernia Corp. (NYSE:HIB) has been chosen from the 100 largest U.S. bank holding companies to receive the Award for Excellence in Corporate Reporting by the Financial Analysts Federation for the quality of its 1988-89 financial reporting practices.

The banking industry award was presented to Hibernia, Louisiana's largest and most profitable bank holding company, based on a study of the company's 1988 annual report and quarterly reports and on an evaluation of the quality of its investor relations efforts.

It was one of only two Louisiana or Texas banks to place in the first quartile and received perfect scores in five categories of competition

leading to the overall U.S. banking industry honor.

More than 500 companies within 31 industry groups were evaluated by a 16-member committee of the Financial Analysts Federation and by 418 other buy-side and sell-side financial analysts and portfolio managers.

Hibernia Corp., parent company to Hibernia National Bank and Hibernia National Bank in Texas, is ranked by American Banker newspaper as the 70th largest U.S. banking firm in deposits and is the largest in Louisiana in assets, loans, deposits and trust operations.

Its common stock is traded on the New York Stock Exchange under the trading symbol HIB. At Dec. 31, 1989, Hibernia Corp. had 27 million shares outstanding.

OAKVILLE, ONTARIO (FEB. 1) BUSINESS WIRE - Teeshin Resources Ltd. (VSE:TEE) announced it is continuing to find ore in the easterly extension of the Boulder Ore body at Dome Mountain, near Smithers, British Columbia.

Stafford Kelley, president of Teeshin said, ''the easterly extension of the main ore zone was missed during programs carried out in 1987 due to the angle at which the ore body is plunging to the east.''

The company has received the first results from drilling done in January, with drill hole D90-10 intersecting 8.5 feet (2.6 m) grading 1.041 ounces gold and 2.64 ounces silver per ton. Several other drill holes have intersected the zone and further assays will be reported as available.

The company expects to add significant additional tonnage to the ore body with the present program. Geological interpretation and drill results appear to indicate the presence of other ore shutes within the same shear zone to the east. It is also possible that similar mineralization will repeat at depth.

The present Boulder Ore body contains 300,000 tons grading 0.355 ounces gold and 2.34 ounces silver per ton. The overall Dome Mountain Property contains other similar gold bearing structures presenting numerous opportunities for many years of future development.

#90032b0792 02/01/1990 ~Business Wire

CLEVELAND (FEB. 1) BUSINESS WIRE - The routine health care program for most American families includes the annual physical and the regular visit to the dentist.

Often overlooked, however, is the regularly scheduled visit to the family eye care professional.

That's why Sears Optical has designated March as Family Eye Care Month at Sears.

''In the United States, approximately 11.4 million people have significant vision impairment,'' says Dr. Arthur Newman, director of professional and optometric services for Sears Optical. ''Of these, 1.4 million are visually impaired to the point where they can't even read a newspaper.

''The disturbing fact is that nearly 50 percent of all blindness can be prevented,'' says Newman. ''One of the best forms of prevention is a regular visit to an eye care professional that includes an eye exam. Eye

exams should be a part of a family's health care planning just as a periodic physical or dental check-up,'' he says.

Newman says families, as well as the eye care professional, can learn quite a bit from regular eye exams.

''The eye not only is the window to the world, but it is a window to the human body. Health problems such as high blood pressure and diabetes can be detected through eye exams,'' he says.

''We're also finding that heredity may play more of a role in individual vision problems than once thought,'' says Newman. ''Independent research, as well as Sears Optical's 30 years of experience in treating family vision problems, bears this out.''

Newman says patterns of eye disorders such as glaucoma and cataracts are being found from one generation to the next in certain families. ''The family informing us of these patterns enables us to either recommend or take preventative measures to treat the disorder,'' he says.

A visit to the family eye care professional also provides the family the opportunity to take a look at the wealth of new eye care products that have come into the market in recent years.

Marj McGraw, frame products manager for Sears Optical says that new developments in eyewear technologies are making it possible for the optical industry to offer families a wider variety of eyewear that is stylish yet at the same time provides comfort and all-important vision safety.

McGraw notes as one of the major changes the development of light-weight, durable plastics and metals. ''These materials are allowing frame designers more leeway in creating attractive eyewear that can hold up under the abuses of day-to-day wear,'' she says.

''The marriage of new technologies with creative design has resulted in the development of attractive, protective eyewear for almost any type of lifestyle,'' says McGraw. ''The trend we are seeing at Sears Optical is the purchase of multiple pairs of eyewear; one pair for work, another for casual wear and a third pair for athletics. All fashionable yet at the same time serving specific needs and providing vision protection.''

As part of its month-long effort to promote better family vision care, Sears Optical will provide free of charge a Family Eye Care Record to anyone who stops by one of its participating departments.

#90032b0796 02/01/1990 ~Business Wire
TOKYO (FEB. 1) BUSINESS WIRE - NKK Corp., in offerings of new registered and convertible notes, will raise about $770 million to repay some of the company's borrowings, according to a company spokesman.

Eighty million shares (about $370 million) of new registered common stock will be offered for public subscription on the Euro and other foreign markets, but not in the United States.

Nomura International will be the lead manager of a group of securities companies making the offerings through bought deals. Payments will close Feb. 7.

NKK will also issue on Feb. 7 convertible notes at par to the value of 600 million Swiss francs (about $400 million). Maturing March 31, 1995, the notes will be offered through private placement in Switzerland by the Union Bank of Switzerland, Yamaichi Bank (Switzerland), and other financial institutions.

NKK is Japan's second-largest steelmaker and a diversified engineering firm.

#90032b0807 02/01/1990 ~Business Wire
QUINCY, MA (FEB. 2) BUSINESS WIRE - Excel Bancorp Inc. (OTC:XCEL) parent company of Quincy Savings Bank and Lincoln Trust Co., Thursday reported consolidated net income for the fourth quarter and the year ended Dec. 31, 1989.

Net income for the fourth quarter ended Dec. 31, 1989, amounted to $915,000, or 16 cents per share compared to $1.5 million or 24 cents per share for the same period in 1988.

For the year ended Dec. 31, 1989, net income was $5.6 million or 92 cents per share based on 6,083,583 weighted average shares outstanding for the year as compared to $6.9 million or $1.03 per share on 6,660,621 weighted average shares outstanding during 1988.

The decline in earnings for both the fourth quarter and the entire year is largely due to increases in the provisions for losses on loans and real estate owned. On a combined basis, these provisions increased by $1.7

million in the fourth quarter and $4.1 million for the entire year as compared to the same periods in 1988.

Charles R. Simpson Jr., president and chief executive officer, stated that ''Despite a leveling off in our total non-performing assets during the fourth quarter, it remains prudent for management to continue to increase its allowance for losses to reflect changing and uncertain real estate market conditions and in order to maintain a strong ratio of reserves to non-performing assets.''

At Dec. 31, 1989, non-performing loans totaled $8.2 million representing 0.91 percent of total assets and 1.38 percent of total loans. Non-performing loans at Dec. 31, 1988, were $5.3 million representing .60 percent of total assets and .88 percent of total loans. Other real estate owned (OREO) acquired by foreclosure at Dec. 31, 1989, amounted to $6.6 million.

Total non-performing assets as a percentage of total assets were 1.63 percent as of Dec. 31, 1989. The allowance for loan losses and the reserves on other real estate owned in the amount of $6.4 million cover 43.32 percent of non-performing assets at Dec. 31, 1989.

To comply with its understanding of recent developments in the accounting rules for assets held for sale, management has specifically identified a portfolio of assets held for sale which will be reported at the lower of cost or market value on a quarterly basis. At Dec. 31, 1989 the market value of these assets was lower than their book value by $299,000, resulting in a charge against earnings.

Charles A. Pearce, chairman of the board, stated that ''In light of the deteriorating real estate market in the Northeast and the general economic malaise affecting Massachusetts, the board of directors and management feel that we performed more than respectably during 1989. We approach 1990 with guarded optimism fully aware of the anticipated negative market climate.''

On Dec. 31, 1989, Excel Bancorp Inc. had total assets of $901.8 million, total deposits of $747.6 million and total loans of $572.3 million.

Excel Bancorp Inc. is the holding company for Quincy Savings Bank, a state chartered stock savings bank, headquartered in Quincy, Mass., and Lincoln Trust Co., a state chartered commercial bank, headquartered in Hingham, Mass. The subsidiaries conduct business through 17 offices located on the South Shore of Massachusetts.

Quincy Savings Bank and Lincoln Trust Co. are members of the Federal Deposit Insurance Corp. (FDIC). Quincy is also a member of the Deposit Insurance Fund of Massachusetts (DIFM).

HORSHAM, PA. (FEB. 1) BUSINESS WIRE - Advanta Corp. (NASD: ADVN) announced Thursday that its board of directors has declared a first quarter 1990 dividend of $.025 per common share.

The dividend will be payable to stockholders of record at the close of business on Friday, Feb. 16, and will be paid on Tuesday, March 6.

Dennis Alter, chairman and chief executive officer of Advanta Corp., said, ''In September, we announced a 10 cent dividend for 1989 and the commencement of a dividend program paying 2.5 cents per share per quarter. This is the first of those quarterly dividends. The dividend program is one way we can show our confidence in the company's future while providing our shareholders with a current return on their investment.''

Advanta Corp. is a financial services holding company that operates through its subsidiaries to market credit cards, home equity loans, equipment leases and deposit products to consumers nationwide. The company manages assets in excess of $1.9 billion at Dec. 31, 1989, including more than $600 million of receivables serviced for investors.

#90032b0814 02/01/1990 ~Business Wire
NORTH MIAMI BEACH, FL (FEB. 1) BUSINESS WIRE - Home Intensive Care, Inc. 1/8NASDAQ/NMS:KDNY (common stock) and KDNYW (warrants)3/8 Thursday announced that U.S. District Judge Stanley Sporkin concluded the bond hearing in connection with the Company's injunction against the Health Care Financing Administration (''HCFA'').

The government requested that the Court increase the bond to $18 million, however, after hearing testimony, Judge Sporkin directed Home Intensive Care to post a $750,000 bond. A provision has been made for the Company to reduce the bond in the event that it needs the funds and can show hardship. Judge Sporkin also noted the order previously in effect limiting the use of the Company's assets will be lifted when the bond is posted.

Judge Sporkin also ruled that because of his deep concern for the welfare of the patients, the Company would continue to provide care to any patient

that was not yet placed in a dialysis clinic.

James P. Cefaratti, President of Home Intensive Care commented, ''Naturally, we are most gratified by the ruling and we expect to post the bond within the next few days. Now that there are no restrictions on the use of our assets, we are continuing to implement our ambitious plans for future growth, which includes pursuing judicious acquisitions.

''We are also in the process of opening dialysis clinics in many major markets throughout the nation which should be in operation within the next three to four months. We anticipate that these clinics will enable us to retain three to four hundred of our dialysis patients.

Home Intensive Care, Inc. provides high-tech home health care including supervised chronic home hemodialysis services and home infusion therapy. The Company also operates two kidney dialysis centers and 24-hour acute kidney dialysis services in many metropolitan areas. Its Lifeline Water Systems subsidiary markets water purification systems for commercial, industrial and residential use, while Medi-Sure Testing, Inc. provides testing services for the insurance industry and pre-employment screening services.

FORT WORTH, TX (FEB. 1) BUSINESS WIRE - Team Bank, headquartered in Fort Worth, and Systematics Inc. (NASDAQ: SYST), headquartered in Little Rock, Ark., jointly announced Thursday the signing of a ten-year data processing

management agreement.

Team Bank, with nearly $5 billion in assets, has 48 branch locations in Texas. Systematics, with clients in 44 states and 14 countries outside the United States, has been the leading provider of software and data processing services exclusively for banks, savings institutions and credit unions for over 21 years.

Under the agreement, Systematics will function as Team Bank's data processing department and will be providing the bank with Systematics' comprehensive line of banking application software. As part of the agreement, approximately 170 Team Bank employees will be hired for continued employment in Fort Worth by Systematics.

Terry Kelley, president of Team Bank, in commenting on the agreement said: "The contract gives Team Bank the benefit of Systematics' many years of professional experience in serving the information processing needs of major financial institutions.

"This strategic partnership will allow Team Bank to be much more competitive and cost effective in providing a broader range of products and services to our customers as we grow and expand in Texas."

John Steuri, chairman and chief executive officer of Systematics Inc., commenting on the announcement said, "We are delighted to have been selected as Team Bank's data processing partner.

"We look forward to providing this premier banking organization and their customers with the best possible service and products at the lowest possible cost. They join a growing list of major financial institutions outsourcing their data processing functions to Systematics professionals."

HOUSTON (FEB. 1) BUSINESS WIRE - Quanex Corp. (NYSE:NX), the Houston-based metals company, announced Thursday that its board of directors has approved approximately $60 million in cash expenditures over a 2-1/2 year construction period for an aluminum mini-mill.

The project will replace and expand existing capacity to continuously cast the aluminum sheet fabricated into the building products sold by its Nichols Homeshield (NH) subsidiary. The plant will be located in Davenport, Iowa in the immediate area of NH's existing continuous casting facility, which will remain fully operational throughout construction and

start-up of the new plant.

The cost of the mini-mill includes site acquisition, scrap processing and melting equipment, the Hazelett continuous caster, hot and cold rolling, annealing, coil coating and slitting facilities. Work on the plant's initial design and environmental permitting will begin this month.

Carl E. Pfeiffer, chairman of the board and chief executive officer said, ''We acquired Nichols-Homeshield (NH) because of the opportunities for growth. About half of its sales are to the home-remodeling industry which has been growing rapidly. Currently the Davenport plant's continuous casters run at full capacity for 364 days a year.

''In spite of these high operating rates, NH still has to buy about 25 million pounds of aluminum sheet, about one-third of its 1989 requirements from outside sources. Without this project required purchases from outside sources would continue to increase with NH's growth.''

Pfeiffer continued, ''A large part of the return on investment of this project is based on the scale economics and cost savings of producing all of our aluminum sheet requirements for existing customers and markets in our Davenport plant. The material cost savings represent a relatively low-risk return which justify the project.

Quanex is a technological leader in the manufacture of specialty metals including steel, aluminum and titanium products for transportation, capital equipment, home building and remodeling and energy processing markets.

BENTONVILLE, AR. (FEB. 1) BUSINESS WIRE - Sam's Wholesale Club, a division of Wal-Mart Stores Inc. (NYSE:WMT), Thursday announced the recipient of the company's first Total Quality Award.

Jan-Bell, a distributor of quality jewelry, will be recognized during the company's upcoming annual meetings.

To assure members receive superior quality, Sam's Wholesale Club continually monitors the performance of all its vendor-partners.

''This unique award acknowledges the close relationship that must exist between supplier and wholesale club in order to do the best job possible for the member,'' stated Al Johnson, vice chairman.

Jan-Bell has been a supplier to Sam's Wholesale Club since 1984. Johnson said the partnership has worked well for both companies and ''we look forward to a continued relationship.''

''Sam's Wholesale Club is proud to recognize Jan-Bell as a premier supplier in the jewelry industry,'' Johnson added, ''their strict adherence to quality standards, outstanding service, and innovative programs merits this recognition.''

The year-end management meetings for Sam's Wholesale Club will be Feb. 6 through Feb. 11 in Memphis, Tenn. Sam's Wholesale Club currently operates 123 units in a 24-state trade area.

#90032b0844 02/01/1990 ~Business Wire

PASADENA, CA (FEB. 1) BUSINESS WIRE - Beverly Enterprises Inc. (NYSE:BEV), Thursday announced operating results for the fourth quarter of 1989.

For the three months ended Dec. 31, 1989, revenues were $535,096,000 compared to $510,396,000 reported for the fourth quarter of 1988.

Net income for the fourth quarter 1989 was $2,162,000, or 4 cents per share, compared to a net loss of $11,614,000, or 22 cents per share, in the like period a year earlier. Included in the 1988 fourth quarter operating results were pre-tax restructuring charges of approximately $14,550,000.

For the year ended Dec. 31, 1989, Beverly recorded revenues of $2,103,503,000, compared to $2,024,982,000 recorded in the like period

last year.

A net loss of $104,209,000, or $1.96 per share, occurred for the year ended Dec. 31, 1989, compared to a net loss of $23,939,000, or 47 cents per share, for the year ended Dec. 31, 1988.

Included in the operating results for the year ended Dec. 31, 1989, and the like period of 1988, are pre-tax restructuring charges of approximately $128,104,000 and $27,039,000, respectively.

Beverly started its fourth quarter of 1989 with 930 homes and 102,287 beds and ended the quarter with 885 homes and 96,268 beds. This decrease in homes was primarily due to the sale of all 43 of its homes in the state of Michigan.

Beverly Enterprises Inc., is a long-term health care company, operating nursing facilities, pharmacies, retirement living centers, and home health centers.

Its mission is to be the provider of choice in the communities where it operates, by delivering high quality health care services that meet the unique needs of each of those communities.

NAUGATUCK, CT. (FEB. 1) BUSINESS WIRE - 1989 earnings for The Eastern Co. $1,625,000, or 88 cents per share on sales of $72,120,000 compared with $2,622,000, or $1.38 per share on sales of $73,363,000 in the prior year.

R.G. McMillen, chairman of The Eastern Co., stated, ''Abnormal pre-tax expenses of $1,000,000 were incurred during 1989 at three of The Eastern Co.'s eight manufacturing plants for environmental clean up costs, the closing of a galvanizing operation, and the write down of some unneeded equipment. The charges affected net income by 35 cents per share for the year.''

''Overall, incoming orders and backlogs have declined since mid year. It appears, however, that they have bottomed out and we are optimistic for the current year.''

McMillen concluded, ''Reflecting that optimism and the company's strong financial condition, a prepayment of some of its long term debt will be made in the first quarter.''

#90032b0865 02/01/1990 ~Business Wire

CINCINNATI (FEB. 1) BUSINESS WIRE - Chemed Corp. (NYSE:CHE) Thursday reported excellent sales and earnings growth for the year ended Dec. 31, 1989.

Record sales of $591,824,000 in 1989 represented an 18 percent increase over 1988's sales of $500,647,000. Income from continuing operations in 1989 reached $26,182,000, an increase of 27 percent over the prior year's $20,649,000. Fully diluted earnings per share from continuing operations were $2.54 in 1989, an 18 percent increase over the prior year's $2.15; and primary earnings per share from continuing operations were $2.61 in 1989, an increase of 17 percent over 1988's $2.23.

Chemed's net income for the year was $26,182,000, 19 percent above the prior year's earnings of $21,984,000. This comparison excludes gains in 1988 totaling $2,136,000 from the cumulative effect of changes in accounting principles and the termination of a pension plan. On this basis, fully diluted earnings per share of $2.54 increased 12 percent over 1988's $2.27, while primary earnings per share of $2.61 in 1989 increased 10 percent over the prior year's $2.37. Primary earnings per share comparisons reflect the dilutive impact of an increase in primary shares outstanding in 1989 resulting from note conversions in the first half of the year.

For the fourth quarter ended Dec. 31, 1989, Chemed's income from continuing operations reached $5,738,000, a 55 percent increase over the $3,702,000 earned in the fourth quarter of 1988. Fully diluted earnings per share from continuing operations were 55 cents, an increase of 38 percent over the 40 cents recorded in the 1988 fourth quarter; and primary earnings per share were 56 cents, an increase of 44 percent over the prior-year quarter's 39 cents. Net income of $5,738,000 in the fourth quarter of 1989 increased 9 percent over the comparable 1988 quarter's $5,244,000; net income in the fourth quarter of 1988 included gains

amounting to $1,542,000 from a discontinued operation and the termination of a pension plan. On a net income basis, fully diluted earnings per share were 55 cents, a 2 percent increase over the 54 cents earned in the fourth quarter of 1988; primary earnings per share were 56 cents in the fourth quarters of both 1988 and 1989. Sales for the fourth quarter of 1989 were $145,594,000 as compared with sales of $146,181,000 in the fourth quarter of 1988.

Chemed Corp., headquartered in Cincinnati, is a specialty chemical company with leading positions in institutional and industrial cleaning and maintenance; janitorial supply products and services; laundry detergents and related specialties; water treatment; and residential and industrial sewer, drain, and pipe cleaning.

KENOSHA, WI. (FEB. 1) BUSINESS WIRE - Snap-on Tools Corp. announced Thursday that multi-year contracts have recently been ratified with the union memberships of its manufacturing facilities in Mt. Carmel, Ill., and Newmarket, Ontario.

Yesterday, 634 Snap-on employees represented by The International Association of Machinists and Aerospace Workers, Lodge No. 1856, ratified a new, three-year contract at Mt. Carmel. Snap-on manufactures a variety of hand tools at its Mt. Carmel facility.

On Saturday, January 27, Snap-on employees represented by The United Steelworkers ratified a new, two year contract at the company's Newmarket operation. One hundred and sixty employees are covered by the contract.

The Newmarket manufacturing plant is a new facility opened last fall to produce state-of-the-art metal tool storage units.

Snap-on Tools Corp. has more than 7,000 employees worldwide and offers more than 12,000 items in its product line.

Snap-on Tools Corp. is the world's largest independent manufacturer and distributor of quality hand tools, tool storage units, and electronic diagnostic equipment for the professional mechanic.

MELBOURNE, FL (FEB. 1) BUSINESS WIRE - The Federal Aviation Administration has awarded Harris Corp. an $18 million contract to lease the Meteorologist Weather Processor system.

It will be installed at the 21 Air Route traffic control centers located throughout the country and at the FAA's central flow control facility located in Washington. The contract is a three-year lease with two one-year options.

The weather system will be used for monitoring and reporting weather information to air traffic that is "en route." National Weather Service meteorologists stationed at each of the traffic control centers are responsible for providing information on hazardous weather conditions to air traffic controllers who relay this information to pilots in flight. Each control center is divided into an area of responsibility and guides en route air traffic within that zone.

The Harris system generates weather information especially pertinent to aviation weather forecasting. Information is gathered from a variety of sources including the National Weather Service alphanumeric and graphic products, radar weather data and satellite imagery from the Geostationary Operational Environment Satellite and the Polar Orbiter Satellite.

Control center meteorologists will have interactive workstations with the capability to generate, annotate, and display alphanumeric imagery and graphic weather products.

Additionally, each control center may have up to nine briefing terminals at each site. These will be used by air traffic controller supervisors and the traffic management unit for up-to-the-minute weather data to aid in directing the en route traffic.

The FAA's central flow facility is responsible for en route weather supervision on a national level. The Harris weather processor system will give facility meteorologists the capability to adjust the flow of air traffic throughout the entire airways system.

"Harris has the best possible weather system to offer the FAA," said R. Phil Henderson, vice president and general manager of Harris Government Information Systems Division. "We have developed an 'open' weather information system that can be tailored to meet the needs of a wide range of military and civilian customers. This allows us to design special meteorological systems to meet individual needs."

The weather system is the latest in a series of contracts awarded by the FAA as part of their NAS plan. The NAS program is designed to upgrade the

nation's air traffic control system. Harris is also designing the National Aerospace Data Interchange Network and the Weather Message Switching Center Replacement for the FAA.

#90032b0880 02/01/1990 ~Business Wire

NORWICH, CT (FEB. 1) BUSINESS WIRE - Daniel R. Dennis Jr., chairman, president and chief executive officer of Norwich Financial Corp. (NASDAQ:NSSB) Thursday announced 1989 income of $310,000, or 6 cents per share, for the year ended Dec. 31, 1989, compared to net income of $6,561,000, or $1.14 per share, for the year ended Dec. 31, 1988.

Dennis also announced that the board of directors of Norwich Financial Corp. declared a regular quarterly cash dividend of 15 cents per share payable Feb. 27, 1990, to stockholders of record as of Feb. 13, 1990.

The company reported a fourth quarter loss of $2,328,000, equivalent to 44 cents per share, compared to net income of $1,669,000, or 29 cents per share, in the same quarter in 1988. The earnings results estimated in a release dated Dec. 21, 1989, anticipated a fourth quarter loss of 16 cents per share.

The lower actual year end results are due to management's commitment to take appropriate action on credits determined to be a problem by increasing the loan loss provision and recognizing additional charge-offs.

Dennis indicated that the earnings decline is attributed to a $7.6 million increase in the company's annual provision for loan losses from $1.6 million in 1988 to $9.2 million in 1989, as well as a $976,000 write down in the value of its equity securities portfolio during the fourth quarter.

The company experienced an increase in its non-performing assets of $7.8 million for the quarter and recorded a provision for loan losses of $4.75 million for the fourth quarter. Net charge-offs totaled $2.55 million for the quarter and $4.56 million for the calendar year.

Dennis indicated that the $4.75 million fourth quarter provision for loan losses is due to an increase in non-performing assets to $25.2 million, as of Dec. 31, 1989, or 4.54 percent of total loans and foreclosed properties from $17.4 million, or 3.06 percent of total loans and foreclosed properties, as of Sept. 30, 1989, and is attributable to further deterioration of certain credits within the commerical real estate and commercial loan portfolios.

The allowance for loan losses stood at $7 million at year end compared

with $2.4 million at the end of 1988 and represents 1.27 percent of toal loans and foreclosed properties, and 28 percent of non-performing assets. The year end allowance compares with $4.8 million, or 0.85 percent of total loans and foreclosed properties, and 28 percent of total non-performing assets as of Sept. 30, 1989.

The securities portfolio write down directly relates to an approximate $2.8 million investment in bank and thrift stocks located in New England and reflects management's estimate of the permanent decline in value.

Dennis expressed his confidence in the strength of the company, despite the weak industry as a whole, as evidenced by the company's strong capital/asset ratio of 13.4 percent and by the declaration of the regular quarterly dividend.

The company's net interest margin (taxable equivalent) for the year ended Dec. 31, 1989, equalled a 3.76 percent compared to 3.74 percent for the prior year and its book value per share stood at $17.56 compared to $17.30 for the prior year end.

Norwich Financial Corp. is a registered bank holding company whose principal subsidiary is The Norwich Savings Society, a $682 million FDIC-insured savings bank which operates 14 banking offices throughout Eastern Connecticut.

CHICAGO (FEB. 1) BUSINESS WIRE - Aon Corp. Thursday announced the acquisition of Martin Boyer Co. Inc., a workers' compensation and general liability services organization with offices in Chicago, Peoria and St. Louis.

Patrick G. Ryan, Aon's president and chief executive officer, commented, ''Martin Boyer Company has been in business for 40 years and has truly earned a strong reputation for quality service and client loyalty. There is an increasing demand for managed health care programs and this acquistion presents Aon with an opportunity to link the administration of managed care employee benefits and workers' compensation. Martin Boyer

and his key people will have considerable autonomy in exploiting this opportunity for us. I am confident that they will continue to build on their traditions of success.''

Martin Boyer Co. Inc., makes its specialized services available to commercial, industrial, municipal, health care providers and educational institutional clients in the Midwest.

Aon Corp. is an insurance holding company listed on the New York, London and Midwest Stock Exchanges with assets of nearly $9 billion. Aon's subsidiaries include Virginia Surety Co. Inc., Dearborn Insurance Co., The Life Insurance Co. of Virginia, Ryan Insurance Group Inc., Rollins Burdick Hunter Group Inc., Combined Insurance Co. of America and Union Fidelty Life Insurance Co.

FLORENCE, AL (FEB. 1) BUSINESS WIRE - AlaTenn Resources Inc. (NASDAQ:ATNG) Thursday announced that it has reached an agreement in principle with MEGA Natural Gas Co., a natural gas gathering and marketing company located in Tulsa, Okla., for the sale of Colony Energy Corp., a wholly owned subsidiary of AlaTenn, for approximately $6.3 million.

Consummation of the transaction is subject to the negotiation and execution of a definitive purchase and ssle agreement, satisfaction of certain conditions and regulatory approval. Colony, located in Midland, Texas, develops natural gas gathering systems and markets natural gas supplies throughout the country.

The board of directors of AlaTenn today also declared a dividend distribution of one common share purchase right on each outstanding common share of AlaTenn.

Jerry A. Howard, president and chief executive officer of AlaTenn, stated: ''The Rights are designed to assure that AlaTenn's shareholders receive fair and equal treatment in the event of any proposed takeover of the company and to guard against partial tender offers, squeeze-outs, open market accumulations and other abusive tactics to gain control of the

company without paying shareholders a control premium.''

Each right will entitle shareholders to buy one common share at an exercise price of $40. The rights will be exercisable only if a person or group acquires 20 percent or more of the company's common shares or announces a tender offer, the consummation of which would result in ownership by a person or group of 20 percent or more of the common shares.

If the company is acquired in a merger or other business combination transaction, each right will entitle its holder to purchase, at the right's then current exercise price, a number of the acquiring company's common shares having a market value of twice such price.

In addition, if a person or group acquires 20 percent or more of the company's outstanding common shares, each right will entitle its holder (other than such person or members of such group) to purchase, at the right's then current exercise price, a number of the company's common shares having a market value of twice such price.

Further, at any time after a person or group acquires 20 percent or more (but less than 50 percent) of the company's outstanding common shares, the board of directors may, at its option, exchange part or all of the rights (other than rights held by the acquiring person or group) for common shares of the company on a one-for-one basis.

Prior to the acquisition by a person or group of beneficial ownership of 20 percent or more of the company's common shares, the rights are redeemable for one cent per right at the option of the board of directors.

The board of directors is also authorized to reduce the 20 percent thresholds referred to above to not less than 10 percent.

The rights are intended to enable all AlaTenn shareholders to realize the long-term value of their investment in the company. The existence of the rights will not prevent a takeover, but should encourage anyone seeking to acquire the company to negotiate with the board of directors prior to attempting a takeover.

The rights will be distributed on Feb. 20, 1990, to shareholders of record on such date and will expire on Feb. 1, 2000. The rights distribution is not taxable to shareholders.

AlaTenn Resources Inc., is a diversified energy holding company with interests in natural gas transmission, distribution and marketing, as well as oil and gas exploration and automated electronic flow monitoring systems for the oil and gas industry.

#90032c0023 02/01/1990 ~Comtex

STAMFORD, CT (FEB. 1) COMTEX -A federal grand jury is investigating allegations of mail fraud, wire fraud and racketeering against General Development Corp. in relation to the Miami developer's product pricing and disclosure practices.

An indictment of the company and some of its top officers on charges related to the probe may be recommended by the grand jury, General Development said in a filing today with the Securities and Exchange Commission.

Federal investigators have advised the company, which develops condominiums and is also involved in time shares, that any indictments would be based on the fact that other home builders in the company's Florida communities offer similar housing products at substantially lower prices than General Development, and that the General Development concealed the difference in pricing to its customers.

General Development, which said it does not believe there is a basis for criminal proceedings, maintains that any price differences have been disclosed to buyers in the company's ''home sales contract'' for years. Company officials claim they do not attempt to hide competitive housing prices from their clients, and said they believe such concealment would be impossible because of widespread advertising.

General Development and its wholly owned residential mortgage banking subsidiary, GDV Financial Corp., were served federal subpoenas in 1988 in connection with the investigation.

The subpoenas sought documents concerning General Development's relationships with appraisers and lenders.

Since then, General Development and other of its subsidiaries and employees have received additional subpoenas.

General Development officials and its legal counsel, Cravath, Swaine & Moore of New York, have been meeting with investigators from the U.S. attorney's office, but do not expect to resolve the issue before the end of February.

In a separate case, General Development has reached an agreement with plaintiffs in about 104 suits involving the company's sales practices.

General Development said it will settle the suits to avoid the expense and disruption involved in protracted litigation.

The details of the proposed settlement were not disclosed.

In addition, about 3,000 plaintiffs have sued the company in federal court in New Jersey claiming that the sale of homes and homesites in Florida by General Development involved misrepresentation and fraudulent sales practices.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 31, 1990

STAMFORD, CT (FEB. 1) COMTEX - Drillstar Corp. of New York has agreed to acquire American Distributors Group Inc., the Pompano Beach, FL, food distributor, in a tax-free stock swap.

ADG is the exclusive distributor for Continental Baking Company's products in South Florida.

Drillstar is presently negotiating the acquisition of several other food distributors, according to a filing with the Securities and Exchange Commission.

In connection with a letter of intent signed by both companies Jan. 25, Drillstar agreed to provide a secured working capital loan of $100,000 to ADG.

After the acquisition, Drillstar will create a new, wholly owned subsidiary called Drillstar Distributing Inc., which will manufacture and distribute the company's existing marching and leisure shoe products.

Drillstar will maintain ADG with its present management.

STAMFORD, CT (FEB. 1) COMTEX - Ronson Corp. of Somerset, N.J., has decided to discontinue operations of its subsidiary, Ronson Metals Corp.

The Newark, N.J.-based flint manufacturer has experienced losses since the decline of the domestic steel industry.

Also, Ronson received new term loans from Foothill Capital Corp. of $1 million and $1.2 million.

The new loans represent an increase of about $1.1 million for Ronson and its subsidiaries.

Additionally, Foothill extended Ronson a new $300,000 line of credit for the purchase of new equipment, according to a Securities and Exchange Commission filing.

#90032c0047 02/01/1990 ~Comtex
WASHINGTON (FEB. 1) COMTEX - Securities and Exchange Commission Chairman Richard C. Breeden told the Senate securities subcommittee today he is seeking changes to proposed new legislation designed to strengthen the enforcement of federal securities laws.

Specifically, the SEC is seeking authorization to issue "cease and desist" orders and proposes to amend the Federal criminal code to authorize a court to approve the disclosure of grand jury information to the SEC for

use in enforcing federal securities laws.

A cease and desist order is an administrative remedy that directs a person or persons from engaging in illegal activity. Many other federal agencies have been authorized to issue cease and desist orders against individuals who are about to violate statutory provisions administered by those agencies. Presently, the SEC now must go to court to obtain a restraining order to halt illegal conduct.

Breeden argued cease and desist powers will permit swift remedial action in response to illegal conduct, enable the SEC to address specific violations more quickly and efficiently in circumstances where emergency judicial relief is not available, and provide the agency with a flexible administrative remedy that is comparable to an injunction. This would allow the SEC to address violations in a manner that recognizes different degrees of securities violations.

Breeden said it important that small investors do not abandon the market because they perceive the federal government is unwilling to dedicate the resources necessary to protect them from unfair trade practices.

"I have recently allocated approximately 100 additional positions to the Commission's fraud prevention program for fiscal years 1990 and 1991," Breeden said. "This allocation assumes enactment of the increased budget of $192.4 million that the President has recommended for the Commission in fiscal 1991, a 15% increase over the appropriation available during fiscal 1990."

Subcommittee Chairman Christopher Dodd (D-CT) and Sen. John Heinz (R-PA) are sponsoring the legislation which would strengthen the SEC's enforcement powers by authorizing new civil fines for a range of securities violations. A controversial aspect of the bill also would provide specific authority to bar those who violate the law from serving as officers and directors of public companies.

Breeden said the SEC supports narrowing the provision barring securities law violators from serving as officers and directors of public companies. Rather than making an administrative decision, Breeden suggests it should be left up to the federal courts to make such decisions and that this remedy should only be employed in cases involving "repeat violations of the securities laws or egregious conduct."

Breeden also is pushing for an amendment to the bill which would authorize prosecutors to seek court approval to release grand jury information to the SEC for use in matters within the SEC's jurisdiction. He argues the SEC should not be precluded from obtaining access to information which may have been gathered with SEC assistance. In addition, he says preventing the SEC from obtaining access to information gathered by Justice Department

attorneys would unnecessarily waste federal resources by requiring the SEC to duplicate their investigations.

Under the terms of the proposed legislation, the SEC would be able to assess maximum penalties of $100,000 per violation for most individuals and $500,000 per violation for partnerships, firms or groups.

The SEC is pushing for civil money penalties to discourage securities law violations. Many violators of securities laws, with the exception of insider trading, are only forced to disgorge their wrongfully obtained profits if caught. Therefore, the SEC seeks believes the authority to seek or impose substantial money penalties in addition to the disgorgement of profits is necessary to deter securities law violations.

Current law provides that, where the SEC finds a broker-dealer has willfully violated the securities laws, it may impose remedial sanctions ranging from a censure to a revocation of the firm's registration. In practice, the SEC says, these measures are much too severe or too strong.

"Right now we have the ability to slap the wrist or the atom bomb," Breeden said. "The power to impose a civil money penalty will give us something in between."

#90032c0084 02/01/1990 ~Comtex
SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 8

ANNOUNCEMENT:

Emerson extended its offer to McGill (TICKER: MGLL) from Jan. 31 to Feb. 7 1990.

As of Jan. 31, 1990, 1.17 million shares had been tendered which, when combined with shares already held by Emerson, total 99 percent of all shares.

The delay in the expiration is due to an extension of the HSR waiting period.

TOKYO (FEB. 1) - Japan's holdings of gold and foreign exchange reserves dropped 2.2 billion dollars from the previous month to 82.7 billion dollars at the end of January, the Finance Ministry said Thursday.

The decline was the first since September and reflected heavy dollar-selling by the Bank of Japan to support the yen, a ministry official said.

The yen fell to more than 146 to the dollar in January, its lowest level in several months.

Japan's reserves in January compared with 74 billion dollars in Taiwan, 71.5 billion dollars in the United States and 63.9 billion dollars in West Germany.

#90032d2980 02/01/1990 ~French/German News Agency

TAIPEI (FEB. 1) - Eastern Cosmetic Corp., a Taiwan-based manufacturer, said Thursday it would set up a joint-venture beauty product factory in the Soviet Union in Taiwan's first investment there.

Company chairman Tsai Chih-hong said a letter of intent to build the 10 million U.S. dollar plant in the Republic of Georgia was signed last month between Eastern and four Soviet government offices.

This would be the first Taiwanese investment in the Soviet Union, he added.

Mr. Tsai, who returned Tuesday from an eight-day trip to the Soviet Union, said Eastern would inject five million dollars and provide management, technology and manfacturing equipment for the cosmetics project through French company Parfum Esthetique Eastern France Sarl, in which Eastern has a stake.

The anti-communist Nationalist government here forbids its residents to have direct business contacts with the Soviet Union and Albania.

The manufactured cosmetics would be sold in the Soviet Union, he said, noting great potential there due to the general lack of consumer goods, including beauty products.

During his visit, Mr. Tsai also met Soviet officials to discuss the possibility of promoting visits there by Taiwan people, importing chemical products to the island, and exporting locally-made mineral water.

In line with its political and economic liberalization policies, the Taipei government is to consider opening direct trade with Moscow and Albania in a bid to expand outlets of Taiwan-made products and seek cheaper raw materials for local manufacturers.

The Soviet Union has become Taiwan's largest trading partner in the communist bloc, selling 101.07 million U.S. dollars worth of goods to the island in the first 11 months of last year and buying 26.74 million dollars worth of products from Taiwan in the same period.

Authorities here allowed a private trade delegation led by businessman Lin Tzu-ching to visit the communist giant in October 1988, the first such trip in four decades. A second trip also led by Mr. Lin followed in September last year.

TOKYO (FEB. 1) - Japan's Mitsubishi Motors Corp. said Thursday it was holding talks with European carmakers about possible joint production in Europe but refused to say if the discussions included Sweden's Volvo Car Corp.

The Swedish newspaper Svenska Dagbladet reported Wednesday that Mitsubishi was discussing with Volvo the possibility of using its assembly lines in Belgium.

"We have been talking with some local European companies regarding the possibility of cooperation," a Mitsubishi spokesman said. But he added that "nothing concrete" had emerged from the talks so far.

Mitsubishi, Japan's third-biggest manufacturer of motor vehicles and an affiliate of Chrysler Motor Corp. of the United States, already produces trucks in Portugal and buses in Turkey.

But it is also one of the few Japanese carmakers which have so far not announced plans to produce cars in Europe.

Nissan Motor Co. produces cars in Britain for the European market while Toyota Motor Corp. and Honda Motor Co. Ltd. have similar plans for British plants.

Of the smaller rivals, Isuzu Motors Ltd. makes commercial vehicles in Britain while Suzuki Motor Co. Ltd. has agreed to produce cars in Hungary.

Still being discussed are separate plans for Mazda Motor Corp. to produce cars in Europe, possibly with its affiliate Ford Motor Co. in West Germany and for Daihatsu Motor Co. Ltd. to make cars in Poland.

Mitsubishi announced separately Thursday that it would spend about two billion yen (13.8 million dollars) to build a testing ground near Obihiro in northern Japan.

The 1,083 hectare (2,675 acre) site will be one of the country's biggest and include facilities for cold-climate testing, it said.

"The company plans to conduct high-speed driving, braking and durability testing throughout the year and also comprehensive cold-climate testing of general vehicular functions in the winter," it said.

JAKARTA (FEB. 1) - Indonesia's export income from commodities outside oil and gas surged by at least 17 percent in 1989, Trade Minister Arifin Siregar said here Thursday.

Preliminary figures showed that non-oil and gas exports brought in at least 13.5 billion dollars in revenue last year, up from 11.53 billion in 1988, Mr. Siregar said while opening Indonesia's first export training centre.

Officials said non-oil exports, which in the early 1980's represented only about a third of Indonesia's total exports, last year accounted for 60 percent of the estimated 22.3 billion dollars in overall export income.

Mr. Siregar said the government had set a target of 15.6 percent in annual growth in non-oil exports during the current Fifth Five-year Plan which started in April.

Indonesia's main non-oil exports include timber products, textiles, rubber, coffee, palm oil and shrimps.

The new training center, built with a grant of 2.02 billion yen (13.3 million dollars) from the Japanese International Cooperation Agency (JICA),

will provide training in export marketing, quality control, exhibition management and Japanese trade idioms.

HELSINKI (FEB. 1) - Finnish banks were closed Thursday as the management staged a lockout following the rejection by employees of the employers' latest pay offer.

Teuvo Kallio, the national mediator, said he believed that the conflict would continue for at least two weeks.

Only the state-run postal savings bank Postipankki will be open as the staff have a different labour agreement from that in other banks.

The employees had started refusing to handle payment transfers between Finnish banks 10 days ago and had said they would go on strike from February 15.

The 38,000-member bank employees union has been asking for a 10 percent pay rise and more days off.

The banks associaton said late Wednesday that their final offer was 6.3 per cent to be paid in three stages during this year.

The employers' association has said that the banks were tied by an overall agreement agreed by the government, employers and the main trade unions earlier this year.

This deal guarantees a 4.5 percent increase in real incomes in the two-year period from March.

TOKYO (FEB. 1) - Japan's Finance Ministry is to let securities firms issue commercial paper provided that all offerings are rated by a credit-rating agency, a ministry official said Thursday.

The revised rules will expand fund-raising capacities for securities firms and make the commercial-paper market more liquid, bankers said.

They noted, however, that bond issues by securities firms did not require a credit rating.

The amount of commercial paper outstanding was 11.162 trillion yen (78 billion dollars) in October.

LONDON (FEB. 1) - The Glaxo drugs group has become one of the first major British-based companies to appoint a Japanese director, the firm has said here.

Hiroshi Konishi, the representative director president of Glaxo's main Japanese operation Nippon Glaxo, becomes a board member, and will continue to primarily take care of the group's interests in Japan, a Glaxo spokesman said.

Spokesman John Barr said Glaxo's total operations in Japan, which include a joint venture with Sankyo for production and distribution of Glaxo's best-selling anti-ulcer drug Zantac, generated 1989 sales of some 390 million pounds (655 million dollars).

The value of the Japanese interests to the group's consolidated accounts is around six per cent of its total sales of 2.5 billion pounds (4.2 billion dollars).

The Financial Times newspaper said the move reflected Glaxo's growing internationalization and its desire to expand in the booming Asian market for drugs. Only three of the firm's nine executive directors were British-born, the paper said.

Mr. Konishi, who is 47, has been involved with Glaxo in Japan since 1968. The firm's relations with the country date back to the early 1950's, Mr. Barr said.

Over half of Glaxo's global sales are generated by Zantac, which is claimed to be the world's best-selling prescription medicine.

LONDON (FEB. 1) - Consumption of both natural and synthetic rubber outstripped production last year, but the price outlook for 1990 is gloomy the International Rubber Study Group said here Thursday.

Consumption of natural rubber in 1989 rose by 3.6 percent from the previous year to a record 5.30 million tons. Production rose by 1.6 percent to 5.12 million tons, also a record.

New highs were also reached for synthetic rubber, with consumption up 3.7 percent at 10.39 million tons, and production up 2.3 percent at 10.38 million tons.

Natural rubber prices continued to fall last year from the high levels achieved in mid-1988, the Study Group said in its latest report.

So far this year the price of natural rubber has been weakening, and the outlook for the rest of the year is gloomy, according to many experts.

This view is supported by the excess of latex concentrate supply, excess production in the tyre and vehicle industries, uncertainty over the dollar's value during the year, and the prospect of slower economic growth in rubber consuming countries.

However, a number of factors could change this picture: low prices could slow production growth in 1990, and political changes in Eastern Europe (which in 1989 showed the highest growth in natural rubber consumption) could also influence prices.

The decline in rubber prices last year can be attributed to the appreciation of the dollar against other currencies, to the delayed effects of the International Natural Rubber Organisation (INRO) sales on the market, and to the excess supply of latex products and concentrates, the Group said.

It also cited the political turmoil in China, a major consumer, during May and June.

#90032d3940 02/01/1990 ~French/German News Agency

EDINBURGH (FEB. 1) - British North Sea crude oil production will average 2.01 million barrels per day this year against 1.83 million in 1989, according to County NatWest Woodmac's team of specialists here.

But third quarter production is likely to average only 1.71 million barrels a day due to shutdowns, County said in its latest monthly oil report.

A survey of scheduled shutdowns on British platforms in 1990 showed that production would be "significantly curtailed" by closures scheduled primarily for the purpose of installation or modification of Emergency Shutdown Valves (ESV's) and sub-sea isolation systems.

Scheduled closedowns on the Ninian and Beryl systems together with restricted throughput on the Brent pipeline system would significantly curtail third quarter production, the report said.

Much of the work is to be undertaken to comply with a June 1989 government directive that all platforms should be fitted with ESV's by end 1990. The report followed the Piper Alpha disaster in July 1988 which claimed 167

lives.

"The need to comply with regulations and, in certain cases, the decision to act in advance of legislation has necessitated extra work to be undertaken over and above normal summer maintenance", the County report said.

County estimates the value of lost production in 1990 at some 1.2 million pounds (two million dollars).

The proliferation of shutdowns comes after 1989, itself a low year, in which production was down by 25 percent on 1988, severely restricted by a number of major incidents resulting in extended field shutdowns plus serious equipment failures on other fields.

The combination of these incidents plus summer maintenance programmes pushed production down to 1.35 million barrels per day in June, the lowest level since 1979, making Britain a net importer of oil for the first time in almost nine years.

On a more optimistic note, the report said that throughput would improve into the 1990's as new fields came on stream.

The combination of a large number of probable developments and the continuing good performancce of existing fields could result in average oil production of some 2.4 million barrels per day in 1994, County predicted.

#90032d3950 02/01/1990 ~French/German News Agency

BUDAPEST (FEB 1) - The huge red star that has shone out over Budapest for the past 40 years, symbolising communist power, has finally been brought to earth.

The star, three metres (10m feet) in diameter and weighing one tonne, was dismantled and taken down from its perch on top of the Hungarian parliament, the highest parliament building in Europe.

The work, which will continue Friday, is being carried out by a "cooperative for the restoration and repair of historic monuments."

The Hungarian communist party, which had exercised sole power since 1949, dissolved itself at a special congress last October and formed a new party based on western-style social democratic principles.

The red star is to be replaced by the weather-vane that topped the building prior to the communist takeover. It will be stored in the building's cellars and its ultimate fate will be decided by the parliament elected in free general elections on March 25, an official said.

Electricity lighting up the star at night was cut last October.

"The red star was a symbol of too many bad things", Budapest museum curator and MP Attila Zsigmond said.

And for sculptor Imre Varga, "taking the star down ends a long insult to the nation".

BONN (FEB. 1) - World sugar production in the 1989-90 season could be more than a million tons lower than initial estimates, and there could be a sharp rise in prices before the end of the year, a West German trader has said.

World production for 1989-90 is likely to be around 106.5 million tons, against initial estimates of 107.7 million, F.O. Licht said in a study published Thursday.

This would still be 700,000 tons more than the previous season's production, but would not be enough to meet demand.

"Hopes of a stabilisation or even a slight increase in stocks have not been realised," the study said, and stocks could be down to a "critical level" by the end of the season.

The tensions on the sugar market have been reflected in price rises, encouraged by expectations of major buying by India, Pakistan, China and the Soviet Union.

White sugar prices rose from an average 6.76 cents a pound (0.45 kilos) in 1987 to 10.19 cents a pound in 1988 and 12.79 cents a pound in 1989.

In January, prices were up to 14.16 cents a pound, and F.O. Licht said it did "not rule out a steep rise in prices" towards the end of the year.

The higher prices could encourage growers to increase production in the 1990-91 season, but "the question is whether an increase in production as a result of these higher prices will be enough to save the market from chaos " F.O. Licht said.

BUCHAREST (FEB. 1) - An alarming number of infants with the AIDS virus have been found in Romanian hospitals and orphanages, according to medical

sources here.

The Romanian Institute of Virology has found that 20 per cent of all children under the age of three who underwent a test for AIDS were discovered to be seropositive.

The rate, vastly higher than anywhere else in Europe, is especially astonishing in a country where AIDS has been considered a low risk.

The 1,000 children tested were primarily from orphanages and pediatric hospitals in the capital Bucharest and the Black Sea port of Constanta, although children from other cities were included in the survey.

Officially some 200 children of the 1,000 tested were found to be carrying the virus. Some fear the real figure may be higher.

"We're talking about a major problem, totally unexpected," a French biologist told Agence France-Presse.

Dr. Alain Dublanchet said he came to Bucharest to verify results of tests run by Romanian laboratories.

"When they phoned me the results in Paris about 10 days ago, I didn't believe it," he told AFP. "The figures were just too high. We thought the reactive agents used must have been poor quality or the test methods faulty."

But he said he found after a visit to the Institute of Virology that laboratory conditions were excellent.

Romanian specialists are puzzled because none of the mothers tested positive, ruling out fetal transmission of the virus.

An explanation being advanced is that contamination may come from blood transfusions which are administered routinely for hepatitis or dietary insufficiencies, common in Romania because of widespread food shortages.

So far no test has been run on blood in transfusion centers.

DUSSELDORF, West Germany (FEB. 1) - West German businesses are more interested in moving into East Germany than fellow EEC member countr of lower wage costs, according to a survey published here Thursday.

Some 53 percent of 500 senior managers surveyed by the Wirtschaftswoche magazine said that East Germany was a more interesting proposition than a

European Economic Community country because of lower wages.

The managers also expressed increasing interest in other eastern European countries, with 36 percent saying that Hungary offered better prospects than Ireland, Portugal or Greece while 28 percent had the same view for Czechoslovakia.

Some 29 percent thought Hungary offered the same prospects as the three EEC countries, with 27 percent giving the same judgement for Czechoslovakia.

LONDON (FEB. 1) - Former chancellor of the exchequer Nigel Lawson has become a non-executive director of Barclays Bank, Britain's leading bank said Thursday.

Mr. Lawson will spend about two days a week advising the bank, particularly its broking operation Barclays de Zoete Wedd.

"This part-time job with a leading British financial house, which I am delighted to join, fits well with my plans to write a book and remain in politics," Mr. Lawson said.

Barclays did not reveal his salary, but financial sources said it was likely to be at least 100,000 pounds (168,000 dollars) a year. Barclay's highest-paid administrator currently earns 320,000 pounds.

Mr. Lawson resigned from the government on October 26 over disagreements on policy with Prime Minister Margaret Thatcher's personal adviser Sir Alan Walters.

He remains MP for Blaby in Leicestershire in central England.

#90032d5590 02/01/1990 ~French/German News Agency

LONDON (FEB. 1) - The British Anti-Apartheid Movement on Thursday demanded an official inquiry into why a U.S. businessman allegedly involved in proscribed arms sales to South Africa was able to become a director of one of the country's top weapons companies.

A spokesman for the AAM said that the appointment of Clyde Ivy, a director of Ferranti's U.S. arms subsidiary International Signal and Control (ISC) to the Ferranti board should have been refused on security grounds.

Ferranti took over ISC in 1987 but in September uncovered a multi-million-pound fraud scandal which cost the company hundreds of

millions of pounds and last month led to the group selling off its core radar activities to the rival General Electric Company.

Mr. Ivy was one of four ISC directors appointed to the Ferranti board after the 1987 take-over.

He left the board in May, along with James Guerin, the U.S. company's chief executive, who has since been unreachable.

The other two ISC directors are still on Ferranti's board, and are not suspected of fraud.

The AAM spokesman said the request for an inquiry was based on new revelations concerning the case, and which are to be outlined in a programme to be screened on independent British television later on Thursday.

He said the Thames Television programme showed "definite evidence" that sales of electronic equipment made by ISC to South Africa continued after the company became part of Ferranti, and were still going on until at least last year.

The programme claims that in addition to his ISC and Ferranti activities, Mr. Ivy was a top executive of Kentron, a missile company which is part of South Africa's state-owned Armscor company.

A spokesman for Mr. Ivy, who is believed to be in the United States, has confirmed that the businessman had links to Kentron, but not at such a high level.

NEW DELHI (FEB. 1) - Pakistani troops have been firing intermittently from across the Jammu and Kashmir state border for the last four days, the Press Trust of India (PTI) said Thursday.

Officials quoted by PTI from Jammu, the northern state's winter capital, said the shooting was aimed at keeping "alive" the ceasefire line dividing the disputed state in to areas controlled by Pakistan and India.

The officials reportedly said a villager from Digwal in the Poonch border area was injured during Pakistani firing Sunday. Doctors said the victim was out of danger.

The news agency did not say whether Indian forces returned the fire.

India and Pakistan, both claiming India's only Moslem-majority state, have fought two of their three wars over Kashmir since the partition of the subcontinent with independence from Britain in 1947.

RIO DE JANEIRO (FEB. 1) EFE - Soviet President Mikhail Gorbachev has accepted an invitation to become the first Soviet leader to visit Brazil, a Rio newspaper reported Thursday.

The invitation was made by president-elect Fernando Collor de Mello when he met Gorbachev at the Kremlin Wednesday as part of a world tour to drum up support for his new administration which takes office March 15.

The Rio daily O Globo said Gorbachev had agreed to visit Brazil, but said the date would depend on the Soviet leader's workload.

A spokesman for Collor de Mello said the Brazilian president-elect and Gorbachev discussed the difficulties the Soviet leader was facing implementing democratic and economic reforms in his country.

Collor de Mello, who won December presidential elections on a center-right ticket, stressed the need to increase bilateral ties between the two nations on a pragmatic rather than ideological basis.

Relations between Brazil and the Soviet Union have improved markedly since two decades of military rule ended in Brazil five years ago.

In 1988 outgoing President Jose Sarney made the first trip by a Brazilian leader to Moscow in 1988.

Following meetings Thursday with leading intellectuals at the Soviet Academy of Sciences, Collor de Mello and his entourage were to travel on to West Germany.

After visiting Bonn, Collor de Mello is scheduled to visit Rome, Paris, London, Lisbon and Madrid.

WASHINGTON (FEB. 1) UPI - Construction spending decreased 0.6 percent in December to $414.6 billion, the lowest monthly rate since a one percent decrease in June, the Commerce Department said Thursday.

December's construction spending followed a 0.7 percent increase in November to $417.3 billion, the department said. The figures were

seasonally adjusted to account for such factors as the dip in construction activity associated with winter weather.

The value of new construction in 1989 increased to $414.7 billion, compared with $409.7 billion in 1988, an increase of 1.2 percent and the lowest since a 5.1 percent decrease in 1982, the department said.

Spending on new homes was $134.9 billion in December, six percent below December 1988, while non-residential construction was $96.7 billion, four percent below November's $101.1 billion, it said.

For 1989, new private construction was $330.7 billion, compared with $328.7 billion the year before, an increase of 0.6 percent, the department said. Non-residential building construction for 1989 was $99.4 billion, an increase of two percent over $97.1 billion in 1988.

December public construction was $91.1 billion, three percent above November's $88.5 billion, it said. For the year, public construction spending was $84 billion, four percent above $80.9 billion in 1988.

MOUNTAIN VIEW, CA (FEB. 1) PR NEWSWIRE - Quintus Computer Systems Inc., an Intergraph company, has announced delivery of Quintus Prolog Release 2.5 on Sun workstations. Release 2.5 will also be available on the Intergraph Clipper and DEC RISC Workstations in the first quarter.

Quintus Prolog, the core product of the Quintus software development environment, provides applications developers with powerful tools for the development and delivery of applications.

Maintaining features include a full screen editor, incremental compiler, comprehensive debugger, module system, sophisticated memory management, on-line help, a large library of supported Prolog procedures and utilities as well as language interfaces to C, Fortran and Pascal. The new 2.5 release incorporates several design enhancements to the core Prolog architecture.

These enhancements include static linking of Prolog rules which can now be linked into the "shareable" section of a UNIX executable. Additionally an advanced Interprocess Communication Package allows Prolog processes to act

as knowledge servers on a UNIX network. A GNU Emacs interface provides an interface between Prolog and the popular GNU Emacs editor.

Applications developers using Quintus Prolog Release 2.5 can deliver runtime applications which include Quintus ProWindows and Database Interface add-on products.

"Quintus Prolog Release 2.5 is part of our ongoing commitment to developing state-of-the-art software development products to support our key customers. Of particular importance is the sophisticated way our Prolog products integrate with C and UNIX. We support the linking of C and Prolog into standard executables with Prolog code made shareable. This is a normal UNIX capability, but is not usually supported by other rule-based tools," stated Lawrence Byrd, vice president of Engineering.

Quintus Computer Systems Inc., headquartered in Mountain View, is the premier supplier of Prolog-based software productivity tools. These tools provide dramatic increases in programmer productivity for decision making in intelligent and traditional applications. Quintus products are feature-rich, provide graphics, rule-based capabilities and database facilities, and are designed to integrate easily with existing programs and databases. The company's products are supported on 80386-based PCs, leading technical workstations, departmental systems and mainframes.

#90032p0023 02/01/1990 ~PR Newswire

GLENDALE, CA (FEB. 1) PR NEWSWIRE - Baxter International's Hyland Divison announced today it has received approval from the West German Bundesgesundheitsamt (BGA) to market and sell Hemofil (r) M Antihemophilic Factor (Human) in West Germany. The product will be marketed in West Germany under the brand name, Factor VIII-M.

Indicated for the treatment of hemophilia A, Hemofil M AHF uses monoclonal antibodies to extract Factor VIII, the clotting protein missing from the blood of people with hemophilia. This advanced process, first approved by the U.S. Food and Drug Administration in February 1988, significantly reduces the amounts of the viruses that cause hepatitis and AIDS. It also reduces the extraneous proteins, such as fibrinogen and fibronectin, usually present in earlier Factor VIII concentrates.

Hemophilia is a hereditary disease caused by the absence of Factor VIII clotting factor in the blood. One out of every 10,000 males is estimated to suffer from the disease.

The risk of viral transmission, particularly hepatitis non-A, non-B and

HIV I, has long been a primary concern among physicians who treat patients with hemophilia. Approximately 90 percent to 95 percent of hemophiliacs who use Factor VIII products show symptoms or laboratory findings of hepatitis, a debilitating and sometimes fatal viral disease of the liver, during treatment.

To improve viral safety and purification of Hemofil M AHF, Baxter uses a solvent/detergent viral inactivation process, licensed from the New York Blood Center, and adds this step to the purification process. Baxter was the first company to combine advanced biotechnology purification and chemical viral inactivation in the manufacture of its Factor VIII.

In ongoing clinical studies, 29 patients who have never received any blood products prior to Hemofil M AHF have shown no evidence of transmission of HIV, hepatitis B or hepatitis non-A, non-B. These patients have been followed for up to 24 months.

Baxter has been a pioneer in the development of a number of key products to improve hemophilia treatment. The company introduced the first commercial Factor VIII concentrate to control bleeding in the mid-1960s. Since then, it has developed a number of improvements to advance Factor VIII safety. In March 1987, the company announced the first clinical trials of a genetically engineered Factor VIII, which are now being conducted in 15 centers worldwide. The use of genetically engineered Factor VIII will allow a supply that will not be limited by the availibility of human plasma.

FULLERTON, CA (FEB. 1) PR NEWSWIRE - Wynn's International Inc. (NYSE: WN) reported today net income of $1,471,000 or $.38 per share in the fourth quarter as compared to net income of $2,243,000 or $.59 per share in the fourth quarter of 1988. The 1988 fourth quarter included a gain of $1,011,000 (net of tax) or $.27 per share, from a sale of real estate.

Net sales for the quarter ended Dec. 31, 1989, were $67,478,000 compared to $70,176,000 a year ago, a decrease of 4 percent. The revenue decline was caused by continued lower sales at the Wynn's Climate Systems automotive air conditioning subsidiary.

Net income for the year ended Dec. 31, 1989, was $7,555,000 or $1.97 per share compared to $4,418,000 or $1.16 per share a year ago, an increase of 71 percent. As previously reported, the first quarter of 1989 was benefited by a gain on sale of joint venture interest (net of tax) of

$1,375,000 or $.36 per share.

Net sales for the 12 months ended Dec. 31, 1989, were $283,885,000, a decrease of 4 percent compared to $296,004,000 recorded for the same period in 1988.

Wynn's International Inc., founded in 1939, is a leading worldwide supplier of automotive air conditioners, O-rings, seals, molded rubber products, petrochemical specialties products and builders hardware. The company has 1,979 employees and is headquartered at 2600 E. Nutwood Ave., Fullerton, Calif. 92631, telephone: 714-992-2000.

#90032p0026 02/01/1990 ~PR Newswire

BIRMINGHAM, MI (FEB. 1) PR NEWSWIRE - ALC Communications Corporation (NASDAQ: ALCCC), based in Birmingham, today announced that it has ended discussions with Atlanta-based Telecom USA, regarding the proposed business combination between the two companies. On Jan. 8, 1990, the companies announced the signing of a letter of intent under which ALC would merge into a subsidiary of Telecom USA, the nation's fourth-largest long-distance company.

ALC's president, John Zrno, said that, "Although the discussions with Telecom USA have ended, management will continue to analyze and explore options available to the company to continue business as usual, consistent with the best interests of ALC's stockholders, customers, suppliers and employees."

For example, Zrno noted that on Tuesday, Jan. 30, Allnet Communication Services, Inc., the wholly owned subsidiary of ALC, completed the cash sale of one of its subsidiaries, CTI Telecommunications, Inc., at a material gain over the purchase price two years ago.

ALC also announced today that the grace period for payment of interest on its 11-7/8 percent Senior Subordinated Debentures due Dec. 31, 1989, had expired Jan. 30, 1990. ALC recently reached a "standstill" arrangement with the holders of more than 76 percent of the debentures. The debenture holders had agreed not to take any action regarding this formal "Event of Default."

The "standstill," however, was subject to the combination with Telecom USA. Management indicated that it will discuss with the controlling debenture holders extending the "standstill" until suitable other arrangements can be made.

ALC Communications is the parent company of Allnet Communication Services, Inc., one of the country's largest providers of long-distance telecommunication services. Allnet specializes in providing worldwide long-distance services to small and medium-size businesses via its 100-percent digital network.

HOUSTON (FEB. 1) PR NEWSWIRE - ENSR Corporation (AMEX: ENX) expects to report a net loss for the fourth quarter ending Dec. 31, 1989, of about $20 million, resulting from a streamlining to focus on the company's profitable core environmental businesses.

As part of the streamlining, ENSR will take a much more conservative approach to spending and investments, and pursue technology development primarily funded by client contracts, said ENSR Chief Financial Officer John Deckro.

"Profitability is ENSR's primary objective as we move into the 1990s," Deckro said. "Our streamlining will allow us to focus on the proven strength of our core service businesses."

According to Deckro ENSR revenues for the fourth quarter will remain healthy at approximately $44 million, representing a 17 percent increase over revenues of $37.7 million for the same period in 1988.

The net loss will be primarily the result of write-offs of two unprofitable businesses and a major portion of the costs associated with the development of financial reporting systems. In addition, ENSR will establish reserves in anticipation of costs associated with certain contracts and with the shutdown of the two businesses: the ENVIRONET regulatory information publishing service; and the health information software system.

ENSR also announced today that ENSR-Celgene, Inc. has been discontinued. However, ENSR will continue a relationship with Celgene under a cooperative agreement to provide bioremediation service for industrial clients.

"We expect the demand for environmental services to remain strong for the decade of the '90s," added ENSR Chairman Robert M. Zoch Jr. "With a focus on our core businesses, and with increased profitability through better control of costs and expenses, we will be in an excellent position to maintain and enhance our leadership in the industry."

ENSR (pronounced "N-Sir") Corporation has more than 20 years of experience solving complex environmental problems for America's leading industrial companies.

NEW YORK (FEB. 1) PR NEWSWIRE - Omnicom Group Inc. (NASDAQ: OMCO) announced today that its subsidiary, Doremus Holdings Inc., has reached agreement in principle to acquire Gavin Anderson & Company, the international financial and corporate public relations firm.

Omnicom said that on closing, it will merge Gavin Anderson & Company with the public relations division of its Doremus. Terms of the transaction were not disclosed but key shareholders of Gavin Anderson & Company will sign long-term employment agreements. Gavin Anderson will continue as chairman and chief executive officer of the company.

Gavin Anderson & Company was formed in 1981 and is headquartered in New York. It also maintains offices in Los Angeles, London, Tokyo, Hong Kong, Sydney and Melbourne. It is considered a leader among the specialist financial and corporate public relations firms and the most international in scope. Clients include: Boeing, BHP, British Gas, Cadbury Schweppes, Mitsubishi Bank, Reuters and Salomon Brothers.

In the United States, the firm will operate as Gavin Anderson Doremus & Company, and overseas as Gavin Anderson & Company. Total staff will be 120.

In commenting on the transaction, Bruce Crawford, president and chief executive officer of Omnicom, said, "With financial markets becoming more and more integrated around the world, we believe financial public relations firms need to be global to properly service clients. This acquisition of an already internationally established firm will allow us to immediately meet those client needs and provide the base to grow a significant business in an important communications area."

#90032p0038 02/01/1990 ~PR Newswire

SAN MANUEL, AZ (FEB. 1) PR NEWSWIRE - Magma Copper Co. (AMEX: MCU) today announced a record net income for 1989 of $58.5 million (after a $3.5

million pretax asset write-down in the fourth quarter) or $1.43 per common share on a fully diluted basis.

Net income in 1988 was $56.3 million or $1.47 per common share, assuming full dilution.

Fourth quarter 1989 net income was $5.9 million (after a $3.5 million pretax asset write-down) or $.14 per common share on a fully diluted basis compared to net income of $15.5 million or $.40 per common share for the fourth quarter 1988.

Net cash provided by operating activities in 1989 was $92.8 million compared to $69.8 million in 1988, an increase of 33 percent, resulting in a year-end cash balance of nearly $50 million.

Total revenues for the year 1989 was $650 million compared to $607.1 million in 1988.

Copper sales were $565.4 million or 87 percent of revenue in 1989 compared to $531.4 million or 88 percent in 1988.

Magma sold 461.6 million pounds of refined copper in 1989 compared to 464.7 million pounds for the year 1988.

During 1989, approximately 56 million pounds of copper were acquired through purchases of copper and copper concentrates from third parties at a cost of $65.7 million compared to 93.1 million pounds purchased in 1988 at a cost of $117.5 million.

Magma produced 389.9 million pounds of refined copper, excluding third party tolling, in 1989.

The average revenue per pound for 1989, including rod conversion premiums, was $1.22 compared to $1.14 in 1988; however, the average revenue for fourth quarter 1989 was $1.15 compared to $1.41 for the fourth quarter 1988.

Approximately 25 percent of Magma's refined production for 1989, excluding third party tolling, was from its lower-cost leaching/SX-EW processes as compared to 24 percent in 1988.

CONTACT: Frank Harris, 602-385-3256 or 602-385-2153, or Alan Oshiki, 602-385-3145, both of Magma Copper Co.

ANAHEIM, CA (FEB. 1) PR NEWSWIRE - The Clothestime Inc. (NASDAQ: CTME),

today announced sales for the four weeks of January ended Jan. 27, 1990.

Sales for the four weeks of January were $10.9 million or 4 percent higher that $10.4 million in the same period last year. Comparable stores sales for the four weeks of January increased 4 percent.

Fourth quarter sales were $45.0 million or 1 percent less than $45.6 million in the fourth quarter of last year. In the fourth quarter, the company reacted to a highly promotional environment by taking significant inventory markdowns to maintain its sales momentum which will result in a projected quarterly net operating loss. For the 52 weeks of Fiscal 1989, total sales of $187.1 million were 9 percent better than sales of $171.4 million for the prior year. Comparable store sales increased 10 percent for the fiscal year.

LOS ANGELES (FEB. 1) PR NEWSWIRE - Logicon Inc. (NYSE: LGN) today announced results for the third fiscal quarter and nine months which ended Dec. 31, 1989. Net income in the third quarter was $614,000, or 13 cents per share on revenues of $63,860,000. In the comparable period a year ago, the company reported net income of $1,863,000, or 41 cents on revenues of $55,718,000.

The results for the third quarter of fiscal 1990 include a $3,350,000 (48 cents per share after federal tax benefits) provision for loss on two fixed price development contracts with the U.S. Navy to provide air traffic controller training systems. The systems are in the integration and test stage, with delivery scheduled for late 1990.

For the first nine months of fiscal 1990, the company reported net income of $6,081,000, or $1.33 per share on revenues of $191,492,000, compared with net income of $7,081,000, or $1.56 per share on revenues of $169,704,000 for the first nine months of fiscal 1989.

Logicon is a leader in providing advanced technology systems and services to support national security, civil and industrial needs.

#90032p0042 02/01/1990 ~PR Newswire

LOS ANGELES (FEB. 1) PR NEWSWIRE - Bell Industries Inc. (NYSE: BI) today

declared a special cash dividend of $4 a share "so that our shareholders can realize tangible benefits from our successful restructuring program, improved earnings performance and substantial cash flow from operations." The dividend will be paid in two installments of $2 per share each.

Theodore Williams, Bell's president and chief executive officer, said that in approving the special cash dividend, the board of directors recognized that shareholders are entitled to a return on their investment, commensurate with the company's financial condition and business prospects.

"We believe that our shareholders are being penalized by a volatile stock market, which does not truly reflect the value of our shares," Williams said. "By paying this special cash dividend, Bell is recognizing its obligation to those who have invested their funds in our company."

An initial $2.00 special cash dividend will be paid March 30, 1990, to shareholders of record March 9, 1990. A second $2.00 special cash dividend will be paid Jan. 25, 1991, to shareholders of record Jan. 4, 1991.

Williams noted that the special cash dividends will be in addition to the recently increased regular cash dividend of $.40 a share, annually. The first quarterly dividend under the higher rate, 10 cents a share, will be paid to shareholders on Feb. 15, 1990.

The company executive said Bell expects continued improvement in earnings for the fiscal year ending June 30, 1990. Net income for the first six months of the year rose to $3,533,000, or $.60 per share, an improvement of 61 percent from the $2,192,000, or $.35 per share reported for the corresponding year earlier period.

Bell Industries Inc. distributes and manufactures products for the electronics, computer, building and other markets.

FOUNTAIN VALLEY, CA (FEB. 1) PR NEWSWIRE - Newport Corp. (NASDAQ: NEWP) today announced a stock repurchase program and an increase in its quarterly dividend.

President Tom Galantowicz said: "Newport's board of directors authorized the purchase, over a period of time, in the open market of up to one million shares of its outstanding stock. In addition, the board elected

to increase the quarterly dividend 33 percent to 4 cents per share from 3 cents per share, payable March 15, 1990, to stockholders of record March 1 1990.

Galantowicz continued: "We repurchased 1.5 million shares of Newport stock since May 1987. Now we are buying another one million shares -- 12 percent of our outstanding stock at a current market value of about $9 million.

"At current prices," Galantowicz concluded, "we believe the buy back of our stock is an attractive opportunity for the company, a good investment of corporate funds and in the best interests of our stockholder family."

Newport Corp. designs, manufactures, and markets a comprehensive line of instruments, components and accessories for the laser and electro-optical market which includes industrial, government and laboratory customers.

WEST CHESTER, PA (FEB. 1) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) (Weston), has been awarded a three-year basic ordering agreement with the city of Cincinnati, Ohio, to provide environmental testing, consulting and engineering services, as such services are needed by the city, the company announced today.

LeRoy E. Euvrard, office manager of Weston's Cincinnati office, said, "I think it is a far-sighted approach for the city to recognize a need to responsibly manage its property holdings and to comply with environmental regulations. This contract allows the city to have at its fingertips, firms which can help correct any environmental problems that may arise."

Services covered by the contract include real estate assessments, asbestos management, testing, removal and replacement of underground storage tanks, hazardous waste management and remediation of contaminated sites.

Only two other environmental firms were awarded similar contracts with Cincinnati.

Weston is a recognized leader in providing comprehensive public works infrastructure management, engineering and science consulting services to all levels of local government.

Weston's full-service approach includes planning, design, regulatory compliance, financing alternatives, construction and facility management

for water, wastewater, solid waste, storm water and hazardous waste projects.

Weston's clients include most major cities. Weston is headquartered in West Chester, and operates 42 offices nationwide, including Los Angeles, Houston, Chicago, Atlanta, Boston, New York and Washington, D.C.

#90032p0045 02/01/1990 ~PR Newswire

LOS ANGELES (FEB. 1) PR NEWSWIRE - Caesars World Inc. (NYSE: CAW) today said its estimates that its earnings per share will range between 3 and 10 cents for the fiscal 1990 second quarter ended Jan. 31.

In the comparable quarter of fiscal 1989, Caesars World's net income was $10,383,000, or 42 cents per share, on approximately the same number of common and common equivalent shares outstanding.

The company said its estimates indicate earnings per share for the first six months of fiscal 1990 ended Jan. 31, 1990, will range between 74 and 81 cents. For the comparable period of fiscal 1989, Caesars World's net income was $33,096,000, or $1.35 per share.

The company said the primary factor in its expected earnings decline for the fiscal 1990 second quarter was substantially lower win percentages at both of its Nevada hotel/casino operations in Las Vegas and Lake Tahoe, despite the fact that business remained strong and the volume of casino play increased significantly over the same prior-year quarter. In fact, both Caesars Palace in Las Vegas and Caesars Tahoe in northern Nevada each established records for table-game activity for any quarter in their respective histories. The company emphasized that the table-game record at Caesars Palace was achieved even though there was a substantial increase in casino capacity on the Las Vegas Strip during the most recent quarter.

The company also announced today that it intends to proceed with its previously authorized program to repurchae shares of its common stock on the open market or in negotiated purchases. The company's board of directors previously authorized the repurchase of up to 3,000,000 shares and, to date, the company has repurchased 55,000 shares. The timing and actual completion of any further purchases will depend on market conditions.

PITTSBURGH (FEB. 1) PR NEWSWIRE - Bayer USA announced today that its parent company, Bayer AG, has completed its purchase of Creations Aromatiques S.A., Port Valais, Switzerland, and Creations Aromatiques, Woodside, N.Y.

Bayer purchased the businesses from Mallinckrodt Inc., St. Louis, and its parent company, International Minerals & Chemical Corp. (IMC), Northbrook, Ill. No purchase price was disclosed.

Bayer already holds a substantial interest in the flavors, fragrance and aroma chemicals market through its wholly owned Haarmann & Reimer group of companies. In the United States, Harmann & Reimer Corp., Springfield, N.J. is an operating company of Bayer USA Inc., Pittsburgh.

The present operations of Creations Aromatiques will continue under that name and identity as a separate company affiliated with Haarmann & Reimer.

Brian F. Schmalz remains the president of Creations Aromatiques, New York.

R.M. Classen, president and CEO of Creations Aromatiques S.A., will continue in this capacity and guide the worldwide operations from Geneva.

Sales of Creations Aromatiques in their last fiscal year, 1988-89, reached $30 million.

Bayer USA is the U.S. management holding company of Bayer AG, West Germany. In addition to Creations Aromatiques and Haarmann & Reimer, other major Bayer USA companies include Mobay Corp. (chemicals), Miles Inc. (healthcare), and Agfa Corp. (imaging technologies). Together, the Bayer USA companies had 1989 sales of more than $5 billion, or approximately 20 percent of Bayer's sales worldwide.

COLUMBUS, OH (FEB. 1) PR NEWSIRE - The Limited, Inc. (NYSE/LSE/TSE: LTD) reported net sales for the four-week period ending January 27, 1990 of $285.6 million, an increase of 11 percent from sales of $256.7 million for the same period in 1989. Sales for the 52 weeks ended January 27, 1990 increased 12 percent to $4.577 billion from $4.071 billion for the same period last year. The Limited sold its Lerner Woman division effective April 29. 1989. Had last year results excluded Lerner Woman after April 28,1988, the sales increase would have been 17 percent for the four weeks

ended January 27, 1990 and 17 percent for the 52-week period.

The Company's comparable store sales increased 9 percent for the four-week period ended January 27, 1990 and 9 percent for the 52 weeks ended January 27, 1990.

The Limited, Inc.'s fiscal year ending Feb. 3, 1990 has 53 weeks. The Company will release fiscal January sales and fiscal year-end sales on Feb. 8, 1990.

The Limited, Inc., through the Limited, Express, Victoria's Secret, Henri Bendel, Lerner, Lane Bryant and Abercrombie & Fitch, presently operates 3,171 specialty apparel stores throughout the U.S. and distributes apparel nationally through the Victoria's Secret, Lerner, Lane Bryant and Roaman's catalogues.

#90032p0049 02/01/1990 ~PR Newswire

AKRON, OH (FEB. 1) PR NEWSWIRE - The BFGoodrich Company (NYSE: GR) reported today that 1989 net income declined 11.9 percent from the record set in 1988, primarily because of lower earnings in the company's Geon vinyl--or polyvinyl chloride (PVC)--business during the second half of the year.

Goodrich, a chemical and aerospace company, had net income in 1989 of $172.4 million, or $6.48 per share, compared with $195.7 million, or $7.42 per share, in 1988.

Sales in 1989 were $2.4 billion, compared with $2.3 billion a year earlier.

For 1989, BFG's Geon Vinyl Products business segment reported operating income of $183.3 million, down 21.5 percent from the $233.6 million in operating income in 1988.

The company's Specialty Chemicals business segment had 1989 operating income of $77.3 million, an increase of 12 percent from the $69.0 million in operating income in 1988. BFG's Tremco subsidiary recorded another year of sales and income gains, while continuing to expand in markets outside of the United States. The Specialty Polymers and Chemicals Division, while continuing to make substantial investments in research and market development, recorded good sales and income growth compared with 1988 results.

The Aerospace business segment reported 1989 operating income of $56.5 million, an increase of 36.5 percent from 1988 operating income of $41.4

million. The increase in Aerospace sales and income was fueled in part by results from Tramco, a leading provider of maintenance, repair and overhaul services, which BFG acquired in the third quarter of 1988. Also contributing to the strong Aerospace sales and income performance were results from the deicing systems, aircraft evacuation systems and commercial aviation wheel and brake operations.

The company's pretax income from continuing operations during 1989 was $244.2 million, down only slightly from $250.1 million in 1988. During 1989 BFG had income tax expense of $73.0 million, compared with $45.0 million in the previous year. The lower income tax expense during 1988 reflected the full utilization of all available net operating loss carryforwards. During 1989 only tax credits were available to reduce income tax expense.

Goodrich's net income during the fourth quarter was $27.0 million, or 98 cents per share, compared with $37.2 million, or $1.39 per share, during the same quarter of 1988. Sales during the 1989 quarter were $573.7 million; during the 1988 fourth quarter sales were $594.7 million.

LONDON (FEB. 1) PR NEWSWIRE - The board of Asea Brown Boveri Ltd, London, and the independent directors of ABB Kent (Holdings) plc announced today that agreement has been reached on the terms of a recommended cash offer for all ordinary shares of ABB Kent (Holdings) plc not already owned by ABB Asea Brown Boveri Ltd, Zurich. At present, ABB Zurich owns 54.5 percent of the ordinary share capital of ABB Kent.

The offer is for 178 pence (US$2.95) in cash for each ordinary share in ABB Kent. This offer represents a premium of 34 percent over the ABB Kent share price on the London stock exchange at the close of business Jan. 31, 1990, and values the shares not owned by ABB Zurich at 62 million (US$103 million).

Sune Carlsson, executive vice president of ABB Zurich, said, "ABB Kent and Combustion Engineering Inc., recently acquired by ABB, have some overlapping activities in the field of process automation and instrumentation. The international market in this area is highly competitive and the technology is changing very quickly. Clearly we should coordinate product development, manufacturing and marketing activities to achieve economies of scale which will be facilitated by the inclusion of ABB Kent as a wholly owned subsidiary of ABB."

ABB Kent is an international organization providing a capability in

process control, industrial measurements, control valves and liquid metering. In 1988 ABB Kent had revenues of 130 million (US$216 million) with a pre-tax profit of 8.6 million (US$14.3 million). Total average number of employees was 3,770.

SAN DIEGO (FEB. 1) PR NEWSWIRE - Smith Laboratories Inc. (NASDAQ: SMLB) today reported a 15 percent increase in fourth quarter revenues ended Oct. 31, 1989, to $4,305,000 and a 10 percent increase in full year revenues to $16,353,000 from the same periods in the prior year. In 1988, the company reported $3,743,000 in fourth quarter revenues and $14,931,000 in revenues for the full year.

Product revenues reached record levels during the quarter, increasing 13 percent to $3,481,000 from $3,085,000 in the prior year. For the full year, product revenues increased six percent to $13,145,000 from $12,407,000 in 1988.

Income from continuing operations before terminated merger expenses relating to the previously announced International Power Machines Corporation and Rehabilitation Technologies Inc. transactions and taxes was down four percent for the quarter, to $552,000 from $578,000 in the prior year. The company recorded record income from continuing operations before terminated merger expenses and taxes for the full year, up two percent to $2,105,000 from $2,067,000.

In December of last year, Smith announced the signing of a definitive agreement with the Columbia Hospital Corporation of Ft. Worth, Texas to combine Smith, Columbia and certain of Columbia's affiliated companies through a tax-free exchange of stock. The new company's stock is expected to trade on the NASDAQ. Smith said that proxy/prospectus materials are scheduled to be mailed to shareholders in late March 1990. Shareholders will meet in May 1990 to vote on the combination.

The company said that it has provided Columbia, through a secured note, approximately $2,700,000 to assist in the acquisition of two hospitals: Willow Creek in Dallas and University Hospital in Ft. Lauderdale, Fla.

Smith reported a net loss of $379,000 for the quarter ended Oct. 31, 1989, due to increased costs resulting from the expiration and cancellation of merger and acquisition agreements. Also contributing to the loss for the quarter were one-time charges associated with the refinement and redirection of the company, including termination costs for a number of employees and consultants and costs related to the altering of production

levels of older Sutter products in conjunction with the introduction of new products.

Tim Wollaeger, president of Smith Laboratories, said Smith's fourth quarter and full-year revenues are the highest achieved by the company since the sale of its pharmaceutical business in 1986; its product revenues have reached new record highs.

ATLANTA, GA (FEB. 1) PR NEWSWIRE - Samna Corporation (NASDAQ: SMNA) today announced an increase in revenues and net income for the fourth quarter ended Dec. 31, 1989. Net revenues were $3,815,000, an increase of 33 percent over the $2,865,000 reported in the same quarter a year earlier. The revenue increase was primarily attributable to sales of Samna's graphical word processor Ami(R) Professional, which began shipping on Oct. 23, 1989. Net income for the quarter was approximately $17,000, or $.01 per share, compared with a net loss of $751,000, or $.29 per share, for the fourth quarter of 1988.

The company reported net revenues of $11,067,000 for the year, a 22 percent decrease from the $14,117,000 reported the year earlier. The decrease in revenues was primarily attributable to a decline in the sales of the company's character-based products. Net loss for 1989 was $2,256,000, or $.88 per share, compared with net income of $501,000, or $.20 per share, for 1988.

Said Mohammadioun, chairman and president of Samna, stated, "Our new product launched in October of 1989, Ami Professional, is a program which provides sophisticated, graphical word processing capabilities in a user-friendly environment. The successful introduction of this product, combined with a continued marketing emphasis, indicates revenue growth during the coming fiscal year."

Samna Corporation designs, manufactures, markets and supports computer software primarily for word processing applications.

TROY, MI (FEB. 1) PR NEWSWIRE - Du Pont Automotive Products' finishes production facility in Flint, Mich., has earned the elite Ford Q1 Preferred Quality Award, according to Edward J. Donnelly Jr., Du Pont's worldwide director - automotive finishes.

At a special luncheon Jan. 31, in Dearborn, Mich., Du Pont's Larry C. Crawley, Ford business manager, and Flint plant manager Richard L. Waibel were presented the award by Alexander J. Trotman, executive vice president - Ford North American Automotive Operations.

According to Ford, the Q1 Award evaluation criteria entail a comprehensive review of plant quality practices and performance. The satisfaction of customers - both Ford Assembly plants and the ultimate retail customer - is a major consideration of the ad hoc team that determines if the award should be given. Included on the team are specialists from both the

"customer" plants and the product engineering office that designs the parts or commodities.

Ford pays particular attention to a plant's ability to maintain quality while implementing new manufacturing processes. The use of statistical methods to control manufacturing techniques is also important. These statistical methods focus on preventing defects, rather than finding defects at the end of the line. The methods increase quality and productivity by reducing the need for redundant testing, inspection, product rework and material scrappage.

The Ford Q1 Award is well known for influencing the acceptance and widespread use of statistical methods among Ford's 2,100 suppliers in North America.

According to Waibel, Du Pont's Flint facility supplies "Centari" basecoat/clearcoat and monocoat enamel finishes to several Ford assembly plants. Employing 240 people, the state-of-the-art plant also produces "Cromax" waterborne basecoats and "Dulux" acrylic enamels used in the automotive industry.

The leading supplier of topcoat finishes in North America, Du Pont offers a full range of OEM and aftermarket finishes, including cathodic electrodeposition primers, anti-chip coatings, high-solids lacquers, high-solids enamel monocoat and basecoat/clearcoat system, and the new low-temperature cure "Cromax-LTC" waterborne basecoat.

Du Pont also provides extensive technical support and services, including finishes training, color development, application trouble- shooting, and assistance in paint shop layout, debugging and plant start-up.

With world headquarters in Troy, Du Pont Automotive Products offers more than 100 product lines to the worldwide auto industry, including finishes, plastics, elastomers, fibers, fabricated products, electronics, advanced composites, specialty chemicals and lubricants.

WATERTOWN, MA (FEB. 1) PR NEWSWIRE - Summit Technology, Inc. (NASDAQ: BEAM) today announced that revenues for the fourth quarter of 1989 were $2.43 million compared to $0.64 million for the same period last year. For the 12 months ended Dec. 31, 1989, revenue increased 360 percent to $5.16 million from sales of $1.12 million recorded in the 12 months of 1988. Net income for the fourth quarter ended Dec. 31, 1989 was $117,000

or 1 cent per share on 9.66 million average common shares outstanding as compared to a net loss of $350,000 or 4 cents loss per share for the fourth quarter of fiscal 1988. Net loss for the 12 months of 1989 was $1.46 million or 17 cents per share on 8.5 million average shares outstanding as compared to a net loss of $2.19 million or 32 cents per share on 6.87 million shares outstanding for the 12 months of 1988.

Summit also announced that Richard W. Grant has been appointed vice president of finance/administration. Grant brings over 25 years of professional finance and management experience to Summit. Prior to joining the company, Grant was group financial officer for the Oxbow Corporation. From 1981 to 1985, Grant was controller of Helix Technology Corporation and from 1979 to 1981 he was division controller of W.H. Nichols Company. From 1969 to 1979, Grant held several financial management positions at Raytheon. At the time he left Raytheon, Grant held the position of manager of corporate accounting. Grant holds a B.S. degree in electrical engineering from Northeastern University and an M.B.A. from Columbia University. Previous chief financial officer, William G. McLendon, will assume responsibilties for new business development and act as an advisor to the board of directors.

Summit Technology, Inc. has established a leadership position in designing manufacturing and marketing medical excimer laser systems. A major focus of the company's business is in ophthalmology where applications have been developed for the treatment of common vision disorders including near-sightedness, far-sightedness, glaucoma, astigmatism, and superficial diseases of the cornea. To date, the Summit Technology ExciMed(tm) excimer laser systems have been used to treat several hundred patients in clinical trials domestically and internationally.

CANTON, MA (FEB. 1) PR NEWSWIRE - Hills Department Stores, Inc. (NYSE: HDS) today announced sales for the first four weeks of January of $81,046,000, an increase of 24 percent from sales of $65,358,000 for the comparable four weeks in January 1989. Same store sales for the four-week period increased 5.2 percent.

Sales for the first 13 weeks of the fourth quarter (period ending Jan. 27, 1990) were $697,347,000, an increase of 21.7 percent over sales of $572,945,000 for the comparable 13 weeks in fiscal 1988. Same store sales increased 1.7 percent for this 13-week period.

Sales for the 52-week period ended Jan. 27, 1990 were $2,051,991,000, an increase of 23 percent over sales of $1,668,556,000 for the comparable 52 weeks is fiscal 1988. Same store sales increased 1.5 percent.

Final consolidated sales for the fiscal month, quarter and year will be higher than reflected above because Hills will be reporting results of operations based on a 53 week fiscal year which ends Feb. 3, 1990.

The company operates 208 stores compared with 167 stores last year.

HOLLYWOOD, FL (FEB. 1) PR NEWSWIRE - Heico Corporation (AMEX: HEI) today reported that its board of directors has authorized the purchase of up to 150,000 shares of the company's stock in the open market, from time to

time, depending on market conditions.

The buyback plan was put in place in light of the board's belief that the current share price doesn't adequately reflect the inherent value of the company's stock. The company added that it has current cash balances of approximately $6 million and that the pending sale of the laboratory equipment businesses will generate additional cash balances.

The company also announced year end audited operating results consistent with previously reported preliminary results.

After giving effect to the previously announced pending selling of its laboratory equipment businesses and proxy litigation settlement, the company reported fiscal 1989 sales and earnings from continuing operations of $26,473,000 and $1,721,000 ($.54 per share), respectively. Earnings from continuing operations reflect a reduction in net income of $1,316,000 ($.41 per share) relating to the non-recurring charges of the 1989 proxy contest, including the litigation settlement, and a provision for restructuring the company's aviation operations.

In fiscal 1988, comparable sales and earnings from continuing operations were $22,925,000 and $3,232,000 ($1.00 per share), respectively.

After deducting losses relating to the discontinued laboratory equipment operations, the company reported a net loss in fiscal 1989 of $4,648,000 ($1.45 per share). The net loss includes a $5.6 million anticipated loss on the disposal of the laboratory operations.

In fiscal 1988, the company reported net income of $2,486,000 ($.77 per share).

The company also reported that the current order backlog (Jan. 31, 1990) for aviation and defense products approximated $22 million, as compared to a $21.5 million backlog of orders as of the end of fiscal 1988.

Heico's continuing operations are engaged in the manufacture and sale of aviation and defense industry products with operations in Hollywood and Ft. Lauderdale, Fla.

WASHINGTON (FEB. 1) PR NEWSWIRE - Marriott Corporation (NYSE: MHS) today reported earnings per share from continuing operations of $1.62 for the fiscal year ended Dec. 29, 1989, up two percent from $1.59 a year ago, as restated.

Excluding a divestiture gain, and restructuring charges and writeoffs applicable to continuing operations, earnings per share from continuing operations increased 10 percent from 1988.

Consolidated sales totaled $7,536,000,000 in 1989, up 14 percent from $6,624,000,000 in 1988, as restated. Operating income rose 7 percent in 1989.

The company said income from continuing operations in 1989 was $181,000,000, down four percent from $189,000,000 in the prior year. Excluding a pretax gain of $231 million on the divestiture of Marriott's airline catering operations, and pretax restructuring charges of $256 million applicable to continuing operations, 1989 income from continuing operations rose 4 percent.

Marriott said results were in line with projections made in conjunction

with the December 1989 announcement of a major restructuring which includes the planned sale of its fast food and family restaurant businesses. Results for these businesses are reported as discontinued operations.

The company's net income for fiscal 1989 was $177,000,000 ($1.58 per share), compared to $232,000,000 ($1.95 per share) in 1988.

For the 1989 fourth quarter, Marriott Corporation reported net income of $1,000,000 (1 cent per share), compared to $65,000,000 (56 cents per share) in 1988. Income from continuing operations was $36,000,000 (33 cents per share), versus $52,000,000 (45 cents per share) in the 1988 quarter. Results for continuing operations in the 1989 fourth quarter included the gain on the airline catering divestiture as well as restructuring charges and writeoffs, while the 1988 quarter included pretax hotel development gains of $16 million. Excluding these items, earnings per share from continuing operations increased 24 percent in the 1989 fourth quarter. Sales totaled $2,516,000,000 in the 1989 quarter, up 18 percent from $2,136,000,000 in the prior year, as restated.

NEW YORK (FEB. 1) PR NEWSWIRE - Woolworth Corporation (NYSE: Z) reported that domestic sales for the four weeks ended January 27 rose 8.5 percent to $283 million from $261 million in the comparable year earlier period.

Total sales increased 7.9 percent to $481 million from $446 million and foreign sales, expressed in U.S. dollars, rose 7.0 percent. If foreign exchange rates had remained constant, foreign sales would have increased 3.7 percent and total sales would have increased 6.5 percent. Domestic comparable store sales for the four weeks rose 4.5 percent.

For the cumulative fifty-two weeks domestic sales rose 9.5 percent to $5,126 million from $4,681 million in the year earlier period. Total sales increased 9.0 percent to $8,764 million from $8,044 million and foreign sales, expressed in U.S. dollars, rose 8.2 percent. If foreign exchange rates had remained constant, foreign sales would have increased 7.8 percent and total sales would have increased 8.8 percent. Domestic comparable store sales for the fifty-two weeks rose 5.3 percent.

Harold E. Sells, chairman and chief executive officer, stated, "January sales were satisfactory. Particularly strong comparable store sales gains were posted by our Kinney operations in the U.S. and by our Woolco stores in Canada."

#90032p0073 02/01/1990 ~PR Newswire

STAMFORD, CT (FEB. 1) PR NEWSWIRE - Rayonier Forest Resources Company, (NYSE: LOG) the managing general partner of Rayonier Timberlands, L.P., announced preliminary 1989 Partnership results today.

Sales for 1989 totaled $94.8 million, an increase of $4.2 million over 1988 sales of $90.6 million. Partnership income of $72.0 million rose $4.7 million over the $67.3 million earned in 1988. Income per publicly traded Class A Unit rose 42 cents per unit to $3.76 from last year's $3.34. Cash available from operations to publicly traded Class A Units was $4.01 in 1989 compared to $3.42 in 1988.

Continued strong pricing led to an approximate seven percent increase in income over the prior year. Stumpage prices improved in response to a strong log export market and near capacity production in the pulp and paper industry. These prices increases more than offset a slight volume reduction in the Southeast.

For the fourth quarter, sales totaled $13.7 million in 1989 compared with $15.8 million in 1988. Partnership income of $10.1 million was $0.6 million lower than the 1988 fourth quarter of $10.7 million. Fourth-quarter cash available per publicly traded Class A Unit was 61 cents in 1989 compared to 57 cents in 1988. Similar to last year, fourth-quarter sales volume represented the lowest quarterly volume of the year as customers again concentrated on harvesting 1989 contracts during the first nine months.

At year end 1989, contracts for approximately 35 percent of the projected 1990 harvest volume have been awarded. This level of commitment is similar to the level under contract at the end of 1988. Average prices on the 1990 contracts are higher than those realized for the 1989 harvest in both regions, but particularly in the Northwest where public timber supply continues to be restricted by preservationist pressures. Management indicated that the effect of the improved pricing will be somewhat lessened by the ongoing plan to gradually reduce the Northwest volume cut each year in order to reach a more sustained harvest level by the mid-1990s.

ITT Rayonier Inc., the forest products subsidiary of ITT Corporation, owns 74.7 percent of the outstanding Class A Units of Rayonier Timberlands, L.P. The balance is publicly traded on the NYSE.

#90032p0077 02/01/1990 ~PR Newswire
NEW YORK (FEB. 1) PR NEWSWIRE - The Chubb Corporation (NYSE: CB) today reported that net income for the year ended Dec. 31, 1989 was $420.8 million or $9.83 per share compared with $359.6 million or $8.55 per share for the like period of 1988. These amounts include tax benefits of $19.2 million or $.44 per share in 1989 and $20.4 million or $.48 per share in 1988 relating to the "fresh start" adjustment as a result of the Tax Reform Act of 1986. Net income for the fourth quarter of 1989 was $107.1 million or $2.44 per share compared with $83.9 million or $2.00 per share for the fourth quarter of 1988. These quarterly amounts include "fresh start" tax benefits of $4.8 million or $.11 per share in 1989 and $5.1 million or $.12 per share in 1988.

Consolidated operating income is no longer presented separately. For comparative purposes, such amounts were $389.9 million or $9.12 per share and $372.6 million or $8.85 per share for the years ended Dec. 31, 1989

and 1988, respectively, and $97.3 million or $2.22 per share and $93.4 million or $2.22 per share for the fourth quarters of 1989 and 1988, respectively.

Property and casualty post-tax underwriting loss amounted to $25.0 million for the year 1989 compared with income of $15.8 million in 1988. These underwriting results include the "fresh start" tax benefits. Net premiums written were $2.7 billion, a decrease of 1.1 percent compared with 1988. The combined loss and expense ratio, after dividends to policyholders, was 101.5 percent for the year ended Dec. 31, 1989 compared with 99.8 percent for 1988. The fourth quarter combined loss and expense ratio, after dividends to policyholders, was 103.3 percent in 1989 compared with 101.8 percent in 1988. Catastrophe losses for the year 1989 amounted to $89.5 million, of which $73.5 million were incurred in the second half of the year. Catastrophe losses for the fourth quarter amounted to $31.5 million. Such losses represented 3.4 percentage points and 4.7 percentage points of the combined loss and expense ratio for the year and the fourth quarter, respectively. In 1988, catastrophe losses amounted to $16.4 million or 0.6 of a percentage point for the year and $2.2 million or 0.3 of a percentage point for the fourth quarter.

Post-tax investment income, exclusive of life and health insurance operations, was $345.1 million for the year 1989 compared with $300.7 million in 1988, an increase of 14.8 percent.

Life and health insurance resulted in post-tax income of $42.1 million for the year 1989 compared with $31.5 million in 1988.

Real estate operations contributed post-tax income of $42.0 million for the year 1989 compared with $40.0 million in 1988.

FAIRFAX, VA (FEB. 1) PR NEWSWIRE - CACI International Inc. (NASDAQ: CACIA) has announced the release of its new geographic information system, InSite-USA(TM).

Developed by CACI, the world's largest international marketing consulting firm, InSite-USA(TM) allows marketers to analyze new site locations for building development, new properties for retail outlets, measure consumer demand, compare competitive market potential, set sales targets, or plan product merchandising.

What makes InSite-USA(TM) different from other systems available is a

unique concept that geographies are the building blocks for areas of data. InSite-USA(TM) builds on this concept by using an open architecture design, a fourth-generation programming language, and comprehensive and powerful retrieval and query systems to perform data analysis and computation. In addition to standard geography and data sets, client databases, third-party data and customized geography can be included in individual systems.

Gregory Bradford, executive vice president, states, "InSite-USA(TM) is the culmination of years of discussion between our development team and our clients about their need for versatile and adaptable marketing systems. With the multitude of databases on the market today, InSite- USA(TM) answers a very important need."

CACI, in its 28th year, is an international high-technology and professional services corporation. CACI is a leader in advanced information systems, engineering, logistics, proprietary software and market analysis. CACI provides worldwide services in support of national defense agencies, civil government and commercial enterprises.

CACI offices are located in major cities in North America and Western Europe. Corporate headquarters are in the metropolitan Washington area.

BINGHAMTON, NY (FEB. 1) PR NEWSWIRE - Outdoor Sports Headquarters, Inc. (OSHI), a wholly owned subsidiary of Centuri, Inc. (NASDAQ/NMS: CENT), has purchased substantially all of the assets of Alpha Sports, Incorporated, an Albany, N.Y.-based distributor of outdoor sporting goods, it was announced today by Milton Koffman, chairman and chief executive officer of Centuri. OSHI also intends to purchase from affiliates of Alpha Sports a new 42,000-square-foot warehouse/ distribution center located in Menands, N.Y., a suburb of Albany. The details of the transaction were not announced.

Commenting on the transaction Koffman said, "The acquisition of Alpha Sports will add approximately $8 million to OSHI's sales, which are anticipated to approach $240 million on an annual basis in fiscal 1990. In addition, the distribution facility is perfectly located with respect to servicing the Northeast market, and should enable OSHI to increase market share in that area of the country."

OSHI is the nation's largest wholesale distributor of hunting, fishing, archery, camping and marine equipment and the only such distributor operating on a nationwide basis.

Centuri, Inc. in addition to its wholly owned OSHI subsidiary, holds an 85 percent equity interest in Poloron Products, Inc. (NASDAQ: PPRI) which designs, manufactures, and distributes modular housing and mobile homes through its wholly-owned Poloron Homes of Pennsylvania, Inc. subsidiary, which is based in Middleburg, Pa.

NEW YORK (FEB. 1) PR NEWSWIRE - Michael J. Hershman, president of Fairfax Consultants Ltd., announced that prominent New York Lawyer Michael Berne has joined the firm as senior managing director, effective Feb. 1.

Berne, a partner in the prestigious law firm of Baer, Marks and Upham (1984-1990) and a successful special prosecutor for New York State in two of the state's worst scandals, will serve as senior managing director, in charge of the New York office of Fairfax Consultants.

Fairfax Consultants Ltd. is a management consulting firm which specializes in international investigations and security services. With an expert team of professionals, many with prior service in the FBI, CIA, U.S. State Department, and the Attorney General's office, Fairfax's area of expertise over the past eight years includes crisis management, investigations involving corporate takeovers, trade secret protection, fraud, computer security, executive protection services, hostage negotiations and counter-terrorism. The clientele includes Fortune 500 corporations, financial institutions, foreign governments and individuals.

"Michael Berne earned a reputation as a tough prosecutor," said Hershman in announcing the high-level appointment. "He is well known for his high ethical standards. He is also very knowledgable about the investigative needs of law firms and their clients. This mix of characteristics will be valuable to us, as Fairfax offers a wide range of security services including litigation. The fact that Mr. Berne is an expert in health care, and an author, are icing on the cake for us.

"Our company provides private security systems and advice on very sensitive asset management issues," continued Hershman. "And we are certain that Michael Berne will be a valuable addition to the Fairfax team."

"This is an exciting opportunity to become affiliated with Fairfax as it grows and prospers," stated Berne. "Corporate security and systems for

safegarding information have become essential elements in the business world of the nineties. We can provide law firms and their clients with an investigative edge. I am eager to apply the skills which I have developed in both the private and public sector on behalf of Fairfax and its clients."

DEFIANCE, OH (FEB. 1) PR NEWSWIRE - Defiance, Inc. (NASDAQ: DEFI) announced a net loss for the quarter ended Dec. 31, 1989 of ($162,000) or ($.03) per common share compared to net earnings of $222,000, or $.05 per common share for the same period in the prior fiscal year.

Net earnings for the year to date were $40,000 or $.01 per common share compared to net earnings of $623,000 or $0.13 per common share for the same period in the prior fiscal year.

Earnings were adversely affected by a shipping interruption caused by a quality problem at a supplier to Precision Products. This problem has been corrected and shipments resumed on Feb. 1, 1990.

Defiance is an integrated supplier of products and services to the OEM manufacturers in the Transportation industry.

LOUISVILLE, KY. (FEB. 1) PR NEWSWIRE - Vacation Stores, Inc. - the nation's third largest company for exchange, resale and rental of timeshare, interval and whole ownership vacation properties - announced it

has moved its corporate headquarters to Louisville from Springfield, Virginia, a suburb of Washington, D.C.

According to John Bowers, president of Vacation Stores, Inc., the move to Louisville made economic sense. "Louisville's central location allows us to service our customers on both coasts more effectively," stated Bowers. "We also found it difficult to maintain a quality work force in Washington. I've been nothing but pleased with the employees we've been able to attract and choose from in Louisville."

By the end of the year, Vacations Stores plans to employ 30 workers at its Louisville headquarters, located in NTS Plaza. Employment is expected to grow to 56 employees by 1991. Vacation Stores currently services 30,000 members worldwide with offices in Mexico City and Mazatlan, Mexico, and Leeds, Great Britain, as well as Louisville. Plans call for five regional U.S. offices to open within the next two years. In addition, Adventure Travel, Inc., a full-service travel subsidiary, was opened in 1987 to serve the travel needs of members.

"Too often, once someone has purchased a vacation property," added Bowers, "they can't exchange, rent or sell the property. Vacation Stores has helped create an international secondary market for people who own these types of shared vacation properties."

Bowers and Vacation Stores also have been very supportive of charitable causes in the Washington area with the creation of the Colter Foundation, a foundation formed and named for his son Jason Colter Bowers who has diabetes. The Colter Foundation plans to continue its charitable work in Louisville.

NEW YORK (FEB. 1) PR NEWSWIRE - The Zweig Total Return Fund, Inc., (NYSE: ZTR) a closed-end investment company that began operations in Sept. 1988, today announced its monthly distribution to shareholders. The distribution of 8 cents per share, will be paid on Feb. 26, 1990, to shareholders of record on Feb. 12, 1990, (ex-date Feb. 6, 1990).

Dr. Martin Zweig, chairman of the board and president of the Fund, said, "I am pleased to announce this distribution to The Zweig Total Return Fund's shareholders. This distribution is in keeping with our policy to make minimum monthly distributions of 0.83 percent of the fund's net asset value (10 percent on an annualized basis), offering our shareholders a

stable cash flow."

The Zweig Total Return Fund has assets of over $580 million. The fund's investment objective is to seek the highest total return, consisting of capital appreciation and current income, consistent with the preservation of capital.

PEAPACK, N.J. (FEB. 1) PR NEWSWIRE - Fedders Corporation (NYSE: FJQ) today announced record sales and profits for 1989, as projected last July. The record sales of the room air conditioner manufacturer rose 66 percent for the year ended Dec. 31, 1989 to $367.6 million from $221.1 million in 1988.

Earnings per share increased 41 percent in 1989 to $1.16, fully diluted, before the extraordinary gain from 82 cents in 1988.

For the year, income before the extraordinary gain from utilization of tax loss carryforwards totaled a record $22.1 million compared with $14.9 million in the prior year. Net income for 1989 totaled $23.7 million, or $1.24 per share fully diluted, versus $21.9 million, or $1.20 per share fully diluted in 1988.

For the fourth quarter ended Dec. 31, 1989 net sales increased 11 percent to $74.4 million from $67.2 million in the prior-year quarter. Income before extraordinary gain in the quarter rose 33 percent to $5.0 million, or 26 cents per share, versus $3.7 million, or 20 cents per share fully diluted in 1988. Net income in the 1989 quarter totaled $6.5 million, or 34 cents per share, compared with $6.4 million, or 35 cents fully diluted, a year earlier.

Fedders Chief Executive Officer Sal Giordano, Jr. indicated that Fedders' share of the North American room air conditioner market totaled 30 percent in 1989, for a 50 percent increase from its 20 percent share of market in 1988 and double the 1987 share of 15 percent.

"Based on existing orders, we anticipate further growth in our North American market share this year. Sales should exceed $415 million in 1990, assuming normal weather, and we expect good profitability improvement for the year from the full integration of our three acquired operations," Giordano said. "In addition, earnings per share will benefit from our share repurchases of late last year." The company

acquired 873,500 shares during the fourth quarter of 1989 for $11.7 million under the buyback program authorized on Oct. 24, 1989.

NEW YORK (FEB. 2) PR NEWSWIRE - United States Banknote Company L.P. announced today that the expiration date of the tender offer for 12,671,337 shares of common stock of International Banknote Company, Inc. (AMEX: IBK) commenced by a U.S. Banknote subsidiary on June 1, 1989 has been further extended.

The offer, as extended, and the proration period will now expire at 5 p.m. New York City time, on Friday, Feb. 9, 1990, unless further extended. Shares tendered pursuant to the offer may be withdrawn at any time prior to their acceptance for payment as provided in the offer of purchase. As of the close of business on Jan. 31, 1990, 17,639,275 shares of International Banknote Common Stock (constituting approximately 92.8 percent of the common stock outstanding on a fully diluted basis) have been tendered pursuant to the offer and not withdrawn.

U.S. Banknote said that it and International Banknote had amended their merger agreement to extend from Jan. 31, 1990 to Feb. 20, 1990, the date after which the merger agreement may be terminated by either party if the offer has not been consummated. U.S. Banknote said this extension was required to afford additional time to complete definitive financing documentation with Citibank, N.A. and to satisfy certain of the conditions to be contained in the definitive credit agreement described in the offer to purchase.

ST. LOUIS (FEB. 1) PR NEWSWIRE - Emerson Electric Co. (NYSE: EMR) announced today that it has extended the expiration date in connection with the proposed acquisition of McGill Manufacturing Company, Inc. (NASDAQ: MGLL), by Emersub XXVI, Inc., a subsidiary of Emerson, until midnight (New York City time) on Feb. 7, 1990. The tender offer was originally scheduled to expire on Jan. 17, 1990, and was extended to Jan. 31, 1990.

Emersub XXVI has commenced a cash tender offer for all outstanding shares of common stock of McGill for $93 per share of common stock. Emerson reported that as of January 31, approximately 1.17 million shares of McGill common stock had been tendered which, when combined with the approximately 279,000 shares not yet tendered but subject to option agreements, represent 99 percent of the McGill shares outstanding. The extension of the tender offer is due to the previously announced extension of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 in connection with the acquisition of McGill.

McGill, based in Valparaiso, Ind., manufactures bearings and electrical products primarily for industrial use.

Emerson Electric Co., based in St. Louis, manufactures a broad range of electronic, electrical and other products for consumer, commercial, industrial and government and defense markets.

LANCASTER, PA. (FEB. 1) PR NEWSWIRE - Armstrong World Industries Canada Ltd. has purchased assets used in the production of ceiling materials from Fiberglas Canada, a subsidiary of Owens-Corning Fiberglas Corp.

The Armstrong company in Canada, with headquarters in Montreal, Quebec, is an affiliate of Lancaster-based Armstrong World Industries Inc. (NYSE: ACK).

The assets sold to Armstrong are primarily equipment used in the manufacture of fiberglass ceiling materials. The equipment will be installed in an existing Armstrong plant in Gatineau, Quebec, a company spokesman said, permitting this plant to produce fiberglass ceiling materials for the first time. Its production of mineral fiber ceiling

materials also will continue, he said.

Terms of the cash transaction were not disclosed.

Armstrong intends to begin the manufacture of fiberglass ceiling materials at Gatineau by the end of October. The installation of the newly purchased equipment will mean additional employment at this plant, the spokesman said, but he said specific numbers were not yet available. The plant at Gatineau currently employs about 180 men and women.

Armstrong's affiliate in Canada produces resilient flooring and insulation materials at a plant in Montreal and acoustical wall coverings at a plant in Toronto, Ontario.

The parent company operates six other ceiling materials plants in North America -- at Marietta and Beaver Falls, Pa.; Pensacola, Fla.; Mobile, Ala.; Macon, Ga.; and Hilliard, Ohio -- and several others in Europe. In addition, a ceilings plant now under development at St. Helens, Ore., will begin production this year. Armonstrong is a manufacturer and marketer of interior furnishings and industrial specialty products.

HAMILTON, MT (FEB. 1) PR NEWSWIRE - Ribi ImmunoChem Research Inc. (NASDAQ: RIBI) announced today its financial results for the fourth quarter and year ended Dec. 31, 1989.

Revenues from sales for the fourth quarter of 1989 achieved $175,704, as compared to $146,052 in the fourth quarter of 1988.

Interest income declined in the fourth quarter of 1989, resulting in lower total revenues of $279,794, as compared to $302,244 for the fourth quarter of 1988.

Revenues from sales for the year ended Dec. 31, 1989, were up 23 percent, achieving $728,328 as compared to $591,326 for the year ended Dec. 31, 1988. Total revenues for 1989, affected by lower interest income, were down 4 percent, achieving $1,240,072, as compared to $1,288,388 in 1988. The net loss for 1989 was $2,891,105, or 33 cents per share, compared to $2,355,184 or 27 cents per share in 1988.

"Our financial results are better than originally anticipated by our 1989 financial plan," said Robert E. Ivy, chief executive officer, president and chairman. "Our accelerated research and development efforts, designed to bring our products to market as quickly as possible, consumed considerably more cash than in previous years. Yet, increased sales and judicious cash management allowed Ribi ImmunoChem to exceed its planned performance."

CHICAGO (FEB. 1) PR NEWSWIRE - Sears Merchandise Group today reported that revenues from continuing operations in January were 2.2 percent higher than last year.

Gross revenues for the four weeks ended Jan. 27 were $2,166,482,920 compared with restated volume of $2,119,263,659 in the same period of 1989. Discontinued operations accounted for sales of $12,784,000 in January 1989.

Michael Bozic, chairman and chief executive officer, said double digit increases were reported in sales of children's and junior apparel, home appliances, sporting goods, riding and lawn mowers, and business equipment. These increases were largely offset by soft sales in other lines, he said.

Bozic noted that sales were competing against a strong performance in January last year, when a gain of 11.4 percent was recorded over the previous year.

Sears Merchandise Group gross revenues for the 52 weeks ended Jan. 27 were $33,574,235,105. This represents an increase of $1.27 billion or 3.9 percent over revenues of $32,305,591,214 in the comparable period a year ago.

Although the company operates on a calendar year for fiscal reporting, Sears Merchandise Group gross revenues are reported on a February-through-January basis for ease in comparison with the retail industry.

NEWTON, IA (FEB. 1) PR NEWSWIRE - Maytag Corporation's (NYSE: MYG) North American appliance business remained strong in the fourth quarter of 1989 and operating income showed improvement over the third quarter because of price and volume increases. Net income for the period continued to feel the impact of interest on the firm's higher long-term debt as well as depressed sales in the United Kingdom.

According to figures released today, Maytag's sales in the period ending Dec. 31, 1989, were $800.2 million. Operating income amounted to $77.6 million, while both income from continuing operations and net income were $39.8 million, or 38 cents a share based on an average of 105.6 million shares outstanding.

In the fourth quarter of 1988, which was prior to the acquisition of Hoover, Maytag's sales were $477.4 million, operating income was $56.9 million and income from continuing operations was $33.1 million, or 43 cents a share on an average of 76.6 million shares. Net income was $52.6 million, or 69 cents a share.

For the year 1989, Maytag posted sales of $3.09 billion. Operating income amounted to $279.9 million and both income from continuing operations and net income were $131.5 million, or $1.27 a share on an average of 103.7 million shares outstanding.

In 1988, prior to the Hoover acquisition, Maytag had sales of $1.89 billion. Operating income was $226.2 million and earnings from continuing operations were $135.5 million, or $1.77 a share on an average of 76.6 million shares. Net income was $158.6 million, or $2.07 a share.

LEXINGTON, MA (FEB. 1) PR NEWSWIRE - On January 31, 1990, Raytheon Company (NYSE: RTN) received the initial funding for the Tacit Rainbow missile system under two contract awards that total $110 million.

The funding covers the development of the U.S. Army ground- launched version of the missile and technology transfer of the data package for the U.S. Air Force air-launched second source program.

In September, 1989, the U.S. Air Force announced that the Raytheon team had won the Tacit Rainbow competitions to develop the ground-launched version for the Army and to qualify as a second source producer of air-launched version for the Air Force/Navy. The use of common subsystems in both versions is expected to reduce procurement and system life-cycle costs.

The team consists of Raytheon's Missile Systems Division, Bedford, Mass., McDonnell Douglas' Missile Systems Company, St. Louis, Mo., and E-Systems' Melpar Division, Fairfax, Va. Raytheon is the prime contractor with responsibility for the guidance and control and ordnance for both versions. McDonnell Douglas is responsible for the airframe subsystem for both versions, and E-Systems will participate in the development and production of selected electronics subsystems.

The Tacit Rainbow missile system is a home-on-emitter, jet- propelled,

unmanned autonomous air vehicle. It can be programmed to fly to a designated target area and then loiter while searching for enemy targets. The ground-launched version will be deployed on the U.S. Army's Multiple Launch Rocket System (MLRS), and the air-launched version will be carried on and launched from Air Force B-52 and Navy A-6 aircraft.

The Tacit Rainbow program is sponsored by the U.S. Air Force's Aeronautical Systems Division, Wright Patterson AFB, Ohio.

HOUSTON (FEB. 1) PR NEWSWIRE - Digicon Inc. (NYSE: DGC) announced that it has filed a petition to reorganize under Chapter 11. Also filing separate reorganization petitions were Digicon Geophysical Corp., a Digicon domestic subsidiary and Digicon Finance N.V., a Netherlands Antilles finance subsidiary.

Digicon said that none of its foreign operating subsidiaries are included in the reorganization. These foreign subsidiaries, which are located primarily in Europe and the Far East, are not expected to be impacted during the reorganization process.

Digicon also announced the signing of an agreement in principle, pursuant to which an investment group has committed to make an investment of approximately $13 million in new equity capital contemporaneously with the completion of the reorganization process.

Edward R. Prince Jr., chairman and Larry E. Lenig Jr., president of Digicon, said that during the reorganization process, the company will continue to operate its business in the normal course and that each of its subsidiaries' operations would also continue on an uninterrupted basis. No changes in the management of its operations will result from the reorganization. Prince and Lenig also said that arrangements were already in hand with Digicon's principal working capital lender to continue the company's revolving credit facility on the same basis as before the commencement of the proceedings.

Digicon said that the reorganization was necessary to restructure its indebtedness in order to meet investors' requirements for the injection of new capital. Although earlier transactions have reduced the company's indebtedness and increased its equity capitalization by over $50 million, and many other possibilities for meeting investor requirements have been explored in recent months, it became apparent that no other restructuring alternative was likely to result in achieving the goals necessary to appropriately recapitalize the business. The filing companies' indebtedness includes six different unsecured bond issues totaling about $55 million. Three of these bond issues were in default immediately prior to the filing.

The agreement in principle for the new equity capital is with Jupiter Investment Company of New York which is headed by Douglas B. Thompson and D.O. (Swede) Nelson. Thompson has previously been a secured lender to the company and currently owns approximately two percent of the company's common stock. Prior to forming Jupiter, Thompson headed a group which, at one time, owned a substantial majority of the company's secured revolving credit. He has been involved in a number of oil service restructurings during the past few years and, until May 1989, was president of R.D. Smith & Company of New York. Nelson has 40 years experience in the international petroleum business including 30 years with Chevron Corporation. Nelson retired in 1980 after serving for 12 years as president of Chevron Overseas. Nelson was educated in petroleum engineering and, since 1980, has served as a consultant on petroleum matters to both private and governmental entities in the United States and abroad.

AUSTIN, TX (FEB. 1) PR NEWSWIRE - The CompuAdd Corporation today reported worldwide 1989 revenues of $400.1 million, compared to $240.7 million in 1988, an increase of 66 percent. The privately held company also said its earnings set a record for the eighth consecutive year.

CompuAdd, which employs more than 1,300 people, designs, manufactures and markets a wide range of personal computers and is a major reseller of add-on products and software from leading vendors.

"Customer acceptance of CompuAdd's products and services resulted in a growth rate that continues to outpace the industry, and we believe the company is well positioned for future growth," said Bill H. Hayden, CompuAdd's chief executive officer.

In 1989, CompuAdd introduced a widely accepted new line of space- saving personal computers, expanded its mail order operations and attained prominence as a retailer by expanding its computer store network to 84 outlets in the United States and Canada.

In 1990, the company expects to continue aggressive growth in the United States and broaden its presence in international markets.

Plans also call for an expanded systems product line and new peripheral products, the latter of which will include Macintosh- compatible hardware marketed by a newly formed Macintosh division.

PALATINE, IL (FEB. 1) PR NEWSWIRE - Square D Company (NYSE: SQD) announced today that it has concluded the sale of its Yates Industries copper foil operations in Europe to Arbed S.A. of Luxembourg and its 50 percent ownership of the Furukawa Circuit Foil Co. Ltd. joint venture in Japan to Furukawa Electric Co. Ltd. of Japan.

Jerre L. Stead, chairman, president and chief executive officer of Square D, said that after agreement was reached to sell the European and Japanese operations, Square D negotiated and reached agreement to sell the Yates United States copper foil operations in Bordentown, N.J., to a new company to be formed by Arbed and Furukawa. He said Square D expects total proceeds from the three transactions involving Yates operations will be approximately $175 million U.S.

Stead said the European sale includes Yates facilities in Wiltz, Luxembourg, and Silloth, England. The Japanese sale involves the Square D portion of a copper foil joint venture established by Yates and Furukawa Electric in 1970.

Yates Industries, acquired by Square D in 1980, manufactures copper foil for printed circuit boards. It had 1988 sales of approximately $130 million.

Square D is a worldwide leader in industrial control and electrical distribution products, systems and services. Its 1989 sales from continuing operations were $1.63 billion.

Arbed, a major European steel producer, is part of an international corporate group which had 1988 sales of $5 billion. Furukawa, a leader in electric wire and cable, optical-fiber cable and nonferrous metals had 1988 sales of about $4 billion.

NEW YORK (FEB. 1) PR NEWSWIRE - W.R. Grace & Co. (NYSE: GRA), the

diversified international specialty chemical company, today announced that its income after taxes from continuing operations for the 1989 fourth quarter rose 50 percent to $83 million, and that net income increased by 8 percent over the comparable 1988 quarter. Income from continuing operations for the full year 1989 rose 34 percent to $257 million, while net income for the year increased 8 percent to $253 million. Grace Specialty Chemicals Co. produced record earnings which contributed significantly to Grace's results for both the fourth quarter and the full year.

According to J. Peter Grace, chairman and chief executive: "We have defined the company's focus for the 1990s and believe that each of our four major businesses is fundamentally sound. The broad industrial base of our product lines should enable us to grow earnings steadily even during economic downturns."

For the fourth quarter ended Dec. 31, 1989, Grace's income from continuing operations was $83,377,000, 50 percent higher than the 1988 fourth quarter figure of $55,485,000. In addition to favorable operating results, the 1989 fourth quarter was also affected by the reversal of previously accrued charges for stock appreciation rights. The 1989 period also benefited from a lower effective tax rate in part due to a reduction in foreign taxes. On a per share basis for the quarter, Grace earned 98 cents from continuing operations compared with 65 cents per share in 1988. Net income for the 1989 period was $81,804,000, compared with the 1988 figure of $75,549,000 which included $20 million of net gains from discontinued operations. On a net income per share basis, Grace earned 96 cents versus 88 cents, a 9 percent improvement. Sales for the 1989 fourth quarter were $1,719,194,000, an increase of 4 percent above 1988 fourth quarter sales of $1,651,651,000.

Full year results included income from continuing operations of $256,641,000, a 34 percent jump over 1988 earnings of $192,059,000. Grace earned $3.01 per share in 1989 from continuing operations, a 33 percent increase over the $2.26 earned in 1988. Excluding a non- recurring gain of $62 million after taxes from the restructuring of the company's energy-related operations, reported in the 1989 third quarter, income from continuing operations for the full year was slightly ahead of the prior year's comparable figure. Net income for the year was $253,178,000, or $2.97 per share, 8 percent above 1988 net income of $233,613,000, or $2.75 per share. Sales for 1989 were $6,114,585,000, up 6 percent over 1988 sales of $5,786,110,000.

BOSTON (FEB. 1) PR NEWSWIRE - F.T. White, chairman and chief executive officer of Myrias Computer Corp., announced today that arrangements had been completed for Myrias to acquire the majority of the sales and sales support organization of the supercomputer division of Evans & Sutherland.

As a consequence of the arrangement, the Myrias sales and sales support organization now totals 20 professionals with new locations being opened immediately in Seattle, Denver, San Francisco, and Houston areas, bringing the total number of cities with Myrias offices to 11.

In making the announcement, White said ''The decision of Evans & Sutherland to close their supercomputer division came at a time when the initial results from early Myrias installations were exceeding our best expectations. The ability to build on the parallel processing expertise and momentum that was developing in the E&S organization was an opportunity to good to turn down. By tripling the size of sales organization, we now have the opportunity to "jump start" our sales program to fully exploit the strong user references coming from our initial customers."

Jerry Clay, the new vice president of sales for Myrias said, "The E&S sales team is committed to the inevitability of parallel architectures dominating the numerical computing arena during the 90's. The Myrias system combines ease of use and performance in a manner we believe will be exceptionally attractive to serious users of large scale computers.''

Coincident with the announcement, Myrias announced that Peter Gregory, formerly president of Myrias Computer Corp. and acting vice president of sales had left the company to return to his consulting practice.

Myrias Computer Corp. develops high performance computers based on parallel technology featuring ease of programming and exceptionally high performance.

DOMINGUEZ, CA (FEB. 1) PR NEWSWIRE - Pic 'N' Save Corp. (NASDAQ: PICN) announced today that its sales for the four weeks ended Jan. 28, 1990, were $28,089,000, an increase of 14.0 percent over sales of $24,636,000 in the prior year. Sales in comparable stores increased by 2.5 percent over the prior year.

Pic 'N' Save Corp. also confirmed a change of its fiscal year to a 52-week year ending on the Sunday with closest proximity to Feb. 1.

The current four-week accounting period ended Jan. 28, 1990 is the transition period between the prior fiscal year ended Dec. 31, 1989 to the new fiscal year beginning Monday, Jan. 29, 1990.

For reference purposes, the monthly accounting periods, the new fiscal quarters, and the structure of the new fiscal year are shown on the attached exhibit. Additionally, the exhibit shows the monthly unaudited sales for the 1989 year for both comparable stores and all stores, as well as the planned dates of all 1990 monthly sales announcements.

In commenting on the January sales results, Lewis B. Merrifield III, president and chief executive officer, stated, "Sales are improving over the weak environment experienced in the fourth quarter of 1989, and we are particularly pleased that solid sales results continue in the Southern markets which represent relatively new areas for Pic 'N' Save."

Pic 'N' Save Corp. operates a chain of 190 retail stores in the Western and Southern United States and the New York Metropolitan Area. These stores specialize in new, close-out, variety general merchandise which is sold at substantial reductions from original retail prices.

PITTSBURGH (FEB. 1) PR NEWSWIRE - USX Corp. (NYSE: X) announced that its board of directors has adopted amendments to the by-laws of the corporation implementing notice procedures for stockholder proposals to be considered at the annual meeting and for nominations for election of directors.

These procedures assure that notices will be timely and in writing. USX also confirmed that its 1990 annual meeting of stockholders will be held as usual on the first Monday in May: May 7, 1990.

The amended by-laws provide that for business (other than election of directors) to be properly brought before an annual meeting by a stockholder, written notice is to be provided to the corporation not less than 60 days nor more than 90 days prior to the meeting. The stockholder's written notice must contain a brief description of the proposal and reasons for conducting such business at the annual meeting, the stockholder's name and address (as they appear on the corporation books), the class and number of shares beneficially owned by the stockholder, and

any material interest of the stockholder in such business. In the event that less than 70 days notice or prior public disclosure of the date of the meeting is given or made to stockholders, to be timely, notice from a stockholder proposing business must be received by the corporation by the 10th day following the date notice of the meeting date was mailed or public disclosure of the meeting date was made, whichever occurs first.

Stockholder nominations for the election of directors are governed by similar provisions as to timeliness of written notice. The notice must set forth as to each proposed nominee information including name, age, business address, principal occupation, shares beneficially owned and other information required in proxy solicitations pursuant to Regulation 14A under the Securities Exchange Act of 1934. In addition, the nomination notice must include the nominating stockholder's name and address (as they appear on the corporation books) and the class and the number of shares of the corporation beneficially owned by the stockholder. The corporation may also require a proposed nominee to provide information reasonably required to determine his eligibility to serve as a director of the corporation.

The new by-laws further provide that in the event the timely written notice requirements have not been complied with, the chairman of the meeting is empowered to preclude transaction of the business proposed or disregard the nomination.

#90032p0127 02/01/1990 ~PR Newswire

MIAMI (FEB. 1) PR NEWSWIRE - Atlantis Group, Inc. (AMEX: AGH) announced today that its Rigal Plastics, Inc. subsidiary, based in Melbourne, Fla., has entered into a joint venture with CKS Plastics, Inc. of Orlando to manufacture and sell blow-molded plastic containers to the dairy, juice and bottled water industries in the state of Florida.

CKS Plastics, Inc. is principally owned by Charles K. Sewell, a 26-year veteran of the plastics industry. Sewell founded Sewell Plastics in 1964 building the company into a 5-plant operation before selling the company in 1970. Under this new ownership, Sewell remained and led the company to become the largest blow molder in the United States. Thereafter, he started CKS Plastics, Inc. in 1989, and also operates CKS Packaging, Inc., an Atlanta-based blow molder of plastic containers serving the southeastern United States.

"The affialiation between CKS Plastics and Rigal Plastics creates a very strong company with enhanced manufacturing and service capabilities to

accommodate our growing customer base in Florida," Sewell said of the joint venture. "Atlantis Group is highly respected in the plastics industry. It has a significant presence in the molded plastics field, is one of the nation's top 10 producers of general purpose polyethylene film, and is the second largest manufacturer of stretch film in the country. Together, we're going to be an unbeatable team in marketing our product to the dairy, juice and bottled water industries in Florida."

H. Randall Litten, president and chief operating officer of Atlantis, said the joint venture will operate under the name of CKS/Rigal Plastics. "We are pleased to be affiliated with Charles Sewell," Litten said. "He has been a major player and innovator in the plastic blow-molding industry since its infancy. Sewell's operations have always been distinguished by their commitment to low cost, excellent quality and consumer service. That is also the kind of operations we run, so we should make excellent partners in this new CKS/Rigal venture. Additionally, our Molded Plastic Products Group, which represents about 20 percent of our 1989 revenues, performed well last year and this joint venture should accelerate our growth in the attractive Florida market."

Headquarted in Miami, Atlantis is a diversified plastics and furniture manufacturing company which acquired Regal Plastics in late 1988.

#90032p0128 02/01/1990 ~PR Newswire

LOWELL, AR (FEB. 1) PR NEWSWIRE - J. B. Hunt Transport Services, Inc., (NASDAQ-NMS: JBHT) announced today revenues and earnings for the fourth quarter and year ended Dec. 31, 1989.

Consolidated revenues for the fourth quarter totaled $132.1 million, up 29.2 percent over the $102.2 million for the similar period of 1988. Net earnings amounted to $8.4 million, or 36 cents per share, compared with $8.5 million, or 36 cents per share, for the corresponding period of 1988.

For the year ended Dec. 31, 1989, revenues increased 29.7 percent to $509.3 million from $392.6 million for 1988. Net earnings amounted to $30.6 million, or $1.30 per share, compared with $33.0 million, or $1.40 per share, for 1988.

Revenue increases for the year and the fourth quarter were primarily related to further market share penetration and the associated expansion of the company's revenue equipment fleet.

1989 annual operating income improved by 3 percent, despite higher fuel prices and excess industry capacity in the first half of 1989. Net

earnings were affected by increased interest expense related to the fleet expansion and a higher effective tax rate.

Fourth-quarter operating income was up 12 percent in 1989 compared with the comparable period of 1988. Improvements in driver utilization, decreased tractor fuel consumption and reduced communication expense, all the result of specific cost reduction programs, contributed to this increase. Higher fuel prices adversely affected operating income. Increases in interest expense and income taxes held net earnings constant with the fourth quarter of 1988.

ANNANDALE, VA (FEB. 1) PR NEWSWIRE - Ameribanc Investors Group (NASDAQ-NMS: AINVS) announced 1989 earnings of $7.2 million, consistent with previously released estimates.

Earnings per share on a fully diluted basis were $1.13. Fourth quarter net earnings were $1.4 million after increasing general loss reserves by $1.2 million.

Net interest revenue for the year, after provision for losses, increased to $20.6 million, compared to $16.8 million in 1988. Controlled asset growth resulted in year-end assets of $1.34 billion, an increase of $71.2 million over Dec. 31, 1988. Intensified balance sheet restructuring contributed to the net interest revenue improvement during the year, including an increase of $72.3 million of interest earning assets resulting from the profitable conversion of real estate, joint venture and other partially earning investments.

Deposits at year-end reached $974.4 million, an increase of 8.2 percent from the prior period. Ameribanc also originated $361 million in residential mortgage loans, of which $270 million were sold with servicing rights retained. At year end, Ameribanc's servicing portfolio grew to $971 million, an addition of $180 million over year-end 1988.

Arthur C. Weid, chairman and president of Ameribanc, noted: "Ameribanc Savings Bank enjoyed a very successful year in 1989 despite intense market competition and the negative image created by the problems generally prevalent among other thrifts. Ameribanc reported full compliance with all regulatory capital requirements as of year end. The board believes our business plan for 1990 clearly indicates our ability to continue to meet those requirements."

TARRYTOWN, N.Y. (FEB. 1) PR NEWSWIRE - Keishi Toda has been selected as the new president of Hitachi America, Ltd., the wholly owned U.S. subsidiary of Hitachi, Ltd (NYSE: HIT). Toda will replace the current president, Tsuneo Tanaka, on Feb. 21.

Toda, 56, was most recently general manager of Hitachi's International Sales Division I, which handles the export of power systems and equipment and industrial machinery and components. A graduate of Hitotsubashi University in economics, he joined Hitachi in 1960. Following a transfer to the international operations group in 1982, Toda became vice president of Hitachi Europe, Ltd. He served as president of Hitachi Europe, Ltd. from 1983 to 1988. He has a wife, Yoshiko, and one son, Shiro.

"Since the United States is one of our most important overseas markets, Hitachi America, Ltd. offers a strong challenge to any executive," Toda said. "I look forward to working with the staff of our U.S. operations, the business and local communities and, of course, our U.S. customers."

Tanaka has been promoted to group executive of Hitachi's international operations group, which oversees all sales outside of Japan.

Tanaka became president of Hitachi America in February 1985 and has been with the parent firm for more than 30 years. Last June, he was elected to Hitachi, Ltd.'s board of directors, the first person in Hitachi's

80-year history to serve on the board in an overseas capacity.

During his tenure at Hitachi America (1985-1990), net sales increased from approximately $750 million to $1.66 billion (Fiscal 1989 estimate). He spearheaded a strong effort to Americanize the company, through promotion of native executives to management positions, expansion of U.S.-based manufacturing facilities, establishment of U.S. research and development laboratories and strong philanthropic activities supporting American universities and local communities hosting Hitachi facilities nationwide.

"Keishi Toda's selection as president is an important step to maintaining the forward momentum of Hitachi America, Ltd.," Tanaka said. "Personally, and representing all Hitachi America, I welcome and wish Toda well in his new position."

Hitachi America, Ltd., a wholly owned subsidiary of Hitachi, Ltd., Japan, markets and manufactures electrical and electronics goods throughout the United States. The firm employs approximately 3,000, including personnel from 11 sales divisions and 11 manufacturing subsidiaries spread throughout the country.

#90032p0135 02/01/1990 ~PR Newswire

NEWTON, Iowa (FEB. 1) PR NEWSWIRE - Maytag Corporation's (NYSE: MYG) North American appliance business remained strong in the fourth quarter of 1989 and operating income showed improvement over the third quarter because of price and volume increases. Net income for the period continued to feel the impact of interest on the firm's higher long-term debt as well as depressed sales in the United Kingdom.

According to figures released today, Maytag's sales in the period ending Dec. 31, 1989, were $800.2 million. Operating income amounted to $77.6 million, while both income from continuing operations and net income were $39.8 million, or 38 cents a share based on an average of 105.6 million shares outstanding.

In the fourth quarter of 1988, which was prior to the acquisition of Hoover, Maytag's sales were $477.4 million, operating income was $56.9 million and income from continuing operations was $33.1 million, or 43 cents a share on an average of 76.6 million shares. Net income was $52.6 million, or 69 cents a share.

Commenting on the results, Maytag Chairman and CEO Daniel J. Krumm said, "Our sales of major appliances and floor-care products in this country and

Canada were strong in the fourth quarter because of volume and pricing improvements. Dixie-Narco's vending equipment sales also were stronger than they were earlier in the year.

"Our net income remains under pressure because of interest payments and sluggish business in the U.K., but fourth-quarter tax benefits approximated 8 cents a share from a reorganization of foreign operations. This lowered our tax rate to 29.8 percent in the fourth quarter, compared to a rate of 39 percent for the first nine months of 1989."

For the year 1989, Maytag posted sales of $3.09 billion. Operating income amounted to $279.9 million and both income from continuing operations and net income were $131.5 million, or $1.27 a share on an average of 103.7 million shares outstanding.

In 1988, prior to the Hoover acquisition, Maytag had sales of $1.89 billion. Operating income was $226.2 million and earnings from continuing operations were $135.5 million, or $1.77 a share on an average of 76.6 million shares. Net income was $158.6 million, or $2.07 a share.

Discussing operations for all of 1989, Krumm said, "Actually our sales of major appliances and floor-care products in North America were very good throughout the year and we out-performed our competitors in these respective industries. For example, our unit sales of major appliances to United States dealers increased 7.5 percent while total sales for the industry were slightly down.

Krumm said Maytag's problem area in 1989 was the United Kingdom where high interest rates and lower consumer spending have had a significant negative impact on manufacturers of consumer durable items.

LONG BEACH, CA (FEB. 1) PR NEWSWIRE - Southland Communications Inc. (NASDAQ: SCII) reported a 50 percent increase in revenues from $4,021,532 in fiscal 1988 to $6,031,050 in fiscal 1989. The company's operating income increased from $1,405,401 to $2,474,648 in the same period, an increase of 76 percent. The company's net loss decreased from $1,800,205 ($1.15 per share of Common Stock) to $1,436,643 ($0.74 per share of Common Stock). Operating expenses include depreciation expense of $1,515,870 in 1989 compared to $1,018,814 in 1988. The company had a net increase in cash in fiscal 1989 of $46,111 as compared to a net decrease in cash in fiscal 1988 of $239,271.

Selling, general and administration expenses during 1989 were 49.6 percent

of net rental revenue compared to 68.7 percent for 1988. This significant drop is due primarily to the continued progress in adding more subscribers to the company's customer base. The company's customer base increased to 48,000 subscribers in fiscal 1989 from 32,000 subscribers in fiscal 1988, a net increase of 50 percent.

The company had an average of 2,181,797 shares of Common Stock outstanding during 1989 compared to 1,811,686 shares of Common Stock in 1988.

Southland Communications Inc. does business as National Paging, providing electronic paging services for individual and business subscribers in 50 states.

#90032p0139 02/01/1990 ~PR Newswire

CINCINNATI (FEB. 1) PR NEWSWIRE - Roto-Rooter, Inc. (NASDAQ: ROTO) today reported earnings of $5,623,000 for the year ended Dec. 31, 1989, a 2 percent increase over the $5,504,000 earned in 1988.

This year-to-date earnings comparison excludes a gain of $282,000 recorded in the first quarter of 1988 resulting from the cumulative effect of two changes in accounting principles.

For the quarter ended Dec. 31, 1989, Roto-Rooter's net income was $1,332,000, a decrease of 20 percent from the $1,668,000 reported in the comparable quarter 1988.

For the full-year 1989, Roto-Rooter's earnings per share (excluding the cumulative effect of the 1988 accounting changes) increased 1 percent to

$1.14 from $1.13 in 1988. For the fourth quarter, earnings per share were 27 cents, or 21 percent below the 34 cents earned in the comparable 1988 quarter.

Roto-Rooter's total operating revenues increased 7 percent in 1989 to $66,842,000 as compared with $62,255,000 in 1988. Operating revenues for the fourth quarter of 1989 were $17,855,000, a 6 percent increase over operating revenues of $16,901,000 achieved in the fourth quarter of 1988.

Commenting on Roto-Rooter's results, William R. Griffin, President of Roto-Rooter, stated: "1989 was a year marked with some successes and several key problems. In 1989, we were pleased with the growth of our plumbing businesses. Plumbing revenues increased to $14,644,000 in 1989, or 21 percent above plumbing revenues achieved in 1988.

"We continued to develop our commercial, industrial and municipal customer base by increasing the number of direct sales representatives from two in 1988 to eight at year- end 1989. In addition, we were successful in acquiring 12 franchised areas, which increased the population covered by company- owned operations from 71 million to 79 million. These positive achievements position Roto-Rooter for good growth in 1990."

Commenting further, Mr. Griffin stated: "In 1989 we also faced some challenges. Excluding the effects of acquisitions, our sewer and drain cleaning jobs were flat for the year and actually declined in the fourth quarter of 1989 as compared with the prior year. A major reason that we did not grow our sewer and drain cleaning job counts was that we did not maintain our manpower at targeted levels - particularly in the fourth quarter.

"In order to improve our current manpower levels, we have implemented several programs, including career opportunity seminars and an in-house plumbing school, that should help us attract and retain servicemen.

"Furthermore, in 1990 we plan to improve our compensation sytems so that we can continue to attract and keep qualified service personnel."

During the fourth quarter of 1989, Roto-Rooter's profit decline resulted primarily from increases in employment, insurance and legal costs. In 1990, Roto-Rooter expects to bring these costs in line with its revenue growth rate.

Reflecting its confidence in Roto-Rooter's continued growth prospects, the board of directors of Roto-Rooter, Inc. today declared a quarterly cash dividend of 10 cents per share on its common stock, payable on March 9, 1990, to stockholders of record on February 21, 1990.

This is Roto-Rooter's twenty-second consecutive quarterly dividend since

it began paying dividends in 1984.

Roto-Rooter, Inc., through its 42 company-owned operations and approximately 650 independent franchises, is the largest nationally recognized provider of sewer and drain cleaning services in the United States. The company, headquartered in Cincinnati, Ohio, also offers plumbing repair services, industrial and municipal pipe cleaning services, and consumer products.

NEW YORK (FEB. 1) PR NEWSWIRE - Raycomm Transworld Industries, Inc. (NASDAQ: RACM) president and chief executive officer, Robert Fain, today announced that its board of directors has appointed Deloitte & Touche as the company's new independent auditors, effective Jan. 31, 1990, for the fiscal year ending March 31, 1990.

Commenting on the announcement, Fain stated, "While we hold our relationship with Blonder, Seymour & Shapss, our former accountants, in high regard, we believe that Deloitte & Touche's proximity to our operations in Encino, Calif. will be extremely beneficial. This as well as the advantages derived from using a Big 6 accounting firm will be instrumental to Raycomm as we continue to strengthen our financial posture in order to facilitate further growth in our core businesses."

Raycomm Transworld Industries, Inc. is engaged, through its subsidiaries, in supplying temporary professional and technical personnel to a broad range of industries, including the aircraft, aerospace, electronics and defense Industries.

SANTA MONICA, CA (FEB. 1) PR NEWSWIRE - Professional Bancorp (NASDAQ: MDBK), parent of First Professional Bank, has eliminated all long-term debt from its balance sheet, Dr. Joel W. Kovner, chairman and chief executive officer, announced today. The company also has no short-term debt.

The company accomplished this by not renewing $1,100,000 in promissory notes, to which 110,000 warrants were attached, exercisable at $9.50 a share, which were set to mature on Feb. 1, 1990.

As a result, 100,000 warrants were converted into an equal number of common shares. The rest of the warrants were eliminated according to the prearranged agreement. The promissory notes eliminated were the amount remaining of $1,450,000 originally issued in 1987.

As of now, the company's total capitalization is in the form of 772,244 shares of common stock which will increase to 965,305 shares after payment of a previously announced five-for-four stock split on March 9, 1990.

#90032p0149 02/01/1990 ~PR Newswire

BETHPAGE, NY (FEB. 1) PR NEWSWIRE - Grumman Corporation (NYSE: GQ) today reported that 1989 net income declined 22 percent to $67.3 million or $1.91 a share from $86.5 million or $2.50 a share in 1988. Sales decreased 2.5 percent to $3.56 billion from $3.65 billion.

Included in the 1989 net income was $4.5 million or 14 cents a share reported in the second quarter for the expected recovery of product improvement costs on several F-14 contracts. In the third quarter of 1988 Grumman reported a benefit of $11.1 million or 34 cents a share from an accounting adjustment for New York State franchise taxes.

In the fourth quarter of 1989, net income was down 39 percent to $14.8 million or 41 cents a share from $24.1 million or 70 cents a share in the 1988 fourth quarter. Sales in the quarter decreased 16 percent to $867 million from $1.04 billion.

"Our operating margin for 1989 was relatively strong at 5.7 percent," said John O'Brien, chairman. "However, a 24 percent increase in interest expense penalized our bottom line."

For the year, operating income was $201.4 million. The 1988 operating margin was 5.9 percent on operating income of $215.4 million. Interest expense increased to $105.3 million from $84.9 million. Long term debt increased to $846.4 million from $802.1 million at the end of 1988.

#90032p0152 02/01/1990 ~PR Newswire

WILKES-BARRE, PA (FEB. 1) PR NEWSWIRE - Franklin First Financial Corp. (NASDAQ-NMS: FFFC), the parent holding company of Franklin First Federal

Savings Bank, today announced net income for the year ended Dec. 31, 1989, was $6.1 million, or $1.26 per share, compared to $7.8 million for the year ended Dec. 31, 1988.

Earnings per share figures for the 1988 year are not meaningful since the company converted from a mutual to a stock form of ownership in August 1988. Net income for the three months ended Dec. 31, 1989, was $1.8 million, or $.37 per share, compared to $2.2 million, or $.45 per share for the three months ended Dec. 31, 1988.

Elmer J. Klimchak, chairman and chief executive officer of Franklin commenting on the results said, "Our assets, savings deposits, shareholders' equity, and core earnings have all increased, while the industry has been besieged by adverse publicity, a negative yield curve and a changing regulatory environment. Although economic conditions contributed to shrinking interest rate spreads throughout the first half of 1989, we are pleased with our overall results."

Klimchak went on to note that total assets increased 3.4 percent to $854.4 million at Dec. 31, 1989, compared to the prior year end. Total deposits at Dec. 31, 1989, were $626 million, a 1.4 percent increase over 1988. Core earnings increased 2.1 percent over the prior year.

Shareholders' equity rose 3.8 percent during the year, reaching $96.6 million on Dec. 31, 1989. Franklin's tangible capital totaled $93.6 million, approximately 11 percent of total assets, placing the company far in excess of the new capital requirements set forth by the recently enacted FIRREA regulations.

During 1989, Franklin improved on its prior year's asset quality ratios despite the recent negative trend for financial institutions nationwide. At Dec. 31, 1989, non-performing loans totaled $7.9 million or 1.7 percent of total gross loans compared to $9.1 million or 1.8 percent of total gross loans at Dec. 31, 1988. The allowance for loan losses totaled $3.3 million or 41.9 percent of non-performing loans at Dec. 31, 1989, compared to $2.4 million or 26.5 percent of non- performing loans at the prior year end.

Franklin said it continues to place strong emphasis on generating fee income and controlling operating expenses. Other fees and charges totaled $2.4 million in 1989, an increase of 35.5 percent over the prior year. Total other expense in 1989 was $16.3 million representing a modest 3.3 percent increase over 1988.

Franklin First Financial Corp.'s common stock is listed on the NASDAQ National Market System under the symbol "FFFC." Its price as of close of business yesterday was $10.125. Franklin First Financial Corp. is headquartered in Wilkes-Barre. Franklin First Federal Savings Bank is a

federally chartered, federally insured savings bank which conducts operations throughout Northeastern Pennsylvania through its 19 full-service offices and two lending centers.

#90032p0155 02/01/1990 ~PR Newswire

KALAMAZOO, MI (FEB. 1) PR NEWSWIRE - The Upjohn Company (NYSE: UPJ) today reported that 1989 fourth-quarter and annual sales increased four percent and eight percent, respectively, over 1988 levels, while net earnings, including discontinued operations, were reduced by after-tax charges of $206 million associated with a previously announced restructuring.

The restructuring includes the costs associated with the strategic decision to phase out the low-margin industrial chemical business in North Haven, Conn., which has been recorded as discontinued operations, and various charges related to continuing operations. Results of prior periods have been restated to reflect the operations of the company's continuing businesses separately from discontinued operations. The three-year phase-out of the industrial chemical business at North Haven resulted in an after-tax loss on disposal of $130 million, or 70 cents per share, from discontinued operations in the fourth quarter.

Unless noted otherwise, the following results reflect the company's continuing operations. Fourth-quarter sales were $728 million, a four-percent increase over 1988 fourth-quarter sales of $700 million. Earnings of $14 million, or eight cents per share, were down compared to earnings of $82 million, or 44 cents per share, in the year-earlier quarter. The restructuring charges affecting continuing operations reduced earnings $76 million after tax, or 41 cents per share and included after-tax charges for a special early retirement plan of $23 million offered to eligible U.S. employees; asset write-downs of $35 million; and other charges related to environmental reserves, product liability reserves and corporate contributions of $18 million.

Fourth-quarter operating income was $35 million, a 69-percent decrease from 1988. Earnings before tax decreased 83 percent to $20 million.

Operating income and earnings before tax included $84 million and $108 million of restructuring charges, respectively.

Annual consolidated sales were $2.9 billion, an increase of eight percent over 1988 sales of $2.7 billion. Earnings from continuing operations of $311 million, or $1.67 per share, were down 13 percent from 1988 earnings of $359 million or $1.92 per share.

Operating income of $454 million was down ten percent from 1988, as a result of the restructuring, and amounted to 16 percent of sales, compared to $504 million, or 19 percent of sales, a year ago. Cost of products and services sold and research and development expense during 1989 remained level as a percent of sales. Marketing and administrative costs rose as a percent of sales, primarily as a result of intensified marketing programs related to new products.

Earnings before tax of $460 million were 11 percent less than the $515 million earned in 1988, as a result of the restructuring.

The fourth-quarter net loss, including discontinued operations, was $118 million, or 64 cents per share, compared to net earnings of $81 million, or 43 cents per share, in fourth-quarter 1988. Annual net earnings, including discontinued operations, were $176 million, or 95 cents per share, compared to $353 million, or $1.89 per share in 1988.

The Upjohn Company is a worldwide, research-based provider of human health care products and services, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

#90032p0156 02/01/1990 ~PR Newswire

PARSIPPANY, NJ (FEB. 1) PR NEWSWIRE - Home Nutritional Services Inc. (NASDAQ: HNSI) today announced its 1989 financial results.

The results for the year reflect revenue growth of 37 percent, with revenues increasing to $64.5 million in 1989 compared to $47.1 million in 1988. The company reported a 46 percent increase in net earnings to $6.6 million, or $0.66 per share, in 1989 from $4.6 million, or $0.46 per share in 1988.

In the fourth quarter of 1989, the company reported net earnings of $2.0 million, or $0.19 per share, on revenues of $18 million. This compares favorably to net earnings of $1.4 million, or $0.14 per share, on revenues

of $13.4 million in the fourth quarter of 1988.

Kent Kerkhof, president and chief executive officer, stated: "I am very pleased with the results for the fourth quarter and the year. Our revenue growth is good, our profitability, which continues to be among the highest in the industry, is improving and our financial position is strong. We expect 1990 to continue to reflect these trends as our existing centers grow and as our expansion program opens new markets. I believe our commitment to improve the quality of life of our patients by providing superior, innovative, cost-effective service is the foundation of our success."

HNS is a national provider of home infusion therapies and related services. Founded in 1980, HNS is one of the oldest and largest providers of home infusion care, with operations in 26 states that are conducted through 21 regional centers, 18 satellite facilities and 25 additional sites of service. HNS is recognized as a leader in quality care and clinical sophistication.

#90032p0157 02/01/1990 ~PR Newswire

TORONTO (FEB. 1) PR NEWSWIRE - Increased gold production and an effective gold price hedging program produced record income from operations, earnings and cash flow for American Barrick Resources Corporation (NYSE: ABX) in 1989.

The company today announced net income of $35.8 million, or 30 cents per share fully diluted, for the year ended Dec. 31, 1989 compared with net income of $30.5 million, or 25 cents per share fully diluted, in 1988. (The company's per share earnings reflect a two-for-one stock split, effective Dec. 13, 1989.) Barrick achieved this increase in earnings after charges during the year of $12.7 million for net losses on the disposition of long-term investments and the write-down of the Valdez Creek Mine. Income from operations was $86.3 million for the year, up 41 percent from $61.2 million a year earlier.

Revenue rose 40 percent to $206.1 million for the year ended Dec. 31, 1989 compared with $147.5 million for the same period of 1988. Operating cash flow was higher at $86.4 million in 1989, compared with $61.7 million a year earlier.

Gold production in 1989 increased to 467,837 ounces, from 341,000 a year ago. The company's gold reserves were 20.7 million ounces, up from 18.5 million ounces at the end of 1988.

Despite a non-recurring write-off in the quarter of $11 million for its investment in Hayes Resources, Barrick was able to report net income of $12.1 million, or 10 cents per share fully diluted, compared with net income of $11.7 million, or 10 cents per share fully diluted, in the same quarter of 1988. Income from operations was $31.5 million for the quarter, compared with $21.5 million in the same period of 1988.

Barrick's hedging policy enabled it to realize an average price of $436 per ounce on gold sales of 472,452 ounces in 1989, compared with the Comex average gold price for the year of $382 per ounce.

Approximately 95 percent of 1990 production has been hedged at an average minimum price of $421 per ounce. Because the company has used primarily put options for this hedging, Barrick has retained 75 percent of the upside potential in gold price increases to $507 per ounce and 36 percent over $507 per ounce.

The company's balance sheet reflects its strong and improved financial position, with cash and short-term deposits at year end of $304.7 million. This includes the net proceeds to the company of $90.4 million from the issue of three million common shares (pre-split) in December 1989. The company's cash position was further increased by $19.4 million at the end of January 1990 with the sale of 1.5 million shares of LAC Minerals Ltd.

#90032p0159 02/01/1990 ~PR Newswire

BRIDGEPORT, CT (FEB. 1) PR NEWSWIRE - Citytrust Bancorp, Inc. (NYSE: CYT) today reported a net loss of $58,543,000, or $14.09 per share, for the fourth quarter of 1989, and a net loss of $84,771,000, or $20.41 per share for the year 1989.

These results compared with net income of $6,423,000, or $1.54 per share, for the fourth quarter of 1988 and net income of $23,638,000, or $5.66 per share, for the year 1988.

The company announced in December that it expected to report a considerable loss for the fourth quarter and the year as a result of an additional provision to its loan loss reserve due to a projected increase in non-performing assets.

"The company's loss for the fourth quarter and the year related directly to the continued deterioration of the real estate market -- particularly the construction market for condominiums and single-family homes -- which

is adversely affecting banks in Connecticut and throughout the Northeast," said George F. Taylor, chairman of the board and chief executive officer of the company and its bank subsidiary, Citytrust.

The company reported that it made a fourth quarter provision of $50.7 million to its loan loss reserve as a result of an increase in non-performing assets from $175 million at Sept. 30 to $257 million at Dec. 31. This action brings the reserve level to $82 million, or 4.01 percent of total loans outstanding. "We believe that the reserve is adequate to cover our foreseeable loan losses and includes a substantial portion which is unallocated," said Taylor.

"We are taking vigorous action in dealing with the situation," Taylor said. "In addition to increasing the reserve, we have materially expanded our workout task force, which has made real progress during the year in working with developers to market unsold properties successfully and has brought about significant problem loan resolutions. As an example, during the quarter, a second successful auction of an entire condominium complex was conducted, this time in Westchester County."

The bank is also maintaining an aggressive stance with developers by causing them to identify potential problems early and take decisive action to resolve them rather than wait for a turnaround in the housing market, according to Taylor.

#90032p0160 02/01/1990 ~PR Newswire

MIAMI, FL (FEB. 1) PR NEWSWIRE - Citizens Savings Financial Corporation (NASDAQ-NMS: CSFCB), a $4.3 billion, five-state financial institution, has reported the highest annual earnings in its history. It is the parent compary of Citizens Federal Bank, a Federal Savings Bank.

Citizens Savings Financial achieved net earnings of $13,862,000 ($4.48 per share) on total income of $430,473,000 for its fiscal year ended Dec. 31, 1989, a gain of four percent over the $13,337,000 ($4.36 per share) it earned on total income of $300,523,000 for fiscal 1988.

For the three months ended Dec. 31, 1989, Citizens Savings Financial reported net earnings of $4,403,000 ($1.42 per share) on total income of $109,386,000, a gain of 72 percent over the $2,565,000 ($.83 per share) in net earnings on total income of $80,500,000 for the same quarter of 1988.

Stockholders' equity per common share climbed to $28.63 on Dec. 31, 1989, a gain of 22 percent over the $23.39 per share a year ago.

Commenting on 1989, Charles B. Stuzin, chairman and president of Citizens Savings, stated, "This was our best year ever, and it is all the more so because it was accomplished under the most difficult of circumstances during the worst year ever for our industry.

"Our record earnings are obviously important, but not more so than the fact that all three of our capital levels are well in excess of the new federal requirements. Our tangible capital of $84 million is $21 million above the requirement, and results in a ratio of 2.01 percent versus the 1.50 percent necessary.

"Our core capital of $176 million is $50 million above the requirement, and results in a ratio of 4.19 percent versus the 3 percent necessary. Our risk-based capital of $295 million is $130 million above the requirement, and results in a ratio of 14.27 percent versus the 6.40 percent necessary.

"Credit for these achievements should go to all of our employees who worked diligently to increase and improve banking services in an extremely difficult environment. Our operations in Florida, Illinois, Ohio, California and Virginia all contributed to the final result.

"All I can add is to again emphasize that Citizens did it by continuing to be a very conservative, residential first mortgage savings bank. That's what we know best, and we are fortunate that our customers recognize the bank's strong financial condition and appreciate our conservative manner of protecting their money."

As of Dec. 31, 1989, Citizens Savings had total assets of $4.3 billion, a loan portfolio of $3.8 billion, deposits of $3 billion, and stockholders' equity of $166 million.

In conformity with a 1987 S.E.C. staff accounting bulletin, the company also reported on a supplemental basis that its earnings per common share would have been $1.05 for the quarter ended Dec. 31, 1989; $3.05 for the full year ended Dec. 31, 1989; $.46 for the quarter ended Dec. 31, 1988; and $2.90 for the full year ended Dec. 31, 1988, if the earnings per common share were adjusted for dividends not actually paid or accrued but imputed on its Series A Preferred Stock which was sold to the Federal Savings and Loan Insurance Corporation (now the FSLIC Resolution Fund) in connection with the company's 1986 acquisition of an Ohio savings bank.

The imputed dividends are calculated as if the dividends payable on the Series A Preferred Stock were based upon a market rate dividend of 5.3 percent in both years.

The company's actual earnings per share of $1.42 for the last quarter of 1989 and $4.48 for the 1989 fiscal year, and $.83 and $4.36 for the same periods of 1988 are based upon the actual dividends paid or accrued to the

FSLIC on this stock.

Citizens Federal Bank operates 92 banking offices in five states. It operates as Citizens Federal Bank in its Florida, California and Virginia divisions; as Equitable Savings in its Ohio division; and as American Savings in its Illinois division.

SEATTLE (JAN. 31) PR NEWSWIRE - NYK Line, one of the world's leading transportation companies, will establish its primary U.S. computer center at Seattle, and has enlisted Boeing Computer Services to plan, install and test the facility.

Taketaro Kotani, President of NYK Line (North America) Inc., announced today that the new computer center is scheduled to begin operating in August. The center will be responsible for developing and operating a cargo transportation information system linking NYK's Japan/Far East operations with North America.

According to Akira Nishio, president of NYK Systems Research Institute, Tokyo, the system, called WINS (Worldwide Information Network Services for Logistics), will provide the company with three major capabilities:

- Expedient access to all transportation logistics services, including vessel, terminal or port authority, rail and depot schedules.

- Real-time tracking of cargo aboard ships and/or inland intermodal transportation systems.

- Rapid response to inquiries from shippers and consignees on ship loading information and movement.

Boeing Computer Services, under contract to NYK, will perform a variety of functions, including site evaluation, computer hardware and software installation and integration, and pre-operational center testing.

Tom Smith is the program manager for Boeing on the NYK Seattle computer center. K. Yoshida is project manager of the center for NYK.

NYK Line is a global mega-carrier providing integrated transportation services door to door around the world. NYK provides a full range of sea, land and air transportation and logistics services. A broadly diversified

company, NYK's core shipping operations comprise container and conventional breakbulk liners, tramp vessels and tankers.

A division of The Boeing Co. (NYSE: BA), Boeing Computer Services currently operates six major data centers throughout the United States that support all divisions of Boeing. It also provides information management, systems integration, and facilities management services to government and commercial customers worldwide.

The WINS system will run on an IBM 3090-20J host computer at the Seattle computer center, and be linked by a dedicated circuit to NYK hub offices containing IBM 3745-170/150 communications controllers at North American headquarters in Secaucus, N.J., and Seattle, Los Angeles, Chicago, San Francisco, Houston and Atlanta.

CONTACT: Don McCallian of NYK, 201-330-3003; or Barbara Murphy of Boeing Computer Services, 206-865-5166; or Paul Sandhaus of Paul Sandhaus Associates, 212-575-2560

#90032p0166 02/01/1990 ~PR Newswire

TORONTO (FEB. 1) PR NEWSWIRE - LAC Minerals Ltd. (NYSE: LAC) today reported increased revenues and gold production for the year ended Dec. 31 1989, compared with 1988.

As a result of the acquisition of approximately 65 percent of Bond International Gold, Inc. (NYSE: BIG) on Nov. 15, 1989, the company has adopted the U.S. dollar as its reporting currency since BIG reports in U.S. currency and a significant amount of future production will be from areas where the U.S. dollar is considered to be the functional currency.

Comparative 1988 financial information has been translated into U.S. dollars at the Dec. 31, 1988, exchange rate. The operating and financial results appearing in this release include operating results of BIG consolidated with LAC's results from Nov. 16, 1989.

Earnings for the year ended Dec. 31, 1989, were $30.5 million on revenues of $186.0 million, compared with earnings of $38.4 million on revenues of $174.3 million in 1988. Earnings per share were 31 cents in 1989 compared to 42 cents from the year before. Cash flow from operations was $64.9 million in 1989, compared with $68.3 million last year.

Revenues in the fourth quarter of 1989 were $67.5 million compared with $45.2 million in the last three months of 1988. Fourth quarter earnings were $1.5 million or one cent per share compared with $6.1 million or seven cents per share recorded in the fourth quarter of 1988.

LAC's share of gold production increased to 370,875 ounces in 1989, helping to offset a strong Canadian dollar and soft gold market conditions which prevailed for most of the year. LAC's 65 percent equity interest in BIG during the fourth quarter contributed 41,911 ounces of gold in addition to the 328,964 ounces of gold produced from LAC's operations. LAC delivered 370,093 ounces of gold during the year at an average price of $411, compared with 316,440 ounces at an average price of $470 in 1988.

#90032p0169 02/01/1990 ~PR Newswire

ATLANTA (FEB. 1) PR NEWSWIRE - The 2,800 employees at Ford Motor Company's Atlanta Assembly Plant today received major recognition from a highly respected automotive magazine and from Ford officials from Detroit.

The employees of the plant in Hapeville, Ga., received an award from Car & Driver magazine for assembling the 1990 Mercury Sable, one of the magazine's "10 Best Cars of the World."

Helping to present the award and join in serving up some Sable-shaped cake to employees was senior editor John Phillips III, along with company officials and UAW Local 882 leadership at the plant.

Mark Hutchins, general sales manager of Lincoln-Mercury Division and former Atlanta district manager of the division, told employees while presenting the award, "Being in a sales division, we get a lot of fun jobs

such as accepting prestigious awards from outside groups honoring our products...

"Unfortunately, we can take little of the credit for making Sable one of the '10 Best' of the year," he said.

Bob Anderson, plant manager, continued that theme as he accepted the award on behalf of the plant team. "It's not the plant manager who built more than 1 million Mercury Sables and Ford Tauruses at this plant since assembly began in October 1985.

"It's the employees who built each one, making quality an item that was not optional, and so who deserve this top recognition from a top automotive magazine," Anderson said.

"As our employees know, representatives of other auto companies from Europe and Asia visit here often to see how the Atlanta team does it. That's further evidence of the quality that goes into each car here, when our competitors come from abroad to look over our shoulders," he said.

Frank Samples, president of UAW Local 882, representing employees at the 2.3-million-square-foot plant, joined in the festivities. Dave May, Lincoln-Mercury Division's Eastern regional manager, and Harold Feder, L-M's Atlanta district manager, also were present.

The January issue of Car & Driver praised the Sable, and the Ford Taurus -- both are built at the company's plants in Atlanta and Chicago -- as strong on value. The magazine said station wagon models of these cars are "the most attractive in Detroit history."

Ford spent $250 million at the Atlanta plant to prepare to build the Sable and the Taurus. The company added a 207,000-square-foot Clearcoat paint facility and a 144,000-square-foot expansion of the body shop.

The company also enlisted the support of its employees with a strong Employee Involvement program. The veteran work force submitted hundreds of ideas which helped make the cars the award winners they went on to become, following public introduction on Dec. 26, 1985.

DALLAS (FEB. 1) PR NEWSWIRE - Caspen Oil, Inc. (AMEX: CNO), a Dallas-based oil and gas exploration, production and acquisition company, announced today that it has reached an agreement with Yates Unit, Inc. (now called Sixx Holdings, Incorporated) for Yates Unit, Inc. to exercise its option to puchase Caspen's 30 percent interest in Yates for approximately $1,938,000, which, after adjustments, (including a payable to Yates Unit, Inc.), was a net payment of $1,246,000. In connection with Yates Unit, Inc.'s purchase of Caspen's interest, Jack D. Knox, chairman and CEO of Yates Unit, Inc., has resigned as a director of Caspen Oil, Inc. and Caspen Oil Plc, and has also sold his shares in Caspen Oil, Inc. Sixx Holdings, Incorporated will begin trading on NASDAQ, under the symbol "SIXX," in early February. Sixx Holdings was created from certain spun out assets from Summit Energy, Inc., which changed its name to Caspen Oil, Inc. in 1988. Delo Caspary, chairman and CEO of Caspen Oil, Inc., has resigned from the board of Sixx Holdings, Inc., in connection with the transaction.

SYDNEY, AUSTRALIA (FEB. 1) PR NEWSWIRE - CSR Limited, one of Australia's largest building materials companies, announced today that its United States holding company, CSR America Inc., has acquired all the stock of the subsidiaries of ARC America Corporation from Hanson PLC of the United Kingdom, effective Jan. 31. The total consideration is US$650 million (A$840 million).

The ARC companies comprise the United States' largest concrete pipe producer and fifth largest quarry operator. Hydro-Conduit operates 38 pipe plants and four pre-stressed concrete products plants in 21 states. American Aggregates operates 44 quarries in three states. Associated Sand and Gravel and WMK Transit Mix operate as separate integrated construction materials businesses. In total, the ARC companies employ over 3,000 people.

Ian Burgess, chief executive officer of CSR, said: "The acquisition of ARC reinforces CSR's commitment to the United States and is a further step in our strategy of becoming a large U.S. building materials company". He added that CSR had been producing building materials in the United States since 1982 and that the subsequent 1988 acquisition of Florida-based Rinker Materials Corporation, for US$515 million, had substantially expanded CSR's U.S. building materials operations. "By combining the ARC America subsidiaries with our existing quarrying, pre-mixed concrete,

concrete block and cement operations, CSR is well positioned for continuing low risk growth in the United States," he said.

CSR Limited is listed on the Australian Stock Exchange, the International Stock Exchange in London, the Frankfurt Stock Exchange and the New Zealand Stock Exchange.

WHITE PLAINS, NY (FEB. 1) PR NEWSWIRE - Texaco Inc. (NYSE: TX) announced today that its wholly owned subsidiary, Texaco Capital Inc., has filed with the Securities and Exchange Commission an S-3 shelf registration statement, enabling the company to issue up to $1 billion of debt securities.

The debt securities issued under this shelf registration would be unconditionally guaranteed by Texaco Inc.

The shelf registration allows Texaco to issue and sell from time to time various forms of debt securities with varying dates of maturity, depending on market conditions at the time of sale.

Proceeds from the actual sale of securities would be loaned to Texaco Inc. or its subsidiaries for general corporate purposes, primarily the repayment of existing debt. During 1990, scheduled debt repayments will approximate about $900 million.

The company further noted that total debt outstanding at Dec. 31, 1989, was $6 billion, representing a decline of $1.9 billion from the year-end 1988 debt level of $7.9 billion.

NEW YORK (FEB. 1) PR NEWSWIRE - The Prudential Strategic Income Fund today issued the following February 1990 monthly update:

Distribution Information

Amount	Payable Date	Record Date	Declaration Date
$0.08	Feb. 23	Feb. 12	Feb. 1

Investment Adviser Commentary:

- The fund's monthly dividend has been lowered from $0.0875 to $0.08 per share to reflect the fund's current asset mix and the expectations for lower interest rates later in 1990. The new rate more closely corresponds to the current earnings level of the fund.

- U.S. high yield bonds and high yielding Canadian and Australian government securities now comprise a smaller portion of the fund than was previously the case. While this structure provides less current income for monthly dividend payments, the adviser believes the current asset mix increases the potential for NAV appreciation from both currency and security gains.

- The foreign government sector remains overweighted at 29 percent of net assets, as non-dollar bond markets appear promising due to the outlook for a lower dollar. The European bond markets appear most attractive from a total return perspective due to positive expectations about their currencies and markets from Europe 1992 and the opening up of Eastern European economies.

- The adviser remains positive on the U.S. government sector long term, especially at current interest rate levels and has lengthened the duration of this sector to seven years.

- As of Jan. 26, the fund's annualized monthly distribution rate on the stock price was 13.02 percent, while its annualized monthly distribution rate on net asset value was 12.14 percent.

ST. PAUL, MN (FEB. 1) PR NEWSWIRE - The St. Paul Companies, Inc., (NASDAQ: STPL) today reported 12 months 1989 consolidated net income of $398,158,000, or $8.13 per share.

This compared with 12 months 1988 net income of $355,258,000, or $7.38 per share. For the fourth quarter, net income was $126,540,000, or $2.57 per share, compared with fourth quarter 1988 net income of $84,262,000, or $1.75 per share.

Revenues for 12 months 1989 totaled $3.79 billion, compared with $3.63 billion in 1988. Revenues for the quarter were $971 million, compared with $980 million in 1988. These figures included pretax realized gains and losses from investments.

"Our strong 1989 results reflect solid accomplishments by our underwriting, brokerage and investment banking operations as well as excellent performance from our investment portfolio," Robert J. Haugh, chairman and chief executive officer of The St. Paul Companies, said. "These results were achieved in the face of some of the most severe catastrophes in the insurance industry's history and a continued strongly

price-competitive environment."

Underwriting operations had 12 months 1989 pretax income of $456 million, compared with $424 million in 1988. For the fourth quarter of 1989, underwriting operations pretax income was $123 million, compared with $102 million for the fourth quarter of 1988.

Underwriting results for 12 months of 1989 produced a loss of $196 million, compared with an underwriting loss of $90 million for 1988. Investment income for 12 months of 1989 was $614 million, compared with $549 million for 1988. Pretax realized gains were $92 million for 12 months of 1989, compared with $4 million for 1988.

For fourth quarter 1989, the underwriting loss was $59 million, compared with an underwriting loss of $22 million for the same 1988 period. Investment income for the fourth quarter of 1989 was $156 million, compared with $153 million for the fourth quarter of 1988. Pretax realized gains for fourth quarter 1989 were $32 million, compared to pretax realized losses of $4 million for the ame 1988 quarter.

Property-liability written premiums totaled $2.81 billion for 12 months of 1989, compared with $2.69 billion for the same period of 1988. For fourth quarter, written premiums were $704 million, compared with $735 million for the same quarter of 1988.

The combined ratio was 106.2 for 12 months of 1989, compared with 103.6 for 12 months of 1988. For fourth quarter 1989, the combined ratio was 107.5, compared with 104.1 for the same period of 1988. Insurance Brokerage Operations:

Insurance brokerage operations had pretax income of $31 million for 12 months of 1989, compared with pretax income of $9 million for the same 1988 period. Insurance brokerage operations had pretax income of $15 million for the fourth quarter of 1989, compared with a pretax loss of $2 million for the same quarter of 1988.

Investment banking operations had pretax income of $38 million in 1989, compared with $37 million for 1988. Fourth quarter 1989 pretax income was $11 million, compared with $9 million for the same period of 1988.

Consolidated assets for The St. Paul Companies, Inc. as of Dec. 31, 1989, were $11.0 billion, compared with $10.4 billion a year earlier.

Book value per share was $47.65 on 49,303,881 shares of stock outstanding on Dec. 31, 1989. Comparable book value on Dec. 31, 1988, was $43.47 on 46,364,084 shares.

NEW YORK (FEB. 1) PR NEWSWIRE - The Prudential Intermediate Income Fund, Inc. (NYSE: PIF) today issued the following February 1990 monthly update.

Distribution Information

Amount	Payable Date	Record Date	Declaration Date
$0.08	Feb. 23	Feb. 12	Feb. 1.

Investment Adviser Commentary:

-- During January, the adviser further overweighted the foreign sector of the fund, in line with the adviser's belief that the U.S. dollar will weaken in the first part of 1990 and foreign markets will perform well relative to the US market.

-- The adviser remained bullish on the U.S. government market during January, reflected in a duration of 5.3 years in the sector of the fund at month end. (A four-year duration is considered neutral).

-- The adviser remains positive on the U.S. government sector long term, especially at current interest rate levels, and is not looking to sell

into current market weakness, which it considers temporary.

-- The adviser further overweighted the foreign sector, now at 39 percent of net assets. Non-dollar bond markets appear promising, due to the outlook for a lower dollar later this year. The European bond markets appear attractive from a total return perspective due to positive expectations about their currencies and markets from Europe 1991 and the opening up of Eastern European economics.

The Prudential Intermediate Income Fund, Inc. is an asset allocation fund that invests in different sectors of the world's bond markets, primarily intermediate-term U.S. government and foreign government bonds. The fund's manager is Prudential Mutual Fund Management, Inc. and investment advisory services are provided by the Prudential Investment Corporation.

CINCINNATI (FEB. 1) PR NEWSWIRE - Meridian Diagnostics, Inc. (NASDAQ/NMS: KITS) announced today net sales and net earnings for the fiscal 1990 first quarter ended Dec. 31, 1989 were $1,690,000 and $128,000 ($.03 per share), respectively, as compared to net sales of $1,528,000 and $94,000 ($.02 per share) during the same period of the prior fiscal year.

Sales for the first quarter were up $162,000 or 10.6 percent compared to the prior year's first quarter. Net profit increased by 36 percent compared to the comparable period during the past fiscal year.

Commenting on the first quarter operating results, Jerry L. Ruyan, President and Chief Operating Officer said, "I am pleased to report that even though we were slightly behind on our sales projection for the first quarter, our net earnings exceeded our projections because of better management of our costs and expenses."

MERIDIAN DIAGNOSTICS, INC.
FIRST QUARTER RESULTS

The following table sets forth the comparative operating results of Meridian Diagnostics, Inc. for the three months ended Dec. 31, 1989 and 1988.

	Three Months Ended Dec. 31	
	1989	1988
Net sales	$1,690,000	$1,528,000

Gross profit	988,000	886,000
Operating income	106,000	67,000
Earnings before income taxes	194,000	140,000
Net earnings	128,000	94,000
Earnings per common share	$ .03	$ .02
Weighted average number of shares outstanding	4,800,000	4,800,000

Meridian Diagnostics, Inc. develops, manufactures and markets a variety of immunodiagnostic test kits, reagents and related products for use in physicians' offices and in hospital, commercial and research laboratories.

The Company pioneered one of the most successful rapid strep tests on the market, is a leader in parasite and bacterial collection, preservation and transportation systems, and has a leading market position in fungal serology testing in clinical laboratories. The Company's shares are traded through NASDAQ/NMS (Symbol: KITS).

MILWAUKEE (FEB. 1) PR NEWSWIRE - Good Morning America! Hotel delivered breakfast is no longer a luxury enjoyed by only a few -- because Budgetel Inns, Inc. today introduced free room service continental breakfast for guests at all of its locations.

Budgetel, a national hotel company with 72 locations and more than 7,700 rooms, is the first major hospitality chain in North America to make this service to available to all of its guests -- free of charge.

According to company Chairman Stephen H. Marcus, breakfast in one form or another is consumed by 90 percent of the American public and is becoming

increasingly popular among business and leisure travelers. "The Budgetel Continental Breakfast Delivery is another way we can meet travelers' needs and offer the best possible value for the lowest possible price in the hotel industry," said Marcus.

For rates around $30, Budgetel offers guests more than 23 amenities -- some of which are not even available at more upscale, higher-priced hotels.

For example, standard features at Budgetel Inns include: complimentary local telephone calls; free fax service; free cable television; movable television remote controls; desks and extra-long beds in every room; non-smoking and handicap rooms; an executive conference room available upon request; and inside entry to all rooms.

The continental breakfast, which will be delivered before 7 a.m. on weekdays and 8 a.m. on weekends, includes a Danish roll, juice and in-room coffee. Budgetel executives expect three out of every five guests to take advantage of the offer.

"The critical advantage of the Budgetel program is that the breakfast is delivered to guests' rooms, without raising rates or charging added cost to our customers," said Marcus. "Similar to other Budgetel amenities, we anticipate that the Complimentary Continental Breakfast Delivery will increase customer loyalty and help boost sales."

With more than 72 properties and 7,700 guest rooms in 22 states, Budgetel enjoys the highest average occupancy rate among the top 15 economy lodging chains.

Based in Milwaukee, Budgetel is a wholly owned subsidiary of The Marcus Corp. (NASDAQ/NMS: MRCS).

WASHINGTON (FEB. 21) PR NEWSWIRE - Gannett Co., Inc. (NYSE: GCI) achieved its 22nd consecutive year of higher income in 1989 as earnings per share advanced 9 percent to a record $2.47 per share, according to an announcement today by John J. Curley, chairman, president and chief executive officer.

In the fourth quarter, earnings per share increased 8 percent to 79 cents from 73 cents. Net income advanced to $127,369,000, from $117,842,000 in the year-earlier quarter. Operating revenues in the quarter were $968,574,000, a gain of 7 percent over 1988 revenues of $905,283,000. Operating income grew to $229,844,000. In the 1988 quarter, operating income was $226,993,000.

For the 53-week year ended Dec. 31, net income increased to $397,509,000. In 1988, a 52-week year, Gannett's net income was $364,460,000, or $2.26 per share. Operating revenues in 1989 totaled $3,518,189,000, 6 percent higher than 1988's $3,314,485,000. Operating income advanced 10 percent to $756,511,000. In 1988, operating income was $687,725,000.

"Improved results were achieved despite a weakening economy that challenged our business plan," Curley said. "The diversity of Gannett properties and the vigilance of its managers were key factors in our continued earnings progress."

In the fourth quarter, Gannett sold a newspaper in Santa Fe, N.M., and recorded a gain, which is included in non-operating income. Non-operating expense in the quarter includes the operating losses of GTG Entertainment and costs associated with Gannett's plan to terminate its interest in GTG ventures.

Newspaper earnings advanced during the quarter. Newspaper advertising lineage improved 3 percent, including the effect of an additional week of operations in the fourth quarter of 1989. Daily circulation of local newspapers was even with last year, while Sunday volume was higher. At USA TODAY, advertising pages totaled 1,113, compared to 1,132 in the 1988 quarter, which included Olympics-related advertising. Because of rate adjustments and increased readership, advertising revenues at USA TODAY gained 13 percent in the quarter and the year. For the year, USA TODAY ran 3,847 pages of paid advertising, compared to 3,979 in 1988,

Gannett is a nationwide news and information company that publishes 82 daily newspapers, including USA TODAY, 35 non-daily newspapers and USA WEEKEND, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 40 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

NEW YORK (FEB. 1) PR NEWSWIRE - Imphy S.A. announced that its U.S. subsidiary, Imphy Alloys, Inc., has acquired today Techalloy Company, Inc. from sole owner Gunnar Gillberg.

Imphy S.A. is a subsidiary of Usinor Sacilor, the world's second largest steel producer. Imphy S.A. manufactures a variety of stainless steel, nickel-based and cobalt-based alloy products and had consolidated sales of $500 million in 1989. Techalloy is Imphy's first acquisition of a United States stainless steel processor.

"Imphy is very excited about expanding its presence in the U.S. marketplace by the acquisition of an established U.S. company with a broad customer base," said Demus, the new chairman of Techalloy. He added, "The combination of Imphy and Techalloy in conjunction with the planned capital expenditure program will improve Techalloy's ability to continue to serve its clients."

Techalloy, headquartered in Armonk, New York, is a processor of stainless steel and high-nickel alloy products such as wire, cold-rolled strip, straight and cut bar, welding wire and electrodes.

"I am enthusiastic about the infusion into Techalloy of Imphy's strong technical base as well as its financial resources," stated Gunnar Gillberg who will continue as CEO during the transition period. Gillberg added that he expected Techalloy will be able to quickly and efficiently move into new and exciting areas of customer service.

Techalloy employs 350 people in five plants located in California, Georgia Illinois, Maryland, and Pennsylvania, and in a warehouse in Texas. Sales in 1989 were $85 million.

CONTACT: Gunnar Gillberg of Techalloy Company, 914-273-4500.

CORPUS CHRISTI, TX (FEB. 1) PR NEWSWIRE - Hitox Corporation of America (NASDAQ: HTXA), primarily a producer of buff-colored titanium dioxide pigment used in the manufacture of paints, industrial coatings and plastics, has named Dr. Alan H. Bruder, vice president for manufacturing and technology, Richard L. Bowers, chairman and president, announced today.

"Dr. Bruder has extensive experience in the development and manufacture of pigments. His background also includes considerable experience as a senior-level research and development manager in the areas of product and process development, project and program management, plant supervision and manufacturing. The addition of Dr. Bruder to our management team is in line with our corporate objective to strengthen the company's entire operating structure, with particular emphasis on R&D and manufacturing," Bowers said.

Prior to joining Hitox Corporation, Bruder served seven years as a senior research chemist and program/project manager with Pfizer Pigments, Inc., a division of Pfizer, Inc. He was also associated with Polaroid Corporation as a senior scientist.

Bruder holds a doctorate in inorganic, organometallic chemistry from Cornell University.

Based in Corpus Christi, Hitox Corporation manufactures pigments and extenders which are marketed world-wide to paint, plastics and chemical industries.

CONTACT: Richard L. Bowers, president and chief executive officer of Hitox Corporation of America, 512-882-5175.

DALLAS (FEB. 1) PR NEWSWIRE - E-Systems today reported record 1989 year-end sales, earnings, new order bookings, and backlog of unfilled orders and in addition a 50 percent increase in cash dividends. Fourth quarter sales and earnings also set new records.

Annual sales for 1989 amounted to $1.626 billion compared to 1988 sales of $1.439 billion. Net income for the year was $83.0 million, or $2.65 a share, compared to 1988 net income of $74.6 million, or $2.40 a share.

Fourth quarter sales reached $433.8 million versus sales of $388.0 million a year ago. Fourth quarter net income was $23.2 million, or 73 cents a share, compared to fourth quarter 1988 net income of $20.4 million, or 65 cents a share.

Orders (bookings) for 1989 totaled $1.887 billion and year-ending firm

backlog rose to $2.506 billion from $2.245 billion at the end of 1988.

Additionally, E-Systems board of directors approved a 50 percent increase of the first quarter dividend to 18.75 cents a common share (or 75 cents a share on an annualized basis), up from a quarterly rate of 12.5 cents a share paid previously. The dividend will be paid April 4 to stockholders of record March 16.

Fourth quarter and total year net income included a $7 million after-tax gain from the proceeds of an insurance policy. Separately, pre-tax reserves were established amounting to $6 million against operations and $3 million for legal fees and other costs associated with the company's previously terminated VRC-12 contracts in Florida.

E-Systems, Inc. (NYSE: ESY), is a major worldwide developer and producer of defense electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

PONTIAC, MI (FEB. 1) PR NEWSWIRE - Pontiac Division today announced new customer incentive action on 1989 and 1990 models, effective for a three-month period -- Feb. 3 through May 2.

Pontiac customers may choose from one of two incentive plans: -- Financing rates have been enhanced to provide special low 6.9 percent financing for up to 48 months on all Pontiac carlines.

OR -- Direct customer rebates of $1,000 are available on all Pontiac carlines, except LeMans and Sunbird, which carry $750 cash incentives.
"When you combine these new simplified programs that run for three months with the new products that we have entering the spring selling season, 1990 can be a great time to buy a new Pontiac," said Pontiac General Manager John G. Middlebrook.

"On top of that, these incentives can be combined with other incentive or allowance programs, such as the $600 available to first-time new car buyers, to make our models even more attractive at the dealership."

#90032p0221 02/01/1990 ~PR Newswire

NEW YORK, NY (FEB. 1) PR NEWSWIRE - Witco Corporation (NYSE: WIT) today announced it has taken a $43.2 million ($1.70 per common share) after-tax charge in the fourth quarter primarily related to reserves for environmental projects and plant shutdowns. Approximately 80 percent of the fourth quarter charge is related to environmental projects. The charge reduced 1989 net income to $1.60 per common share.

For the 1989 fourth quarter, after the charge, Witco has a net loss of $29 million, or $1.09 per common share, against net income of $20.4 million, or 86 cents per common share in the comparable 1988 quarter. Sales for the fourth quarter were approximately $380 million, down 1 percent from $384 million a year ago. 1989 fourth quarter income before the charge was $14.2 million, or 61 cents per common share, or approximately 30 percent below that of the 1988 fourth quarter. Inability to pass on higher crude oil costs resulted in lower profit margins for the 1989 fourth quarter.

For the year 1989 Witco's net income was $35 million or $1.60 per common share. This compares with 1988 income of $71.6 million, or $3.05 per common share, before income of $20.3 million equal to 81 cents per common share, as a result of adopting a change in accounting for income taxes. In addition, 1988 income was reduced by $11.4 million, or 46 cents per common share, related to the writedown of investments in foreign affiliates and reserves for environmental projects and plant shutdowns recorded in the first quarter. Sales for the year 1989 increased slightly to $1,588 million compared to $1,586 million in 1988.

Witco's Board of Directors today authorized the company to purchase up to $100 million of the company's common stock and/or 5.5 percent Convertible Subordinated Debentures due 2012. The shares will be purchased from time to time in the public market or in private transactions on terms acceptable to Witco. The shares repurchased by the company will be used for general corporate purposes. Goldman, Sachs & Co. and Smith Barney, Harris Upham & Co., Incorporated are the authorized agents for this program. Currently Witco Corporation has 22.5 million shares of common stock and $150 million of the Convertible Subordinated Debentures outstanding.

Witco Chairman William Wishnick said, "Witco's balance sheet continues to be strong with the company having adequate cash to fund its buyback program as well as to finance its capital expenditure requirements and act on favorable acquisition opportunities."

Witco manufactures specialty chemical and petroleum products and engineered materials.

CONTACT: C.R. Soderlind, VP, 212-605-3813, or S.L. Levy, Manager Public Relations, 212-605-3815, both of Witco

#90032p0224 02/01/1990 ~PR Newswire

AUSTIN, TX (FEB. 1) PR NEWSWIRE - Sematech has signed a joint development contract with Orchid One, an electron optics company based in Palos Hills, Ill., to develop an advanced electron beam microscope to inspect microchips in semiconductor processing.

Orchid One was formed in 1987 by Dr. Albert Crewe, a professor at the University of Chicago. The company's founding represents the culmination of 20 years of research by Crewe in the field of high brightness electron beam sources.

Crewe developed a self-contained field emission gun operated under complete digital control in a controlled vacuum system. The emission gun will be enhanced for further applications in the joint development contract with Sematech.

"As the linewidth of semiconductor chips gets smaller and smaller, the density or amount of information on the chip gets larger and larger," said Crewe. "The ability to inspect these smaller, more dense chips has pushed current electron microscopes to the limits of existing technology. We are developing a microscope to keep up with advanced semiconductor technology."

Sematech's joint development program was established in an effort to regain America's leading role in semiconductor manufacturing. To accomplish this objective, Sematech works with U.S. suppliers to develop new equipment, materials and processes that support manufacturing requirements for future generations of technology.

"This joint development project is the first that Sematech has awarded to an Illinois firm, and I'm pleased that Illinois is making a contribution to this most important mission," said Rep. Harris W. Fawell (R-IL).

"It doesn't make sense to produce smaller microchips if we have no method to inspect our progress. The joint effort between Sematech and Orchid One will allow us to closely examine our new technology and reduce the existing three-foot-by-six-inch microscope to about the size of a pepper mill," said Dr. Tom Seidel, Sematech's director of manufacturing equipment and materials.

Sematech, a consortium of 14 U.S. semiconductor manufacturers, has an annual budget of $200 million. Half of Sematech's funding is derived from industry or member firms and the remainder from the federal government through the Defense Advanced Research Projects Agency (DARPA).

DETROIT (FEB. 1) PR NEWSWIRE - U.S. automakers will assemble an estimated 109,440 cars this week, down from last week's actual count of 117,646, Ward's Automotive Reports announced today.

This compares to same-week 1989's tally of 155,382. Ward's reported that total estimated U.S. car output for calendar 1990 through the end of this week is 399,777 units, just over half of year-ago's "build" of 727,310.

General Motors Corp. has five car assembly plants down this week located in Linden, N.J.; Flint, Mich.; Lakewood, Ga.; Oklahoma City, Okla., and Van Nuys, Calif. Also, Ford Motor Co. halted production at its Edison, N.J., plant this week, as did Chrysler Corp. at St. Louis, No. 1 and Sterling Heights, Mich.

Chrysler's Jefferson plant in Detroit is scheduled to assemble 2,300 Omni/Horizon cars this week, its last week of production, Ward's said.

Ward's said U.S. truck production will also be down this week, with truckmakers scheduling an estimated 70,473 units compared to last week's count of 77,307, and like-1989's 94,267.

U.S. truck production for calendar year 1990 through the end of this week is 263,086 vs. year-ago's 436,104, said Ward's.

Chrysler's Warren, Mich. (Dodge City), truck plant and GM's Pontiac, Mich. (East), facility are both closed this week for inventory control.

Of this week's estimated U.S. car output, GM accounts for 44.5 percent; Ford, 21.2 percent; Chrysler, 10.9 percent; Honda of America Mfg. Inc., 8.0 percent; Mazda Motor Mfg. (USA) Corp., 2.6 percent; Nissan of America Mfg. Corp., 2.2 percent; New United Motor Mfg. Inc., 3.7 percent; Toyota Motor Mfg. USA Inc., 3.9 percent; Diamond-Star Motors Corp., 2.6 percent, and Subaru-Isuzu Automotive Inc., 0.4 percent.

ROCKY HILL, CT (FEB. 1) PR NEWSWIRE - Ames Department Stores Inc. (NYSE: ADD) today reported January sales of $230 million, a 4.2 percent decline from last year's adjusted total of $240 million. Last year's sales have been adjusted to reflect the September 1989 sale of the company's

variety-store operations.

Comparable-store sales for January increased 1.9 percent in Ames' discount department stores. Comparable-store sales declined approximately 16 percent in the 313 stores acquired from Zayre in October 1988.

Peter B. Hollis, Ames president and chief executive officer, said, "Sales comparisons in the acquired Zayre stores continue to reflect last year's significant promotion and clearance activity."

For fiscal year 1990, which ended Jan. 27, total sales, including sales of the acquired stores, increased 50.6 percent to $5.065 billion from $3.363 billion for last year. Ames' discount department stores had a comparable-store increase of 4.1 percent for the year; 5.7 percent for the fourth quarter.

Ames is one of the nation's leading discount retailer, operating 690 discount department stores in 20 states and the District of Columbia.

MIAMI (FEB. 1) PR NEWSWIRE - Knight-Ridder, Inc. (NYSE: KRI), announced annual earnings from continuing operations of $2.86 a share in 1989, excluding the gain from the sale of the Pasadena Star-News in June 1989, a 10.4 percent gain over the $2.59 earned in 1988. Including the Pasadena gain, total earnings from continuing operations were $3.43 a share. This was the company's 14th consecutive year of earnings per share growth. For the fourth quarter of 1989, earnings per share from continuing operations were $1.05 versus $.76 a year earlier.

Including gains from the sale of eight television stations during 1989, earnings were $4.71 per share.

Operating revenue for the fourth quarter was $607,839,000, a gain of 5.8 percent over the $574,650,000 in the fourth quarter of 1988. For the year operating revenue was $2,268,256,000 versus $2,083,330,000 in 1988, an increase of 8.9 percent.

Newspaper Division Knight-Ridder's Newspaper Division earned an annual operating profit of $347,617,000, a 16.0 percent gain over $299,730,000 a year earlier. For the fourth quarter, the division's operating profit was $109,577,000, 26.1 percent ahead of the $86,893,000 earned in the fourth quarter of 1988. Total Newspaper Division revenue for the year was $1,988,444,000 versus $1,917,352,000 in 1988.

Business Information Services The Business Information Services Division earned an annual operating profit of $12,085,000, up from the 1988 profit of $3,274,000. Excluding the acquisition of Dialog from both years, the division's operating profit was up $3,095,000. In the fourth quarter, division operating profits were $3,368,000 versus $3,160,000 a year earlier. 1989 division revenue was $273,381,000 versus $159,659,000 in 1988.

Knight-Ridder's annual meeting of shareholders will be held at 10 a.m. Wednesday, May 2, at the Omni Hotel, Biscayne Boulevard at 16th Street in Miami. All shareholders at the close of business on March 7, 1990, are entitled to receive notice of and to vote at the meeting.

BLOOMFIELD HILLS, MI (FEB. 1) PR NEWSWIRE - Ross Roy Group announced today that it has completed its acquisition of Anthony M. Franco, Inc., Michigan's largest public relations counseling firm. The transaction completes a business courtship begun in 1987, when Ross Roy purchased a minority interest in the Franco organization. The purchase price and other terms of the sale were not revealed by the privately held companies.

According to Ross Roy, the Franco firm had 1989 fee income of $4.85 million. Anthony M. Franco, Inc. will continue to be headquartered in Detroit.

Anthony M. Franco, who will continue as chairman and CEO of the 25-year-old firm bearing his name, said, "We are very pleased about becoming a full partner with the Ross Roy Group. We are equally pleased that the relationship allows us and our subsidiaries to retain our independent status while being afforded the opportunity to utilize the broad resources and international reach of Ross Roy to further our growth and better serve our present as well as future clients. I am looking forward with great anticipation to this partnership and the opportunity to serve on the Ross Roy Group board of directors."

The chairman of both firms expressed enthusiasm over the linkage of the two companies. Glen Fortinberry, chairman and CEO of Ross Roy said, "The addition of the Franco firm strengthens our universe of marketing services and is on strategy in positioning Ross Roy as a total communications company. It also provides a level of sophistication for our own PR efforts we did not previously have."

Fortinberry noted that Ross Roy exercised its option to complete the purchase about one year ahead of schedule due to a number of factors: "They demonstrated the strength and depth of their organization and the contribution they were capable of making to our clients. It appeared advantageous to move forward and capitalize on the full benefits of a relationship immediately."

Founded in 1964, Anthony M. Franco, Inc. ranks among the top 25 firms nationally. It operates offices in New York and Cleveland.

Ross Roy Group is the nation's ninth-largest independent advertising agency, billing more than $600 million annually. It is comprised of nine companies with offices in Michigan, New York, Ohio, California, Georgia, Florida and Canada.

#90032p0254 02/01/1990 ~PR Newswire

HIGHLAND PARK, MI (FEB. 1) - Chrysler Corporation (NYSE: C) today reported it is transferring production of its Dodge Daytona sports car and the Chrysler LeBaron coupe and convertible to two other U.S. assembly plants, and will close the St. Louis I (Fenton, Mo.) Assembly Plant on Sept. 21, 1990, following the expiration of the current labor agreement.

Chrysler said transferring production of the Daytona and LeBaron to its Sterling Heights (Mich.) and Newark (Del.) assembly plants respectively enables the company to better utilize its assembly plant capacity.

Recently concluded studies by auto analysts indicated that about 22 million units of assembly capacity was targeted for the North American market in the 1989 calendar year, while sales hovered around 16.5 million -- leaving more than 5 million units of unused capacity.

Since the start of the 1990 model year, the St. Louis I Assembly Plant has been down for inventory adjustment 13 weeks of the 29 weeks available for production.

In early December 1990, after a three-week changeover period in November, Dodge Daytona production will resume along with Dodge Shadow and Plymouth Sundance 2-door and 4-door sedans at the Sterling Heights Assembly Plant.

The company said as a result of added production and the increase in Sterling Heights' capacity utilization it expects there will be work opportunity for several hundred hourly employees in December of this year.

Chrysler said LeBaron coupe and convertible production will be transferred to the Newark (Del.) Assembly Plant where the Dodge Spirit, Plymouth Acclaim, and new Chrysler LeBaron mid-market 4-door sedans are currently produced. Production of the LeBaron coupe and convertible will begin in early December, after a three-week changeover period in November.

The company said that with resumption of normal production levels at Newark, it anticipated there will be work opportunity for several hundred hourly employees.

St. Louis I currently employs about 3,700 hourly people, and as previously announced, 1,900 of those will be laid off indefinitely when the plant is single-shifted Feb. 12. Under provisions of the current Chrysler - UAW contract, if openings occur at other U.S. plants covered by the agreement, laid-off workers from St. Louis I would be eligible for those openings on a priority basis.

Eligible UAW represented hourly and salaried employees placed on indefinite layoff may receive up to 95 percent of their after-tax income through a combination of Chrysler Supplemental Unemployment Benefits and State Unemployment Compensation benefits. They may also receive extended

coverage under the Guaranteed Income Stream plan. In addition, Chrysler continues most health-care coverage for up to 25 months depending on length of service.

Eligible non-represented salaried employees placed on indefinite layoff will receive Chrysler Income Protection Plan benefits and State Unemployment Compensation benefits.

Production of the Dodge Daytona started in the 1984 model year. Chrysler LeBaron coupe and convertible production started in the 1987 model year. The 2.5-million-square-foot St. Louis I Assembly Plant was built in 1959. While Chrysler said it was mothballing St. Louis I it also said it has no current plans for the plant.

CHICAGO (FEB. 1) PR NEWSWIRE - Directors of Baker, Fentress & Co. (NYSE: BKF), a closed-end fund, today declared a first quarter dividend of $0.125 per share on its common stock, payable April 4, 1990, to shareholders of record March 15, 1990.

Beginning in 1987, the company established a policy of annually paying shareholders dividends and capital gain distributions which, when added together, equal at least 8 percent of the company's average net asset value for the 12-month period ended Oct. 31 of that year.

For 1989, the total distributions from 1989 income were 12.8 percent of average net asset value for the 12-month period ended Oct. 31, 1989, well in excess of the 8 percent minimum distribution policy. Based on average market value of Baker Fentress stock for the same period, the total payout percentage was 15.8 percent.

MONTREAL (FEB. 1) PR NEWSWIRE - Domtar Inc. (NYSE: DTC) today reported net earnings for 1989 of $33 million or $0.24 per common share compared to $111 million or $1.15 per common share in 1988. Earnings from continuing operations were $15 million or $0.04 per common share compared to $103 million or $1.06 per common share in 1988. The lower earnings were attributable to reduced operating profit and higher interest expense. Earnings from discontinued operations increased to $18 million from $8

million in 1988 primarily due to improved results for the salt business.

Sales from continuing operations in 1989 were essentially unchanged at $2.5 billion. Operating profit declined to $89 million from $198 million in 1988 due to weaker cyclical market conditions for newsprint, packaging and construction materials, the estimated $50 million impact of the stronger Canadian dollar and the inclusion of a $35 million special charge to cover the cost of the corporation's organizational restructure. Despite a deterioration in the industry environment for fine papers and market pulp in the second half of the year, operating profit for these business-lines improved as the results for the previous year had been significantly impacted by a strike at the Lebel-sur- Quvillon pulp mill.

In the fourth quarter, the corporation incurred a net loss of $27 million or $0.35 per common share compared to net earnings of $23 million or $0.23 per common share for the corresponding period in 1988. The loss from continuing operations was $36 million or $0.45 per share, compared with earnings of $20 million of $0.20 per share in 1988. The decline in earnings was due to reduced operating profit and an increase in interest expense.

Sales in the fourth quarter in 1989 declined to $596 million from $637 million in the same period of 1988. An operating loss of $39 million was incurred compared to an operating profit of $49 million in the fourth quarter of 1988. The decline in profitability was attributable to weaker markets for pulp and paper and packaging, the impact of the stronger Canadian dollar and the recording of the special charge in the fourth quarter. The operating loss for construction materials increased primarily due to a decline in the results for wood preserving, reflecting the write-off of a mothballed facility and higher environmental site rehabilitation costs.

NEW YORK (FEB. 1) PR NEWSWIRE - Bankers Trust New York Corporation (NYSE: BT) put warrants based on the Nikkei Stock Average began trading this morning on the American Stock Exchange, the third such product to be introduced within a month on the exchange.

Trading under ticker symbol BTBWS, the new warrants opened at 8-7/8 on 234,000 warrants. Within an hour, more than 668,000 warrants had changed hands.

The 6 million Bankers Trust New York Corporation put warrants introduced today were underwritten by Merrill Lynch Capital Markets, and expire on

Jan. 16, 1993. These warrants will have a floating yen/dollar exchange rate instead of a fixed exchange rate in determining the settlement value. Two similar issues which began trading last month utilize a fixed exchange rate.

Hedging Japanese Market

"Until put warrants became available for trading on the American Stock Exchange, U.S. investors were largely precluded from hedging investments in the Japanese securities market," said American Stock Exchange Chairman James R. Jones. "Previously one had to establish an offshore account to achieve any degree of liquidity."

The American Stock Exchange is the first exchange in the United States to provide a market in put warrants on the Nikkei Stock Average.

The Kingdom of Denmark and Salomon Inc put warrants on the Nikkei Stock Average, which began trading on the Amex on Jan. 12 and Jan. 17, respectively, continue to attract broad investor interest, appearing frequently in the most active list.

SAN BRUNO, CA (FEB. 1) PR NEWSWIRE - Anton Hendriksz, president of North Lily Mining Co. (NASDAQ: NLMC), is pleased to announce the receipt of an initial reserve report on the Taltal joint venture in northern Chile. The 660-square kilometer iodine/nitrate project is being joint ventured by Kap Resources Ltd. and Atacama Resources Ltd. on a 50-50 basis. North Lily is the operator of the project and has a 10 percent net profits interest in this substantial property.

A feasibility study, scheduled for completion by April 1990, is being conducted by Davy McKee, an internationally recognized engineering company. The reserve report, based on extensive sampling of a 26-square kilometer sector of the property and using a cut-off grade of 4 percent nitrate, indicates that this sector of the property alone contains 27,752,000 metric tonnes of ore. This reserve base will support a 7,600 tonne per day processing plant for a period of 10 years. Production from a plant of this size is projected at 275,000 tonnes of nitrate and 635 tonnes of iodine per annum. The current market price for iodine is $18,000 per tonne, and for nitrates, $300 per tonne. Based on the reserves from this 26-square kilometer sector, the project will generate gross revenues of $922 million over a 10-year life.

Encouraging results are being received from North Lily's exploration on an

additional 48-square kilometer area of the property, which is scheduled for completion in May 1990. In addition, an extensive exploration program has been planned on the remaining acreage of the property. It should be noted that in addition to iodine and nitrates, several other products, including sodium sulfate, boric acid and lithium carbonate could be produced from a single mining operation. The economic impact of these products on the project will be assessed as part of the feasibility study.

The first phase of a marketing study on consumer demand for the products of the joint venture indicates extremely favorable markets. In addition, several of the consumers and traders contacted during the marketing study expressed immediate interests in securing contracts for the purchase of iodine and nitrates.

Management is confident that reserves on the property will be significantly enhanced by the current exploration, and that the joint venture's objective of bringing the property into production as quickly as possible will be met.

CHICAGO (FEB. 1) PR NEWSWIRE - Montgomery Ward & Co. today reported improved sales for the 52-week period of Jan. 29, 1989, through Jan. 27, 1990. Net sales of $5,001,582,000 were up 2.8 percent compared with $4,866,602,000 a year ago.

"Sales results are still being impacted by the company's strategic decision last year to discontinue certain merchandise lines,'' said Bernard F. Brennan, chairman and chief executive officer. ''On a 'continuing lines' basis, 52-week sales increased 5.1 percent. Strongest sales came from our Electric Avenue specialty business.''

Net sales for the four-week period ending Jan. 27, 1990, were $278,248,000 down 3.8 percent from $289,366,000 in the same period last year.

Montgomery Ward had 333 stores in operation during the reporting period.

MINNEAPOLIS (FEB. 1) PR NEWSWIRE - The board of directors of Bemis Company, Inc. (NYSE: BMS), today increased the quarterly cash dividend on Bemis common stock to 18 cents per share from 15 cents, a 20 percent

increase, payable on March 1, 1990 to stockholders of record on Feb. 16, 1990.

This follows quarterly cash dividend increases of 36 percent in 1989 and 22 percent in 1988.

"This increase is consistent with our dividend payout philosophy, and we feel it is appropriate in view of Bemis Company's continuing progress and prospects for the future," said Howard Curler, chairman and chief executive officer.

Bemis Company recently announced 1989 earnings per share of $1.80, up 22 percent from $1.48 in 1988, marking the seventh consecutive year of earnings gains.

Bemis Company is a major supplier of flexible packaging and specialty coated and graphics products. Bemis common stock is traded on the New York Stock Exchange.

#90032p0271 02/01/1990 ~PR Newswire

BEAUMONT, TX (FEB. 1) PR NEWSWIRE - Gulf States Utilities Co. (NYSE: GSU) today reported an (unaudited) loss of $1 per share of common stock for 1989, compared to earnings of 37 cents per share for 1988.

Results for 1989 were adversely affected by four significant accounting charges (net of their related income tax effects):

-- In the first quarter, a charge to earnings of $15 million (14 cents per share) was taken to reflect the Louisiana regulatory treatment of the cancelled River Bend 2 unit.

-- In the third quarter, a charge to earnings of $37 million (34 cents per share) was taken to reflect the write-off of River Bend deferrals related to activities governed by the Federal Energy Regulatory Commission (FERC).

-- Also in the third quarter a charge to earnings of $18 million (17 cents per share) was taken to reflect the write-off of abandoned lignite leases.

-- In the fourth quarter, a charge to earnings of $22 million (20 cents per share) was taken to reflect the write off of River Bend deferrals related to GSU's steam department electric operations.

The write-offs of River Bend deferrals were the result of the company's competitive pricing of FERC rates and the anticipated reduction in killowatt-hour sales to the steam department's electric operations, which cause the deferrals to be unrecoverable. These four charges totaling $92 million reduced 1989 per share earnings by 85 cents.

During 1989, GSU recorded $41 million of earnings (38 cents per share) attributable to accounting order deferrals and phase-in plans compared to $128 million of earnings ($1.19 per share) recorded for those items in 1988.

GSU reported a loss of 34 cents per share of common stock for the fourth quarter of 1989, compared to a loss of 8 cents per share of common stock during the fourth quarter of 1988.

Gulf States serves an estimated 563,000 electric customers in a 28,000-square-mile area spanning the Gulf Coast between Houston and New Orleans.

#90032p0272 02/01/1990 ~PR Newswire

BRADENTON, FL (FEB. 1) PR NEWSWIRE - Tropicana Products, Inc. today announced plans for new packaging and distribution facilities for both the East Coast and the West Coast. In the East, a new 210,000- square-foot distribution, product packaging and sales administration facility will be constructed in Jersey City, N.J. On the West Coast, a 210,000-square-foot sales, manufacturing and distribution facility in the City of Industry, Calif. has been purchased. Both facilities will provide greater national prominence for all Tropicana's products.

Tropicana will consolidate all existing California-based sales, distribution and packaging operations in the new facility. The continued growth of the West Coast customer base for Tropicana orange juice and the new Tropicana Twister products created the need for an expanded single-site business center. Tropicana's share of chilled orange juice has grown to 25 percent in the West, about a one-third increase over the last two years.

"Customer service to the West Coast retail trade will be further strengthened when the new facility becomes fully operational later this year," Robert L. Soran, Tropicana Products president, said. The West Coast represents one of the nation's largest demand markets for high-quality 100 percent pure juice and natural juice-blend beverages.

The multi-story, Jersey City facility will include an automatic storage and retrieval system in a refrigerated warehouse; new state-of- the-art juice packaging and filling machines, and a sales office. Tropicana has leased 42 acres from Conrail in the Greenville Yards section of Jersey City. Construction will begin in early 1990, and the facility will be operational in the spring of 1991.

Railcars carrying Tropicana Pure Premium orange juice from Bradenton will be unloaded with dramatically increased efficiency at the new Jersey City facility. With this expanded refrigeration and product storage capacity,

Tropicana will be able to make more efficient use of its more than 300 refrigerated railcars. There will also be automated truck loading stations for the Tropicana delivery fleet.

The new facility will greatly expand Tropicana's refrigerated product storage capacity, and will provide enhanced customer service and product delivery in the growing Mid-Atlantic and New England markets. Tropicana enjoys a greater than 50 percent market share in the highly competitive metropolitan New York area. A variety of Tropicana reconstituted orange juice and other juice-blend beverages will also be loaded and packaged in Jersey City.

"Both facilities are a demonstration of commitment from Tropicana to consumers and the retail trade," Soran said.

Tropicana Products, Inc., the leading producer of 100 percent pure, not-from-concentrate orange juice, is a wholly owned subsidiary of The Seagram Company Ltd. (NYSE: VO).

CONTACT: Terri Holloway of Tropicana Products, 813-747-4461, or Richard Russack of Adams & Rinehart, 212-557-0100, for Tropicana-The Seagram Company Ltd.

#90032p0275 02/01/1990 ~PR Newswire
PRINCETON, N.J. (FEB. 1) PR NEWSWIRE - Chronar Corporation (NASDAQ-NMS: CRNR) announced today that it is redirecting its operations to concentrate primarily on the continuing development of its amorphous silicon photovoltaic technology and the sale of photovoltaic panels in emerging worldwide markets.

The company will continue to focus on the improvement of its manufacturing process, including its Eureka manufacturing line, and on efforts to improve encapsulation and stabilized conversion efficiencies to meet the Solar Energy Research Institute's new thin film qualification standards and competitive conditions in the marketplace. Although delays are possible, the company anticipates delivery of the Eureka equipment to the purchaser in late 1990 and expects to commence delivery in the fall of 1990 of Eureka panels under its $2 million contract with the government and utility sponsored Photovoltaic for Utility Scale Applications (PVUSA) program.

As a result of this new focus and to conserve resources, the company will manage its marketing and sales activity in consumer and commercial products to extend the company's working capital through the third quarter 1990. The company further stated that it has begun discussions regarding additional financing with several of its principal stockholders although

no commitments have yet been made.

The company reported that it continued to experience significant losses in the fourth quarter of 1989. The company noted that losses were likely for 1990 and 1991 as the company continues to develop its technology and then seeks to exploit opportunities. The company said that it is presently seeking about $10 million of funding for 1990 and would probably require additional financing in 1991 and 1992.

The company has concluded a renewal of the $10 million credit line with Midlantic National Bank through Jan. 31, 1991. Chronar presently has available for borrowing approximately $4.5 million under this line. The Sheet Metal Workers' National Pension Fund and affiliates of the Harbert Group are guaranteeing the line 75 percent - 25 percent, respectively. Under their arrangements with the company, the guarantors are entitled to several installments of fees and warrants for their guarantees and under certain conditions are obligated to reissue their guarantees for an additional period through September 1991. At the guarantors request, the company has agreed to presently issue to the guarantors all the warrants due to them for the current and additional guarantee periods in exchange for an extension of the next guarantee period from September 1991 to January 1992. Pursuant to this arrangement, the company will issue in the aggregate warrants to purchase 888,000 shares of the company's common stock at an exercise price of $2.64 per share.

Chronar Corporation is a leader in the research and development and production of amorphous silicon thin-film photovoltaic panels which convert light directly into electricity. The company develops and markets photovoltaic panels and photovoltaic-powered consumer and commercial products and develops photovoltaic electricity-generating power stations.

FOUNTAIN VALLEY, CA (FEB. 1) PR NEWSWIRE - Hyundai Motor America today announced the appointment of Dennis Lamont as executive vice president and chief operating officer of the newly formed Hyundai Motor Finance Company, a wholly owned subsidiary of HMA.

"We are pleased to have Dennis Lamont joint us and we know that he shares our excitement about the start up of HMFC. His solid financial service background will be of immeasurable as we launch this important new HMA subsidiary," said H.W. Baik, president of Hyundai Motor America.

Prior to joining Hyundai, Lamont was president and chief executive officer of Security Pacific Auto Finance, a $2 billion subsidiary of Security Pacific Corp.

From 1981-1986 he was vice president for Citicorp Acceptance Corporation where his responsibilities included planning, developing and implementing new financing programs throughout the United States.

Lamont began his career with Ford Motor Credit Corporation in 1967 where he worked for 14 years in both the domestic and international areas of finance and credit.

He received his bachelor of science degree in economics from the University of Detroit in 1965 and his master of business administration degree from Harvard Business School in 1967.

Lamont resides in Laguna Niguel, Calif., with his wife, Dory. In his spare time, Lamont enjoys traveling, reading and golf.

PITTSBURGH (FEB. 1) PR NEWSWIRE - Dr. John Kenneth Hulm, chief scientist emeritus of the Westinghouse Electric Corp. (NYSE: WX), has been appointed to the U.S.-Japan Joint High Level Advisory Panel by the president's assistant for science and technology, Dr. D. Allan Bromley.

An eminent physicist and international authority on superconductivity, Hulm, 66, is the Pittsburgh area's only industry member of the National Academy of Sciences.

The Advisory Panel is comprised of 20 distinguished U.S. and Japanese scientists and engineers from industry and academia. Formed under a cooperative agreement on research and development signed in 1988, it provides advice to both governments on their science and technology relationship.

A Squirrel Hill resident, Hulm retired as chief scientist from the Westinghouse Science & Technology Center in Churchill two years ago, where he maintains a consulting relationship. As chief scientist, he was responsible for the planning, development and funding of the company's scientific programs.

A native of England, Hulm attended Cambridge University where he received his Ph.D. in physics in 1949. That same year he published his first paper

on superconductors in the journal Nature. He was a research fellow and professor at the University of Chicago before coming to Westinghouse in 1954, where he remained except for two years in the 1970s spent as the U.S. State Department's Scientific Attache in London.

#90032p0282 02/01/1990 ~PR Newswire

LONG GROVE, IL (FEB. 1) PR NEWSWIRE - Kemper Corporation (NYSE: KEM) today reported fourth quarter 1989 net income from continuing operations of $49,001,000, or $1.00 per share. This compares with $63,797,000, or $1.08 per share, for the same period in 1988.

Included in net income from continuing operations are after-tax realized investment losses of $2,475,000, or $.05 per share, for the fourth quarter of 1989, versus 1988 fourth-quarter gains of $6,507,000, or $.11 per share.

Kemper Corp.'s net income from continuing operations in 1989 was $229,621,000, or $4.44 per share, compared with $210,795,000, or $3.59 per share, in 1988. This includes after-tax realized investment gains of $13,712,000, or $.27 per share, in 1989, compared with gains of $15,977,000, or $.27 per share, in 1988. Impacting after-tax realized gains in 1989 was a reduction of $12,211,000, or $.24 per share, in the carrying value of certain below investment grade securities. This compares to a reduction of $8,566,000, or $.15 per share, in 1988.

For 1989, net income, including discontinued operations, was $307,441,000, or $5.96 per share, compared with $220,750,000, or $3.76 per share, for 1988. Included in 1989 net income is a one-time $67,235,000 gain resulting from the sale of American Motorists Insurance Company in the second quarter.

Revenue for 1989 was $2,773,711,000, versus $2,425,500,000 in 1988, an increase of 14.4 percent.

"Results in our life insurance, asset management, reinsurance, property-casualty, and loss control operations were quite satisfactory, relative to their industries," said Joseph E. Luecke, Kemper Corporation chairman of the board, president and chief executive officer. "The only unsatisfactory results came in our securities brokerage operation where industry conditions are currently adverse," he said.

"Today, we will also announce the details of a two million share repurchase plan designed to benefit our stockholders," Luecke added.

Kemper Corp. is investor-owned, and its major subsidiaries operate in life insurance, investment services, reinsurance and property- casualty insurance.

LONG GROVE, IL (FEB. 1) PR NEWSWIRE - Kemper Corp. (NYSE: KEM) announced today that the executive committee of its board had authorized the purchase of up to 2.0 million shares of its common stock. The purchases would be made in either open market or privately negotiated transactions.

''As our action indicates, we have assessed the value of our company and determined that, in light of current market conditions, this move will benefit our stockholders,'' said Joseph E. Luecke, chairman, president and chief executive officer.

Continued Luecke: ''With the concern over asset values that is rampant today in the marketplace, it's worth noting that, as of Dec. 31, 1989, the market value of Kemper Corp.'s invested asset portfolio was less than two percent below its carrying value of approximately $8 billion.''

The shares purchased would be held as treasury stock and may be reissued from time to time for general corporate purposes. As of Dec. 31, 1989, Kemper Corp. had approximately 48.8 million common shares outstanding.

Kemper Corp. is investor-owned, and its common stock is traded on the New York Stock Exchange. Major subsidiaries operate in life insurance, investment services, reinsurance and property casualty insurance.

JACKSON, MS (FEB. 1) PR NEWSWIRE - Mobile Telecommunication Technologies Corp. (NASDAQ: MTTL) announced today that its subsidiary SkyTel Corp., Washington, D.C., has signed two new affiliate agreements for the marketing of its nationwide messaging services.

The two agreements, which are separate and unrelated, pertain to the resale of "SkyPager" and "SkyTalk", nationwide paging and voice messaging services.

Under an agreement with Ameritech Mobile Communications of Schaumburg, Ill., Ameritech will offer SkyPager in nine Midwest markets.

Under an agreement with Graphic Scanning Corporation of Englewood, N.J., Graphic Scanning will market SkyPager and SkyTalk in 16 major U.S. cities.

Ameritech Agreement Ameritech will make SkyPager available to its customer base in the following Midwest markets: Chicago, Cleveland, Detroit,

Columbus, Milwaukee, Dayton, Toledo, Flint and Grand Rapids.

"Ameritech becomes the fourth Regional Bell Operating Company to sign an affiliate agreement with SkyTel," said Jim Phillips, president of SkyTel, the country's leading provider of nationwide paging services. "U.S. West, NYNEX Paging Company, and BellSouth are already offering SkyTel services in other parts of the Midwest, the West, the Greater New York City area and the South, respectively."

"SkyTel is the premier nationwide paging company and we are looking forward to offering 'SkyPager' to our customers," said Jay Edwards, vice president of Paging Services, Ameritech Mobile Communications.

Graphic Scanning Agreement Graphic Scanning will offer SkyPager and SkyTalk to its customer base in Atlanta, Boston, Chicago, Dallas, Detroit, Houston, Jacksonville, Los Angeles, Miami, New York, Orlando, Pittsburgh, Philadelphia, Sacramento, San Diego and St. Louis.

"Graphic Scanning has an established presence in major cities around the country, and we are happy to increase SkyTel's U.S. market distribution through this agreement," said Phillips.

Sergio Silva, vice president, paging division, Graphic Scanning, said, "SkyTel's services, 'SkyPager' and 'SkyTalk,' will fulfill the need for a national paging system we see among our customers. The combination of our sales force and SkyTel services will benefit both Graphic Scanning and SkyTel."

Graphic Scanning Corporation is one of the largest paging companies in the U.S. with over 300,000 customers. Graphic Scanning provides its services nationally through its wholly owned subsidiaries Radio Relay, Digital Paging Systems, Inc. and Tel-Car.

SkyTel's system covers approximately 95 percent of the U.S. business population. SkyTel believes that its satellite-based system offers technical advantages over competing nationwide paging systems, including more effective penetration of downtown metropolitan areas.

SkyTel developed the proprietary operating system that enables a radio message to be simulcast nationwide over a high penetration frequency and be received in seconds.

SkyTel is 90.3 percent owned by Mobile Telecommunication Technologies Corp. or Mtel.

Mtel, headquartered in Jackson, Miss., is engaged in businesses that include nationwide paging and voice messaging systems; interests in other satellite-based telecommunications systems; air-to-ground and marine

telecommunication systems; telephone answering service operations; and a microwave relay system in southern California.

Mtel's Common Stock is quoted on the NASDAQ National Market System under the symbol MTTL.

#90032p0295 02/01/1990 ~PR Newswire

CHICAGO (FEB. 1) PR NEWSWIRE - United Airlines announced today that seats are now on sale for the carrier's new service linking Chicago's O'Hare International Airport with Charles DeGaulle International Airport in Paris.

On Aug. 1, 1990, United plans to launch daily non-stop service between Chicago and Paris with Boeing 767-200 aircraft reconfigured for three-class service and equipped for overwater international operation. Westbound service from Paris will commence Aug. 2.

United's Flight 106 to Paris will originate from Los Angeles International Airport with McDonnell-Douglas DC-10 aircraft, departing LAX at 10 a.m. and arriving at O'Hare at 3:52 p.m. Flight 106 will operate nonstop from Chicago in Boeing 767-200 aircraft, departing O'Hare at 5:15 p.m. and arriving at Charles DeGaulle Airport at 8:35 a.m. the following day.

The westbound Flight 105 will operate in Boeing 767-200 aircraft and will depart from Charles DeGaulle Airport at 11:20 a.m., arriving at O'Hare at 1:40 p.m. Flight 105 will continue from Chicago to Los Angeles in 147-passenger Boeing 727-200 aircraft, departing from O'Hare at 3 p.m. and arriving in Los Angeles at 5:05 p.m.

The flights are subject to government approval. Passengers using O'Hare airport can avail themselves of on-line connecting service to more than 60 U.S. cities.

And passengers will enjoy the benefits of earning miles toward free travel in Mileage Plus, the carrier's popular frequent flier program.

The following fare levels for travel from Chicago to Paris have been approved by the U.S. Department of Transportation and are subject to French government approval.

The lowest economy APEX round-trip fares available for travel from Chicago to Paris from Aug. 1 through Sept. 30 are $648 midweek (Monday- Thursday) and $698 weekend (Friday-Sunday).

The first class round-trip fare is US$4,690. The business class round-trip fare is US$2,552. The normal economy class round-trip fare is US$1,814.

United plans to add Washington Dulles as a U.S. gateway for its service to Paris at a future date. The carrier will inaugurate its European service on May 15, 1990, with daily non-stops linking Frankfurt with Chicago's O'Hare International Airport and Washington's Dulles International Airport.

#90032p0296 02/01/1990 ~PR Newswire

VOORHEES, NJ (FEB. 1) PR NEWSWIRE - American Water Works Company (NYSE: AWK) today announced earnings per share for 1989 of $1.56. This represents a decline of 15 percent in comparison with earnings per share of $1.84 in 1988.

Company President James V. LaFrankie said that during the summer months of 1989, the weather was much less conducive to water usage than was the case in 1988. In fact, he said, 1988 was a record year for water consumption due to below normal rainfall and warm temperatures.

The volume of water sold in 1989 was 5 percent lower than in 1988.

"The fluctuation in summer weather between 1989 and 1988 was the most dramatic year-to-year change we have ever experienced," LaFrankie said.

For the 15th consecutive year, the board of directors, at its meeting in January, increased the quarterly dividend rate for common stock. This 8 percent increase from 18-1/2 cents to 20 cents per share, payable Feb. 15, 1990, reflects the confidence of the board of directors in the positive performance of the company.

Rate increases were approved during the year authorizing additional annual revenues of $13.2 million. Total revenues in 1989 were approximately 3 percent above revenues recorded in 1988.

LaFrankie said total operating expenses in 1989 were about 4 percent higher than those incurred in 1988. Income deductions, primarily interest expenses, were approximately 14 percent above those in 1988, he said, reflecting the cost of money borrowed in connection with the company's ongoing construction program to insure proper water service to all customers.

GARDENA, CA (FEB. 1) PR NEWSWIRE - Free motorcycle training will be offered to consumers purchasing a Honda street motorcycle or scooter, American Honda officials announced today.

"This program, which becomes effective February 1, is another step in our long-standing commitment to rider safety education," said John Petas, senior vice president for American Honda's Motorcyle Division.

Basic motorcycle training or experienced rider training by the Motorcycle Safety Foundation will be made available at the more that 770 Motorcycle Safety Foundation (MSF) training sites nationwide, as well as at Honda Rider Education Centers. The course can be completed six months prior to or six months after purchase of the motorcycle. The offer is limited to actual tuition costs. Riders will be reimbursed by Honda after completion of the training course and submission of a school receipt.

As part of Honda's commitment to promote safe, enjoyable motorcycling through education and rider instruction, Honda established Rider Education Centers to provide year-round training devoted solely to developing rider skills and improving rider education. To date, two center are open - Colton, Calif.; and Arlington, Texas. Three additional centers are scheduled for completion.

NEW YORK (FEB. 1) PR NEWSWIRE - GTECH Holdings Corporation, a company formed by Donaldson, Lufkin & Jenrette Capital Corporation (DLJCC), an affiliate of Donaldson, Lufkin & Jenrette Securities Corporation, the leading merchant banking firm in 1989, announced that its $300 million acquisition of GTECH Corporation (NASDAQ: GTCH) has been completed.

As previously announced, members of senior management of GTECH Corporation (including Guy B. Snowden, chairman, president and chief executive officer and Victor Markowicz, vice chairman, and certain other members of GTECH's management) are participating as equity investors in the acquisition, along with DLJCC and GTECH Bridge Partnership, an affiliate of DLJCC, which is also providing bridge financing of approximately $136 million in connection with the acquisition.

In the merger, each outstanding publicly held share of GTECH (other than

shares held by shareholders who properly exercise appraisal rights under Delaware law) was converted into the right to receive $16-5/8 in cash. Instructions concerning the exchange of GTECH shares for cash will be mailed to all GTECH shareholders of record by Marine Midland Bank, N.A., the exchange agent.

Donaldson, Lufkin & Jenrette Securities Corporation and its affiliates have participated in more than 25 leveraged buyouts and similar transactions valued at more than $18 billion. In addition, DLJSC and its affiliates control the DLJ Bridge Fund, which has committed capital in excess of $1 billion to provide financing for such transactions.

GLEN ROCK, NJ (FEB. 1) PR NEWSWIRE - Richard G. Kelley, chairman and chief executive officer of Citizens First Bancorp, Inc. (AMEX: CFB) announced today that the board of directors had approved a program to purchase for its treasury, from time-to-time, up to 500,000 shares of its own common stock.

The shares will be used in connection with its employee stock option plan and the employee stock ownership plan. Kelley said the board felt that the purchase of its stock represents an appropriate use of the corporate funds in view of what the board believes to be an undervaluation of the company stock in the current market. The company plans to pay for the stock repurchased from general corporate funds on hand. The repurchase program will be executed from time-to-time. Keefe, Bruyette & Woods, Inc. has been named the company's exclusive agent in connection with the program.

Citizens First Bancorp, Inc. is the holding company for Citizens First National Bank of New Jersey, located at Glen Rock. The bank has 51 branches located in the northern and central portions of the state.

The company recently announced record 1989 earnings which increased 18.2 percent over 1988 earnings. Citizens First Bancorp has total assets in excess of $3 billion. The company's common stock is listed on the American Stock Exchange.

PHOENIX, AZ (FEB. 1) PR NEWSWIRE - StatesWest Airlines Inc. (NASDAQ: SWAL) reported that an initial purchase in the open market of 100,000 shares of StatesWest's common stock was made by the members of the business group proposing to form a new airline joint venture with StatesWest Airlines.

The new airline will serve the Pacific Rim and be headquartered in Bangkok Thailand. The signing of the letter of intent was announced yesterday.

The Group also informed StatesWest's chairman, Rudy R. Miller, they may, from time to time, acquire more stock in the open market but they would not acquire more than 5 percent in such transactions.

StatesWest is one of the largest regional air carriers in the country not owned or totally affiliated with a major carrier. The company owns 7.34 percent of Mesa Airlines Inc. (NASDAQ: MESA), a regional airline carrier headquartered in New Mexico.

StatesWest operates one of the newest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County and San Diego, along with the Arizona cities of Phoenix, Scottsdale, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca, and Laughlin, Nevada/Bullhead City, Ariz. and Telluride, Colo. StatesWest operates 63 daily departures between these locations.

CHATTANOOGA, TN (FEB. 1) PR NEWSWIRE - CONSTAR International Inc. (NYSE: CTR) announced today that its Wellstar joint venture in Europe has completed the acquisition of two additional PET plastic beverage bottle operations, one in the Netherlands and the second in England. The company has previously reported the signing of an agreement in principle to acquire the operations from PLM AB, a Swedish company.

Wellstar, in which CONSTAR holds a 40 percent interest, now operates four PET plastic bottle operations in Europe. The other two plants are located in the Netherlands and France. With combined sales of over $90 million, Wellstar is now the second largest PET bottle manufacturer in Europe.

CONSTAR, through its wholly-owned subsidiary Sewell Plastics, Inc., produces a complete line of plastic containers at 23 production facilities located coast to coast in 16 states. Sales of more than one- half billion dollars make Sewell Plastics the largest manufacturer of plastic containers in the United States.

ENGLEWOOD, CO (FEB. 1) PR NEWSWIRE - U S WEST International, a subsidiary

of U S WEST Inc. (NYSE: USW), has submitted bids to provide cellular communications services in four regions of Mexico, according to Maureen O'Ryan, the company's director of business development in Latin America.

The four regions sought by U S WEST International are: Baja California, Monterey, Guadalajara/Jalisco and Veracruz/Puebla. The Government of Mexico is expected to award licenses to provide cellular service in a total of eight regions on March 5 and 6.

"U S WEST International has joined with strong local and national industrial groups to pursue this first private sector opportunity in the new environment of Mexican telecommunications," said O'Ryan.

"The opening of the A Band cellular concessions in Mexico is the largest cellular opportunity in the developing world and represents a strategically important opportunity for U S WEST in the context of our worldwide cellular interests," she added. "This will become a strong base for other Latin American developments in the telecommunications area.

Joining U S WEST International as partners in the four bids are two Mexican companies, Grupo Olmeca and Grupo Ica.

U S WEST Inc. is a $23 billion diversified company headquartered in Englewood. Its major subsidiary, U S WEST Communications, serves the communications needs of 10 million customers in 14 states of the western United States. Besides U S WEST International, which markets the company's services in the international marketplace, U S WEST also owns companies involved in cellular communications and paging, directory publishing and marketing services, cable television, business telecommunications products and services, data solutions, commercial real estate and financial services.

Internationally, U S WEST is a partner in the following projects: eight cable television franchises in the United Kingdom; Lyonnaise Communications, a major French cable communications company; the Hong Kong cable television franchise and non-franchise telecommunications services; the Hungarian national cellular communications system; Unitel, a United Kingdom firm developing Personal Communications Networks (PCN); and the Trans-Soviet Line Project, under negotiation to construct a fiber-optic cable across the Soviet Union. The company also has submitted bids to operate cellular communications systems in four regions of Mexico.

#90032p0319 02/01/1990 ~PR Newswire

TORONTO (FEB. 1) PR NEWSWIRE - Arendscor (Canada) Inc., headquartered in

Toronto, announced today the completion of an agreement to purchase a majority interest (50.1 percent) of common shares of National Enterprises, Inc. (NYSE: NEI) of Lafayette, Ind. Arendscor paid US$2 million in cash and also provides N.E.I. with the availability of a US$5 million credit facility.

The board of directors of N.E.I. has elected John B. Overzet chairman of the board; Garry W. Culverson interim president, and David R. Price vice chairman.

The new deal provides N.E.I. with the funds necessary to complete its repositioning strategy designed to return the company to profitability.

As a part of its repositioning strategy, the acquisition of Homecraft's business and production facilities in South Hill is critical. N.E.I. will now close down its current manufacturing operations in Martinsville and transfer those operations to the South Hill facility. That facility will be reorganized to take advantage of N.E.I.'s advanced manufacturing and materials handling systems. These actions are expected to expand N.E.I.'s sales base, lower its labor and materials costs, and gain manufacturing efficiencies. The purchase price for the South Hill facility consisted of the assumption of certain liabilities of Homecraft, not to exceed the fair value of the assets acquired plus $75O,000.

A recognized leader in its field, N.E.I. (formerly National Homes Corporation) is entering its 50th year of manufacturing panelized building systems. Acknowledged as an industry innovator through the years, N.E.I. has manufactured a pacesetting record of over 650,000 living units and is traded on the New York Stock Exchange. N.E.I. said that, given its core business, it is the right company with the right product for the '90s and beyond.

Arendscor is a dynamic Canadian real-estate based investment and management company actively pursuing business opportunities in North America and worldwide. The company manages assets and investments in a broad scope of areas. Its direct and management interests include land acquisition and real estate development/construction and manufacturing and retail operations.

#90032p0320 02/01/1990 ~PR Newswire

NEWTOWN, PA. (FEB. 1) PR NEWSWIRE - SPS Technologies (NYSE: ST) today reported 1989 net earnings of $18,090,000 or $3.62 per share, up 51 percent from the previous year's net earnings of $11,975,000 or $2.42 per share, which included losses related to the materials handling segment

discontinued in 1988.

On the basis of continuing operations, 1989 earnings were down 5 percent from $18,980,000 or $3.84 per share reported in 1988.

Net sales for 1989 were $423,190,000, a 1 percent decrease from the 1988 level of $427,327,000.

The company also announced that it had reached an agreement in principle to acquire a leading Spanish manufacturer of industrial fasteners.

Net earnings for the fourth quarter were $3,376,000 or $.67 per share, compared to net earnings of $5,041,000 or $1.02 per share in 1988. Earnings before extraordinary item in the fourth quarter of 1988 were $4,807,000 or $.97 per share.

Net sales for the fourth quarter of 1989 were $99,778,000 compared to $109,292,000 for 1988.

Incoming orders of $458.2 million in 1989 increased by 4 percent over the previous year. Backlog at Dec. 31, 1989, was $138.1 million, up 17 percent from 1988.

Essentially flat sales for the year reflect the effects of a weak U.S. automotive market, depressed fourth quarter shipments of aerospace fasteners, and the sale of the Unbrako Steel Co. Ltd. subsidiary in April 1989.

Sales of UNBRAK0(R) socket screw products were substantially higher as a result of increased production activity in the worldwide machine tool and industrial machinery markets. Record sales of computer- controlled tightening equipment resulted from the Assembly Systems Division's expanded domestic marketing efforts as a full-service supplier of fastening systems and automobile assembly stations. Sales of superalloys and magnetic materials also increased in 1989.

Earnings for the year and the fourth quarter were adversely affected by lower margins on sales of aerospace fasteners that resulted from highly competitive pricing and abnormally high costs related to the start of full-scale production at the new Salt Lake City plant. In addition, the company's heightened emphasis on product quality, and testing and certification procedures, reduced operating efficiencies and shipment levels at certain aerospace production facilities.

According to Chairman and Chief Executive Officer John R. Selby, "Adverse conditions in several of our markets, coupled with the Salt Lake City full-scale production start-up costs and the adjustments we are making to assure that our aerospace product quality remains the highest in the

industry, have resulted in 1989 performance that was lower than expected.

"However, we are confident that the actions we have already taken to improve pricing and reduce costs will benefit earnings in 1990."

In announcing the agreement in principle to acquire a manufacturer of industrial fasteners in Spain, Selby said: "This action is in keeping with our strategic objective of being a leading producer of high strength, engineered fasteners for automotive and original equipment manufacturers in Europe. We believe that it is particularly timely in view of the changes that will take place following the removal of Common Market trade barriers in 1992."

#90032p0322 02/01/1990 ~PR Newswire

HOUSTON (FEB. 1) PR NEWSWIRE - Quanex Corp. (NYSE: NX), the Houston-based metals company, announced today that its board of directors has approved approximately $60 million in cash expenditures over a 2-1/2 year construction period for an aluminum mini-mill.

The project will replace and expand existing capacity to continuously cast the aluminum sheet fabricated into the building products sold by its Nichols Homeshield (NH) subsidiary. The plant will be located in Davenport Iowa in the immediate area of NH's existing continuous casting facility, which will remain fully operational throughout construction and start-up of the new plant.

The cost of the mini-mill includes site acquisition, scrap processing and melting equipment, the Hazelett continuous caster, hot and cold rolling, annealing, coil coating and slitting facilities. Work on the plant's initial design and environmental permitting will begin this month.

Carl E. Pfeiffer, chairman of the board and chief executive officer said, "We acquired Nichols-Homeshield (NH) because of the opportunities for growth. About half of its sales are to the home-remodeling industry which has been growing rapidly. Currently the Davenport plant's continuous casters run at full capacity for 364 days a year. In spite of these high operating rates, NH still has to buy about 25 million pounds of aluminum sheet, about one-third of its 1989 requirements, from outside sources. Without this project required purchases from outside sources would continue to increase with NH's growth."

Pfeiffer continued, "A large part of the return on investment of this project is based on the scale economics and cost savings of producing all of our aluminum sheet requirements for existing customers and markets in

our Davenport plant. The material cost savings represent a relatively low-risk return which justify the project. The mini-mill uses proven technology, the Hazelett caster, to add up to 275 million pounds of capacity and remove the constraints which have limited NH's product and market expansion and this should further add to the profitability of the project."

Quanex is a technological leader in the manufacture of specialty metals including steel, aluminum and titanium products for transportation, capital equipment, home building and remodeling and energy processing markets.

CONTACT: W.F. Cleary or C.A. Meador, 713-961-4600, both of Quanex Corp.

#90032p0325 02/01/1990 ~PR Newswire

DEARBORN, MI. (FEB. 1) PR NEWSWIRE - CMS Generation Company, the independent power production unit of CMS Energy Corporation (NYSE: CMS), has elected two new officers. The announcement was made by James W. Cook, president and chief executive officer.

Thomas W. Elward has been named vice president of conversion projects, with responsibility for developing independent power projects by converting uncompleted or abandoned nuclear plants to alternate fuels and repowering obsolete conventional power plants.

Ashish D. Sarkar has been appointed vice president of project management, with responsibility for overseeing the asset management, engineering, construction, plant operation and fuel procurement activities for CMS Generation's current projects. He will also provide technical services for projects under development.

Elward, 41, had been manager of Consumers Power Company's Big Rock Point nuclear plant near Charlevoix since 1987. He earned a master of science degree in nuclear engineering from the University of Illinois in 1972 and a bachelor of science degree in chemical engineering, summa cum laude, from the University of Detroit in 1971. Elward completed the Harvard Business School program for management development in 1983.

A native of Monroe, Elward joined Consumers Power in 1972 as an associate engineer at its Palisades nuclear plant near South Haven. He held increasingly responsible supervisory and management positions at the company's nuclear facilities until 1981, when he was named director of planning and administration for the company's nuclear operations department in Jackson. He subsequently held progressively responsible nuclear operations and energy supply department management positions in Jackson before being named manager of the Big Rock facility. Elward, his wife, Joni, and their three children will relocate to the Detroit area.

Sarkar, 41, was previously manager of projects for CMS Generation since March 1989 and has been instrumental in the success of the 80-megawatt Filer City project currently nearing completion near Manistee, Mich. He joined CMS Generation in 1987, coming from its corporate affiliate, Consumers Power Company. At Consumers Power he held a progression of engineering and management positions over a nine- year period in the projects, engineering and construction department where his activities focused on cost control and project management issues. Before that, Sarkar worked as a project engineer for the Gilbert-Commonwealth design engineering firm in Jackson, Mich., since 1973.

Sarkar earned a bachelor of science degree from the Marine Engineering College of the University of Calcutta, India, and a master of science degree in mechanical engineering from the University of Michigan. He, his wife, Norma, and their two daughters live in Ann Arbor.

CMS Generation is a wholly owned unit of CMS Energy Corporation's nonutility subsidiary, CMS Enterprises.

CMS Energy Corporation is an $8.6 billion diversified energy company with businesses engaged in the distribution of electricity and natural gas, interstate storage of natural gas, oil and gas exploration and production, independent power generation and utility services. Its CMS Enterprises subsidiary is engaged in the acquisition and management of energy-related businesses and projects worldwide. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest and the nation's fourth-largest combination utility.

#90032p0326 02/01/1990 ~PR Newswire

CHALFONT, PA. (FEB. 1) PR NEWSWIRE - The Material Handling System division of FMC Corp. (NYSE: FMC) announced today its selection by News Corp. Ltd. (NYSE: NWS) to install an automated guided vehicle system (AGVS) to handle newsprint paper rolls for each of four newspaper operations in Australia.

Under this contract, FMC will design, manufacture and install AGV systems at four sites: Advertiser Newspapers Ltd. in Adelaide; Herald & Weekly Times in Melbourne; M.A.T. Publications Ltd. in Sydney and Queensland Newspapers Ltd. in Brisbane. The combined two-year project activity began in January 1990, with completion of the last site targeted for March 1992. The Adelaide site will be completed first in June 1991, followed by Melbourne, September 1991, Sydney, December 1991 and Brisbane, March 1992.

"We are delighted that News Corporation Ltd. has chosen FMC to provide the AGV system for each of these major newspapers," said Bruce Stouffer, product manager for the Automated Material Handling Systems Business of FMC's Material Handling Systems Division. "This project represents the largest-ever AGVS contract selection within the newspaper industry and the largest-ever AGVS contract awarded in Australia.

"The magnitude of this project is significant to FMC for two reasons," said Stouffer. "First we will be putting a sizable number of staff resources in place to carry out the installation and attract future business in Australia," said Stouffer. "In addition, we anticipate that the close working relationship with News Ltd. throughout each installation will promote future projects with this organization."

For each site, FMC will install the AGV equipment used to transport paper rolls from the warehouse to the stripping area. In addition, FMC will provide stripping stations as well as the roll conveyor between the strippers and the AGV pick-up point. The AGVs will move the rolls either directly to the press spurs or laydown/rack storage area where they will be stored and later transported to the printing presses. The AGVS will also handle waste and cores, including provisions for automatic waste dumpers and waste weigh scales.

The FMC AGVS will be controlled by an IBM industrial grade personal computer system with an identical hot back-up. This system will provide control of all AGV movement, including interface to the stripping and waste areas, as well as reelstand call terminals. The IBM PC will be used to track and report both roll and waste inventory.

FMC, a leading manufacturer of materials handling equipment since 1875, offers a wide range of AGVs and other fully automated material handling systems equipment for the newspaper industry. For more information about FMC's AGV systems, contact Bruce Stouffer, product manager at 215-822-4499.

RADNOR, PA (FEB. 1) PR NEWSWIRE - Sun Co. (NYSE: SUN) today named Richard W. Ince an executive vice president.

Ince will have oversight responsibility for a number of corporate activities. He will also provide corporate leadership to the safety, health and environmental function. Ince had been a Sun vice president and president of Sun Coal Co., a Knoxville, Tenn.-based subsidiary. Merle D. Wolfe, executive vice president of Sun Coal, will succeed Ince as

president.

Ince joined Sun in 1960 as a research engineer and was later involved in the company's first formal planning process. In 1976, he headed the acquisition effort resulting in the 1979 merger of Sun and Elk River Resources, the predecessor of Sun Coal Co. Ince became president of Elk River in 1983.

In 1984 Ince was named group vice president at Sun's Radnor headquarters responsible for coal operations and alternate energy programs. Following a restructuring, he returned to Knoxville as president of the newly organized Elk River in July 1986.

Ince is a chemical engineering graduate of The University of Texas at Austin, receiving a B.S. in 1960 and an M.S. in 1963. He earned an MBA from Southern Methodist University in 1972.

He is a director of the National Coal Association and serves on the executive committee. He is also a director of the American Mining Congress and a U.S. delegate, International Committee on Coal Research.

ATLANTA (FEB. 1) PR NEWSWIRE - On Tuesday, Jan. 30, Landmark American Corp. (NASDAQ: LMACE) filed for relief under Chapter 11, Title 11, in the United States Bankruptcy Court for the Northern District of Georgia, Atlanta division.

Landmark filed for a reorganization under Chapter 11 because the company was threatened with imminent foreclosure on two properties, and the company did not have the cash flow and liquidity required to make its debt service payments and meet its much-reduced overhead requirements.

Landmark expects to be a debtor-in-possession during the reorganization and further anticipates emerging from the reorganization within nine to 18 months as a much smaller organization with considerably less assets and debts. It is anticipated that the plan of reorganization will provide for payment of all creditors in full.

HOUSTON (FEB. 1) PR NEWSWIRE - Commonwealth Mortgage of America, L.P.

(NYSE: CMA) announced today that it has agreed in principle to sell the partnership's loan production operations and Federal National Mortgage Association (FNMA) mortgage servicing portfolio. CMA previously announced its intentions to sell these assets.

USAT Mortgage Services Inc., a wholly-owned subsidiary of United Savings Association of Texas FSB (USAT), has made an offer to purchase the FNMA servicing which has been accepted by CMA. The sale, subject to completion of a definitive agreement, will involve approximately $1.8 billion of CMA's $9.9 billion residential mortgage servicing portfolio. Anticipated closing date is on or before Feb. 28, 1990, with the transfer of servicing occurring on or before April 30. CMA will continue to service approximately $8.1 billion of residential mortgage loans after the sale is finalized. Countrywide Servicing Exchange assisted CMA in securing and evaluating bids for this portfolio.

In a seperate transaction, CMA has accepted an offer from Hyperion Partners L.P., on behalf of its subsidiary, USAT, to purchase the partnership's loan origination operation and other assets associated with loan production. These assets include, but are not limited to, certain data processing systems, telephone equipment, certain fixed assets, leasehold improvements as well as the assumption of certain leases of the origination network. The sale is subject to completion and execution of a more definitive agreement and will involve the loan origination operation and the assumption of both the warehouse of mortgages and its existing mortgage loan pipeline. Anticipated closing date will be 45 to 120 days from the signing of the agreement. CMA will continue its loan origination operation until the sale is finalized and the transfer is completed. Hamilton, Carter, Smith & Co. assisted CMA in securing and evaluating bids for the operation.

USAT has also expressed a desire to retain the bulk of the CMA loan production staff as this operation will serve as the cornerstone of their mortgage loan origination operation. Lewis S. Ranieri, chairman of USAT, said, "We are committed to the traditional goal of a savings bank of providing residential mortgage lending. This acquisition will go a long way toward helping us fulfill that responsibility."

Terms of the proposed sales are not being disclosed at this time. Any proceeds realized from the sale would be used to repay debt of CMA.

CMA is a publicly-traded limited partnership engaged in the origination, sale, and servicing of residential mortgage loans.

PITTSBURGH, (FEB. 1) PR NEWSWIRE - Equibank today announced that it will extend the no-fee status on its MAC automated teller machine (ATM) card and transactions past the promised 1990 date to 1992.

In making the announcement, Nicholas J. Zennario, president of Equibank, noted, "We orginally promised to charge no fees on our MAC card or transactions to 1990. We kept that promise and are now extending the commitment to 1992."

Equibank operates 89 machines throughout southwestern Pennsylvania and is a member of the Money Access Center (MAC) network. In addition, Equibank exclusively offers postage stamps through Stamp Stop(SM) at 44 of its ATMs. Stamps are priced at face value and no transaction fee is charged to consumers for the stamp purchase.

"Today's busy consumer needs the convenience of ATMs and they want to avoid additional bank fees," Zennario continued. "When banks introduced ATMs, the idea was to offer convenient, automated 24-hour banking service without the overhead of personnel costs associated with check processing and extending branch hours. This service was free then, and we think it should be free now."

Equibank is a subsidiary of Equimark Corp. (NYSE: EQK), a diversified financial services institution with $3.8 billion in assets. Equibank, with assets of $3.1 billion, operates 56 offices in southwestern Pennsylvania. Equimark stock is traded on the New York Stock Exchange under the symbol: EQK.

NEW MADRID, MO. (FEB. 1) PR NEWSWIRE - United Steelworkers of America (USW) Local 7686, representing 950 workers at Noranda Inc.'s (Toronto, Montreal Stock exchanges: NOR) aluminum smelting plant in New Madrid, will meet with company negotiators on Feb. 13 to resume bargaining on a new contract.

The negotiating session, to be held in St. Louis, was called by James LaMartina, a mediator with the Federal Mediation Service in St. Louis.

The negotiations will be the first since Local 7686 members went on strike Sept. 1, 1989, after bargaining on a new contract broke down. The members voluntarily returned to work on Dec. 5, after the company hired 600 non-union workers and threatened to replace USW members permanently with

scabs. Noranda implemented its final contract offer, which the members had voted overwhelmingly to reject.

In an effort to force Noranda to negotiate a fair contract, the USW on Jan. 5 launched a coordinated campaign involving about 8,000 USW members working at 23 Noranda facilities in the United States and Canada. During the campaign, USW members at the Noranda facilities have worn yellow armbands, signaling their support of the New Madrid members, and have joined in urging the company to return to the bargaining table.

#90032p0336 02/01/1990 ~PR Newswire

STAMFORD, CT (FEB. 1) PR NEWSWIRE - According to an announcement made today by Edmund M. Carpenter, chairman and chief executive officer of General Signal Corporation (NYSE: GSX), the company has acquired Dual-Lite the Newtown, Connecticut-based subsidiary of Insilco Corporation and the leading U.S. manufacturer of emergency lighting equipment.

Dual-Lite has manufactured emergency lighting equipment, which is used during a power failure to illuminate critical areas in commercial, industrial, and institutional buildings, for over 25 years. With Dual-Lite, General Signal's yearly revenues for building safety equipment will approach $200 million.

Terms of the cash transaction were not disclosed. Dual-Lite will continue under present management in Newtown as a separate operating division of General Signal's Farmington, Connecticut-based Edwards Company. A unit of General Signal since 1962, Edwards has for over a century designed, engineered, and manufactured fire alarm systems and signalling equipment. Edwards products can be found in buildings throughout the United States and Canada and in more than 50 foreign countries.

The acquisition of Dual-Lite is General Signal's second in less than a year aimed at advancing its already strong position in the building safety systems and equipment markets. In April 1989, the company purchased the manufacturing operations of International Mirtone, a major Canadian supplier of fire alarm equipment with sales and service offices throughout North America.

General Signal's Electrical Controls sector, with 1989 sales of $425 million, is a leading manufacturer of power conditioning equipment, fire signaling systems, electrical fittings, transformers, power distribution equipment, and electric motors for a variety of industrial, residential, and commercial markets. The sector's five operating units maintain a

strong reputation in the electrical distribution and electronic equipment industries for product quality, service, and delivery excellence. These attributes have positioned General Signal as a central and preferred source for its broad customer base.

General Signal Corporation, with 1989 sales of $1.9 billion, is a leading manufacturer of equipment and systems for the process control, electrical, semiconductor, transportation, and telecommunications industries.

#90032p0337 02/01/1990 ~PR Newswire

SEATTLE (JAN. 30) PR NEWSWIRE - Ackerley Communications Inc. (AMEX: AK) reported the company's preliminary unaudited results for both their final quarter and fiscal year ended Dec. 31. Sales for the fourth quarter ended Dec. 31 were $45.9 million, up 13 percent from $40.8 million a year earlier. Sales for the fiscal year ended Dec. 31 reached $168.6 million, up 10 percent from $153.5 million for the prior year.

Adjusted operating profit (defined as net revenue less operating expenses plus other income before depreciation, amortization and interest) -- the "cash flow" by which the company measures its performance -- remained at $8.7 million for the fourth quarter and reached $33.1 million for the year up 5 percent from $31.6 million for the previous year. The year-to-date figures reflect the January acquisition of radio station WBOS-FM, Boston. Without the acquisition, the year-to-date adjusted operating income would have risen 11 percent.

The company showed a net loss applicable to common shares of $2.9 million, or 19 cents per share, for the quarter ended Dec. 31, compared to a gain of $0.1 million, or one cent per share, for the comparable quarter. For the year, the company lost $7.4 million, or 48 cents per share, compared to the year earlier loss of $2.5 million, or 16 cents per share. In 1989, the company had major acquisitions in both the broadcasting and out-of-home segments. These acquisitions increased the non-cash expenses of depreciation and amortization, as well as interest due to borrowings associated with these same acquisitions, both of which together more than offset the gain in adjusted operating income.

Ackerley Communications is a national multimedia advertising business, with interests in outdoor and airport advertising, broadcasting and professional sports, notably the Seattle SuperSonics.

#90032p0343 02/01/1990 ~PR Newswire

EDISON, N.J. (FEB. 1) PR NEWSWIRE - Engelhard Corporation (NYSE: EC) today announced a major plan that would streamline the company's businesses, reduce its ongoing operating costs, and improve prospects for increasing shareholder value.

The company said that it has taken a $160.4 million after-tax charge against 1989 fourth-quarter earnings to cover the actions. This non-recurring charge consists of $110 million related to the exiting of businesses and $50.4 million to restructure ongoing operations. At the same time, Engelhard's board of directors approved a 21 percent increase in the company's regular first-quarter common stock dividend.

In addition to its plan to exit certain businesses, Englehard will restructure its ongoing operations. As a result of this restructuring, the company anticipates it will eliminate approximately 500 salaried jobs worldwide, consolidate some operations and close others. "These actions will have a positive impact on future earnings and cash flow, as well as create an organization able to more effectively and efficiently respond to rapidly changing market and customer needs," said Smith. The company believes it can complete a large part of its restructuring plan during 1990.

For the fourth quarter ended Dec. 31, 1989, Engelhard posted net earnings, excluding the special charge, of $14.5 million, or 32 cents per share, compared to $19.3 million, or 43 cents per share, for the same period last year. Including the $160.4 million non-recurring special charge, the company recorded a net loss of $145.9 million, or $3.26 a share, for the 1989 quarter.

Full-year net earnings, excluding all non-recurring items, were $61.4 million, or $1.37 per share, in 1989, compared to $60.0 million, or $1.34 per share, in 1988. Including the non-recurring charge for exiting businesses and restructuring as well as $21.5 million, or 48 cents per share, from the public sale of a portion of the company's Japanese joint venture, Engelhard recorded a 1989 net loss of $77.5 million, or $1.72 per share. Total reported earnings in 1988 were $63.7 million, or $1.42 per share, which included the benefit from a petroleum refining contract settlement.

Net sales for the fourth quarter of 1989 were $626.3 million, compared to $695.1 million a year ago. The decline was due primarily to lower prices for precious metal raw materials. Full-year net sales were $2.40 billion compared to $2.35 billion in 1988.

Excluding charges associated with the exiting of businesses and

restructuring, operating results were mixed in the fourth quarter. Improved profits from Engelhard's chemical catalysts, pigments and additives and precious metals management businesses were more than offset by lower profits from the company's petroleum and environmental catalysts and engineered materials businesses.

Engelhard Corporation is a world-leading provider of specialty chemical products, engineered materials and precious metal management services.

#90032p0344 02/01/1990 ~PR Newswire

NEW YORK (FEB. 1) PR NEWSWIRE - McGraw-Hill, Inc. (NYSE: MHP) today reported 1989 earnings of $47,791,000, or 98 cents per share, after previously announced unusual charges (after tax) of $152,000,000. Revenue for 1989 increased 6.9 percent to $1,788,963,000. In 1988, McGraw-Hill earned $185,505,000, or $3.83 per share.

The unusual charges were taken in the fourth quarter of 1989 to provide for the realignment of operating units and writedowns associated with Data Resources and other non-performing assets, the shutdown of General Books, reserves for severance payments associated with staff reductions of more than 1,000 full-time positions and other items.

These charges resulted in a net loss of $98,265,000, or $2.01 per share in the fourth quarter. Revenue for the fourth quarter increased by 8.2 percent to $518,019,000. In the fourth quarter of 1988, McGraw-Hill reported net income of $54,970,000, or $1.13 per share.

Earnings for 1989 of 98 cents per share include non-repetitive gains of 54 cents from the sale of certain properties and 33 cents from the formation of the Macmillan/McGraw-Hill joint venture, as well as 16 cents from the change in accounting for income taxes. These gains partially offset a loss of $3.12 for the unusual charges in the fourth quarter. Earnings in 1988 of $3.83 per share included 38 cents of non-repetitive gains on the sale of certain operations.

Operating results for 1988 and the first half of 1989 have been restated to reflect the formation of the joint venture school publishing company with Macmillan on July 1, 1989. For this period, revenue from the McGraw-Hill units now in the joint venture company has been eliminated. Operating profits of these businesses are now shown separately.

McGraw-Hill is also providing new, more detailed segment results. A report on the operating revenue and profit of four segments replaces segment data on three line companies, which were eliminated in 1989 when McGraw-Hill

streamlined operations. The new segments are: (1) Information and Publication Services; (2) Educational and Professional Publishing; (3) Financial Services and (4) Broadcasting.

OKLAHOMA CITY (FEB. 1) PR NEWSWIRE - Hadson Corp. (NYSE: HAD) announced today that its 50 percent owned subsidiary, Hadson Energy Resources Corp. (NASDAQ: HERC), has commenced an initial public offering of 3,000,000 shares of its common stock at a price of $13.00 per share in concurrent international and domestic offerings. Of the shares being sold, 420,000 are being sold by Hadson Corp. and 2,580,000 shares are being sold by HERC. Following consummation of the offerings, Hadson Corp. and the public will each own 3,000,000 shares, or 50.0 percent of HERC's outstanding common stock.

Stephen W. Houghton, president and chief executive of Hadson, stated that, "Approximately $62,133,000 in debt previously attributable to HERC will no longer be consolidated in the financial statements of Hadson. This debt consists of $8,383,000 of the 9-3/8 percent petroleum price- Based Notes, $31,750,000 in the long-term debt relating to Hadson Petroleum International p.l.c. and $22,000,000 in the long-term debt relating to Hadson Petroleum (USA), Inc. The proceeds from the sale of the 420,000 shares will be used to repay inter-company debt owed to HERC. The successful completion of this offering is the first step in our debt reduction plan. Also, the retained 50 percent interest in HERC provides Hadson shareholders the opportunity to share in the future growth of this well-capitalized oil and gas company."

Hadson Corp. is an independent producer and supplier of energy products and a defense technology firm as well as an electric power services firm. Hadson has operations in natural gas and gas liquids; the development, construction, operation and ownership of electric power generation facilities; international oil and gas exploration; and defense and space technologies.

IRVINE, CA (FEB. 1) PR NEWSWIRE - Aerotest Inc., which in July 1989 announced its entry into maintaining, updating and modernizing commercial jet air transports, today named three experienced managers to positions of vice president.

The move, announced jointly by Aerotest Chairman Bob Laidlaw and the firm's President Iain Glendinning, was prompted by the rapid expansion of the company's operations at Mojave, Calif., both officials said.

In the past, Aerotest's employment has risen to over 500. The company projects that 1990 year-end employment will exceed 1,000, with over 750 at Mojave.

Named as vice president of administration was Jonathan Bromberg, who joined Aerotest in February 1988 after 15 years with Tracor Flight Systems and 13 years with the U.S. Navy. Bromberg also serves as corporate secretary, in addition to his responsibility for coordinating risk management, personnel, facility and administration activities for all Aerotest companies. He is based at Aerotest's corporate office in Irvine.

Richard Horn has been named vice president of transport maintenance at the firm's Mojave facility. Horn worked with United Airlines for 35 years, before joining Aerotest a year ago to implement Aerotest's entrance into transport aircraft maintenance.

Horn is in charge of the planning and execution of aircraft maintenance at Mojave, including overseeing all hangar and shop personnel. Since he joined Aerotest, company transport maintenance activities have grown from inception to a current level over 300 persons. Laidlaw said the firm anticipated adding at least 450 more employees at Mojave by the end of 1990.

Ron Neal is the newest member of Aerotest's management team, joining the company at Mojave as vice president of development. In this role, he has assumed all responsibilities for Aerotest's certification, development, and flight test activities. Neal will also oversee all support functions at Mojave, including material, engineering, program developement, personnel, facilities, accounting and adminstration.

Neal served most recently as president of Broman Aircraft in Puerto Rico. Prior to that, he had been division manager for aircraft design at Beech Aircraft; senior vice president of operations for Learjet; and vice president for the Challenger program at Canadair. He has also worked at Lockheed in Marietta, Ga.

Aerotest is a privately held aviation services company based in Irvine with operations at the Van Nuys and Mojave Airports.

CHICAGO (FEB. 1) PR NEWSWIRE - Centel Corporation (NYSE: CNT) announced today that it has reached an agreement to sell approximately $30 million of Centel Credit Company's $70 million telecommunications equipment portfolio to Rosemont, Ill.-based Comdisco Inc. Centel Credit Company provides equipment financing to customers of Centel Communications Systems.

Centel announced in May 1988 its intention to sell its business systems operations, which include Centel Communications Systems, Centel Information Systems and Centel Federal Systems. Results from these units, and Centel Credit Company, have been reported as discontinued operations since that announcement.

Chicago-based Centel Corporation, which had 1989 revenues of $1.19 billion provides local exchange telephone service in nine states through nearly 1.6 million access lines; operates cellular communications franchises in

44 markets, and supplies electric power to nearly 136,000 customers in two states.

#90032p0355 02/01/1990 ~PR Newswire

PHILADELPHIA (FEB. 1) PR NEWSWIRE - SmithKline Beecham (NYSE: SBH) announced today that it is rolling back to 1988 levels its price to wholesalers of "Dyazide," the potassium sparing diuretic for the treatment of high blood pressure.

The 11 percent reduction is effective Feb. 3 and could reduce by one third the price difference to the patient between "Dyazide" and its generic versions.

"On October 6, 1989, we announced that we would freeze the 'Dyazide' price to wholesalers pending the outcome of unfolding events related to generic competition," said Frederick Kyle, president SmithKline Beecham Pharmaceutical-U.S.

"On Tuesday, January 30, 1990, Bolar Pharmaceutical Company advised the Food and Drug Administration that it had ceased production and distribution of its generic version of 'Dyazide,' and has begun a voluntary recall of the product.

"Bolar said that these actions have been taken in light of serious questions concerning the accuracy and reliability of the documentation supporting the approval of the Abbreviated New Drug Application."

"We believe that the recent events represent a significant change in the marketplace, and we are cognizant of the role 'Dyazide,' with its 25 year record of safety and efficacy in millions of patients, continues to play as the lowest-priced major antihypertensive medicine."

It is estimated that this reduction will bring the average daily cost for a patient to approximately 32 cents. In comparison to "Dyazide," the average patient taking a beta blocker for high blood pressure pays $ .66 a day; a patient taking an ACE inhibitor pays $.75-$1 a day; and a patient on a calcium channel blocker pays $.90-$1.50 a day. This means that "Dyazide" therapy is approximately one-half to one-fourth the cost of other leading therapies.

"Nevertheless, we recognize that for some patients the unavailability of a generic version will represent an increase in their health care expenditures. To help minimize the impact, we are decreasing the price of 'Dyazide'."

Kyle noted that over the past few months SmithKline Beecham has had discussions with U.S. Rep. John Dingell and his senior staff about an appropriate response should the continuing problems of generic companies lead to the removal of all generic copies of "Dyazide."

"That has now happened, and we are lowering our price in recognition of that fact." Kyle added, "as a public company, we have a responsibility to our shareholders and employees as well as to patients."

#90032p0356 02/01/1990 ~PR Newswire

PLEASANTVILLE, NJ (FEB. 1) PR NEWSWIRE - J.G. Salomone, chief financial officer of Atlantic Energy Inc. (NYSE: ATE) today announced consolidated financial results for 1989.

Atlantic Energy is the parent company of Atlantic City Electric Co. (ACE), its primary subsidiary, and Atlantic Generation Inc., Atlantic Southern Properties Inc. and ATE Investment Inc.

Total consolidated operating revenues for 1989 increased to $705 million from $675.9 million for 1988. Net income for 1989 totaled $81 million compared with $72.2 million for 1988. Earnings per share for 1989 amounted to $3.74, compared with $3.68 per share for 1988, with approximately 10.4 percent more average shares outstanding in 1989. Salomone said the change in earnings per share reflects the effects of higher net income, resulting primarily from the higher sales of energy by ACE. The effects of increased kilowatt-hour sales were partially offset by higher operating expenses and higher preferred stock dividend requirements of ACE. Earnings per share in 1989 were also impacted by the increased average number of shares of common stock outstanding at the parent company.

Total consolidated operating revenues for the fourth quarter ended Dec. 31 1989, increased to $174 million from $162.4 million for the fourth quarter of 1988. Salomone noted that the primary factor contributing to the increase in 1989 fourth quarter revenues were higher kilowatt-hour sales. Net income for the fourth quarter of 1989 totaled $13.2 million, compared to $9.9 million for the fourth quarter of 1988. Earnings per share for the fourth quarter of 1989 amounted to $.58, compared with earnings per share of $.49 reported in the fourth quarter of 1988, as a result of the increased energy consumption recorded by ACE.

ATLANTA (FEB. 1) PR NEWSWIRE - Equifax Inc. and U.K.-based Next PLC

announced today a joint venture to provide a wide range of information services throughout the United Kingdom.

The partnership establishes Equifax and Next as a major force in the international consumer information services industry.

The transaction was completed on Jan. 31, for an undisclosed amount of cash.

Under the terms of the agreement, Equifax and Next will be equal partners in a new company, Wescot Decision Systems. J.E. Dawson, senior vice president of Equifax, has assumed reponsibility as managing director of WDS. WDS will provide consumer credit reporting, credit scoring and modeling, and marketing and insurance information services in the United Kingdom.

Commenting on the European initiative, C.B. (Jack) Rogers Jr., president and chief executive officer of Equifax and chairman of the board of the newly formed Wescot Decision Systems, said, "I believe the combined strengths of Equifax and Next provide a solid basis for Wescot Decision Systems to be a leader in the consumer credit, marketing and insurance information industry."

Rogers added: "As part of our international strategic plan, this venture not only enhances our ability to serve our customers in North America and the United Kingdom but also positions us well for further expansion in the European market."

David Jones, chief executive officer of Next PLC, said: "The opportunities to develop the database marketing operation of Next will be greatly enhanced as a result of this partnership. The added marketing expertise from Equifax will enable this area of our business to show substantial growth through the 1990s."

Wescot Decision Systems has a current database of 25 million households representing 44 million consumers. It will market in the United Kingdom a range of information services and products similar to those provided by Equifax in North America.

Now in its 91st year, Equifax is the leading provider of information for consumer financial transactions. Equifax provides information services and automated systems that help its customers evaluate risk as well as market products and services. Equifax's revenues for the year ended Dec. 31, 1989 were $840 million.

Next PLC is a diversified retail group whose core activities include retailing, home shopping and financial services throughout the United Kingdom. Next had revenues for the year ending Jan. 31, 1989, of $1.9

billion.

#90032p0363 02/01/1990 ~PR Newswire

WARREN, NJ (FEB. 1) PR NEWSWIRE - Celgene Corporation (NASDAQ: CELG) today announced that they and ENSR Corporation (AMEX: ENX) have agreed to restructure their business relationship in the biological treatment of hazardous waste.

Louis Fernandez, president and CEO of Celgene, commented, "The biological treatment of hazardous waste is a rapidly growing industry. Celgene has had a specific interest in two areas, site and process stream clean-up. The primary focus of the joint venture corporation, ENSR-Celgene, Inc., formed last year with ENSR, was to clean hazardous waste sites, including superfund sites. We have mutually determined that today's marketplace for this type of work has been slower to mature than expected. Therefore, our joint venture should be terminated and our relationship restructured.

"Celgene is optimistic about its technological capabilities and, in particular, the opportunities in the biological treatment of hazardous waste from process streams of industrial plants. Separately, we will continue to seek agreements with major chemical and pharmaceutical companies to treat waste at their facilities before it is emitted into the environment," concluded Dr. Fernandez.

Robert Zoch, chairman of ENSR, stated, "Establishing a new cooperative agreement with Celgene will allow us to carry out certain technology programs together. ENSR will continue its involvement in the bioremediation industry separately through its existing divisions."

Celgene Corporation, based in Warren, N.J., is a chemical biotechnology company engaged in the development of fine and specialty chemicals, and the degradation of hazardous chemical wastes.

ENSR is a national, full-service, environmental services company with more than 20 years of experience in the hazardous waste industry. The Houston-based company performs a complete range of consulting, engineering environmental health, applied technology, remedial operations and remedial construction services.

PITTSBURGH (FEB. 1) PR NEWSWIRE - Rodney Eckerman, executive vice president, PACE Entertainment Group Inc., announced staff appointments and a service agreement with the Civic Arena Corp. (CAC) for Star Lake Amphitheatre in Hanover Township, Washington County, Pa., today.

Staff appointments include Thomas J. Rooney, executive director; G. Wilson Rogers, general manager; and Robert Klaus, director of marketing.

Beginning Feb. 15, Rooney will assume his position as executive director of Star Lake with responsibility for the overall operations of the facility. Prior to joining PACE at Star Lake, Rooney served as arena director and vice president of marketing for the Civic Arena Corp., Pittsburgh.

Coming from Fayetteville, N.C., Rogers begins his duties as Star Lake's general manager on Feb. 15. He will be responsible for the staffing and operations of the facility including all services, cleaning, maintenance and event operations. Rogers most recently served as director of the Cumberland County Civic Center in Fayetteville, N.C.

Klaus joins PACE Entertainment Group from its sister organization, PACE Theatrical Group. He served there as marketing director, Eastern U.S. Region, where he was responsible for activities surrounding the Broadway Series in eight cities, including Pittsburgh. As marketing director of Star Lake, Klaus will direct all the marketing and promotional activities for the amphitheatre events as well as for the facility as a whole. He assumes his position on Feb. 1.

In addition, Eckerman said that PACE has reached an agreement and is finalizing a contract with the Civic Arena Corp. to provide concession, merchandise and parking services for Star Lake.

And finally, Eckerman said CAC will provide merchandise services, including all staffing, vendors and products.

FLINT, MI (FEB. 1) PR NEWSWIRE - Buick Motor Division has announced a new 6.9 percent special GMAC finance rate on loan contracts of between 25 and 48 months for most 1990 models, effective Feb. 3 through May 2, 1990.

In addition, consumer rebates ranging from $500 to $1,250 (available in

lieu of special rates on most 1990 Buicks) have been extended through May 2. Those on certain Electra/Park Avenue models (excluding Park Avenue Ultra) are increased to bring them into line with other eligible models.

The 4.8 percent finance rate previously offered on Regal expires Feb. 2, while the $600 "Downpayment Assistance" incentive for first-time buyers choosing a Buick Skylark, Century or Regal remains available (in addition to other incentives) through the end of the 1990 model year.

Buick's specific incentive amounts are as follows:

Length of GMAC Contract	New Interest Rate (Feb. 3-May 2, 1990)	Previous Rate
1-24 months	6.9 pct.	6.9 pct.
25-36 months	6.9 pct.	8.9 pct.
37-48 months	6.9 pct.	9.9 pct.
49-60 months	10.9 pct.	10.9 pct.

Rebates by Option Package (Feb. 3-May 2, 1990)

1990 Buick Model	SA	SB	SC	SD/SM	SE/SF
Skylark	$500	$500	$750	$1,000	$1,250
Century	$500	$500	$750	$1,000	$1,250
Regal	$500	$500	$750	$1,000	$1,250
LeSabre	$500	$500	$750	$1,000	$1,250
Electra/Park Avenue (except Ultra)	$500	$500	$750	$1,000	n/a

(Note: The previous Electra/Park Avenue amounts were: option package SA -- $200; SB -- $400; SC -- $600; SD -- $1,000.)

SHELTON, CT (FEB. 1) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) said today that its previously announced exchange offer for the company's 8.25 percent convertible subordinated debentures due 2002 will be extended from 5 p.m. today until 5 p.m., Friday, Feb. 9, 1990.

The company also said that $4,032,000 of the outstanding debentures had been tendered as of the close of business yesterday.

Rudolph G. Morin, executive vice president, stated that the company has been in contact with certain debenture-holders and that those conversations were continuing.

"The exchange offer has received a mixed reaction from debenture-holders. Some intend to tender, and others have expressed an interest in tendering subject to some modification of terms. The company will be considering options to enhance the offer during the extension period."

Under terms of the original offer, for each $1,000 face amount of existing 8.25 percent debentures exchanged, a holder will receive a new $700 face amount subordinated debenture, with a 15 percent annual interest coupon, plus 40 five-year warrants to purchase Data Switch common stock at $6.25 per share.

The existing debentures are convertible at $7.92 per share, and there are approximately $33 million face amount of them currently outstanding. The minimum percentage response required for the exchange offer to be consummated has been reduced to more than 50 percent from 80 percent of the total debentures outstanding.

#90032p0378 02/01/1990 ~PR Newswire

NEW YORK (FEB. 1) PR NEWSWIRE - John J. Phelan, Jr., announced today that he plans to retire from his post as chairman and chief executive officer of the New York Stock Exchange at the end of 1990.

Phelan, who has been associated with the NYSE and the securities industry for 35 years, told the NYSE board of directors of his decision this afternoon at its February meeting.

The board regretfully accepted his decision, and appointed a committee to

explore all the questions which would arise from Phelan's retirement. The committee is expected to complete its deliberations and make recommendations to the board this fall.

Phelan said he would begin to explore other opportunities, but emphasized that he will remain an active chairman and CEO during the year, and will work to assure the smooth transition to a new NYSE management team.

Phelan was elected chairman and CEO in May 1984. He had been president and chief operating officer of the NYSE since 1980, and vice chairman of the NYSE board from 1975-1980. He served on the NYSE board of directors from 1974-1980, having previously served on the board of governors from 1971-1972.

During his tenure as chairman and CEO, Phelan has focused on building relationships with the international business community; strengthening the NYSE marketplace and reinforcing confidence in America's capital markets; reaching out to the broad arena of NYSE constituents; and establishing the NYSE as a business-oriented corporation run by a highly skilled professional management team.

Under Phelan's leadership, the NYSE has developed the communications, data processing and trading support systems that today constitute one of the most extensive and advanced privately owned computer complexes in the world.

His goal has been to enhance markets through technology by reducing costs and speeding communications without eliminating the important human element that makes decisions and takes risks in the marketplace.

While technology has greatly enhanced the NYSE's ability to electronically monitor and regulate trading, Phelan's efforts have also been aimed at reinforcing the regulatory partnership between the member firms, the first line of defense in the regulatory process, and the Securities and Exchange Commission and Congress.

#90032p0379 02/01/1990 ~PR Newswire

INDIANA, PA (FEB. 1) PR NEWSWIRE - National Mine Service Co. (NYSE: NMS) announced results for the third quarter of fiscal 1990 ended Dec. 30, 1989.

The company is pleased to report its 10th consecutive profitable quarter. Sales were up 6 percent as compared to the prior year third quarter, while net income was comparable to the prior period.

Sales for the third quarter ended December 1989 were $16,595,000 resulting in a net income of $942,000, or 19 cents per share. This compares to sales of $15,617,000 and net income of $937,000, or 19 cents per share, for the same period last year.

Increased sales in the third quarter were attributable to the Mine Supplies/Health and Safety Products business segment. Third quarter sales in the Hydraulic Services business segment were lower than the comparable period of the prior year, largely due to shipment of an unusually high level of longwall shield rebuild orders in the prior year period.

The current year third quarter earnings benefitted from the higher sales volume, lower interest expense resulting from the total accelerated repayment of the company's principal long-term debt obligation at the end of fiscal 1989, and a non-recurring foreign income tax benefit of $192,000.

Offsetting these favorable items were a shift in the mix to lower margin sales and higher operating expenses, primarily, increased bad debt expense due to a customer bankruptcy ($143,000), higher employee compensation and benefit costs, and certain other volume related and inflationary cost increases. The operating expense increase was magnified by the prior year third quarter including a favorable non-recurring employee benefit adjustment of $61,000.

For the first nine months of fiscal 1990, sales and net income were up 8 percent and 29 percent, respectively, over the comparable period of the prior year.

Sales for the first nine months were $48,043,000 resulting in a net income of $2,818,000, or 58 cents per share. This compares to sales of $44,415,000 and net income of $2,176,000, or 45 cents per share, for the same period last year, which included an unusual credit of $348,000, or 7 cents per share, related to an adjustment to an inventory valuation reserve previously established.

The higher earnings in the current year first nine months is attributable to the 8 percent increase in sales, lower interest expense due to accelerated repayment of all long-term debt, and lower foreign income taxes. Partially offsetting these favorable items were higher operating expenses for the same reasons as the second quarter.

LOWELL, MA (FEB. 1) PR NEWSWIRE - COMFED BANCORP, INC. (AMEX: CFK)

announced today the appointment of Jack C. Zoeller to the position of president and chief operating officer of COMFED Savings Bank. Zoeller also serves as a director and executive vice president of COMFED BANCORP, as well as president of COMFED Mortgage Company and its subsidiaries.

In his new role, Zoeller will oversee all company operations, which include retail banking, mortgage lending, treasury and secondary market activities. For the past 18 months, Zoeller has been responsible for the restructuring and re-orienting of COMFED's residential mortgage business and asset liability strategy. Jack Zoeller is a recognized expert in Wall Street financings, and is considered a pioneer in the securitization of loans and the hedging of interest rate risk.

Prior to joining COMFED in 1987 as executive vice president of the Mortgage Company, Zoeller was president of the New Jersey-based Capital Risk Management Corporation, a private investment firm specializing in savings and loan mergers and financings. Zoeller's firm was the first in the country to assist a healthy savings and loan in an interstate merger with a commercial bank, and also the first to securitize real estate investor notes. From 1980 to 1985, Zoeller was an investment banker and held the position of president and chief executive officer of E.F. Hutton Indemnity, a highly profitable subsidiary within the E.F. Hutton Group. Zoeller was recognized as a leading Wall Street innovator of financial guarantee insurance and interest rate protection for municipal borrowers.

Zoeller graduated first in his class from the United States Military Academy at West Point in 1970, and received a master's degree in public policy from the John F. Kennedy School of Government at Harvard University. Also selected as Rhodes Scholar, Zoeller earned a master's degree in politics from Oxford University in England. Zoeller served 10 years in the U.S. Army, including assignments in the 82nd Airborne Division and the Army Chief of Staff's office in the Pentagon.

COMFED Bancorp, Inc. is a $1.5 billion asset holding company headquartered in Lowell, Mass. Through its principal operating divisions: COMFED Savings Bank and COMFED Mortgage Company, the bank engages in residential mortgage lending, loan servicing and retail banking. COMFED Mortgage Company maintains a network of 16 offices in five Northeastern states. COMFED Savings Bank operates 30 retail banking offices in Massachusetts and Connecticut. The bank's loan servicing portfolio currently ranks in the top 20 among Thrifts nationwide.

NEW YORK (FEB. 1) PR NEWSWIRE - B+H Bulk Carriers Ltd. (NASDAQ: BULKF)

announced today the declaration of a dividend of 40 cents per share payable on Feb. 28, 1990, to shareholders of record on Feb. 14.

This dividend represents 70 percent of the company's projected fourth quarter available cash flow with the remaining 30 percent payable to B+H Management Ltd. as an incentive management fee.

After giving effect to this dividend, and with the distribution of an additional 40 cents per share to shareholders, shareholders will have received a return of the $10 initial share price plus an 11 percent cumulative preferred return, plus an additional 6 percent cumulative return. At that point, the incentive management fee increases to 50 percent of available cash flow from operations and vessel sales.

The board is also reviewing ways in which to maximize shareholder value. Included in this review is the possibility that shareholders might be asked to consider a change in the company's policy to allow further investments in shipping as contrasted with the company's self- liquidating nature at present.

As part of this review, the board has asked the company's management whether it would invest its incentive management fee back into the company.

The company operates seven handy-size dry bulkcarriers ranging in size from 15,000 to 27,000 deadweight tons. All the company's vessels, which are chartered to the Commodity Ocean Transport Corporation Pool (COTCO), an operating pool affiliated with the company's management, transport dry cargoes, typically sugar, salt, fertilizer, coal, phosphates, grain, iron ore and steel products throughout the world.

#90032p0387 02/01/1990 ~PR Newswire

LOS ANGELES (FEB. 1) PR NEWSWIRE - Associated Financial Corp. (AFC), one of the largest providers of low-income housing in the nation, claimed today that the Department of Housing and Urban Development (HUD) is denying them due process of law. HUD issued a suspension Friday, Jan. 26 which had the effect of cancelling a scheduled hearing over a dispute betweeen an AFC affiliate and the Department scheduled for Tuesday, Jan. 30. AFC believes that its affiliate would have prevailed if the hearing had taken place.

The action limits AFC's and its affiliate's future ability to acquire and operate new low-income housing, although HUD's action has no immediate affect on the company's day-to-day operations of their more than 350

properties involving approximately 45,000 residential apartment units. However, the HUD action, which was specifically directed at AFC's affiliate, Housing Resources Management, does portend protracted litigation between the company and HUD.

A. Bruce Rozet, chairman and chief executive officer of AFC, said, "HUD seems to be intent on denying due process of law by employing a phalanx of unnecessary rules and regulations and inappropriate allegations. HUD's unwarranted action will further delay the process of rehabilitation and renovation of low-income housing units and, as a result, will harm the residents of those units."

Rozet said, "We have submitted written proof to HUD, in response to its request, which indicates that AFC and its affiliates have continuously upheld their obligations under HUD regulations. We believe that HUD knows these charges are invalid and that the Department subsequently took this action at the last minute to delay a fair hearing. We are prepared and expect to successfully defend our company against all allegations. We feel that we are being unfairly harassed and penalized.

"While our present business is unaffected by this latest HUD action which appears punitive in nature, it does hamper our future efforts to provide reasonable and cost-effective solutions to this nation's growing housing problem. Instead of offering cooperation and encouragement which can lead to success stories such as our Glenarden complex near the nation's capitol, HUD is creating an ever-increasing maze of regulations. I think Congressman Yates put it quite succinctly on the floor of the House just last week when he referred to the Department as 'Fortress HUD.' The Congressman said, "It's (HUD's) outer walls are an ever thickening construction of regulations, including some which are Catch 22s."

Rozet was referring to criticism leveled by Congressman Yates (D-Illinois) at HUD over extended regulatory delays in approving funding of a major low-income development (not involving AFC or affiliates) in Chicago.

Associated Financial Corporation is a full service, vertically integrated real estate organization dedicated to private sector investment in government assisted, affordable housing which is low income in character.

VALLEY FORGE, PA (FEB. 1) PR NEWSWIRE - UGI Corp. (NYSE: UGI) reported today that its AmeriGas subsidiary has completed the sales of its two remaining industrial gases assets.

AmeriGas sold its carbon dioxide plant in Bayport, Texas, to MG Industries Valley Forge, and its air separation plant in Vacaville, Calif., to Liquid Carbonic Industrial/Medical Corp., Chicago. Terms were not disclosed.

However, James A. Sutton, UGI's chairman and chief executive officer, disclosed that AmeriGas received $195 million from the divestiture which involved seven transactions since June 1989.

After-tax proceeds of $133 million consisted of $118 million in cash and the balance in the buyers' assumption of debt.

As reported, UGI in December 1988 announced its intent to withdraw from the industrial gases industry and focus the company's resources in its gas and electric utility operations in Pennsylvania and nationwide propane business.

AmeriGas originally agreed in 1988 to sell its Industrial Gases and Carbon Dioxide divisions, comprising most of the company's industrial gases assets, to the Airco Gases Division of The BOC Group for $171.5 million. AmeriGas expected to net $112 million after taxes from the sale.

However, the Bayport and Vacaville plants and an air separation plant in Waukesha, Wis., were excluded from the sale to satisfy concerns of the Justice Department. AmeriGas received $146 million in the modified transaction which closed in June 1989 and realized net cash proceeds of $96 million from the sale.

The sales of the three plants, including Waukesha to AGA Gas Inc., Cleveland, in September, brought $31 million, according to Sutton.

AmeriGas also sold its natural carbon dioxide reserves and related assets in New Mexico in September to Amerada Hess Corp. Earlier in August and June, AmeriGas sold its 50 percent ownership of ANSUTECH Inc., a builder of air separation plants, and Matheson Gas Products, a specialty gases supplier, to its joint-venture partner Nippon Sanso K.K. of Tokyo.

AmeriGas received a total of $17 million from the three transactions, but proceeds from the sale to Amerada Hess were shared with The BOC Group, Sutton said.

TYLER, TX (FEB. 1) PR NEWSWIRE - NCNB Texas confirmed today that it has

assumed approximately $22.3 million in deposits of the former Tyler National Bank, headquartered here.

The bank was declared insolvent earlier today and turned over to the Federal Deposit Insurance Corp. (FDIC) as receiver.

The settlement of the transaction with the FDIC included a premium of $250,000 paid by NCNB Texas. Under terms of the agreement, the FDIC has given NCNB Texas the option of purchasing any and all loans and other assets of the former Tyler National Bank.

"We are pleased with this opportunity to expand our services in this important section of Tyler," said A.W. "Whit" Riter III, president of the NCNB Texas-Tyler banking center. "This is a very important market to NCNB Texas, and we want to assure the former Tyler National depositors that we want them to continue as customers of NCNB Texas.

The transfers represent approximately 3,800 accounts from Tyler National. Riter said the facilities of the former bank will reopen on their regular schedules on Friday, Feb. 2, as NCNB Texas branches.

The former Tyler National Bank's main location is at 3301 Golden Rd. A motorbank is located at 3303 Golden Rd.

NCNB Texas reported $33.7 billion in total assets at Dec. 31, 1989. It is the largest bank in the state and serves customers through a network of more than 220 banking centers in 68 Texas communities.

ARLINGTON, VA (FEB. 1) PR NEWSWIRE - USAir (NYSE: U) will begin one daily nonstop roundtrip flight from New York's LaGuardia Airport to Bermuda on May 1.

The airline currently serves Bermuda with daily, nonstop roundtrip service from Baltimore and Philadelphia. USAir will provide the new service from New York to Bermuda with 151-passenger, 727-200 jet aircraft.

"We are pleased to offer vacation and business travelers the option of flying USAir to Bermuda from yet another major gateway," said Randall Malin, USAir executive vice president -- marketing.

Malin cited "USAir's excellent working relationships with Bermuda's government and tourism authorities as key factors in our decision to

establish additional Bermuda service."

USAir currently has 81 daily jet departures at LaGuardia, more than any other carrier, giving vacation and business travelers many connecting flight options on USAir and its affiliated USAir Express carriers.

Flight schedules for the new LaGuardia/Bermuda service will be announced by USAir at a later date.

SAN MANUEL, AZ (FEB. 1) PR NEWSWIRE - Magma Copper Co. (AMEX: MCU) has signed a letter of intent with Cyprus Copper Co., a subsidiary of Cyprus Minerals Co. (NYSE: CYM) for the proposed sale of all of the capital stock of Magma's wholly owned subsidiary, MCR Products Inc., located in Chicago.

Closing for the transactions is scheduled for mid-February of this year. MCR has 80 employees and a production capacity of approximately 140,000 tons per year of 5/16-inch continuous cast copper rod, the basic feed stock for the wire and cable industry.

Magma will continue to produce and sell high quality copper rod and cathode for both domestic and international markets from its San Manuel operations.

Magma Copper Co. operates mines, concentrators and solvent extraction/electrowinning plants at San Manuel and Miami, Ariz., as well as a smelter, electrolytic refinery and rod plant at San Manuel.

SIOUX CITY, IA - Midwest Energy Co. (NYSE: MWE) has announced earnings of $49,174,000, or $2.28 per share, on revenues of $572,701,000 for the 12-month period ended Dec. 31, 1989.

During the same period in 1988, Midwest Energy reported earnings of $39,406,000, or $1.83 per share, on revenues of $570,325,000.

Gary J. Harward, senior vice president and chief financial officer, said the increase in earnings came primarily from Midwest Energy's sale of its propane operations and Florida natural gas operations.

"Electric sales to retail and wholesale customers increased 1.7 percent over 1988, indicating continuing recovery of the economy in the service area," Harward said. "We also continued to experience success in making off-system electric sales to neighboring utilities."

For the fourth quarter of 1989, Midwest Energy reported earnings of $9,745,000, or 45 cents per share, on revenues of $161,568,000. During the same period in 1988, earnings of $8,909,000, or 42 cents per share, were reported on revenues of $152,479,000.

Harward attributed the earnings and revenue increases in the current quarter to higher energy sales by the Company's utility subsidiary, Iowa Public Service Co.

"Temperatures during the fourth quarter were 11 percent colder than one year ago," Harward said. "As a result, natural gas sales increased to our residential and commercial customers. Electric sales were up 25 percent over the same period last year. The majority of the increase was due to off-system sales and an improved economy in our service area."

Midwest Energy is a holding company with major interests in electric and natural gas utility operations and additional investments in diversified businesses.

Midwest Energy's utility operations provide electricity to 156,000 customers in 228 Iowa and 5 South Dakota communities and natural gas to 345,000 customers in 208 Iowa, 38 Minnesota, 8 South Dakota and 3 Nebraska communities.

Midwest Energy's common stock is listed on the New York Stock Exchange and the Midwest Stock Exchange under the symbol "MWE".

#90032p0437 02/01/1990 ~PR Newswire

KIRKLAND, WA (FEB. 1) PR NEWSWIRE - McCaw Cellular Communications, Inc. (NASDAQ: MCAWA) today announced that revenues and cash flow increased substantially in the fourth quarter as its subscriber base continued to expand rapidly.

McCaw Cellular also reported that it has completed negotiations with its agent banks of the definitive credit agreement for the financing of its tender offer for 21.9 million shares of stock in LIN Broadcasting.

In the three months ended Dec. 31, revenues increased 67 percent to $152.2 million compared with $91.3 million for the fourth quarter of 1988.

Cellular service revenues increased 76 percent, to $106.2 million from $60.2 million in the year-earlier period.

Operating margins continued to improve in the fourth quarter, and cash flow (income from operations before depreciation and amortization) rose to $19.1 million, compared with $0.5 million in the fourth quarter of 1988. It was the sixth consecutive quarter in which the corporation achieved increased positive cash flow.

The net loss for the fourth quarter of 1989 was $58.4 million, compared with a net loss of $92.2 million for the year-earlier quarter. The narrowing of the loss was attributable to a reduction in the loss from operations; gains on the sale of equity securities and certain cellular interests; and a significant rise in interest income from the funds received in conjunction with British Telecom's cash purchase of a 20 percent equity interest in McCaw.

With regard to the financing of its tender offer, McCaw Cellular's agent banks have distributed the credit agreement to the other lenders for their review and comment. McCaw expects the agreement to be executed in the next few weeks after this process is completed. Earlier this week, all of the lenders extended their commitments, which had been scheduled to expire on Jan. 31, 1990, to Feb. 28, 1990. They have extended the deadline for signing definitive financing agreements to that date as well.

In early January, McCaw Cellular stated that it filed a registration statement with the SEC regarding the $425 million of McCaw Cellular Class A common stock to be distributed as a dividend in respect to LIN shares not purchased in the tender offer. McCaw Cellular stated that it foresees no problems in having the registration statement declared effective by the Feb. 27 expiration date of its tender offer.

In addition, McCaw Cellular stated that the pending sale of its south-central systems to Contel Cellular Inc. for approximately $1.3 billion is expected to close in February. On Jan. 18, Contel announced that it had entered into a definitive agreement to obtain an interim loan that will be used to finance such acquisition.

"The fourth quarter capped an excellent 1989 for McCaw Cellular," stated Craig O. McCaw, chairman and chief executive office. "Our growth in revenues, cash flow and subscribers continues to meet or exceed our expectations. With the impending closing of the sale of our south-central cellular systems to Contel and the completion of our tender offer for 21.9 million shares of LIN Broadcasting, we will have achieved a strategic position we have long sought.

"For some years we have been developing the major regional systems, serving the nation's key population centers, that we believe are important

to the creation of a national cellular network. After the closings of the Contel and LIN transactions, more than 65 percent of McCaw's and LIN pops will be concentrated in California, Texas, Florida, New York and Pennsylvania. Approximately 80 percent will be in the nation's 30 more populous markets and their contiguous service areas."

For the year ended Dec. 31, 1989, McCaw Cellular's revenues totaled $504.1 million, an increase of 62 percent over $310.8 million for 1988. Cellular service revenues increased 77 percent, to $350.9 million from $198.1 million for 1988. Cash flow for the year totaled $52.1 million, compared with a cash flow deficiency of $7.0 million for 1988. The net loss for 1989 was $288.5 million, compared with the net loss of $297.0 million for 1988.

McCaw Cellular reported that the number of cellular subscribers in its markets, and in markets where it has the right to buy a controlling interest, increased to 434,000 at Dec. 31, up 68 percent from 258,000 at year-end 1988. At Dec. 31, 1989, McCaw Cellular also had 265,000 paging, conventional mobile phone and telephone answering subscribers in 12 states.

McCaw Cellular Communications, Inc., the nation's largest cellular telephone company, will have 58.7 million "pops" following the completion of the sale of its south-central cellular systems to Contel, the completion of the tender offer and LIN's completion of its pending acquisition of 6.9 million pops in New York from Metromedia. ("Pops" are a key cellular industry yardstick derived by multiplying market area populations by the percentage ownership of the cellular systems serving those markets.) The company currently offers cellular service, primarily under the "Cellular One (R)" name, in 127 markets in 26 states across the country, McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast.

NEW YORK, (FEB. 1) PR NEWSWIRE - Federal Resources Corp. (NASDAQ: FDRC) today announced that it has satisfied $2,500,000 of debt owed to DnC America Banking Corp.

DnC was assigned a $1,400,000 note owned by Federal and agreed to the assumption of the remaining $1,100,000 of the debt by New Gen Corp. New Gen Corp. had agreed to assume $1,100,000 of Federal's debt as part of Federal's sale of New Generation Inc. to New Gen Corp. in December 1989. Payment of the Federal debt was consummated as part of an overall debt restructuring of New Generation with DnC, its principal creditor.

As previously announced, concurrent with the completion of the New Generation debt restructuring, John P. Kotts has resigned as president of Federal.

HAMILTON, BERMUDA (FEB. 1) PR NEWSWIRE - Sea Containers Ltd. (NYSE: SCR) announced today that its board of directors has unanimously decided to recommend to the company's shareholders that they approve Temple's

unsolicited, irrevocable offer to acquire certain ferry, port and container assets of the company for an aggregate purchase price of approximately $1.1 billion in cash. Agreement has been reached with Stena AB and Tiphook plc on forms of definitive agreements for such asset dispositions.

The parties at the same time also effectively brought to an end Temple's takeover bid for Sea Containers by entering into a settlement agreement which provides that neither Temple, Stena nor Tiphook, nor any of their subsidiaries or affiliates, will acquire common shares in Sea Containers for a ten-year period.

The terms announced today reflect an increase in the cash consideration to be paid for the ferry assets by Stena and do not involve the delivery to Sea Containers of the company's common shares held by Stena. The settlement agreement also provides for termination of all existing litigation between the parties, Temple's agreement to adjourn or dissolve the shareholder meeting that it had previously requisitioned in an effort to unseat Sea Containers' board, and its commitment not to pursue its tender offer for the company's shares unless Sea Containers fails to comply with the provisions of the settlement agreement.

Sea Containers intends to utilize a large portion of the net cash proceeds from the asset dispositions in a recapitalization plan which will be proposed to shareholders at the same time they are asked to approve the asset sales. Sea Containers' board is expected to meet shortly to decide on the nature and details of the recapitalization plan. The company's annual meeting of shareholders has now been scheduled for March 15, 1990, in Hamilton, where the company is registered. The record date for this meeting will be Feb. 12, 1990.

In light of these developments, the board of directors of Sea Containers also determined not to recommend that its shareholders approve the container sales contemplated by existing agreements with Genstar Container Corporation and Itel Corporation. These agreements are conditioned upon such approval being obtained.

James B. Sherwood, president, said that he and the other members of the company's board were pleased with the results achieved for shareholders by this resolution of prolonged hostilities. He felt that Stena and Tiphook would be acquiring valuable container and ferry assets at fair prices while Sea Containers would be left with a highly profitable and growing business which would be conservatively financed. Sea Containers will be retaining about 50 percent of its marine container leasing and manufacturing business, 25 percent of its ferry and ports business, all its development land and its investments in the hotel business.

He said that the asset sales would provide job security for most of the

company's existing staff. Stena will be taking over all Sealink British Ferries' staff, ashore and afloat, who are connected with the assets being acquired, including all central and head office staff, while Tiphook will be taking over staff connected with the company's tank container leasing, forwarding and tank manufacturing business.

Sherwood said that the company's first wave-piercing, car-carrying catamaran had been successfully launched in Hobart, Tasmania, on Jan. 28. The ship has been named "Christopher Columbus" and is scheduled to leave the yard on the Easter weekend. It should be in a position to challenge for the Hales Trophy (the North Atlantic passenger ship "Blue Riband" speed record) in the first week of May. This will be the first official challenge for 38 years. The vessel will enter service on the Portsmouth/Cherbourg route toward the end of May.

LIVINGSTON, NJ (FEB. 1) PR NEWSWIRE - Paul J. Burke has been named to the newly created position of executive vice president and chief credit officer of the Howard Savings Bank, (NASDAQ/NMS: HWRD) Leo J. Rogers, Jr., bank president, announced today.

This new position will cover overall credit administration, according to Rogers, including management of the loan approval process, the internal loan and credit quality review function and the bank's loan workout units.

"Mr. Burke is a seasoned credit officer with extensive experience in middle market, corporate and real estate transactions," Rogers said. "His expertise will be very valuable to the Howard in overseeing our loan and credit administration policies and activities."

Burke joined the Howard in April 1989 as a vice president in the Howard's corporate banking division. Prior to that, he was a senior loan officer at Chemical Bank in New York, where he was involved in problem loan workouts and restructurings in international and middle markets. He joined Chemical Bank in 1967 as a business development officer and served in various lending and credit administration capacities during his 20-year career there.

As manager of international finance at Allied Chemical Company in New York from 1965 to 1967, Burke worked on structuring financing packages for foreign projects. From 1962 to 1965, he was international credit manager at Allied responsible for the extension of credit and collection of overdue accounts.

He began his career in 1956 as assistant credit manager for the New York Sales Office of Monsanto Chemical Company, handling approval of credit lines and following of overdue accounts.

A 1955 graduate of Fordham University, Burke received an MBA degree from Columbia University in 1962.

NEW YORK (FEB. 1) PR NEWSWIRE - Moody's Investors Service was informed today that a New Haven Board of Finance member has suggested to the mayor that the City of New Haven prepare to file for bankruptcy under Chapter IX of the Federal Bankruptcy Code and that the bankruptcy option be actively considered as a contingency to the city's current financial situation.

Moody's has been assured by Mayor John C. Daniels that this is not the administration's position and that the city need not and will not give serious consideration to such an action. Corporation counsel has indicated that this action, if it was indeed contemplated, would at a minimum require approval of the mayor as chief executive officer of the city. Therefore, such an action would be extremely remote. The city currently estimates on a conservative basis a fiscal 1990 operating deficit of about $11.7 million. Moody's will continue to closely follow this event and immediately report on new developments.

MORRIS PLAINS, N.J. (FEB. 1) PR NEWSWIRE - The Parke-Davis division of Warner-Lambert Company (NYSE: WLA), maker of the anti-epileptic drug Dilantin, today said that no shortage of the drug exists and that it does not foresee any circumstances that would hinder its ability to continue supplying the drug. The statement was issued in response to concerns voiced by officials at the American Association of Retired Persons that a shortage of Dilantin might result from the recall of a generic version of the drug made by Bolar Pharmaceutical Company, which is sold under the trade name Phenytex. The drug is known generically as extended phenytoin sodium.

"Parke-Davis is aware that some confusion may have resulted from reports of the news of the Food and Drug Administration's recall of Bolar's generic version," the company said. "Parke-Davis wishes to make it clear that the recall relates solely to Bolar's generic version, and that Parke-Davis' product, Dilantin, is in no way affected by the recall.

"Parke-Davis pioneered Dilantin extended phenytoin therapy more than 50 years ago, and as a result millions of epilepsy patients have been able to lead normal lives since then," the company said. "Parke-Davis is in no way hindered in its efforts to manufacture and supply the drug to pharmacies, and does not foresee any circumstances resulting from the Bolar recall that would impede its ability to continue supplying the drug."

ATLANTA (FEB. 1) PR NEWSWIRE - Golden Poultry Company, Inc. (NASDAQ: CHIK) today reported a 5.6 percent increase in net sales for its fiscal second quarter ended Dec. 30, 1989.

Net sales were $46,967,000, versus $44,465,000 reported for the comparable period last year. The company reported a net loss for the quarter of $582,000, or $0.05 per share, compared to net earnings of $1,319,000, or $0.14 per share, reported for the year earlier period.

For the first six months of the fiscal year, net sales were $95,786,000, up 4 percent from the $92,091,000 reported for the comparable period a year ago. Net earnings were $1,003,000, or $0.10 per share, compared to $5,584,000, or $0.58 per share, reported in the year earlier period. The company reported that production increased 15.5 percent for the first six months over 1988-89.

Commenting on the results, Don W. Sands, chairman of the board of Golden Poultry Company, said, "In addition to lower broiler prices due to industry overproduction, unanticipated problems in processing and packaging operations at the company's new Sanford plant and new employee turnover were the primary factors contributing to disappointing second quarter performance."

The company named a new plant manager at the Sanford facility and has added unit managers to each shift to improve processing efficiency. In addition, the company continues to add new broiler/breeder housing designed to improve field production efficiency. The company is also expanding its marketing program for its "Young 'n Tender" brand product line to retailers in the Midwest and Northeast.

Golden Poultry Company, Inc. is an integrated producer, processor, marketer and distributor of poultry and other food products.

LOS ANGELES (FEB. 1) PR NEWSWIRE - Angeles Finance Trust (AMEX: ANF) has declared a combined January/February cash distribution in the amount of $.31 per share of Class A common stock, payable Feb. 28, 1990 to stockholders of record as of Feb. 14. This rate represents a slight increase over the last monthly distribution, $.15 per share paid for December.

The Trust also announced that the new distribution will be paid in cash to all shareholders, and that none of the distribution would be reinvested. Many of the stockholders had established programs for the automatic reinvestment of their prior distributions in shares of the Trust. The decision for a combined January/February cash distribution was made in order to save administrative expenses.

If the previously announced offer by Angeles Corporation (AMEX: ANG) to acquire the Trust's assets is concluded in early March, the Trust will be terminated. The Trust said that, to date, it has received enough stockholder proxies voting in favor of the transaction to approve it at a special meeting to be held March 2. The board of trustees, whose majority consists of independent members, had voted unanimously last April that the Trust be included in the asset pruchase offer.

Angeles Finance Trust is a Los Angeles-based real estate investment trust whose assets consist entirely of a portfolio of mortgage loans that are guaranteed by Angeles Corporation as to both principal and interest.

BAKERSFIELD, CA (FEB. 1) PR NEWSWIRE - Central Pacific Corp. (AMEX: CTA), the Bakersfield-based holding company for American National Bank, announced today record fourth quarter earnings of $3,271,000 for the quarter ending Dec. 31, 1989. This represents $.55 per share on a fully diluted basis which is an 83 percent increase from income of $1,791,000, or $.33 per share, for the same quarter last year.

Central Pacific Corp. also reported record earnings for the year ending Dec. 31, 1989, of $9,347,000, or $1.57 a share on a fully diluted basis. This impressive improvement in earnings performance resulted from significant asset growth, increases in net interest income, and expense control.

Net interest income was $49,562,000 for the year of 1989. This was up $9,020,000, or 22.2 percent, from 1988. Operating expenses of $38,326,000 rose only $1,537,000, or 4.2 percent over 1988. The 1989 provision for losses was $5,742,000 which was $1,662,000 greater than 1988.

Total assets of the company were $957,883,000 as of Dec. 31, 1989. This represents an increase of $152,341,000, or 18.9 percent, over the prior yeaer. Deposits at American National Bank totaled $882,576,000 at year end. This reflects an increase of $140,285,000, or 18.9 percent. Net

loans totaled $656,249,000 for an increase of $59,206,000, or 9.9 percent.

Rayburn S. Dezember, chairman of the board and chief executive officer of Central Pacific Corp., stated "This was definitely a year of significant achievement for our company as we attained record earnings in each of the four quarters of 1989."

Dezember also stated, "American National Bank experienced solid deposit and loan growth in virtually all deposit and loan categories. The sales and marketing culture which has been developed during the past several years has enabled us to grow at more than three times the rate of the average bank growth in our marketplace."

On Sept. 21, 1989, Central Pacific Corp. and Wells Fargo & Company (NYSE: WFC) of San Francisco signed a definitive agreement by which Wells Fargo will purchase Central Pacific Corp., including its principal subsidiary, American National Bank. The purchase price will be approximately $160,000,000 or $28.50 a share. The acquisition, which is subject to appropriate regulatory approvals, is expected to be completed in early 1990.

Central Pacific Corp. and American National Bank operate 29 banking offices in the Central Valley, Antelope Valley, and Inland Empire areas of California specializing in consumer and business banking.

#90032p0476 02/01/1990 ~PR Newswire

FORT WORTH, TX (FEB. 1) PR NEWSWIRE - The Western Company of North America (NYSE: WSN) today reported net income for the 1989 fourth quarter of $1.2 million, or 10 cents per share, on revenues of $80.5 million. For the full year the company reported a net loss of $10.8 million, or 86 cents per share, on net revenues of $243.5 million. The company reported net income of $2.4 million on revenues of $55.0 million for the 1988 fourth quarter, and a net loss of $10.2 million on revenues of $208.9 million for the year 1988.

Pressure pumping revenues and cost of services and operating expenses for the three and 12 months ended Dec. 31, 1989 reflect revenues and costs associated with shipments of equipment and technology to China National Machinery Import and Export Corp. (Machimpex) under an agreement to provide approximately $26 million of equipment and technology. The effects of the completion on Feb. 1, 1990 of the company's convertible subordinated debenture offering and acceptance for payment of all outstanding Series B Notes delivered in response to a tender offer made by the company, announced earlier today, are reflected in results of

operations for the 1989 periods.

Chairman and Chief Executive Officer Sheldon R. Erikson said, "Fourth quarter results reflected substantially strengthened demand for Western's pressure pumping services, as well as the Machimpex sales. While pressure pumping prices have not shown improvement in the last year, it is likely that prices for such services will begin to increase with further increases in equipment utlitization." The domestic rig count averaged approximately 1,020 in the 1989 fourth quarter, compared to approximately 920 in the 1988 fourth quarter.

Erikson went on to say, "Offshore drilling activity also improved during the quarter, particularly in the Gulf of Mexico, where eight of our rigs are located. Moreover, jack-up rig dayrates have been increasing in the Gulf, providing the potential for improved revenue as the rigs are recontracted." Utilization of Western's rig fleet was 91 percent in the 1989 fourth quarter, up from 81 percent in the corresponding 1988 quarter.

Erikson also added, "Most importantly, Western's offshore drilling business became profitable in the 1989 fourth quarter; the pressure pumping business was profitable for 1988 and 1989."

The Western Company of North America provides pressure pumping services which include cementing, fracturing and acidizing, and offshore drilling internationally. Western's common stock is traded on the New York Stock Exchange under the symbol "WSN."

CHICAGO (FEB. 1) PR NEWSWIRE - On May 15, United will begin daily nonstop service linking Chicago's O'Hare International Airport and Washington's Dulles International Airport with Frankfurt. To launch this service, United Airlines is offering Early Bird Special Fares through March 31, for travel between May 15 and Dec. 31, 1990.

During the months of February and March, Early Bird Special purchasers will be able to realize significant savings over current non-refundable APEX fares. For example, the lowest Early Bird Special economy class round-trip fare midweek, Monday through Thursday, from Chicago to Frankfurt will be $529 for travel from May 15 through June 9 and Oct. 1 through Oct. 31. The current non-refundable APEX fare for the same travel period is $638 midweek. Early Bird fares are non- refundable, and certain restrictions apply.

From Washington Dulles to Frankfurt, the midweek Early Bird Special will be $499, compared to the lowest current non-refundable APEX fare of $608 midweek.

From Los Angeles/San Francisco to Frankfurt, the midweek Early Bird Special will be $599, compared to the current lowest non-refundable APEX fare of $718 midweek.

Tickets must be purchased not later than March 31. Reservations for the entire journey must be confirmed at the time of ticketing.

Mileage Plus members purchasing Early Bird Special tickets for travel between May 15 and July 31 will receive a special ''Willkommen Bonus'' of 5,000 miles for the round-trip.

United will operate its new European flights with Boeing 767-200 aircraft reconfigured for three-class service and equipped for overwater international operation. Passengers using either O'Hare or Dulles Airports can avail themselves of on-line connecting service from more than 60 U.S. cities.

SAN FRANCISCO (FEB. 1) PR NEWSWIRE - Chevron Corp. (NYSE: CHV) today issued the following statement in response to the U.S. District Court ruling that granted Chevron's motion to compel Pennzoil (NYSE: PZL) to produce certain documents:

"We are pleased that Judge Henderson has forcefully confirmed Chevron's view that it is entitled to full and complete discovery about Pennzoil's true intent in acquiring $2.1 billion of Chevron's stock and that the proof of that intent may be found in Pennzoil's documents. We are confident that Pennzoil's internal records about its tax strategy and evaluation of other investment targets will help define that intent."

Chevron filed suit on Dec. 7, 1989, accusing Pennzoil of violating federal laws with respect to Pennzoil's purchase of 8.8 percent of Chevron stock. Chevron contends that Pennzoil has made false and misleading statements about its intentions in the stock purchase.

Chevron's suit alleges that Pennzoil is not a passive investor and that Pennzoil intends to force restructuring of the company to the disadvantage of Chevron and its other stockholders.

OAKHURST, CA (FEB. 1) PR NEWSWIRE - Sierra On-Line Inc. (NASDAQ: SIER) today reported revenues of $11,191,000 for the third quarter of its fiscal year ending March 31, 1990, a 37 percent increase over the $8,193,000 for the same period of fiscal 1989. Revenues for the first nine months of fiscal 1990 were $22,712,000, up 34 percent from $16,908,000 in the corresponding period of fiscal 1989.

Earnings before extraordinary item for the quarter were $2,334,000, an increase of 55 percent over the $1,507,000 for the corresponding period of fiscal 1989. Earnings for the nine months ended Dec. 31, 1989, increased 44 percent to $3,896,000 from $2,712,000 in the comparable period in the prior year. Earnings per share before extraordinary item for the quarter were $.63 as compared to $.42 a year ago. Earnings per share before extraordinary item was $1.06 for the first nine months ended Dec. 31, 1989 compared to $.91 for the comparable period of the prior year, an increase of 17 percent.

Ken Williams, president and chief executive officer, said "We enjoyed an extremely busy holiday season. In addition to completing our joint promotion with IBM, we released three major titles "Hero's Quest" and "Leisure Suit Larry III" were released during the first half of the quarter and exceeded our expectations. "Colonel's Bequest," the first Roberta Williams' Laura Bow mystery, shipped Christmas week and sold surprisingly well for being released so late in the season. We're very pleased with third quarter results especially given that two major releases, "Codename Iceman" and "Conquest of Camelot," were delayed to the fourth quarter."

Sierra develops and publishes premium-prices interactive animated adventure software products for the high end of the consumer market. The company's products feature high-quality graphics, music and sound effects and are designed primarily for IBM PCs, IBM PC- compatibles and computers manufactured by Apple Computer Inc.

CHULA VISTA, CA (FEB. 2) PR NEWSWIRE - The board of directors of First International Bank today announced the appointment of Norman E. Richins as president and senior lending officer, effective Feb. 20, 1990.

Richins, in banking since 1964, most recently served as executive vice president for the Bank of San Diego. During 1987-1988, he was vice president/regional manager for Merabank, Phoenix, Ariz. While at Bank of America from 1964-1987, he served in a variety of positions in Southern California. He has worked for Bank of America locally in Kearny Mesa and La Jolla, Calif., and at the San Diego regional headquarters downtown San Diego.

Richins earned his bachelor of science degree, with honors, from the University of Cal Poly, Pomona, Calif. and has undertaken graduate studies in economics, business administration and management at the University of Arizona, the University of California, Riverside, and Northwestern University, Illinois.

"The opportunity to provide the leadership associated with the position of bank president represents the fulfillment of my personal and professional goals," stated Richins. "It is my goal to see First International Bank become the lead bank in South Bay with the capability of serving effectively the needs of all elements of the community from the small depositor to new and established business."

Richins brings a positive and solid approach to First International Bank seasoned with genuine enthusiasm. "The entrepreneurial spirit is what is needed in banking today. Yet, in light of recent criticisms of the industry, I intend to stay with sound fundamentals, execute them well and success will come. The Board of Directors is providing a leadership of vision; we will grow and prosper."

Tom Topuzes' (First International Bank's executive vice president and chief operating officer since 1989) resignation became effective Jan. 31,

1990. His interest is in pursuing more active participation in the legal

profession. He will, therefore, be joining the law practice of Frank Rogozienski on Feb. 1, 1990. Topuzes will continue with First International Bank as a member of the board of directors.

MANILA, Philippines (FEB. 1) UPI - A 3-mile-long slick of crude oil spewing from a sunken tanker threatened to wash ashore Thursday on the famous World War II beach battlefields of Bataan and Corregidor, now popular tourist resorts.

The motor tanker Fernando sank Monday off the coast of Limay, Bataan, 50 miles north of Manila, and has spilling an estimated 50,000 gallons of non-refined oil into South China Sea offshore from the town of Limay at the mouth of Manila Bay.

The tanker had been loading oil from a state-owned refinery on Bataan Peninsula when it sank.

The 3-mile-long oil spill was heading toward the beaches of Limay and nearby towns in Bataan and the onetime island fortress of Corregidor, said

Lt. Ronnie Bacolod, a Coast Guard spokesman.

Bataan and Corregidor, the scenes of some of the bloodiest battles of World War II, now are popular tourist destinations in the Philippines.

Small boats using oil booms and suction pumps have recovered about half the spilled oil, but the slick still threatens the local tourism and fishing industries, Bacolod said.

An initial investigation showed the tanker sprang a leak in its hull, causing it to sink, the spokesman said.

#90032u0218 02/01/1990 ~United Press International

(FEB. 1) UPI - Wisconsin Democrat Les Aspin, chairman of the House Armed Services Committee, says President Bush's proposal to negotiate even lower superpower troop levels in Europe is- in his words- ''clearly a good idea.'' Bush unveiled the idea Wednesday night during his State of the Union address... his first as president. Senate Armed Services Committee Chairman Sam Nunn, a Georgia Democrat, was delighted with the proposal, saying it- quote- ''takes an arms control position much more relevant to the real world, and the changing world.''

Cuba's ambassador to Mexico boarded a Cuban-registered freighter in Tampico, Mexico, to discuss an incident in the Gulf of Mexico earlier Wednesday. A U-S Coast Guard cutter shot at a disabled the freighter suspected of carrying illegal drugs after the freighter's skipper allegedly refused since Tuesday to allow a search. The envoy labeled the incident ''an act of North American piracy and terrorism'' and noted it took place in international waters.

The governor of Alaska says 117 miles of once-pristine shoreline remains oily and related debris is scattered all over Prince William Sound in the wake of the worst oil spill in U-S history. Steve Cowper says Exxon... whose tanker spilled the oil... says the corporate giant should return to Alaska to finish the clean-up job. The tanker's skipper, Joseph Hazelwood, is on trial in Anchorage on criminal charges stemming from last year's disaster.

Philippine coast guard officials say a three-mile-long slick of crude oil threatens the famous World War Two beach battlefields of Bataan and Corregidor... now popular tourist resorts. The oil is spewing from a motor tanker which sank Monday while loading oil from a state-owned refinery, 50 miles north of Manila.

#90032u0232 02/01/1990 ~United Press International
(FEB. 1) UPI - McDonald's officials say a record-breaking opening-day crowd of 30-thousand Soviets lined up on Gorky Street Wednesday to eat at Moscow's first McDonald's restaurant. Those customers questioned said they liked the food... and the courtesy shown them by the young Russians serving them from behind 27 automatic registers. Company officials say the fast-food emporium... with 700 seats inside and 200 outside... is the world's biggest McDonald's.

That claim is being disputed by city officials in the northeast Oklahoma community of Vinita. They say if square footage is the measure, then their McDonald's... with 29-thousand-135 square feet... is bigger than the Moscow restaurant, which has only 23-thousand-680 square feet.

#90032u0345 02/01/1990 ~United Press International
WASHINGTON (FEB. 1) UPI - Declaring a ''new era in the world's affairs,'' President Bush said it's time to slash the number of superpower troops in Europe in a bow to the peaceful political revolution sweeping the communist sphere.

In his first State of the Union address, delivered to a joint session of Congress Wednesday evening, Bush sweetened his proposal to Soviets to further reduce the troop limit from 275,000 to 195,000 on each side.

Bush, who telephoned Mikhail Gorbachev Wednesday morning in advance of the speech, told reporters the embattled Kremlin leader was ''receptive'' to the offer that will be negotiated at talks on conventional forces in Vienna.

While most of the NATO leaders, briefed on the proposal earlier this week by a pair of Bush emissaries, supported the move, British Prime Minister Margaret Thatcher was reported to be ''furious'' and felt that she had

been ''sandbagged'' by the president's initiative.

Bush was greeted with prolonged standing ovations when he entered and left the House chamber, and his upbeat report on conditions at home and abroad was interrupted 30 times by enthusiastic applause. Only Republicans stood for his call for ''no new taxes.''

Asserting that ''Panama is free,'' Bush pledged to pull out the remaining few thousand Dec. 20 invasion troops no later than the end of February.

Bush said events last year caused ''a chain reaction ... so striking that it marks the beginning of a new era in the world's affairs.''

''The time is right to move forward on a conventional arms control agreement to move us to more appropriate levels of military forces in Europe ... that ensures the U.S. will continue to be a catalyst for peaceful change,'' he said.

''With communism crumbling, our aim must be to ensure democracy's advance '' he declared, adding that ''troop levels can still be lower.''

''We are in a period of great transition, great hope, yet great uncertainty,'' he declared. But he contended that while the Soviet threat has diminished there is still a need for the ''Star Wars'' strategic space defense because Moscow continues to modernize its forces.

The overture, which may bolster Gorbachev's wavering political position, was the only major surprise of the speech.

Three top administration advisers - Secretary of State James Baker, Defense Secretary Richard Cheney and Chairman Colin Powell of the Joint Chiefs of Staff planned to fan out on Capitol Hill Thursday to explain the proposed troop cuts at hearings.

Bush broad-brushed most of the domestic goals, saying he chose not to detail ''every new initiative we plan for the coming year,'' but address ''the new world of challenges and opportunities before us'' that has emerged over the past year.

At the same time, he skipped over such trouble spots as China and the Middle East and mentioned in passing that ''our hearts go out to our hostages ... who are ceaselessly on our minds and in our hearts.''

Bush, who has begun his second year in office riding a wave of near-record popularity, again extended a familiar hand of cooperation to Congress even while alluding to election-year fights in the offing over taxes and budget priorities.

''Let's work together to do the will of the people: clean air, child care, the Educational Excellence Act, crime and drugs. It's time to act: the farm bill, transportation policy, product liability reform, enterprise zones. It's time to act together,'' he said.

House Speaker Tom Foley, delivering the Democrats' response to the speech, welcomed the troop cut but was critical of his stand on domestic issues, saying ''the president's words seem to agree with us, but his actions say something else.''

#90032u0368 02/01/1990 ~United Press International

LOS ANGELES (FEB. 1) UPI - Six more men, including a former director of the Mexican Federal Judicial Police and the former head of Mexico's anti-drug campaign, have been indicted in the torture-murder of U.S. drug agent Enrique Camarena.

The federal indictments bring to 19 the number of people charged in a web of crimes surrounding the killing of Camarena, a Drug Enforcement Administration agent whose body was found buried in a shallow grave outside Guadalajara, Mexico in 1985.

The most prominent figure among those charged Wednesday with Camarena's murder is Manuel Ibarra-Herrera, the former director of Mexico's Federal Judicial Police, the Mexican equivalent of the FBI.

Also indicted was Miguel Aldana-Ibarra, the former director of Interpol in Mexico, and the one-time head of Operation Pacifico, the Mexican government's campaign against drug trafficking.

The indictment said the pair participated in Camarena's killing ''to maintain and further the purposes of a Guadalajara narcotics cartel that was engaged in the trafficking of substantial quantities of marijuana and cocaine.''

Others charged were convicted drug kingpin Juan Ramon Matta-Ballesteros, alleged drug trafficker Miguel Angel Felix-Gallardo and Dr. Humberto Alvarez-Machain, who prosecutors say was present during Camarena's lengthy torture.

A sixth defendant, Antonio Vasquez-Ochoa, is charged with the murders of John Walker and Alberto Radelat, two U.S. tourists killed after being mistaken for drug agents the week before Camarena and his pilot, Alfredo Zavala Avelar, were slain.

Matta, now serving a life sentence for his drug trafficking conviction in Los Angeles earlier this month, is the only one among the newly indicted

defendants in custody, Assistant U.S. Attorney Manuel Medrano said. The others are believed to be in Mexico and are considered fugitives, he said.

Three other men, including prominent Mexican businessman Ruben Zuno-Arce, a brother-in-law of former Mexican president Luis Echeverria, are in custody in Los Angeles awaiting trial next month on charges of committing violent crimes in connection with the Camarena case.

So far, three men have been convicted and sentenced to prison after a 1988 trial in Los Angeles; two others have been convicted and sentenced to long prison terms in Mexico.

The statute of limitations for filing all but murder charges in connection with Camarena's death expires Feb. 7.

Camarena, assigned to the DEA's office in Guadalajara, was kidnapped in broad daylight and tortured in an effort to make him reveal which drug traffickers and Mexican government officials were under investigation.

According to various sources, Camarena, 37, had angered drug kingpin Rafael Caro Quintero over a raid at a huge marijuana farm near Chihuahua that cost up to $5 billion in lost street sales. Caro Quintero was recently sentenced to 40 years in prison in Mexico for Camarena's murder.

Camarena and Zavala were killed in a house outside Guadalajara on Feb. 7, 1985. Camarena was tortured more than 24 hours before he was finally killed by several blows to the head. The bodies were found about a month later on a ranch 60 miles outside of Guadalajara.

The five defendants charged Wednesday with his murder also are accused of conspiracy, kidnapping and committing other violent crimes in aid of racketeering. If convicted, all five as well as Vasquez-Ochoa face a maximum term of life in prison.

The Camarena case has strained relations between the United States and Mexico, with DEA officials alleging the Mexican authorities are dragging their feet in the drug war. The killing was recently the subject of an NBC television miniseries, ''Drug Wars: The Camarena Story.''

(FEB. 1) UPI - C O R R E C T I O N:

In 3rd item please read 2nd sentence xxx says Exxon... whose tanker spille the oil... should return to Alaska etc.,

Wisconsin Democrat Les Aspin, chairman of the House Armed Services Committee, says President Bush's proposal to negotiate even lower

superpower troop levels in Europe is- in his words- ''clearly a good idea.'' Bush unveiled the idea Wednesday night during his State of the Union address... his first as president. Senate Armed Services Committee Chairman Sam Nunn, a Georgia Democrat, was delighted with the proposal, saying it- quote- ''takes an arms control position much more relevant to the real world, and the changing world.''

Cuba's ambassador to Mexico boarded a Cuban-registered freighter in Tampico, Mexico, to discuss an incident in the Gulf of Mexico earlier Wednesday. A U-S Coast Guard cutter shot at a disabled the freighter suspected of carrying illegal drugs after the freighter's skipper allegedly refused since Tuesday to allow a search. The envoy labeled the incident ''an act of North American piracy and terrorism'' and noted it took place in international waters.

The governor of Alaska says 117 miles of once-pristine shoreline remains oily and related debris is scattered all over Prince William Sound in the wake of the worst oil spill in U-S history. Steve Cowper says Exxon... whose tanker spilled the oil... should return to Alaska to finish the clean-up job. The tanker's skipper, Joseph Hazelwood, is on trial in Anchorage on criminal charges stemming from last year's disaster.

Philippine coast guard officials say a three-mile-long slick of crude oil threatens the famous World War Two beach battlefields of Bataan and Corregidor... now popular tourist resorts. The oil is spewing from a motor tanker which sank Monday while loading oil from a state-owned refinery, 50 miles north of Manila.

McDonald's officials say a record-breaking opening-day crowd of 30-thousand Soviets lined up on Gorky Street Wednesday to eat at Moscow's first McDonald's restaurant. Those customers questioned said they liked the food... and the courtesy shown them by the young Russians serving them from behind 27 automatic registers. Company officials say the fast-food emporium... with 700 seats inside and 200 outside... is the world's biggest McDonald's.

That claim is being disputed by city officials in the northeast Oklahoma community of Vinita. They say if square footage is the measure, then their McDonald's... with 29-thousand-135 square feet... is bigger than the Moscow restaurant, which has only 23-thousand-680 square feet.

#90032u0415 02/01/1990 ~United Press International

(FEB. 1) UPI - Though they were trailing by nine points at halftime Wednesday night, Michigan Coach Steve Fisher told his team not to worry.

After watching Purdue make 70 percent of its shots in the first half,

Fisher stressed to his No. 4 Wolverines that there was no way the Boilermakers could shoot 70 percent in the second half.

He was right, Purdue only shot 69.6 percent the rest of the way.

Purdue, ninth-ranked and one of college basketball's biggest surprises this year, remained unbeaten in the rugged Big Ten with a 91-73 thrashing of the Wolverines.

The Boilermakers established a Crisler Arena record, making 35 of 50 shots and now hold a two-game lead in the Big Ten.

''Everybody's chasing Purdue,'' Fisher said. ''And everybody could be in a big hurt. Michigan State needs a victory (Thursday) over Minnesota.

Tony Jones and Steve Scheffler combined for 41 points as Purdue improved to 8-0 in the Big Ten for the first time since 1936. It has won 11 conference games in a row overall, one shy of the school record.

Jones, who hit 11 of 21 shots, scored 23 and Scheffler had 18 points while missing just one shot. Loren Clyburn scored 15 with Woody Austin and Ryan Berning getting 13 apiece. Berning made 6 of 7 shots.

Michigan dropped to 5-3 in the Big Ten and 15-4 overall. The Wolverines were led by Rumeal Robinson, who had 17, and Terry Mills with 15.

After the Wolverines closed to within three at 55-52 with 13:59 to play, the Boliermakers went on a 13-0 run that put the game away.

Scheffler who has made an amazing 51 of 61 shots in Big Ten play, converted his only miss into a layup that started the spree.

Keady has stressed self-discipline to his team this year, resulting in their excellent shooting percentages. The Boilermakers never took a shot from outside of 12 feet unless it was wide open.

''The coaches emphasize if you have a real good shot, be willing to make the extra pass to get an even better shot,'' said Scheffler, who made 7 of 8. ''We don't have much of a choice because if we don't, we're dead.''

While the rest of the country waits for the Boilermakers to collapse, Keady is cautiously optimistic.

''Our goal was to finish 12-6 and it looks like we should be able to do that unless we screw it up real bad.''

Shooting 70 percent, Purdue can't miss.

--- AROUND THE NCAA ---

Elsewhere in the Top Twenty; No. 1 Missouri edged Iowa State 95-93; No. 2 Kansas buffaloed Colorado 90-69; No. 3 Arkansas nipped Rice 70-66; No. 5 Duke downed Clemson 94-80; No. 8 Oklahoma pounded Nebraska 105-64 and No. 14 LSU nipped Mississippi 79-77.

At Ames, Iowa, Freshman Travis Ford nailed a 19-footer with five seconds left in the game to lead the Tigers in a Big Eight matchup. After Ford's game-winner, the Cyclones were unable to get off a shot. Anthony Peeler scored a career-high 42 points and tied a school record by converting 20 straight free throws. Missouri has won 11 in a row and improved to 20-1 overall and 6-0 in the conference. Victor Alexander and Phil Kunz each scored 20 points for Iowa State, 7-10 and 2-3.

At Lawrence, Kansas, Rick Calloway led a balanced attack with 17 points as the Jayhawks cruised past Colorado in a Big Eight game. Mark Randall added 14 points and Kevin Pritchard had 13 points to help the Jayhawks raised their record to 21-1 and 4-1 in the league. Shaun Vandiver scored 28 points for the Buffaloes, who fell to 9-10 and 1-5. Colorado has not won a league road game since Februrary 183, a span of 47 games.

At Houston, Todd Day and Arlyn Bowers each converted two free throws in the final 20 seconds and the Razorbacks held off the Owls in a Southwest Conference game. Day scored 23 points to help Arkansas to their 10th straight win and improve to 18-2 and 9-0. Lenzie Howell added 14 points and 10 rebounds for Arkansas. Mike Rourke scored 19 points and grabbed 16 rebounds for Rice, 9-9 and 4-4.

At Durham, N.C., Phil Henderson scored 20 points and Alaa Abdelnaby and Bobby Hurley added 18 points to pace the fifth-ranked Blue Devils. Christian Laettner added 15 points for Duke, which improved to 17-3 overall and 7-1 in the ACC. Elden Campbell's 26 points paced Clemson, which fell to 15-5 overall and 4-3 in conference play. Kirkland Howling added 15 points and Sean Tyson 14 for the Tigers.

At Norman, Okla., Damon Patterson scored 20 points and Jackie Jones added 16 points and 13 rebounds and the Sooners notched their 41st straight home win.Skeeter Henry added 16 points for the Sooners, 15-2 and 4-1. Terrence Mullins scored all 10 of his points during a decisive 20-4 first-half run. Dapreis Owens led Nebraska, 7-11 and 0-5, with 16 points and Carl Hayes added 15.

At Oxford, Miss., Maurice Williamson made a pair of free throws with eight seconds left and Chris Jackson scored all 28 of his points in the second half, including four three-pointers to lead the Tigers. Williamson added 17 points for the Tigers, 15-4 and 6-3. Gerald Glass scored 33 points and snared ninerebounds for Mississippi, 3-6 and 6-12.

-30- 5314
#90032u0418 02/01/1990 ~United Press International
LOS ANGELES (FEB. 1) UPI - Parents of former McMartin Pre-School students wereoverjoyed that Raymond Buckey will be re-tried on the 13 counts of child molestation and conspiracy jurors could not agree upon, but a defense lawyer called the decision outrageous.

Ending speculation he would abandon a case that has dragged through the courts since 1984, District Attorney Ira Reiner said Wednesday that Buckey acquitted in January of 40 child molestation charges in the nation's longest trial, will be retried on those counts on which the jury deadlocked.

''Our present intention is to go forward on all 13 counts,'' Deputy District Attorney Lael Rubin told Superior Court Judge William Pounders, who presided over the first trial. Those include 12 counts of child molestation and one of conspiracy.

Pounders endorsed the decision and scheduled a new trial for March 9, when the process of selecting a new jury will begin. The first trial, in which Buckey's mother, Peggy McMartin Buckey, 63, was acquitted of 12 counts of child molestation against her, lasted nearly three years, but prosecutors said the second trial should last no more than three months. The first trial cost taxpayers more than $13 million, making it the longest, costliest criminal proceeding in U.S. history.

''I'm surprised by the decision, but looking forward to an ultimate acquittal,'' Buckey, 31 told KABC-TV, after hearing the announcement while seated in the courtroom next to defense attorney, Danny Davis. Buckey's civil attorney, Scott Bernstein, had a stronger reaction.

''I think it's an outrage,'' Bernstein said. ''The jury heard evidence for 2 1/2 years (and) made the right decision. They should let it go.''

But Marilyn Salas, whose son attended the once prestigious Virginia McMartin Pre-School in suburban Manhattan Beach, welcomed the news.

''We are beyond joy,'' she told reporters. ''We are thrilled. We didn't know what to expect. There are so many political ramifications, but we thought the outcry from the public over the acquittals has been enormous.''

The jury deadlocked on one count of conspiracy against both Buckeys, and Judge Pounders dismissed that charge against Mrs. Buckey, meaning she cannot be re-tried on any of the charges. The panel also deadlocked on 12 other molestation counts against Ray Buckey involving the alleged sexual abuse of five former students. The jury leaned toward acquittal on all the

deadlocked counts.

Rubin said several factors went into the decision to re-try the case, including the seriousness of the charges and the commitment of the families to re-try the case.

She said the tremendous public outcry over the acquittals and the fact that Reiner is running for state Attorney General had nothing to do with the decision to re-try the case.

''Public pressure played no part in it at all,'' Rubin said.

McMartin parents have lobbied hard for a re-trial, many of them going on the national TV talk show circuit to press their case.

But Reiner said the prime reason behind his decision to re-try the case was his belief that children had been molested at the preschool.

''We felt that the defendant, Ray Buckey, was guilty of these charges, or we wouldn't have proceeded,'' Reiner said. ''At the core of all this is our belief that the children were molested. And with that belief, we have an obligation and a duty to proceed.''

Pounders said he agreed with the decision.

''That decision is most appropriate,'' he said. ''I concur with it.''

But he urged both sides to re-try the case as quickly as possible.

''There are a lot of people sitting in agony,'' he said. ''We should do it quickly to end the turmoil this case has brought.''

Prior to the prosecution's announcement, Buckey's attorney filed a motion seeking to remove Pounders from the new trial on grounds he is biased against the defense. Pounders denied the allegation and said he would file a response quickly.

Pounders, who has also been on the TV talk show circuit, has said he was not surprised at the first verdicts because he felt that, given the evidence, a reasonable jury could have ruled either way.

Jurors, who were consulted by Reiner before his decision to re-try Buckey, said they believed some of the children had been molested but that the prosecution had failed to prove beyond a reasonable doubt that the molestations had taken place at the McMartin school.

Rubin said prosecutors have commitments from most of the five children named in the 12 molestation counts and their families that they will

testify.

Buckey, who spent nearly five years in jail following his arrest in March 1984, faces 32 years in prison if convicted. His mother spent two years behind bars before posting bail.

The charges stemmed from alleged sexual molestations from 1978 until 1983.

When first filed, the case involved seven defendants and was the largest molestation case in U.S. history, with allegations that hundreds of children had been molested at the pre-school.

But following a lengthy preliminary hearing at which some of the children testified, scores of charges and five co-defendants, including Ray Buckey's elderly grandmother, Virginia McMartin, who founded the pre-school, and his sister, Peggy Ann Buckey, were dismissed by Reiner for a lack of evidence.

#90032u0441 02/01/1990 ~United Press International

(FEB. 1) UPI - ''We needed our leader to take charge and Steve Yzerman took charge tonight,'' Detroit Red Wings Coach Jacques Demers said after Yzerman's four goals Wednesday led Detroit to a come-from-behind 7-5 victory over the Edmonton Oilers.

Yzerman admitted there isn't much time for the Red Wings, who are nine points behind fourth-place Minnesota in the Norris Division, to earn a playoff berth.

''We have to get going now,'' he said. ''There's only 60 days left and you're done. It's kind of a miserable position to be in.''

Yzerman said he was encouraged at the way the Red Wings overcame a 4-2 deficit with 5:13 remaining in the second period.

''I don't think one game can turn it around, but our whole team played with more excitement tonight,'' said Yzerman, who boosted his goal production to 39 with the first four-goal game of his career.

Craig Simpson scored twice for the Oilers, who entered the game with a 22-0-1 record when leading after two periods.

The victory was the second straight for Detroit, while Edmonton lost for the first time in four games.

Joe Kocur triggered Detroit's third period outburst when he deflected Lee Norwood's shot from the point during a power play at 6:05 to tie the score

at 4-4.

The Red Wings took the lead 45 seconds later on Bernie Federko's deflection of John Chabot's shot from the top of the faceoff circle.

Yzerman gave the Red Wings a 6-4 lead at 10:29 when he beat goalie Bill Ranford on the short side with a shot from the bottom of the faceoff circle while Detroit had a two-man advantage.

Edmonton had a two-man advantage when Yzerman and Rick Zombo drew penalties with 6:30 left in the game, but the Red Wings killed off the penalties, allowing only two shots on goal.

Edmonton cut Detroit's lead back to one goal at 16:18 on defenseman Steve Smith's shot from just inside the blue line after a faceoff in the Detroit end, but Yzerman sealed the victory with his empty net goal with 50 seconds remaining.

Yzerman's second goal of the game, a wrist shot from between the faceoff circles with 1:10 left in the second period, cut Edmonton's lead to 4-3.

Simpson tied the score at 2-2 at 1:41 of the second period when he took a centering pass from Randy Gregg and beat goalie Glen Hanlon.

Craig MacTavish scored on a rebound at 6:02 after linemates Adam Graves and Joe Murphy had applied pressure on the Detroit net.

The Oilers took a 4-2 lead at 14:47 on Vladimir Ruzicka's fourth goal in six games. Ruzicka broke in alone on Hanlon, pulled the goalie and lifted a backhand shot into the far corner.

Yzerman gave Detroit a 1-0 lead at 2:31 of the first period when he knocked his own rebound out of the air and into the net.

Simpson converted a pass from Petr Klima on a 3-on-2 break at 4:48 to tie the score at 1-1, but Gerard Gallant put the Red Wings back in front at 5:28. Yzerman maintained control of the puck in the slot area, then threaded a pass to Gallant at the edge of the crease.

--- AROUND THE NHL ---

Elsewhere in the NHL, St. Louis and the NY Rangers skated to a 2-2, tie, Washington nipped Minnesota 4-3, Toronto knotted Winnipeg, 5-5, and Buffalo beat Quebec 6-3.

RANGERS 2, BLUES 2, TIE

At New York, Dave Lowry scored a short-handed goal to lift the St. Louis

Blues into the tie, and Blues' rookie goalkeeper Curtis Joseph, subbing for injured Vincent Riendieu midway through the first period, combined with Riendieu to stop 31 shots.

WASHINGTON 4, MINNESOTA 3

At Bloomington, Minn., John Tucker's goal 35 seconds into overtime gave the Washington Capitals the victory. Tucker knocked in a rebound by Geoff Courtnall as the Capitals came from behind to win their 13th game road this season. The Capitals are 13-15-2 on the road but only 10-11-2 at home.

MAPLE LEAFS 5, JETS 5

At Winnipeg, Manitoba , Daniel Marois assisted on three goals, including the final two of the game by Tom Kurvers and Vincent Damphouse, to pull Toronto into the tie.

SABRES 6, NORDIQUES 3

At Buffalo, N.Y., Doug Bodger scored a goal and added two assists to lead the Sabres in a sweep of the teams' home-and-home series.

#90032u0445 02/01/1990 ~United Press International

PRISTINA, Yugoslavia (FEB. 1) UPI - Thousands of Serbs and Montenegrins protested the central government's failure to quell ethnic Albanian unrest and many volunteered to go to Kosovo province to help authorities control the situation.

Thousands of ethnic Albanians exchanged gunfire or threw stones at riot police in Kosovo, 190 miles south of Belgrade, Wednesday demanding more autonomy from Serbia state in the eighth day of anti-Serbian demonstrations.

Four demonstrators were killed Wednesday, raising the death toll to 16 since the start of the recent spate of ethnic violence, police said. Unofficial estimates put the number of deaths at 21.

At least 10 ethnic Albanians were wounded in clashes Wednesday in Podujevo 20 miles north of the Kosovo provincial capital of Pristina, witnesses said. About 5,000 ethnic Albanians rampaged in the streets, and riot police used tear gas to force the protesters to retreat to the outskirts, the witnesses said.

In Pec, 50 miles west of Pristina and close to the Yugoslav-Albanian border, police threw tear gas grenades from helicopters as ethnic Albanian demonstrators blocked the streets with burning tires.

It was calm in Pristina, however, as police in full riot gear mingled with pedestrians.

The protests began Jan. 24 when 40,000 ethnic Albanians in Pristina demanded the resignation of pro-Serbian Kosovo leaders and asked for free elections and a multiparty system. They also demanded the release of political prisoners and the abolition of emergency measures imposed in Kosovo last February.

In the Montenegrin capital of Titograd, about 100,000 people, many of them firing pistols in the air, attended a rally Wednesday demanding the resignation of the Yugoslav leadership for failing to install peace and order in Kosovo and protect Serbs from the ethnic Albanian violence.

A speaker at the rally, televised live to Serbia and Montenegro states in eastern Yugoslavia, said thousands of volunteers were enlisting to go to Kosovo to help stop Albanian ''separatists and terrorists.''

In Pristina, Kosovo Prime Minister Jusuf Zejnulahu told reporters the police force in the province, where 1.7 million ethnic Albanians outnumber 200,000 Serbs, was strong enough to protect all Serbs in villages from possible assaults by Albanian separatists.

Zejnulahu said authorities are ''determined to prevent ethnic conflicts'' but they did not intend to impose a curfew. He announced about 15,000 ethnic Albanians were on strike in about 20 municipalities in Kosovo, a province in the south of Serbia, the largest of Yugoslavia's six republics.

Some 8.5 million Serbs are a majority in multi-national Yugoslavia's population of 23 million, but they are a minority in Kosovo.

A winter vacation for schools and universities in Kosovo that was to end Thursday was extended until Monday. Witnesses said many Serbs, fearing attacks by ethnic Albanians, have evacuated their women and children from Kosovo to other parts of Serbia. In many Kosovo villages, Serbians set up vigilantes to watch houses overnight.

Witnesses said Albanians stoned trucks, buses and cars with license plates registered outside Kosovo. Passenger trains passing through Kosovo were stoned, which shattered windows and wounded one passenger.

In cities throughout Serbia and Montenegro, including the Yugoslav and Serbian capital of Belgrade, Serbs held mass rallies accusing the leaderships of Slovenia and Croatia of siding with and supporting the Albanian demonstrators.

NEW YORK (FEB. 1) UPI - A surgery professor seriously injured by gunfire as he rode in an ambulance from one hospital to another was saved by a team of his colleagues and surgical residents he trained in trauma techniques.

Dr. Henry Lamaute, chief of surgery at St. Mary's Hospital, was in stable condition at the hospital Thursday after two hours of surgery in which part of his kidney was removed, said Dr. Walter Pizzi, who headed the surgical team.

''Dr. Lamaute is a professor of surgery, so he has residents in training in surgery. They were there to receive him. They followed all the procedures he taught them.''

Lamaute's prognosis appeared to be ''excellent,'' said Thomas Chardavoyne, a hospital spokesman.

Lamaute completed an operation at Mary Immaculate Hospital in Queens and was to perform another operation at St. Mary's in Brooklyn's crime-plagued Bedford Stuyvesant section when he was hit by stray gunfire about 3:40 p.m. Wednesday.

''I have been at this hospital for the last 30 years and have always been involved in trauma surgery. It comes as a real shock to have one of your own as one of the victims,'' Pizzi said.

''It is a cruel twist of fate that this happened to someone who has dedicated his life to this very satisfying work of saving people,'' said Pizzi, chairman of the surgery department at Catholic Medical Center of Brooklyn and Queens, which runs St. Mary's, Mary Immaculate and two other hospitals.

Lamaute, 47, specializes in trauma surgery and had served a residency under Pizzi before he began his 17-year affiliation with St. Mary's, Pizzi said.

Officer Fred Weiner, a police department spokesman, said Lamaute caught a ride in a private ambulance headed from Mary Immaculate to St. Mary's. Pizzi said the ambulette was about three blocks from its destination when the vehicle was caught in ''a hail of bullets.''

''The driver said he heard eight shots fired. They were caught in a cross fire,'' Pizzi said. No other injuries were reported after the shooting, police said.

''The bullet went through the car door and hit him in the side. These are very thick car doors. The bullet went straight through and hit him in the side,'' Pizzi said.

''If it had been a few inches higher and gone through the window and hit him in the head, he would have been dead,'' Pizzi said. ''He was hit by a high-velocity bullet from a semi-automatic gun. These are absolutely deadly.''

Pizzi said the doctor was brought into the hospital in shock and bleeding profusely.

Pizzi said the surgery residents resuscitated Lamaute and gave him blood. ''I came from Mary Immaculate and joined the surgeons as they were about to start operating,'' Pizzi said.

''Six of us operated, including a kidney surgeon. He had a gunshot wound in the right kidney. The surgery required removal of part of his kidney,'' Pizzi said.

#90032u0543 02/01/1990 ~United Press International

(FEB. 1) UPI - A Bulgarian opposition leader has rejected an offer to join the communists in a coalition government that would rule until the May elections. He accused the government of a propaganda ploy. Delegates at a Communist Party convention plan to vote today on a new charter and a manifesto detailing its new goals.

A Harris poll commissioned by the Girl Scouts says 65 percent of the high school students surveyed said they would cheat on an important exam. 54 percent of the boys and 22 percent of the girls said they would have sex with someone they love. 53 percent would lie to protect their best friends.

An eight-year-old boy took the stand in Tacoma, Washington, yesterday and identified Earl Shriner as the man who sexually assaulted and mutilated him last spring. The boy also told the court that while he was hospitalized, he picked a photo of Shriner out of several shown to him by a detective.

Four black men will have a reunion today in Greensboro, North Carolina. In 1960, they were students who staged a lunch counter sit-in that sparked mass involvement by young people in the civil rights movement. The four will be honored guests of Woolworth's, where they staged the sit-in.

Physicians for Social Responsibility in Washington state will present the group's first ''Tin Shovel Award'' to the Air Force... for paying 421-thousand dollars apiece for fax machines. The doctors named the award after a federal official who said people could survive nuclear war by burying themselves.

BANGKOK, THAILAND (FEB. 1) UPI - Vietnam's economic ties to the Soviet Union have not achieved the results intended and must be changed to suit

Vietnamese efforts to reform its economy, a senior minister said.

Doan Duy Thanh, minister of external economic relations, praised the Soviet Union as Vietnam's greatest aid benefactor and leading trading partner in a statement broadcast by Radio Hanoi Tuesday.

But, according to a translation of the statement made available Thursday, he said changes were needed.

''We are aware that the economic relations between the two countries still have not achieved desirable results nor developed in a way that suits the policies of restructuring'' of both, Thanh said.

Vietnam and the Soviet Union have tried to reduce the rigid centrally controlled bureaucracy that has hampered economic development.

Thanh said it is necessary to put their economic relationship on a more business-like basis rather than ''one-sided assistance.''

He said both countries must eliminate bureaucratic obstacles and ''subsidy-based mechanisms of the past.''

Thanh said the Soviet Union accounted for 65 percent of Vietnam's international trade, supplies nearly 100 percent of its cotton fiber, gasoline and diesel fuel, provides 82 percent of its steel plates and 68 percent of its fertilizer.

''For its part, Vietnam always strives to give priority to the export of its goods to the Soviet Union,'' he said.

He said the value of exports to the Soviet Union surpassed $360 million last year and is expected to be more than $540 million in 1990. It was not clear whether the increase would come from greater volume or a decrease in the value of the ruble.

Thanh's statement appeared to reflect Vietnam's fears that the Soviet Union will no longer be willing or able to continue its $2 billion per year in economic help.

At the same time, Vietnam has been trying to improve economic relations with countries outside the crumbling communist bloc.

In a separate report, Vietnam said efforts to attract foreign investment from capitalist countries were going well.

''The door of our house had been formerly closed. It was then half-opened but still not too many guests came. This time, the door is definitely wide open and many guests have rushed in,'' said a Radio Hanoi report.

Since the enactment of a liberal foreign investment code three years ago, about 100 foreign investment projects have been approved involving capital of about $750 million, the report said.

It noted, however, that some foreign firms were still ''probing our sincerity.''

Most of the projects are in oil exploration, seafood, light industry, agriculture and food products and service industries such as hotels.

#90032u0660 02/01/1990 ~United Press International

SEOUL, SOUTH KOREA (FEB. 1) UPI - The ruling Democratic Justice Party Thursday followed up on its announcement last week and decided to disband and merge with two opposition groups, moving closer to giving birth to a broadly based political force.

About 6,000 delegates at a special national convention approved the demise of the nine-year-old party.

Under the merger agreement, Kim Young-sam's Reunification Democratic Party was disbanded at a national convention Tuesday. The New Democratic Republican Party headed by Kim Jong-pil is scheduled to follow suit next Monday.

Until the new party completes organization, President Roh Tae-woo and the Kims will serve as the joint leaders of the emerging grand ruling group. The new party will enjoy a two-thirds majority in the 299-seat National Assembly.

The Democratic Justice Party was formed Jan. 15, 1981, when former President Chun Doo Hwan was its leader, and has been the backbone of government under Chun and his successor, Roh, who became president two years ago.

On Jan. 22, Roh and the two Kims announced they would merge their parties and form a middle-of-the-road democratic political force.

A 15-member committee has been formed to complete the merger and register the new party with authorities by Feb. 15. It will be fully operational by mid-May through an inaugural national convention.

(FEB. 1) UPI - President Bush delivers an optimistic State of the Union

Speech... South Africa's president meets with Nelson Mandela... civil rights activists return to North Carolina as honored guests... and the pope wraps up his Africa trip. Those stories and more, next from U-P-I.

In his State of the Union address last night, President Bush ushered in a new year... a new decade... and what he called a ''new era in the world's affairs.''

The president received four standing ovations during his 36-minute speech for declaring Panama free... condemning racism... proposing further superpower troop cuts in Europe... and declaring Social Security UNtouchable.

However, only Republicans stood when Bush said his fiscal 1991 budget will lower the federal deficit and balance the budget by 1993 with NO new taxes.

Bush said last year's events in Eastern Europe were... in his words... ''so striking that it marks the beginning of a new era in the world's affairs.''

Bush telephoned Soviet President Gorbachev in advance of the speech... telling reporters that the Kremlin leader was ''receptive'' to a proposal to further reduce the troop limits in Europe to 195-thousand.

NATO and Warsaw Pact negotiators are working in Vienna to conclude a treaty on conventional forces reduction by fall.

Bush broad-brushed most of the domestic goals, saying he chose NOT to detail every new initiative his administration has planned for the coming year.

House Speaker Tom Foley delivered the Democratic response. He welcomed the troop cut... but was critical of Bush's stand on domestic issues.

South African President Frederik de Klerk is reported planning to meet black leader Nelson Mandela today.

The report says de Klerk and Mandela will try to settle differences over details of the black nationalist's release from life imprisonment.

Mandela is said to be insisting his release be accompanied by a lifting of a three and one-half year old state of emergency and an end to the ban on the African National Congress... which has been outlawed since 1960.

A senior government source says de Klerk hopes to reach a compromise that will allow him to give a firmer indication tomorrow when he opens Parliament of when Mandela may be freed.

South Africa's president has ordered an UNprecedented judicial inquiry into more than a decade of unresolved politically motivated killings. As a result of yesterday's announcement, anti-apartheid activists canceled plans to hold a demonstration in Cape Town today to protest alleged government inaction on the killings.

#90032u0715 02/01/1990 ~United Press International

(FEB. 1) UPI - Four men who could NOT get a meal at a lunch counter 30 years ago today will have breakfast as honored guests at the same location.

The four were young black students when they sparked the civil rights movement in 1960 by demanding service at a Woolworth's lunch counter in Greensboro, North Carolina.

A short time later, blacks were walking into all-white restaurants across the South. Mass arrests were made in some cities. Woolworth's closed the Greensboro lunch counter. But the policy of whites-only eating places ended ultimately.

One of the Greensboro Four... K-K Khazan was then known as Ezell Blair Junior. He says they were determined to turn America around.

He says the student-organized and student-led sit-ins were the catalyst for all civil rights movements in the 1960's. He says it caught most of the adults off guard- even the N-double-A-C-P and the Southern Christian Leadership Conference.

A bronze sculpture of the Greensboro Four is to be dedicated at the Memorial Union Quadrangle on the A-and-T campus, and a street is to be re-named Greensboro Four Place. Other activities scheduled include a re-enactment of the sit-in and a march from the college to the lunch counter.

Woolworth's will donate the original lunch counter stools to the permanent Sit-In Exhibit at the Greensboro Historical Museum.

Pope John Paul is in the Afrian nation of Chad... where he's scheduled today to celebrate a Mass at Ndjamena's Concorde Stadium and meet with Moslem leaders in the capital before leaving for Rome.

Today's services ends John Paul's tour of drought-ridden Central and Western Africa that also took him to Burkina Faso FAH'-soh... Mali... Guinea-Bissau... and the Cape Verde islands.

Yesterday in Chad, the pontiff spoke of traditional values to an audience in the war-ravaged country. He told the Roman Catholic minority to make

what he called a ''worthy and serious commitment'' to shun abortion and divorce.

Addressing the crowed in French and the African language of Sara ... the pontiff also urged local farmers to... in his words... ''resist the temptation to abandon agriculture for an uncertain fate in the towns.''

The pope praised the work of Roman Catholic priests and lay workers during civil wars that have ravaged Chad during the last 14 years.

#90032u0726 02/01/1990 ~United Press International

(FEB. 1) UPI - A report says a drug commonly used to control high blood pressure apparently has the UNintended side effect of reducing the risk of hip fractures in older people.

The researchers studied nine-thousand 518 people aged 65 and older in New Haven, Connecticut... rural Iowa... and Boston. They found that those who took a diuretic drug known as thiazide suffered one-third fewer broken hips than a comparable group that did NOT take the drug.

Because their bones thin with age, elderly people are especially prone to breaking their hips. Officials estimate that one older woman in 20 will suffer a hip fracture.

Andrea LaCroix, an epidemiologist who led a team of investigators in Seattle... says thiazide helps prevent bone loss in elderly people because it reduces the amount of calcium they lose in urine.

LaCroix says thicker bones means fewer fractures. She says 217-thousand people aged 65 and older were hospitalized in the United States for fractured hips in 1987.

A survey of five-thousand young Americans finds that the ''me generation'' may span two decades.

65 percent of the high school students polled said they would cheat on an important exam. 53 percent said they would lie to protect their best friend.

54 percent of the boys and 22 percent of the girls said they would have sex with someone they love before marriage.

57 percent said the most important reason for helping people in their community was because... in these words... ''it makes you feel like a good person.''

35 percent of the teenage boys said they would be willing to fight for their country under any condition. Another 35 percent said they would fight under some conditions.

Asked to categorize the heroes and celebrities they admired, the largest group, 38 percent, named actors, actresses and models.

Asked who were the special adults in their lives, 94 percent said their parents. 82 percent said they believed in God.

Asked about their most important problems, 24 percent named pressure to do well in school or sports and 17 percent said what to do with their lives.

The survey was commissioned by the Girl Scouts and was conducted by Harris-Scholastic research, a division of Louis Harris and Associates.

#90032u0732 02/01/1990 ~United Press International

MIAMI (FEB. 1) UPI - Florida health officials ordered diphtheria vaccinations for thousands of Miami area children after finding a 2-year-old had died of the highly infectious disease thought to have virtually disappeared from the United States.

Four other children in the family, one of them an elementary school student, were also found to have the disease's microbes, according to preliminary tests. Final test results are due Friday, said a spokesman for the Florida Department of Health and Rehabilitative Services.

The other four youngsters had not developed the disease and were inoculated and given antibiotics, said HRS spokesman Steve Konicki.

Diphtheria is caused by a bacterium and is characterized by weakness, high fever and a thick membrane at the back of the throat.

Children in the United States have been vaccinated against diphtheria since 1928 and there have been no reports of diphtheria in Florida since 1969, Konicki said.

HRS and the federal Centers for Disease Control drafted a plan to give the series of diphtheria vaccinations and booster shots free of charge in its Dade County clinics to anyone who has not had them, Konicki said.

''This is not to panic people. There is no epidemic, just one isolated case,'' said Ruben Betancourt, another HRS spokesman.

However, Konicki said, ''We feel strongly we need to act quickly. It's a disease that can develop rapidly. We want to immunize as many kids as we

can.''

He said 10,000 to 20,000 preschool children in the county's poorer areas, where regular medical care is not always readily available, might need to be vaccinated.

Students in Dade Couty Public Schools should have had the shots, which are required before entering classes.

However, a preliminary investigation showed the Shadowlawn Elementary School student who initially tested positive for the diphtheria microbes apparently had not had the series of shots or had not completed them, Konicki said.

HRS planned to notify Shawdowlawn parents to have their children vaccinated Monday under a special HRS program at the school, unless they have already been inoculated.

''You don't wait until someone down the street comes in,'' Konicki said. ''You need to get your child in.''

HRS was alerted after the 2-year-old died Jan. 18. The boy was taken to a clinic shortly before his death with a high fever and a very bad sore throat, Konicki said.

An autopsy and lab cultures revealed he died of diphtheria, said Dade County Medical Examiner Joseph Davis. However, HRS is waiting to officially classify the death until its lab issues a report Thursday or Friday, Konicki said.

The child's parents are from Haiti but the child was born in the United States, Davis said.

''We're going to have to work harder in our outreach programs'' to alert immigrants about the importance of vaccinations, Davis said. Many come from Third World countries and have little health preventive education, he said.

Davis said there is no cause for concern among people who have already been vaccinated for diphtheria. The vaccine ''is one of the most absolute ones you can get in terms of protection,'' he said.

The CDC, which keeps track of the disease, has had only rare reports of the disease in recent years, mostly on Indian reservatons or in skid-row populations.

''It had been pretty much eradicated,'' Konicki said.

-30- 3628
#90032u0740 02/01/1990 ~United Press International
(FEB. 1) UPI - A near perfect night at the free throw line helped the Golden State Warriors deprive Portland of claiming the overall NBA lead.

The Warriors made 49 of 52 free throws, breaking their previous Bay Area best by two, in registering a 135-130 victory over the Trail Blazers Wednesday night at Oakland. The franchise record is 52, set when the club was in Philadelphia.

The Warriors hit 31 free throws in the second half to tie the franchise record.

The Blazers hit nine more field goals than Golden State, but was limited to 35 free throws, sinking 24.

Guard Mitch Richmond scored 28 points and rookie Tim Haraway added a season-best 27 as Golden State stretched its home court winning streak to 13 games. The loss broke Portland's seven-game winning streak and prevented the Trail Blazers from having the best record in the National Basketball Association over the idle Los Angeles Lakers.

Portland now is 31-12, a half-game behind the Lakers, who lead the Pacific Division at 31-11.

Golden State trailed by as many as 13 points, but was able to make up the difference at the free throw line. Richmond, held to only 6 of 16 from the field, made 16 of 16 free throws and now has hit 28 in a row in his last two games.

Forward Terry Teagle also had 27 points for Golden State while Portland's Clyde Drexler led all scorers with 38.

--- AROUND THE NBA ---

In other NBA games, Detroit defeated Washington 133-109, Philadelphia topped Indiana 112-108, Boston beat New York 97-91, Minnesota mauled Seattle 110-82, Dallas defeated Houston 98-91, San Antonio stopped Charlotte 129-95, Utah defeated the Los Angeles 120-101.

PISTONS 133, BULLETS 109

At Auburn Hills, Mich., The Pistons scored a season-high 133 points in beating the Bullets. Bernard King had 23 points for Washington, which has lost 19 of its last 20 road games. The Pistons, who shot 65 percent from the floor, have won five games in a row and eight of their last 10.

SIXERS 112, PACERS 108

At Indianapolis, Charles Barkley scored 29 points and pulled down 16 rebounds as Philadelphia extended its winning streak to nine games. The Pacers lost for the sixth time in their past seven games.

CELTICS 97, KNICKS 91

At Boston, Robert Parish scored 26 points and Larry Bird added 19, including 6 free throws in the final 1:25 of the game. Parish also grabbed a pair of key offensive rebounds in the final seconds as the Celtics handed New York its 23rd straight loss at Boston Garden.

TIMBERWOLVES 110, SONICS 82

At Minneapolis, Pooh Richardson sparked a third quarter surge with his passing to lead the Minnesota. Richardson, in only is eighth start, dished out five assists as the Timberwolves scored 21 straight points in the second half. Derrick McKey had 16 points for Seattle.

MAVERICKS 98, ROCKETS 91

At Dallas, Rolando Blackman and Sam Perkins combined for 8 points down the stretch and Dallas held Houston scoreless for 6:03 of the fourth quarter for their seventh straight win. Houston scored only 3 points over the last 6:35 of the game.

SPURS 129, HORNETS 95

At San Antonio, Terry Cummings scored a career-high 52 points to lead San Antonio to a 129-95 triumph over the Charlotte Hornets, who were playing their first game under interim coach Gene Littles. About two hours before the game, Charlotte fired head coach Dick Harter.

JAZZ 120, CLIPPERS 101

At Salt Lake City, Karl Malone scored 29 points to lead four teammates in double figures as Utah defeated the Clippers. Utah, which saw a nine-game winning streak end in Portland Tuesday night, raised its home record to 20-3.The Jazz scored the game's first eight points, then went on a 17-2 run en route to 29-14 lead after one quarter.

CHICAGO (FEB. 1) UPI - U.S. District Judge William Hart has taken under advisement requests by three Japanese yen traders to exclude incriminating statements they allegedly made to federal investigators.

Three days of hearings requested by the traders at the Chicago Mercantile Exchange concluded Wednesday. Robert Bailin, Sam Cali, and James Baker want their statements declared inadmissable for their trial on racketeering and fraud charges.

The three are among 17 traders scheduled to go on trial in April. In all, 47 traders and one clerk at the Merc and the Chicago Board of Trade have been indicted following a two-year undercover FBI investigation. One indicted yen trader, Daniel Parz, was to plead guilty Thursday. He is accused of skimming off customers accounts to cover personal losses.

In testimony Wednesday, Bailin contended FBI agents threatened to take away his seat on the CME if he did not cooperate in the investigation. Bailin said he agreed to speak to agents Maura Kelley and Kevin Rust about general trading practices, but when the two began to question him about his own activities he said he felt uncomfortable because he did not have an attorney present.

#90032u0813 02/01/1990 ~United Press International

BRUSSELS, BELGIUM (FEB. 1) UPI - President Bush's State of the Union proposals to reduce U.S. and Soviet troops in Europe won ''broad support'' from NATO allies and the Soviet Union said it is ready to discuss them.

Foreign Ministry spokesman Gennady Gerasimov told a news conference in the Soviet capital that Bush told Soviet leader Mikhail Gorbachev the essence of the proposals in a telephone conversation Wednesday before his State of the Union address.

''We will be ready to discuss them,'' Gerasimov said.

Gerasimov indicated the Vienna conventional arms reduction talks would be the forum for negotiations after Bush sounded out his NATO allies on the proposals.

The NATO Council, which consists of ambassadors from all 16 member countries, met Wednesday to discuss the Bush proposal to cut from 275,000 to 195,000.

Bush proposed the 275,000 limit for U.S. and Soviet troops stationed outside their national territory in Europe at a NATO summit in Brussels in May and it was submitted as a Western proposal at the Conventional Forces in Europe talks with the Warsaw Pact countries.

''The initial consultation showed there was broad support in principle for President Bush's proposal, to be pursued in the CFE talks,'' said a statement from NATO Secretary-General Manfred Woerner.

''These new ideas underscore the United States' commitment both to maintain significant military forces in Europe as necessary to alliance security and to pursue actively new opportunities for enhanced stability

at lower levels of arms,'' Woerner said.

Bush, in his annual address to a joint session of Congress, said the proposals reflected ''our new relationship with the Soviet Union.''

In Bonn, Chancellor Helmut Kohl hailed the proposal as ''the right signal and the right time.''

''Mr. Bush's proposal is an important step toward a new structure of security in Europe,'' Kohl said in a statement.

''This step shows that the president is ready to respond to the dramatic changes that have taken place in central and eastern Europe.''

West German Foreign Minister Hans-Dietrich Genscher called the latest initiative an ''important step forward in disarmament efforts.''

Genscher said the proposal was a ''realistic response'' to the changes that have swept eastern Europe in recent months.

British Prime Minister Margaret Thatcher also endorsed the proposals.

The cuts were discussed with Downing Street in advance of Bush's speech ''and we indicated our support,'' a statement issued on behalf of the prime minister said. ''The United States spends a higher proportion of its national income on defense than any other major European country and naturally wanted to make some reductions,''

While Gerasimov said the Soviet Union shares ''U.S. attempts to make more complete efforts to make the new year the year of disarmament,'' he said the Soviet government was not pleased by sections of Bush's address in which the president spoke of the crumbling of communism and defended U.S. policy in Panama.

''It can be criticized for redundant ideology,'' Gerasimov said.

''Such attempts to show the triumph of U.S. ideals and the fiasco of communism are in the spirit of the Cold War - a relic of the past,'' Gerasimov said.

''There is also evidence of these attutudes in the foreign policy of the United States,'' Gerasimov said.

Bush said in his address: ''Today, with communism crumbling, our aim must be to ensure democracy's advances, to take the lead in forging peace and freedom's best hope: a great and growing commonwealth of free nations.''

Gerasimov also said many news reports of the speech failed to grasp that

the United States proposed to leave in place 30,000 troops in Greece, Turkey and other locations in addition to the 95,000 elsewhere in Europe.

''That is 225,000 not 195,000. But these are details to be discussed,'' Gerasimov said.

Bush said troop strengths on both sides should be cut to 195,000 - a 26 percent cut for the United States and a 65 percent cut for the Soviet Union. But he exempted a further 30,000 U.S. servicemen stationed in Britain, Turkey, Italy and Greece.

NATO and Warsaw Pact negotiators have been meeting in Vienna since March and hope to conclude a treaty on force reductions by this fall.

Woerner said Bush's ''new steps take account of new political developments in the East, while remaining consistent with the needs of the alliance's strategy of deterrence.''

He said they ''demonstrate that the alliance maintains the conceptual leadership in these negotiations.''

TAIPEI, TAIWAN (FEB. 1) UPI - The Executive Yuan Thursday approved a bill that would permit Taiwanese investors to engage in limited trading of futures in overseas markets.

The bill set general guidelines for the establishment of futures trading companies in Taiwan and for the trading of futures on foreign exchanges, said Wang Chi-kang, director of the commerce department of the Ministry of Economic Affairs.

It also restricted trading to certain futures which have yet to be announced by the Executive Yuan, and set stringent penalties for illegal brokerage houses, he said.

According to the United Evening News, Taiwanese investors would be allowed to trade in commodities futures, but not more expensive gold and silver futures. Underground futures trading has become rampant in Taiwan in

recent years due to an excess of idle cash and an absence of clear-cut regulations.

Some 300 underground futures trading companies operate on an estimated margin of $192 million in Taiwan, a country which has $75 billion in foreign exchange reserves.

Icy cold knifed its way into the northern Plains Thursday while snow accumulated in the Rockies, thunderstorms soaked large portions of Texas and showers sprinkled the Midwest, the National Weather Service said.

Frigid temperatures kept Montana residents shivering as the mercury sank to 22 below zero at Cutbank, and wind chills made the weather feel even colder. The NWS issued a winter storm warning west of the Continental Divide, where gusty easterly winds of 20 to 30 mph caused near-blizzard conditions.

Light snow fell in Colorado while overnight lows ranged from 5 below zero to 10 above in the mountains and the teens to the low 20s elsewhere. Forecasters said the state could expect highs in the 30s Thursday.

The weather service's storm warning called for up to a foot of snow in the Cascades, running through both Washington and Oregon. The same storm hit the Idaho panhandle, where snow and gusty winds were forecast.

Scattered showers moved through parts of Oklahoma, Texas, Arkansas, and Louisiana Thursday morning, while fog reduced visibility along the Texas-Louisiana Gulf Coast. Thunderstorms hit north and central Texas, southwest Arkansas and northwest Louisiana.

Fair weather graced most of the South, buoyed by a high-pressure system, and temperatures were mild. Knoxville, Tenn., was a cool 34 degrees early in the morning, while the thermometer read 45 in Atlanta, 47 in Charleston S.C., 57, in Jacksonville, Fla. and 75 in Miami.

Light rain was reported in St. Louis, where the mercury rose to 52 degrees while cloudy skies prevailed through most of the Midwest. Light rain fell over much of Illinois and parts of Indiana and Kentucky, forecasters said.

From Wisconsin east to Michigan and south through Illinois, temperatures ranged in the mid 30s to upper 40s, although some northern areas in Wisconsin and Michigan reported 20-degree temperatures.

Patchy, dense fog moved into Vermont, western Massachusetts and Connecticut early Thursday, reducing visibility to than one-eighth of a

mile, officials said. In Maine, low temperatures and wet roads from snow-melt created black ice in many areas and hazardous driving.

Skies were clear over most of Pennsylvania early Thursday, although some patchy fog was reported in eastern portions of the state. Lows ranged from the low 20s to low 30s. Clear skies and light winds prevailed over southern New Jersey, Maryland and West Virginia, where temperatures ranged between the low 20s and the mid 30s.

#90032u0915 02/01/1990 ~United Press International

(FEB. 1) UPI - President Bush says the time is right to reduce the number of troops in Europe- both U-S and Soviet troops. In his State of the Union message last night, Bush proposed that the super-powers reduce their forces in Europe to 195-thousand. But Bush said the U-S must continue to modernize its strategic offensive weapons and push on with the ''Star Wars'' defense initiative.

A second day of fighting in Christian east Beirut today sent the death toll up to at least 52. Christian General Michel Aoun's loyalists and militiamen from the Lebanese Forces militia are fighting in the Christian enclave. Witnesses say the Christians are using tanks, artillery, jeep-mounted cannons, anti-armor rockets and heavy automatic weopons on each other.

U-S officials hope to be able to arrange today for Mexican officials to board a freighter that's riddled with bullet holes by a Coast Guard cutter. The Coast Guard opened fire after the freighter's skipper refused to allow a search for suspected illegal drugs. The freighter, taking on water and belching black smoke, fled from international waters into the Mexican port of Tampico yesterday.

The House Ethics Committee has dismissed a complaint against Congressman Gerry Sikorski. The charge against the Minnesota Democrat stemmed from his alleged misuse of professional staff members for such things as shoveling the snow at his townhouse and helping his wife in her dog-breeding business. The committee said it also dismissed a complaint against Maryland Democrat Roy Dyson.

Leaders of the Senate Armed Services Committee say they are delaying a vote on the nomination of Victor Stello to oversee the nation's nuclear weapons plants. Committee leaders say they want to wait for the outcome of a newly revealed investigation by the Nuclear Regulatory Commission. The N-R-C is investigating an internal probe that Stello authorized.

(FEB. 1) UPI - Operation Rescue is closing its headquarters in Binghamton New York. The anti-abortion group says it will focus on strengthening its chapters across the nation, while cutting expenses at headquarters. Abortion rights activists hailed the shut-down... saying Operation Rescue is showing another sign of the increasing public repudiation of anti-choice extremists.

A federal judge in Los Angeles dismissed a lawsuit against Operation Rescue yesterday. The suit accused the militant anti-abortion group of violating women's rights in blockading abortion clinics. The lawsuit was filed by the National Abortion Federation and 15 health care providers.

A report says Lyndon Johnson won the 1948 Democratic primary for the U-S Senate in Texas by stealing thousands more ballots than was previously thought. Earlier reports said Johnson stole 87 votes. The account by biographer Robert Caro says Johnson urged a lawyer he later named to the Supreme Court to help protect his victory.

A judge has refused to appoint a conservator for actor Gary Coleman, the 21-year-old former star of the T-V show ''Diff'rent Strokes.'' Coleman's mother wanted a conservator to take over the financial affairs of her son. But Los Angeles Superior Court Judge Martha Goldin denied the request.

#90032u0938 02/01/1990 ~United Press International
NEW YORK (FEB. 1) UPI - U.S. economic growth continued to decline in January for the ninth straight month and at the greatest rate of decline since December 1982, the National Association of Purchasing Management said Thursday.

The Purchasing Managers' Index fell in January to 45.2 percent, down from 46.7 percent in December. A reading below 50 generally indicates the manufacturing segment of the economy is experiencing a decline in growth. A reading above 50 usually indicates that the manufacturing portion of the economy is expanding.

The association revised the Purchasing Management Managers Index for December down to 46.7 percent, from the 48 percent reported in January. The revised figure took into account seasonal adjustment factors used by the Department of Commerce.

The association said it also revised the November index down to 46.4 percent, from 46.4 percent, and the October index down to 46.9 percent, from 47.6 percent.

The report was issued by Robert Bretz, chairman of the National

Association of Purchasing Management's Business Survey Committee, and director of materials management at Pitney Bowes Inc. Bretz said the revised figures showed the Purchasing Managing Index "has averaged a revised 48.9 percent for all of 1989."

"This is consistent with real gross national product growth of about 2.2 percent, after adding the additional 0.6 percent to reflect the rebound in agricultural output in 1989 from the 1988 drought," Bretz said.

The report said the U.S. economy was experiencing "its greatest rate of decline since December 1982," and the "production index fell significantly in January, and is at its lowest since December 1982."

"All indicators in January confirmed the anemic condition of the economy, with the exception of New Export Orders which continue to register relatively strong growth," Bretz said.

Production declined for the seventh consecutive month, the report said. The Production Index dropped to 45.4 percent, significantly lower than the revised 48.4 percent in December, and its lowest 44 percent in December 1982, at the beginning of the U.S. economy's recovery.

A number of members said their January production was curtailed by record cold weather conditions in December and early January. The Production Index had remained in the 48 percent range in the three last months of 1989. New Orders "registered a sharp decline in January" for the eight straight month, to 45.8 percent down from 49.4 percent in December, the report said.

The report pointed out the single sector of economic strength, New Export Orders Index, which rose to 55.5 percent from 53 percent in December, and had remained strong throughout 1989 despite a relatively strong dollar. Imports rose to 50.5 percent, up from 45.5 percent in December, the highest in the four months the Import Index was computed.

The Vendor Deliveries Index, renamed in the report Supplier Deliveries Index, rose to 47.2 percent, up from 42.5 percent in December, and the highest since June 1989's 47.6 percent, the report said.

Products in short supply reflected the severe weather conditions in late 1989 and were mainly in energy-related sectors. They included caustic soda used in oil refineries, natural gas and propane.

Inventories also declined in January for the 13th consecutive month, and at the fastest pace in more than four years, the report said. The Inventories Index fell to 41.8 percent, down from a revised 44.5 percent in December, and its lowest since 38.4 percent in December 1986.

Employment declined for the 11th consecutive month in January, slipping to

44.1 percent, down from a revised 44.9 percent in December, and the lowest since November 1986's 42.2 percent. A number of members reported reductions in work force through layoffs and retirement incentives.

For capital expenditures, 51 percent of the members reported lead times in the six-month or more range, up from 50 percent in December. For production materials, 58 percent of the members reported lead times of 30 days or less, up slightly from 57 percent in December. For maintenance and repairs, 86 percent of the members reported lead times of 30 days or less, down from 90 percent in December.

#90032u0955 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Construction spending decreased 0.6 percent in December to $414.6 billion, the lowest monthly rate since a one percent

decrease in June, the Commerce Department said Thursday.

December's construction spending followed a 0.7 percent increase in November to $417.3 billion, the department said. The figures were seasonally adjusted to account for such factors as the dip in construction activity associated with winter weather.

The value of new construction in 1989 increased to $414.7 billion, compared with $409.7 billion in 1988, an increase of 1.2 percent and the lowest since a 5.1 percent decrease in 1982, the department said.

Spending on new homes was $134.9 billion in December, six percent below December 1988, while non-residential construction was $96.7 billion, four percent below November's $101.1 billion, it said.

For 1989, new private construction was $330.7 billion, compared with $328.7 billion the year before, an increase of 0.6 percent, the department said. Non-residential building construction for 1989 was $99.4 billion, an increase of two percent over $97.1 billion in 1988.

December public construction was $91.1 billion, three percent above November's $88.5 billion, it said. For the year, public construction spending was $84 billion, four percent above $80.9 billion in 1988.

#90032u0963 02/01/1990 ~United Press International

TOKYO (FEB. 1) UPI - The heaviest snowfall in six years blanketed Tokyo Thursday, causing hundreds of minor injuries, closing the city airport for much of the day and creating havoc for rush-hour train commuters.

Television reports showed polar bears and penguins at the city zoo covered with snow and some shop owners fashioned snowmen in front of their businesses.

The national weather service said more than 4 inches of snow fell on central Tokyo during the day while up to 11 inches were recorded in suburbs.

The weather service said it was the heaviest Tokyo snowfall since February 1984 when 5.5 inches was dumped on the city, but far short of the 19 inches in the city's record fall in 1968.

A spokesman said the low pressure system from the Sea of Japan was expected to produce further snow during the night and taper off in the morning.

Police officials said at 350 people were injured - mostly pedestrians

slipping in the snow or coming into the path of skidding cars.

The city airport at Hanada was shut down at 10 a.m., with services resuming in the afternoon. Flights at the major international airport at Narita, 45 miles southeast of the city center, experienced delays of an hour or more.

Railway officials said 230 trains were canceled, affecting more than half a million passengers.

MANILA, PHILIPPINES (FEB. 1) UPI - Air traffic controllers protesting President Corazon Aquino's wage policies staged a one-day strike Thursday, disrupting domestic and international flights, officials said.

By late Thursday the controllers agreed to return to work at 6 a.m. Friday after transport officials promised to look into their demands for wage increases. The officials announced normal operations would resume Friday.

Philippine Airlines canceled all domestic flights in 43 airports in the country after 280 members of the air traffic controllers union went on strike shortly after midnight in protest of President Corazon Aquino's wage policies, PAL spokesman Rolando Estabillo said.

Operations at the Manila International Airport were normal during the day, but halted after 6 p.m. because the emergency crew had to rest. International services were to resume at 6 a.m. Friday.

Three PAL flights from Singapore, Bangkok, Thailand, and Hong Kong in the evening were called off, the airline said. Three flights to Hong Kong, San Francisco and Melbourne, Australia, also were canceled.

A Lufthansa German Airlines flight to Hong Kong and Frankfurt, West Germany, scheduled to leave at 8 p.m. had to leave earlier at 5:30 p.m., officials said.

Estabillo said some 200 PAL domestic flights were postponed "until the airline can be assured of positive and safe control of flights at airports and along airways."

Transportation and Communications Secretary Oscar Orbos met with union officials Wednesday night and early Thursday but failed to reach an

agreement. Orbos later Thursday was summoned to the presidential palace for a meeting with Aquino.

Orbos, who warned the striking controllers to return to work by Friday or face dismissal, said contigency plans were being put in place in the country's affected airports.

It was the second strike by the air controllers in three months. The controllers went on strike Oct. 7, paralyzing domestic and international flights but returned to work seven hours later after Aquino promised to look into their complaints.

However, the union said Aquino's promise to raise controllers' pay under the government wages standardization law has not been kept. The union said the law passed by the legislasture and approved by Aquino late last year actually reduced their wages and benefits.

After the law was passed, school teachers and employees of various government agencies went on strike to protest downward adjustment of their salaries under the wage standardization law.

#90032u1021 02/01/1990 ~United Press International
GREENSBORO, NC (FEB. 1) UPI - Four black men who demanded service at a Woolworth's lunch counter 30 years ago finally got their meal Thursday - a breakfast of bacon, eggs, grits, toast and coffee - on the anniversary of a sit-in that sparked the civil rights movement.

The Greensboro Four - Jibreel Khazan, Joe McNeil, Franklin McCain and David Richmond - were invited to Woolworth's to commemorate the protest that broke the back of Southern segregation. Woolworth's Vice President Aubrey Lewis, who is black, greeted them at the door.

''I want to thank you for what you did 30 years ago,'' Lewis told the four men. ''You had the courage to open the door for an entire movement. Thirty years ago, you could not be served here. I could not be served here. But because of what you did, I now stand here as vice president of Woolworth's.''

''We were determined to turn America around,'' said Khazan, now 48. ''It was a war that was going on. We were non-violent warriors in a war. We were struggling to be free.

''That was really our aim - to test the Bill of Rights and the Constitution, to see if they really worked,'' he said. ''We didn't have any civil rights. Most people talked about doing something. We decided to

do something.''

Thirty years ago, the four men walked into Woolworth's, purchased toothpaste and school supplies and then sat down at the lunch counter, where a waitress informed them it was against company policy to serve them.

They held up receipts from their purchases and insisted store policy was to serve blacks. But they got no meal that day, or the day after, or the day after that.

Thursday, the four made no purchases but walked directly to the lunch counter and sat down. Three of them ordered coffee and the fourth asked for water and a banana.

But Woolworth's would have none of that and out came an elaborate spread of bacon, scrambled eggs, grits and toast, in contrast to the treatment 30 years ago when they ordered a meal and got a cold shoulder instead.

''I remember it,'' said Geneva Tisdale, a black who was working at the lunch counter's steam table when the demonstration occurred. ''I was scared stiff because I didn't know what was going to happen.''

Tisdale and Ima Edwards, who also worked at the lunch counter, helped Lewis serve the celebratory breakfast Thursday to the men whose action sparked sit-ins across the South and ultimately ended the policy of whites-only eating places.

As the four ate, a crowd of several hundred gathered outside Woolworth's in tribute. Many in the crowd were white, like Alice Kaplan of Durham, N.C.

''I wanted to celebrate the courage of these men from 30 years ago,'' she said. ''I hope people will be reminded of the daily racism that exists in this country today. The struggle is not over.''

After breakfast, the four men were whisked away in a silver limousine to other events marking the anniversary.

At 4 p.m. on Monday, Feb. 1, 1960, the four students from North Carolina A&T State College, which is still predominantly black - walked into Woolworth's and sat down at the counter.

Although the dime store sold food to blacks, they were not allowed to sit at the counter where whites were routinely served.

''Fellows like you make our race look bad,'' said a black waitress who refused to serve them.

The students remained until the store closed, then returned the next

morning along with 19 others. By Wednesday, the group of protesters had grown to 85 and by Thursday there were 400 students demanding to be served at Woolworth's.

Word spread, and soon blacks were walking into all-white restaurants in other North Carolina cities - Durham, High Point, Charlotte, Winston-Salem and Raleigh.

Similar demonstrations sprang up in Tennessee, Alabama, Georgia, West Virginia, Texas and Arkansas. Mass arrests were made in Raleigh, Nashville and Montgomery. Woolworth's closed the Greensboro lunch counter.

''I was puzzled when they walked in because I didn't know what to do,'' said Edwards, who is white and worked in the bakery area. ''Many of us felt they should have been served but we couldn't do it.''

Khazan, then known as Ezell Blair Jr., said the Greensboro Four met at his parents' home on the night of Jan. 31, 1960 - 4 1/2 years before the federal Civil Rights Act made racial discrimination a crime - and agreed to enter the store the next day and demand service. But he admits they were frightened.

''It was like a drum, my knees were shaking so hard,'' he said. ''I was scared. That was a dangerous thing to do. We broke the social custom, not a written law, and that can be more dangerous.''

#90032u1085 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - Consumer confidence in the economy declined for the third consecutive month to the lowest level since the 1987 stock market crash but still does not signal a recession, the Conference Board reported Thursday.

In its most recent monthly survey of 5,000 households, the consumer confidence index dropped eight points to 105.1 "its lowest level since November 1987, when the index registered 100.8 following the stock market crash," the conference board said. A non-profit organization supported by member companies, the board set 1985 as 100 on the index.

"The present level of consumer confidence does not yet signal a likely recession in the coming months. Still, the size of the decline must be regarded as a possible ... indication of economic troubles ahead," said Fabian Linden, the board's director of consumer research.

The survey showed people have not changed their buying plans although they are less comfortable with the current situation and less optimistic about the next six months.

On the employment outlook, pessimists outnumbered optimists for the first time since the 1987 crash and only 16.2 percent believed business conditions would improve, the board said.

The portion of people planning to buy a car dropped slightly to 6.9 percent, from 7.1 percent in December. The January percentage was the same as November. Those planning to purchase a home were virtually the same - 3.4 percent versus December's 3.3 percent.

The percentage planning to buy major appliances rose slightly from 28.8 percent in December to 30 percent in January with refrigerators jumping from 4.1 to 5.1 percent and air conditioners from 1.7 to 2.6 percent. TV sets fell from 7.9 percent to 6.6 percent in January, the board said.

-30- 1980
#90032u1093 02/01/1990 ~United Press International
WASHINGTON (FEB. 1) UPI - The House ethics committee has decided not to discipline Rep. Gus Savage, D-Ill., for alleged sexual misconduct, congressional sources said Thursday.

The committee filed a report of its preliminary inquiry into the allegations Wednesday and said in a written statement that the findings would be made ''publicly as soon as possible.'' Congressional sources confirmed ''no disciplinary action'' would be taken against the congressman.

Allegations against Savage surfaced last July when The Washington Post reported that a female Peace Corp worker was sexually accosted by Savage during an official visit to Zaire.

The woman told the Post that Savage repeatedly fondled her in the back of a chauffeur-driven embassy car.

''He touched me against my will,'' the woman told the Post. ''He grabbed me. He put his arms around me. He pulled me up against him.''

The woman, however, declined to testify before the ethics committee.

Savage denied the charges and blamed the Post story on racism and his political enemies.

Savage also faced additional allegations of cutting short an official trip to China in 1986 to shop for tailored suits.

Savage was scheduled to respond to the committee's decision in a speech on the House floor later Thursday.

Savage, 64, represents Chicago's Second District and was first elected in 1980. He is a member of the Public Works and Transportation and Small Business committees.

#90032u1096 02/01/1990 ~United Press International
GENEVA (FEB. 1) UPI - Amnesty International accused Israel at the U.N. Commission on Human Rights Thursday of detaining prisoners of conscience in the occupied Arab territories.

''Amnesty International remains seriously concerned about the human rights situation in the Israeli Occupied Territories more than two years since the beginning of the Palestinian intifada (uprising),'' it said.

''Of particular concern during 1989 was the extensive use of administrative detention without charge or trial, allegations of torture and ill-treatment, and the killing of unarmed civilians by Israeli forces '' the agency said.

Amnesty, in a written statement to the U.N. Commission's 46th annual session, said more than 4,000 Palestinians served periods in administrative detention last year.

''About 1,500 remain in detention, the vast majority in harsh conditions in the Ketziot detention camp in Israel,'' it said. ''As in previous years administrative detainees included prisoners of conscience - people held exclusively for the non-violent expression of their beliefs.''

''Thousands of other Palestinians were tried by military courts in the Occupied Territories in 1989,'' Amnesty said.

Some sentences reportedly were as high as five years imprisonment for stone-throwing and up to nine years for throwing gasoline bombs, it said.

The agency said that at least 45 Israeli Jews were also held as prisoners of conscience in 1989, most of them for refusing certain types of military service such as duty in the Territories.

''Despite the high incidence of civilian deaths caused by the Israeli forces' use of firearms in apparent violation of existing guidelines, the authorities do not seem to investigate fatal shootings adequately,'' Amnesty said.

-30- 1981

#90032u1107 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - President Bush, who wants to be the ''education president,'' put forth an ambitious set of goals to revitalize America's schools, including a call for a 90 percent high school graduation rate by the turn of the century.

Developed out of last fall's ''education summit'' with the nation's governors, the other goals include making U.S. students first in the world in math and science achievement by the end of the 1990s. Literacy for all adults is another objective.

U.S. students rank among the bottom in many areas of achievement when compared with their counterparts in other industrialized nations. Studies also show the adult illiteracy rate is near 20 percent, although there are no definitive figures. The high school graduation rate in the United States is about 75 percent and as low as 50 percent in many central city areas, including the nation's capital.

The Education Department said Thursday the high school graduation rate, expressed as percentage of students who started school four years earlier, was 72.6 percent in the 1987-88 school year, the last for which statistics were available.

That figure was down from a high of 78.5 percent in 1968-69. At the start of the post-war era, however, the graduation rate was 51.3 percent in 1945-46.

Bush, who hosted the unprecedented education summit last September at the University of Virginia, announced his goals Wednesday in his State of the Union address.

They came as somewhat of a surprise since administration officials had said they would not be presented until later this month when the governors convene for their annual winter meeting.

Bush, who pledged during his 1988 election campaign to become the ''education president,'' has made education a top domestic priority. But he has been widely criticized for not seeking a significant increase in federal spending on schools. Bush maintains one is not needed.

''Real improvement in our schools is not simply a matter of spending more money,'' Bush said in his State of the Union address.

''It is a matter of asking more - expecting more - of our schools, our teachers, our kids, and our parents and ourselves,'' he said.

While he proposed some major increases - especially for the Head Start preschool program - in the proposed fiscal year 1991 budget he sent to Capitol Hill on Monday, overall spending on education will be only 1 percent of the level needed to keep pace with inflation.

In addition to increased graduation and literacy rates and higher achievement in math and science, the three other national education goals for the year 2000 urged by Bush included:

-''All children in America will start school ready to learn,'' a reference to some educators' complaints that many youngsters, particularly those in grade school, arrive at class lacking the proper nourishment and subsequently are unable to excel.

-''American students will leave grades four, eight and 12 having demonstrated competency over challenging subject matter, including English mathematics, science, history and geography.''

-''Every school in America will be free of drugs and violence and offer a

disciplined environment conducive to learning.''

The White House said Bush developed the goals with members of the Governors' Task Force on Education with advice from scores of education associations, organizations, business and community leaders and parents and teachers.

''These goals will be part of a comprehensive goals and objectives statement and presented to all governors at their winter meeting in late February,'' the White House said in a statement.

''These goals are about excellence,'' it said. ''They are about recognizing that every child, regardless of background or disability, can learn. They are based on a recognition that education is a lifelong enterprise.''

''They are about restructuring and revitalizing the education system of the United States,'' the White House said. ''They are designed to encourage a renaissance in American education.''

#90032u1136 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - A copy of the first printing of the Declaration of Independence has been sold for a record $1.59 million to a Chicago dealer, a spokesman for Sotheby's auction house said Thursday.

The document, one of 23 known to exist and only the second copy to remain in private hands, was sold to Ralph Newman, a dealer in rare American books and manuscripts, said spokesman Matthew Weigman.

The price fetched by the copy Wednesday was the highest ever for a printed piece of Americana, he said.

The document was among a host of dispatches used to bring news of America's independence from Britain to the country's 13 original colonies after the hand-written original was signed in Philadelphia, Weigman said.

The proof was set into type by John Dunlap, the first official printer to Congress. He spent the night of July 4, 1776, working on his first commission from that body, which earlier that day had formally adopted the document, Weigman said.

The number of copies actually printed from Dunlap's proof is unknown, Weigman said, noting that the documents served a utilitarian, rather than commerative purpose.

''The copies were dispatched and probably read from Town Hall. It brought

the news of the independence to the American people,'' the auction house spokesman said.

Newman reportedly says he does not plan on keeping the document for himself, but he declined to disclose who will ultimately own the copy.

The original Declaration of Independence, engrossed by a congressional assistant from the draft primarily written by Thomas Jefferson, is displayed in the National Archives in Washington, D.C.

#90032u1143 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Senate defense leaders lauded President Bush's call to further trim U.S. troop strength in Europe, but Defense Secretary Dick Cheney cautioned against any immediate assault on the Pentagon budget.

Although the risk of a Soviet and Warsaw Pact attack into Western Europe is ''fairly remote, the Soviet Union remains an extremly formidable power '' Cheney told the Senate Armed Services Committee where he testified for his nearly $307 billion 1991 budget.

''The volatility and unpredictability of the situation (in Eastern Europe) has, in many ways, increased the chance for an inadvertant conflict,'' added Cheney, who said Moscow's strategic weapons program remains robust and cautioned against cuts in similar U.S. programs.

''We must allocate our defense dollars to produce the military capabilities our national security requires, not to satisfy domestic political or economic concerns,'' he said.

Cheney did not directly address the issue of cutting troops in Central Europe to 195,000 and to 230,000 in all of Europe at the outset of his presentation, but was expected to do so in questions from panel members later in the day. And he also was expected to defend his propsal to close nearly three dozen domestic bases and defense facilities, along with a dozen overseas bases.

Committee Chairman Sam Nunn, D-Ga., lauded Bush's proposal, saying, ''I think it makes the conventional arms proposal we have on the table in Vienna a much more relevant proposal, both to the changes in Eastern Europe and to the budget reality here at home.''

And the panel's senior Republican, John Warner of Virginia, cautioned about radical budget changes now, saying, ''It seems to me that until the European situation is stabilized, until negotiations have produced a verifiable arms control treaty, until it is ratified by the Senate ..., then is the time in which to talk of major changes in strategy.''

The proposal, said Warner, ''may well have paved the way for a peace dividend. But I think you've got to address that term ... in a very responsible way and not bring up the hopes and aspirations of our people and other people that this will come about too quickly.''

European troop strength is now at 305,000, and the current U.S. proposal in the Vienna talks is to cut overall strength on both sides to 275,000.

The budget Cheney brought to Congress, $306.9 billion, is down 2.6 percent from the 1990 level after taking into account inflation. It is the sixth consecutive post-inflation decline in the defense budget, now down 14 percent in real terms since 1985. In contrast, the 1986 five-year defense plan projected spending in 1991 of $480 billion.

Among its major features are $5.5 billion for the B-2 stealth bomber, $4.5 billion for the Strategic Defense Initiative, $2.8 billion to put the 10-warhead MX missile on rail cars, and $202 billion for the one-warhead, truck-mounted Midgetman missile.

It proposes cutting overall U.S. troop strength in 1991 by 38,000, to make the reduction over 1990-1991 over 91,000 positions. Overall troop strength would drop to just over 2 million.

The budget again tries to kill off the V-22 Osprey, a tiltrotor aircraft project of Bell Helicopter and Boeing's Vertol helicopter division. It also would terminate U.S. purchases of the M-1 tank, retire the battleships Iowa and New Jersey and end a variety of lesser programs that would in total absorb over $28 billion in scarce defense dollars through 1994.

WASHINGTON (FEB. 1) UPI - A New York company facing allegations it lied to the government to win approval of its product has agreed to recall the nation's best-selling generic drug, the Food and Drug Administration said Thursday.

FDA officials said Bolar Pharmaceutical Co., of Copiague, N.Y., notified the agency this week of plans to withdraw its version of the blood pressure medication Dyazide.

The FDA started efforts to pull the Bolar medication off the market in November, saying the generic drug was not therapeutically equivalent to the brand-name product. The action came amidst revelations that Bolar allegedly switched drug samples submitted for approval tests.

About 500,000 people with high blood pressure currently take Bolar's version of Dyazide. FDA officials warned patients on the medication not to suddenly stop taking the drug, but to finish their prescription and consult a doctor about what medication they should take in its place. Brand-name Dyazide, made by SmithKline Beecham, costs about 50 percent more than the generic version.

"The news of this recall could send some people into a panic," John McHugh a drug expert with the American Association of Retired Persons, told the Wall Street Journal.

Bolar, which has been the target of a criminal investigation by the Justice Department for nearly six months, has repeatedly denied any wrongdoing and rebuffed previous FDA efforts to force a recall.

But in a statement issued Wednesday, Bolar said it has decided to stop making the blood pressure medication - the nation's most prescribed generic drug - and to recall existing supplies.

Bolar said it was taking the action because the drug's "bioequivalence cannot be assure in light of serious questions concerning the accuracy and reliability of the documentation supporting the approval." Generic drugs are supposed to be chemically equivalent to brand-name drugs whose patents have expired.

In addition to the blood pressure medication, Bolar announced Wednesday that it is recalling its version of a little-used anti-epileptic drug called Dilantin. Production of that drug was stopped last year.

Bolar said the two medications recalled this week, along with a generic antibiotic it pulled off the market in October, accounted for 47 percent of its 1989 sales of $133 million.

The FDA's generic drug division is currently confronting a scandal stemming from the bribery convictions of three FDA employees, and revelations of widespread wrongdoing in the industry.

TORONTO (FEB. 1) UPI - Movie chain Cineplex Odeon Corp. said Thursday it had completed a $47.2 million buyback of a group of theaters from Carena Developments Ltd. and was negotiating with bankers to revise long-term loan agreements.

The transaction, involving 152 screens in 55 locations across Canada, was to close Dec. 31 but was extended one month to give Cineplex's new management time to complete the deal in an orderly fashion, the company said. Cineplex said it would finance the deal with $10.6 million from its own resources and a $36.6 million demand loan from an unidentified Canadian bank.

Los Angeles-based MCA Inc. and Claridge Inc. of Montreal, both major shareholders in Cineplex, agreed to purchase the demand loan if Cineplex failed to meet its obligations.

Pierre Panet-Raymond, analyst at McDermid St. Lawrence Ltd., said the guarantee from MCA and Claridge confirmed Cineplex's shaky financial position and that the lenders were determined to avoid further risk.

Cineplex sold the theaters to Carena in September 1988 for the same amount it paid to buy them back, saying at the time they were non-strategic assets. Last August, Cineplex said it wanted the theaters because of renewed box office strength in Canada and their year-to-date performance.

Cineplex's stock price at the Toronto Stock Exchange Wednesday remained unchanged, closing at $5.63 with 163,000 shares traded. The stock price has drifted down in light volume since early December.

Panet-Raymond said the stock price was down in light volume because the stock was no longer being promoted. He also said short sellers were content to sit around and wait for the release of the annual report, which he expected would detail the company's financial troubles.

#90032u1184 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Members of the House and Senate began receiving higher but different levels of pay Thursday as the first step of a controversial pay package passed by the lawmakers last November went into effect.

The previous annual salary level of $89,500 was boosted to $96,600 for House members and $98,400 for senators.

The pay package also raises the salaries of federal judges and top officials of the executive branch.

The new House salary results from a previously deferred 4.1 percent cost of living increase for 1989 and another 3.6 percent for 1990.

Another cost of living increase is expected for 1991 and will boost House salaries to approximately $99,500 and the Senate to $101,400.

The House members then are scheduled to receive a 25 percent pay raise on Jan. 1, 1991, which will put their pay level at about $125,000.

When the pay package, which had the support of President Bush, was debated last year the House voted to take the 25 percent pay hike plus the cost-of-living increases, but the Senate, fearful of the potential political backlash, balked at taking a similar pay raise.

The senators voted instead for cost-of-living increases, starting with a 10 percent boost. As a result, members of the House and Senate are receiving different pay levels for the first time in several years. Next January, senators will be receiving about $23,000 less than House members.

The pay plan provides for the elimination or reduction of the amount of money senators and representatives can receive for making speeches or other outside activities. House members currently can keep an amount equal to 30 percent of their annual salary, but that money would be prohibited effective next January.

Senators have been able to accept receive fees amounting to 40 percent of their pay, but their pay plan calls for that limit to be gradually reduced to zero as the senators receive annual cost-of-living increases. The new limit effective Thursday is 27 percent.

Under the Senate plan, the phase-out could take several years, but a bill introduced last week by Sen. Christopher Dodd, D-Conn., and supported by several other senators would prohibit the acceptance of speaking fees and various other sources of outside income begining next year.

If that bill is passed, many senators would face a loss of income since they could not supplement their Senate pay with speaking fees, which under the 30 percent limit can be as much as $26,000 per year.

The pay plan enacted in November, shortly before Congress adjourned for the year, was the second pay hike to be proposed last year. A special commission recommended a nearly 50 percent pay increase for members of Congress and the plan was endorsed by retiring President Ronald Reagan, but widespread public outcry forced the House to vote down the plan.

#90032u1209 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Richard Breeden, chairman of the Securities and Exchange Commission, said Thursday the agency needs more tools to fight fraud in the nation's financial markets.

"What we have today is the ability to deliver a pin prick or an atom bomb. I'd like to see us have some remedies in between," Breeden told the securities subcommittee of the Senate Banking Committee.

The subcommittee is reviewing a bill introduced by Sens. John Heinz, R-Pa., and Christopher Dodd, D-Conn., to strengthen the SEC's enforcement powers. The bill would authorize new civil monetary penalties for a broader range of securities violations and would give the SEC authority to bar security law violators from serving as officers and directors of public companies.

Breeden also is seeking inclusion of a provision to give the SEC power to issue "cease and desist" orders without having to go to court for a temporary restraining order to stop the activities of suspected wrongdoers.

Breeden said the new tools are needed to preserve investor confidence in the nation's markets, which have been rocked in recent years by fraud. "It is especially important that small investors do not abandon our markets because they perceive that the federal government is unwilling to dedicate the resources necessary to protect them against unfair practices," Breeden said.

To enhance the SEC's ability to detect fraud, Breeden said he has allocated about 100 jobs in the agency's fraud prevention program. The positions are contingent upon approval of the agency's $192.4 million budget. The proposed legislation would give the SEC the authority to seek civil monetary penalties against a broader range of securities law violators.

Breeden said the agency's experience with monetary fines against insider trading violators has been posivite and has enabled the SEC to obtain more than $95 million since the passage of the Insider Trading Sanctions Act of

1984.

The agency also wants the power to order violators to return all wrongfully obtained profits, in addition to paying "substantial" monetary penalties. Current law requires only the return of illegally acquired gains.

The legislation also would allowed the SEC to bar securities law violators from serving as directors or officers of any company. Critics of this provision contend shareholders should determine who sits on a board or in the executive suite.

"I see no reason why an officer or director of a major industrial complex who has violated the law should be dealt with any differently than a banker or a broker," said Stanley Sporkin, former head of the SEC's enforcement division and now a United States District Court judge.

Sporkin told the panel the provision is not an example of "over-regulation" but an extention of the power the agency has used for many years through its consent decree process.

#90032u1217 02/01/1990 ~United Press International
BEIRUT, LEBANON (FEB. 1) UPI - Two days of fierce fighting between opposing forces for control of Lebanon's Christian enclave tapered off Thursday as mediation efforts intensified, Christian officials said.

Hospital sources said at least 60 people were killed and 250 others wounded in the fighting between troops loyal to Christian strongman Gen. Michel Aoun and militia leader Samir Geagea for the control of east Beirut the city's Christian sector.

Christian officials said Aoun and Geagea spoke on the telephone late Thursday after a round of negotiations that involved the Vatican mission and Maronite Christian patriarch Mar Nasrallah Sfair.

During the conversation, their first since the fighting broke out, the two leaders agreed on ''normalizing the situation'' in the Christian enclave, the officials said.

Aoun and Geagea, whose power struggle for leadership developed into an armed confrontation, also agreed to quit attacking each other in the press they said.

Geagea is the chief of the 10,000-strong Lebanese Forces militia while Aoun has 15,000 soldiers under his command.

Aoun, 54, regards the Christian enclave as his domain and has shown impatience with any opposition to his claim. He has also steadfastly opposed an Arab-mediated peace accord for war-torn Lebanon which other Christian leaders, including Geagea, have appeared willing to accept.

Witnesses in east Beirut said Thursday the violence had subsided as the two rival forces refrained from launching attacks. Only sporadic gunfire echoed across the shell-pocked deserted streets, they said.

But thousands of people remained huddled for the second consecutive day in corridors and underground shelters as soldiers and militiamen maintained positions on roads and atop multi-story builidings. Tanks roared through the streets, adding to a general sense of panic, the witenesses said.

Shortly before the reported telephone conversation between Aoun and Geagea a militia-operated television station showed militiamen in control of two key army bases they had captured in the port town of Jounieh, 12 miles north of Beirut.

The fighting had raged intensively with tanks, heavy artillery, jeep-mounted cannons, anti-armor rockets and automatic weapons.

A Christian militia spokesman acccused Aoun's gunners of systematically bombarding the densely populated neighborhood of Ashrafiyeh, a main militia stronghold.

Militia sources said a multi-story building in Ashrafiyeh that houses the offices of the pro-Geagea Voice of Lebanon radio station received direct hits, but the station did not stop broadcasting.

Thousands of children were stranded at schools when the fighting erupted, many suffering from hunger and cold, Christian radio stations reported.

Witnesses said fires raged out of control when fire brigades were held up by the intense fighting.

Aoun confirmed Wednesday night that Geagea's forces had seized an Army barracks in the region of Kesrouwane but said his troops were in full control of the situation in Beirut.

The U.S. State Department held Aoun responsible for the resumption of fighting in the Christian areas and reiterated demands that he step down from power.

Geagea angered Aoun when he recognized the election of Elias Hrawi, also a Christian, as Lebanon's president last November under the terms of the Arab-mediated peace accord.

The maverick Aoun opposes the accord because it does not call for the immediate withdrawal of all Syrian soldiers from Lebanon.

#90032u1219 02/01/1990 ~United Press International

SPACE CENTER, Houston (FEB. 1) UPI - Four U.S. astronauts have accepted an unprecedented Soviet invitation to witness a manned space launch, tour cosmonaut training facilities and observe the Soviet's mission control, a NASA spokesman said Thursday.

Some experts believe the American decision to visit Soviet space facilities later this month signals a new era of cooperation for space exploration.

''They (the Soviets) are doing everything they can to encourage Soviet-American space cooperation for a trip to Mars or moon bases,'' said John Pike, a space policy analyst with the American Federation of Scientists in Washington.

''Their space program clearly has become a political controversy in the Soviet Union, especially its high cost. If nothing else, a cooperative flight with the United States would improve their prospects to improve their image and financing.''

The Soviet invitation, received by NASA last month and accepted Wednesday, apparently grew out of discussions between Gen. Alexei Leonov, deputy head of the cosmonaut training center, and NASA chief astronaut Dan Brandenstein, said NASA spokesman Jeff Carr.

Leonov, a veteran cosmonaut who performed the first walk in space in 1965, spoke with Brandenstein several times during a visit to Johnson Space Center last summer, and the invitation was addressed to him, Carr said.

''They discussed the possibility of a future visit by astronauts to some Soviet space facilities,'' he said.

Brandenstein, who just commanded a record-setting, 11-day mission of the shuttle Columbia, selected astronauts Paul Weitz, Ron Grabe and Jerry Ross to accompany him on the six-day trip, Carr said.

''What you have is four guys who represent a cross section of experience in space,'' he said. ''Brandenstein, our chief astronaut; Weitz, who is experienced in Skylab and long-duration flights; Grabe, who is working on the space station; and Ross, who is our top spacewalk man and has a lot of shuttle operations background.''

Weitz also is deputy director of the Johnson Space Center.

Plans call for the astronauts to arrive in Moscow Feb. 9 and travel to the Soviet launch complex at Bakinour the next day to witness the launch of a manned Soviet spacecraft Feb. 11 or 12, Carr said.

Following the launch, the astronauts will travel to Star City near Moscow to visit the cosmonaut training center, then will visit Soviet mission control in a Moscow suburb. They will leave Moscow Feb. 14.

A number of cosmonauts have visited NASA facilities, Carr said, but he did not believe any had been at mission control during shuttle flights. A cosmonaut did witness a shuttle launch at Kennedy Space Center last year.

#90032u1225 02/01/1990 ~United Press International

ATHENS, GREECE (FEB. 1) UPI - The only surviving son of the late Ayatollah Ruhollah Khomeini warned the people of Iran Thursday against forging ties with the United States, the official Islamic Republic News Agency said.

''Those who think of making compromise with the United States are not treading the Imam's (Khomeinis) path,'' Hojatoleslam Ahmed Khomeini said at his father's shrine on the anniversary of the late Shah's return to Iran from exile in Paris.

Ahmed Khomeini holds no official position in Iran, apart from acting as custodian of his father's speeches and documents, but he expressed the views of hard-liners who oppose moves by President Akbar Hashemi Rafsanjani toward easing relations with the United States.

Ahmed Khomeini took advantage of ceremonies to mark the 11th anniversary of his father's return to Iran to lash out at the United States.

''We should make ourselves ready for resistance against the United States '' Tehran radio, monitored in Athens, quoted him as saying. He also called on Iranians to export the Islamic revolution.

Iran's leaders attended a ceremony Thursday at the Khomeini shrine about 10 miles south of Tehran.

Ayatollah Khomeini returned to Iran on Feb. 1, 1979, toppling Prime Minister Shapour Bakhtiar on the 11th day after his return. Bakhtiar's

fall marked the end of the late Shah's regime and the beginning of rule by Iranian clerics.

Tehran annually celebrates the 10-day interim between Khomeini's return and his assumption of power as the ''Ten-Day Dawn,'' holding special seminars, book exhibitions, plays, a film festival, parades and military maneuvers.

Since Khomeini died last June and Rafsanjani was elected president the following month, Iran has paid more attention to its economic problems at home than it has confronting the United States and exporting the Islamic revolution.

#90032u1237 02/01/1990 ~United Press International

(FEB. 1) UPI - VIDEO REVIEWS:

MOVIES

''Indiana Jones And The Last Crusade'' - Steven Spielberg's rousing conclusion to his Indiana Jones thrillogy finds our intrepid hero again on the trail of a religious treasure, this time the Holy Grail, again fighting off hordes of nasty Nazis, but with a new, reluctant sidekick. Indy (Harrison Ford) joins his irascible father, Professor Henry Jones (Sean Connery), in a race to find the Grail before Hitler's henchmen do, surviving one danger after another - booby traps, a fierce tank battle, shootings, fires, rampaging rats - a normal Indiana Jones outing. It's a roller coaster escapade that still manages some funny moments, largely because of the inspired interplay between Ford and Connery. The film opens with Indy as a boy (played by River Phoenix), long before he became a daredevil archeologist, to better explain the character and to introduce his father. From there, we are propelled to 1938 and the grand adventure is on. The action is familiar but exhilarating and while not quite on a par with ''Raiders Of The Lost Ark'' - that was a true classic - it comes close enough, a fitting finale to Spielberg's and executive producer George Lucas' homage to the cliffhangers of yore. 1989. 126 minutes. Paramount Home Video. Rated PG-13. $24.95. Also available in letterbox version on Super-VHS ($39.95) and laser ($29.95). One more note: for keeping up with the Joneses, there's an ''Indy Trilogy Pack'' (64.85), grouping ''The Last Crusade,'' ''Indiana Jones And The Temple of Doom'' (1984) and ''Raiders Of The Lost Ark'' (1981). Some have suggested seeing them in that reverse order to get the full story chronologically.

''Rude Awakening'' - Eric Roberts and Cheech Marin are '60s hippies who have been in a Latin American jungle all these years. Learning of a planned U.S. invasion, they elect to return home to tell the world about it. But, imagine their surprise and chagrin when they find the good old

days are long gone. They are like aliens in strange, new world. Further, their good buddies of 20 years ago have sold out - the flower children now have blossoming careers. Basically a one-joke premise that has some funny moments. 1989. 100 minutes. HBO Video. Rated R. $89.99.

''Slipstream'' - Years in the future, the world is a wasteland in this so-so sci-fi crime drama in which Mark Hamill, who earned his space spurs as Luke Skywalker, plays a cop trying to catch a murderous android. Ben Kingsley and F. Murray Abraham are in the cast. 1989. 92 minutes. MCEG/Virgin Home Entertainment. $79.95.

''Night Visitor'' - Murder and satanic worship. A young man noted for lying knows who the killer is, but no one will believe him. 1989. 93 minutes. MGM/UA Home Video. Rated R. $79.95.

''Jakarta'' - About a CIA agent and a beautiful double-spy he thought was dead, but isn't, leading him to make another effort to save her, though now he's not sure which is the victim. 1988. 94 minutes. MCEG/Virgin Home Entertainment. Rated R. $79.95.

VINTAGE VIDEO

''The Magnificent Ambersons'' - While Ted Turner decided against colorizing ''Citizen Kane,'' he did put the crayons to Orson Welles' masterful ''Kane'' followup, ''The Magnificent Ambersons.'' The overall effect is pretty good, the colors muted enough not to take away totally the somber mood Welles coaxed with his black-and-white cinematography, yet bright enough to enhance especially the outdoors scenes. Based on a novel by Booth Tarkington, the moving story tells of an aristocratic American family unwilling to change with the times, leading to financial ruin, and the conflict between a spoiled young man and his mother's lover. Stars Joseph Cotton, Agnes Moorehead, Tim Holt and Dolores Costello, produced and directed by Welles. Outstanding, no matter how you paint it. 1941. 88 minutes. Turner Home Entertainment. Color enhanced. $19.98.

VIDBITS

Still tops among the nation's video movie renters: ''When Harry Met Sally ...'' with ''Road House'' remaining in No. 2. ''License To Kill'' has moved into third place ... The Rolling Stones ''tell their own story'' in a two-hour-plus video biography of the rock group's quarter century, ''25 x 5: The Continuing Adventures Of The Rolling Stones.'' Due out Feb. 13, the documentary includes some 40 songs, rare performance footage and interviews with the musicians. From CBS Music Video, $19.98 ...

''Picnic,'' the exceptional 1955 love story, finally makes it to home video on March 21, along with ''The More The Merrier'' (1943), from RCA/Columbia which also is re-issuing three giants from the past - ''On ''

-30- 4824
#90032u1244 02/01/1990 ~United Press International
WASHINGTON (FEB. 1) UPI - President Bush will not ask again for Senate approval of Joy Silverman, his nominee to be ambassador to Barbados, and instead announced Thursday he will make her a trustee of the John F. Kennedy Center for the Performing Arts.

Bowing to pressure from senators who claimed Silverman was not qualified for the diplomatic post, Bush's spokesman said the president was taking the action at the request of the New York fund-raiser.

Silverman was nominated by Bush last year to be U.S. ambassador to Barbados, accredited also to Dominica, Saint Lucia, Saint Vincent and the Grenadines. She was awarded the plum job because of her New York work and contributions for the Bush campaign but came under criticism for having no foreign policy experience and virtually no paid employment in recent years.

The Senate at the end of the last session sent the Silverman nomination back to the White House, which could have resubmitted it.

''She has asked, however, that for family reasons, the president not return her name to the Senate for this post,'' the White House said in a statement. ''The president remains fully confident in Mrs. Silverman and her capacity for public service, and is pleased she has agreed to devote her considerable energy to the Kennedy Center.''

WARSAW, POLAND (FEB. 1) UPI - Parliament debated legislation Thursday that would abolish censorship and make Poland the second East bloc country after Hungary where freedom of the press is guaranteed by law.

The press legislation was discussed during the current session of the 460-member Sejm, or lower house of Parliament, and is expected to be approved at the next session in two weeks.

Barbara Labuda of the Solidarity parliamentary caucus told deputies that censorship introduced by communists more than four decades ago should be replaced by freedom of the press.

''I am a supporter of full freedom of speech and information in writing, films and other forms of publications,'' Labuda said. ''I am for personal responsibility of those who write.''

The legislation would abolish the main and regional censors' offices, which are controlled by the Communist Party.

Although press censorship was liberalized under the Solidarity government, censors still continue to intervene, especially with news reports that strongly criticize the Soviet Union.

In the past, editors had to submit their news articles to censors before they were allowed to go to print.

Draft legislation proposed by Prime Minister Tadeusz Mazowiecki drew criticism from the deputies because it called for the registration of publishers who want to start up new newspapers and magazines.

The proposal would punish publishers who don't register with jail sentences of up to six months.

Solidarity deputy Tadeusz Kowalczyk described the proposal as repressive.

''The court should be only informed about the founding of a new publication,'' Kowalczyk said.

WASHINGTON (FEB. 1) UPI - President Bush's proposed 25 percent cut in an

energy assistance program for the poor and elderly will increase homelessness and threaten the health and safety of society's most vulnerable, consumer advocates told a House panel Thursday.

In his 1991 budget proposal, Bush recommended spending $1.07 billion for the Low-Income Home Energy Assistance Program, a $293 million reduction from the 1990 budget. The program offers home heating financial assistance, including funds for weatherization, for the poor and elderly.

At a hearing of a House Education and Labor subcommittee, Rep. Dale Kildee D-Mich., pointed out that when he became chairman of the panel in 1985, $2.1 billion was appropriated for the program.

''I'm really wondering how we can justify cutting in half a program for the most vulnerable people in our society,'' Kildee said, comparing the 1985 level with the 1991 budget request. ''In that same time, we've seen a doubling of the Pentagon budget.''

Eunice Thomas, acting assistance secretary of the Department of Health and Human Services, defended the budget cut request.

''We believe it is time to reassess the federal government's financial role in this area,'' Thomas said. ''The broad variation in energy assistance needs can be well addressed by individual states and localities and there are substantial federal resources to support them.''

Thomas contended that low income households' home heating costs have dropped in recent years. She said they spent 5.9 percent of their income on home heating in 1984 and 3.9 percent in 1988.

Kildee and consumer advocates who testified differed with Thomas' figures and urged that the program be reauthorized and given increased funding.

''We recognize that there is a strong sentiment for fiscal restraint at the federal level, but we believe that further reductions in (energy assistance) funding will increase homelessness and otherwise threaten the health and safety of low income citizens,'' said Lynda Crandall of the Michigan Department of Social Services.

''Congress needs to take a stand on behalf of the needy,'' said Richard Sievers, executive director of Mid-Sioux Opportunity of Remsen, Iowa, a private, non-profit community action agency.

Several witnesses detailed the cases of people who froze to death because of an inability to pay utility bills or those who were saved from such a fate because of funds from the program.

''LIHEAP represents a very crucial preventive approach ... to homelessness

'' said Janet Parrish, chair of the National Fuel Funds Network of Philadelphia, a clearinghouse for information on the various private fuel funds.

#90032u1252 02/01/1990 ~United Press International

ANKARA, TURKEY (FEB. 1) UPI - Unidentified gunmen, believed to be members of an Islamic fundamentalist group, killed a prominent Turkish politician in a suburb of the capital, police said Thursday.

Muammer Aksoy, a former member of Parliament and a leading secularist, was killed outside his home in Bahcelievlar, a suburb of Ankara, late Wednesday, a police spokesman said.

Witnesses saw three unidentified gunmen making their getaway, authorities said. Several newspapers reported that anonymous callers, who said they were members of the Islamic Revenge Organization, claimed responsibility for the killing.

Police said they had not heard of the group, but believed it was made up of Islamic fundamentalists.

Aksoy's assassination, the third apparently politically motivated homicide in one week, touched off fears in the Turkish capital that the country was returning to the type of terrorism that preceded the military takeover of September 1980.

The military coup led by Gen. Kenan Evren in 1980 put a stop to the violence and the junta gradually returned the country to civilian rule in 1982.

The two earlier slayings in the past week included that of a retired member of the Turkish Intelligence Service and of an Istanbul police officer who participated in action to stop student demonstrations.

Aksoy, a professor of law, was killed at the entrance to his home. The callers who claimed responsibility did not say why they killed him.

#90032u1255 02/01/1990 ~United Press International

CHAPEL HILL, NC (FEB. 1) UPI - After waiting more than 65 years to marry her high school beau, 83-year-old Euzelia Smart figures she deserves a wedding so big it will knock the groom's socks off.

Smart and 82-year-old Wade Brown, considered having a low-key ceremony with a justice of the peace. But so many people asked to be invited, a

church ceremony just seemed more appropriate.

''Look, I have waited 60 years for this,'' Smart said, ''and I am going to march right down that aisle.''

Smart and Brown plan to tie the knot Saturday after an on-and-off-again courtship that outlasted the Great Depression, World War II, the free love movement of the 1960s, Watergate and the Reagan presidency.

The couple will exchange vows at Binkley Baptist Church in Chapel Hill. The guest list has blossomed to more than 200.

They began their relationship in 1924, when they were in high school. They dated through college, but sometime after their respective graduations the pair drifted apart.

Brown, a native of Blowing Rock, graduated from Wake Forest, started a successful law practice and married another high school classmate. The couple produced three children and Brown went on to two terms as mayor of Boone and then was elected to the North Carolina Legislature.

Smart, a native of Ellenboro, attended Meredith College and earned a graduate degree from Columbia University. She toured with the Red Cross during World War II, ''moving whenever the troops moved.'' She taught at the University of North Carolina and retired in 1972.

Brown's wife died last year and he contacted Mars Hill College to obtain Smart's address.

''He wrote to me saying he was trying to organize a '60-Plus Club' of Mars Hill graduates,'' Smart said. ''I reponded, and he came to Chapel Hill to see me.

''Actually, we really just picked up where we left off,'' she said. ''I am really not sure why we ever left off in the first place.''

The couple has procrastinated so long about tying the knot, that it has become a habit. They've decided to delay their honeymoon until spring, when they plan to cruise down the Mississippi River on the Delta Queen.

#90032u1313 02/01/1990 ~United Press International

LONDON (FEB. 1) UPI - Stock prices closed higher in thin trading Thursday on the London International stock exchange.

The key Financial Times 100-stock index, which gained 15.3 points Wednesday, closed up 8.5 points at 2,345.8. The narrower top 30 industrial

average added 2.0 points to 1,866.0.

Volume amounted to around a light 470 million shares, compared with 575 million shares traded Wednesday.

Analysts attributed the market's slight gain to a mark-up operation by market makers.

They said interest from institutional investors continued to focus on special stocks with strong defensive qualities and attractive yields.

Among the most widely traded stocks, Barclays Bank gained 18 cents to $9.40 after the bank announced that former Chancellor of the Exchequer Nigel Lawson had been appointed to the board of Britain's largest commercial bank.

Cable and Wireless lost 16 cents to $8.52 as investors waited word on the Hong Kong telephone stake sale.

British Aerospace climbed 26 cents to $8.95 after being awarded a $168 million Ministry of Defense aircraft conversion contract.

Among the day's other active issues, Laing Properties tumbled 34 cents to $8.85 and Sock Shop eased 21 cents to 83 cents a share following a warning that it the company expects losses for the year.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed higher in moderate trading in the wake of President Bush's proposal to cut U.S. troops, traders said.

The German Stock Index gained 35.30 points to 1,858.08.

BY VERNON SCOTT

HOLLYWOOD (FEB. 1) UPI - Long before Mikhail Gorbachev's reforms in the Soviet Union, Leeza Vinnichenko came up with her own version of glasnost by fleeing to the West.

The blonde, round-faced, plump actress needs only a babushka to complete the picture of a Russian peasant, a character she has been playing in Hollywood movies and TV shows for more than 20 years.

For years the native of Nalchick on the Black Sea was the only Soviet-born actress working regularly in American films - a distinction that has been

a mixed blessing.

''I have always been called in when a role required a Russian woman,'' she said.

''But many times the parts went to American actresses putting on accents. Oriental, Mexican and Indian actors are protesting against such practices, but there aren't enough Russians to make a noise for casting ethnic performers.

''There were countless Russian roles I didn't get, so I have been obliged to play other ethnic minorities, including all kinds of Europeans. I couldn't eat if I depended only on playing Russians.

''Anyhow, most Russian parts call for villains and almost all of them are men.''

She has played French, Germans, Scandinavians even an American doctor in an episode of ''Doogie Howser, M.D.''

''I was cast in the only color episode of a 'Perry Mason' TV show, playing a Mexican woman with a black wig. Because of my blue eyes there were not too many closeups.''

Most often, however, she plays women named Freda, Svetlana, Helga and Olga.

With the advent of glasnost, Vinnichenko finds herself coming out of the closet.

''For my whole career I was in the closet,'' she said. ''I arrived as an actress at the time of the McCarthy hearings when all things Russian were suspect and looked down upon. I did not advertise the fact I was Russian.''

Now that she is able to speak proudly of her heritage, Vinnichenko expects more acting competition from Soviet immigrants who find their way to Hollywood. She does what she can to help them find agents and make contacts.

''There are only about five competent Russian actresses in town right now '' she said. ''There are many more actors.

''But no Russian has become really prominent since Leonid Kinskey and Mischa Auer.

''There will be more Russians coming to Hollywood, but the difficulty is that the main tool of the actor is language. It is terribly hard for an adult Russian to learn to speak English without an accent.

''For example there is Savely Kramarov who was Russia's biggest superstar, a favorite of the Kremlin. He is here now but he can only find small roles. The same is true of Vladimir Skomarovsky. He was very famous in the Soviet Union.

''Vladimir is a genius, but cannot prove it in Hollywood films. He is Jewish. It is easier for Russian Jews to get out of the country than it is for non-Jews. As far as I know, I'm the only Russian actress here who is not Jewish.''

A hearty, good-natured woman, Vinnichenko says Russians in the film community are not clannish.

''I don't known why most of them do not hang around with other Russians,'' she said. ''Yakov Smirnoff prefers the company of Americans because he must keep abreast of cultural trends, gossip and expressions for his comedy act.

''There is a different mentality among Russians when they isolate themselves. We're a very strange breed. We are not as supportive of one another as other minority groups. That's because we come from deprivation and shortages.

''Russians establish themselves and are afraid new arrivals from the Soviet Union will take things like jobs away from them. They feel the newcomers' success will diminish the possibility of their success.

''I don't want to sound lofty or self-satisfied. It is only because I have been in America long enough to think and feel like an American.

''I've been here since 1955 so I suppose I am Mother Russia in Hollywood. The new arrivals know who I am and come to me for help.

''The more Americans give to someone else, the more they have for themselves. I am American citizen, but I am happy now to be able to say I was born a Russian.''

#90032u1327 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - Capital Cities/ABC Inc. said Thursday Chairman Thomas Murphy will relinquish his position as chief executive officer of the broadcasting and publishing corporation effective June 1.

Murphy serves as both chairman and CEO of the company which he joined when Capital Cities was formed in 1954.

The company said Murphy, who will turn 65 on May 1, will recommend to the

board that President Daniel Burke be elected CEO. Burke is likely to retain his position as President after succeeding to Murphy who will remain chairman of Capital Cities/ABC.

Capital Cities acquired American Broadcasting Inc. in 1986. The company now owns the ABC television network, six radio networks, eight television stations and 21 radio stations, as well as nine daily newspapers and a number of magazine and book publishing operations.

Murphy was elected president of the company in 1964 and became chairman two years later.

Murphy also serves as a director on the board of International Business Machines Corp., Texaco Inc., Johnson & Johnson, and General Housewares Corp.

Burke, who is also chief operating officer of Capital Cities/ABC, joined the company in 1961 as general manager of WTEN-TV in Albany, N.Y., where Capital Cities started as a broadcasting company, owning and operating a television and a radio station.

In 1969, Burke became president of the Capital Cities' publishing division after the company started to diversify its operations in 1968. He became president and chief operating officer three years later.

WASHINGTON (FEB. 1) UPI - President Bush is hopeful Nelson Mandela will be released from prison Friday and will invite the black nationalist if he is freed to visit Washington, a White House spokesman said Thursday.

But White House press secretary Marlin Fitzwater said while there were ''indications'' that could happen, the United States had no firm word that Mandela might be released from life imprisonment on Friday when South African President Frederik de Klerk opens Parliament, as has been widely speculated.

''We would certainly support his release. We're hopeful he's released,'' Fitzwater said. ''If Mandela is released Friday, the president will invite him to come to Washington at his convenience.''

Fitzwater's comments came as reports surfaced in Capetown, South Africa, that Mandela and de Klerk were negotiating terms in hopes of announcing the black activist's release in the near future.

Mandela, 71, sentenced to life imprisonment in 1964 on sabotage charges, is said to be insisting his release be accompanied by a lifting of a 3

1/2-year-old state of emergency and an end to the ban on the African National Congress, which has been outlawed since 1960.

De Klerk, who has called for power-sharing negotiations with the black majority to end the country's racial conflict, is said to want to introduce the reforms gradually after the release of the world's most famous political prisoner.

#90032u1340 02/01/1990 ~United Press International

KANSAS CITY, MO. (FEB. 1) UPI - Christian Okoye, who led the NFL by rushing for 1,480 yards last season and was named the AFC offensive player of the year, signed a series of one-year contracts with the Kansas City Chiefs, the team announced Thursday.

Terms of the deal and the number of contracts were not released.

Okoye, 28, set a club record with his 1,480 yards. The 6-1, 260-pound fullback from Enugu, Nigeria, also led the NFL with eight 100-yard performances, including a personal high of 170 yards against the Dallas Cowboys.

His 370 rushing attempts set a team record and also led the NFL. He rushed for 12 touchdowns, which was the best mark in the AFC.

''Christian Okoye has been a very valuable member of the Kansas City Chiefs team,'' Kansas City President Carl Peterson said in a release. ''We are very proud of his numerous accomplishments this past season, and we are very pleased that he will continue to be an integral part of our offense in the future.''

Okoye arrived in the United States in 1982 to compete in track and field at Azusa Pacific. He was a 17-time NAIA all-American in track. He took up football in 1984, setting several NAIA rushing records during his three seasons as the school's fullback. He led the NAIA in rushing his senior season and was a second-round choice of the Chiefs in the 1987 draft.

He rushed for 660 yards as a rookie and 473 in an injury-shortened 1988 season before piling up his team-record total in 1989.

#90032u1352 02/01/1990 ~United Press International

TRENTON, NJ (FEB. 1) UPI - Thousands of defective condoms fell onto a major highway in New Jersey's state capital after a canvas cover tore off a trash truck, police said Thursday.

Police said thousands of orange and white, factory-rejected Trojan-brand condoms littered Route 1 during Wednesday's evening rush hour.

Motorists slowed and stared, then laughed and smiled after recognizing the debris, police said.

The condoms spilled from a National Waste Disposal Inc. truck hauling millions of rejected condoms when the truck's canvas cover ripped loose about 4:15 p.m., police said.

''He just didn't have it secured tightly enough,'' Cpl. Freeman Earl of the Delaware River Joint Toll Bridge Commission police said.

Spills of personal hygiene products are not unusual in New Jersey: ocean resorts have had problems in recent years with used tampon applicator tubes washing up on beaches along with hypodermic syringes and medical waste, some of it tainted with the deadly AIDS virus.

The spilled condoms came from the Carter-Wallace pharmaceutical plant in Trenton, one of the nation's largest producers of condoms.

The condoms were swept up by work crews using brooms, rakes and shovels about an hour after the accident.

#90032u1373 02/01/1990 ~United Press International

PUNXSUTAWNEY, PA (FEB. 1) UPI - No matter what the Old Farmer's Almanac predicts, the final word on whether spring is just around the corner will not be written until Punxsutawney Phil has his say Friday.

At the crack of dawn on Groundhog Day, an estimated 1,500 residents and visitors to the western Pennsylvania town in Jefferson County will form a caravan to Gobbler's Knob, the groundhog's legendary den, and assemble before the white-hot glare of lights and television cameras to watch Phil in action.

As legend goes, if Phil sees his shadow, the nation is in for six more weeks of winter weather. But if he does not, expect an early spring.

It is the 103rd year for the annual ceremony and fans of Phil contend he is never wrong.

The King of the Weather Prophets holds his own against the National Weather Service, except perhaps with forecasters in the Pittsburgh office. The weather service is predicting rain and temperatures in the upper 30s for Punxsutawney on Friday and that, coupled with the TV lights and flashbulbs, could make Phil's job difficult this year.

''I'm a scientific person myself,'' said forecaster Richard Leonardon. ''Every groundhog I know has been burrowed in since about Nov. 20 and you probably won't see 'em again until around mid-to-late March.''

Every groundhog, that is, but Phil.

At the Groundhog Zoo in the town nestled in the valley of Mahoning Creek are actually three groundhogs - Phil, Philomena and Barney - kept for the purpose of keeping the town's claim to fame alive.

Jim Means, a retired building contractor, is president of the Punxsutawney Groundhog Club. He is the man who will lead the 14 members of the Inner Circle to Gobbler's Knob, then tap his cane on the door of a hollowed-out tree stump, calling Phil forward.

Groundhog handler Bud Dunkel will retrieve the semi-tame rodent for his place on the stage.

Means' traditional introduction is, ''His Majesty, Punxsutawney Phil!'' And it always takes time for the cheers to die down, before Phil whispers his secret prediction in groundhogese.

-30- 2287

#90032u1378 02/01/1990 ~United Press International

(FEB. 1) UPI - A report says South African President de Klerk intends to meet jailed black nationalist leader Nelson Mandela today. The men reportedly will discuss their differences over conditions for the black nationalist's release from prison. The 71-year-old Mandela was sentenced to life imprisonment in 1964 on sabotage charges.

Frigid air cut into the northern Plains this morning, while snow accumulated in the Rockies. Cold temperatures kept Montana residents shivering as the mercury sank to 22 below zero at Cutbank... and wind chills made the weather feel even colder. The National Weather Service issued a winter storm warning west of the Continental Divide.

A North Carolina jury has sentenced a 21-year-old Winston-Salem man to life in prison for offering two friends cash and sports cars to kill his parents. Christopher Pritchard was sentenced for aiding and abetting second-degree murder of his stepfather. Pritchard also received a 20-year prison term for assault charges in connection with an attack on his mother who survived.

A survey of five-thousand American school children between the ages of nine and 18 says 70 percent of those polled believe a girl should have the final say about getting an abortion. The survey... which was commissioned

by the Girls Scouts... also says 57 percent would advise a pregnant friend to have the baby. The survey was conducted in October and November of last year.

-30- 1602

#90032u1393 02/01/1990 ~United Press International

HENDERSONVILLE, NC (FEB. 1) UPI - The heir to a textile fortune was sentenced Thursday to 150 days in prison and five years probation for molesting two youngsters at a Blue Ridge Mountains summer camp for rich kids.

John Yorke Pharr III, grandson of a founder of Stowe-Pharr textile mills, was sentenced to five years in prison, suspended on the condition that he serve 150 days in state prison followed by five years of supervised probation.

''He must serve 150 days in state prison, day for day, flat out,'' said District Attorney Alan Leonard. ''After that he will undergo supervised probation for five years and he is supposed to get any counseling or treatment the probation office recommends. He must stay away from children.''

Pharr, 41, continued to insist he was innocent of charges that he took indecent liberties with minors attending Camp Falling Creek, a summer camp for privileged children that Pharr owned in nearby Tuxedo, N.C.

''I have found solid strength with my faith in God, my family and my friends throughout this ordeal,'' said Pharr, an elder in the local Presbyterian Church. ''(But) it is very difficult for me to accept this verdict.''

Pharr had been charged with two counts of taking indecent liberties with minors and faced up to 20 years in prison after the jury returned its verdict Tuesday.

Four children testified against Pharr during his trial, each telling nearly identical accounts of being taken on skinny dipping outings and then invited to share his sleeping bag, during which they said the molestations occurred.

Pharr said he shared his sleeping bag with the youngsters, who were each 10 years old, because they were homesick.

Leonard said the 150-day sentence was offered in part because of North Carolina's crowded prison system, which often means early release for offenders.

''He would have been out in six months anyway and back on the street without supervision,'' Lenoard said. ''On balance this is a better sentence.''

Although four boys testified against Pharr, he was actually charged with molesting only two of them - schoolmates from West Palm Beach, Fla. The other two youngsters were from Arizona and Maryland.

Camp Falling Creek, which Pharr bought in 1971 and sold for more than $1 million last year, catered to the children of wealthy parents who typically paid $2,500 for a three-week session.

Leonard said the fact someone like Pharr was found guilty of molesting children should serve as a warning to all parents to screen carefully anyone providing child care.

''I think it's going to tend to make parents more cautious,'' Leonard said. ''But goodness knows, they should be in this day and time, whether it's summer camp or at the daycare center, at the Y or at church.

''You can't be too careful,'' the district attorney said. ''He was a pillar of the community. It shows this can happen anywhere, anytime. No person is immune.''

#90032u1401 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Slower economic growth is on the horizon this year but the threat of a recession is unlikely, a panel of bank economists said Thursday.

The Economic Advisory Committee of the American Bankers Association, concluding a two-day assessment of the nation's economy, forecast a meager expansion during the first half of the year and higher, but "subpar" growth in the second half.

The panel of 13 economists projected economic growth of only 1.8 percent this year, well below the 3.3 percent growth forecast by the Bush administration in its preparations of the fiscal 1991 budget.

Economic growth is expected to improve to 2.5 percent next year, the economists said. The panel said inflation would remain above four percent during the year, with a temporary rise above five percent during in early 1990.

"This combination of slow growth and stubborn inflation is not optimal but is likely to prevail through 1990," said Kathleen Cooper, the committee's chairman and chief economist at Security Pacific National Bank in Los

Angeles.

Cooper said the bank economists "strong support" the Federal Reserve's policy of progressively lowering inflation "even though this may require a level of growth below the economy's long-run trend."

The economists said the current uptick in long-term U.S. interest rates, which was sparked by renewed inflation concerns and higher Japanese rates, will subside by the end of the first quarter. Cooper said the decline in interest rates will be moderate because of lingering concerns about inflation.

Also forecast was a U.S. trade deficit of about $110 billion and a slight weakening of the dollar against the yen. The economists encouraed the Federal Reserve to reduce its monetary growth targets by one-half of a percentage point.

-30- 2011

#90032u1415 02/01/1990 ~United Press International

EAST BERLIN (FEB. 1) UPI - East Germany's reform-minded prime minister called Thursday for the reunification of Germany as a neutral federation with a single government and a capital in Berlin.

Hans Modrow made the dramatic statement two days after he returned from talks with Soviet President Mikhail Gorbachev in Moscow, telling a news conference that ''Germany shall again become a unified fatherland of all citizens of the German nation.''

But West German Chancellor Helmut Kohl late Thursday rejected Modrow's proposal for a neutral united Germany that would belong to neither the Warsaw Pact nor the NATO alliance.

''A united Germany in the heart of Europe cannot be allowed to have a special status or be isolated,'' said Kohl, who been receptive to the principle of reunification of East and West Germany, separated since the end of World War II.

Kohl said West Germany would delay discussion of the reunification process until after elections are held in East Germany in March.

Modrow, at his news conference in East Berlin, dubbed the plan ''for Germany, united fatherland,'' a slogan that has become the rallying call for hundreds of thousands of East Germans demonstrating in favor of German reunification in recent months.

Modrow said the two nations would first sign a treaty regulating their relations, then form a confederation and finally a federation with the

creation of a single parliament and new constitution.

The capital of the new government would be in Berlin, Germany's former capital, which has been administered since World War II by the Allies - the United States, England, France and the Soviet Union.

He also said the reunited Germany would be a neutral state, no longer aligned to military blocs.

''One can assume that during the confederative process both German states will gradually loosen their commitments to third countries and achieve the status of military neutrality,'' Modrow said.

Officials in Bonn have said West Germany would remain firmly in the NATO alliance.

Modrow stressed he is proposing a ''conceptual'' framework for eventual reunification and not a timetable.

''We must be cautious and we must not put down any time limit if we want to move forward and address the issue,'' Modrow said.

Modrow also said it is time to resolve the legacy of World War II and called on the Allies to end the division of Europe that followed the defeat of Nazi Germany in 1945.

''The four powers should declare a readiness, during the process of German confederation, to resolve all of the questions that resulted from World War II and after, including the continued presence of foreign troops on German soil and the affiliations of the military alliances,'' Modrow said.

Western experts estimate that there are 350,000 Soviet troops in East Germany while NATO forces number about 400,000 in West Germany.

Modrow said he planned to discuss his proposal with Kohl during his visit to West Germany later this month.

''A final solution of the German question can only be reached through free self-determination of Germans in both states, in cooperation with the four powers and under consideration of the interests of all European states,'' Modrow said.

''The rapproachment of the two German states and their unification that follows may not be seen by anyone as a threat,'' he said.

Modrow's statement was the first direct call for reunification by an East German government leader and follows growing domestic pressure for it.

In Bonn, West German officials welcomed Modrow's readiness to work for German unity but his insistance on neutrality was criticized as unrealistic.

Observers believe the call for reunification may strengthen Modrow's transitional government, which has been shaken in recent months by strikes and protests, a rapidly crumbling economy and harsh criticism of communist dominance of his administration.

Later this week, Modrow is expected to confirm a new, non-partisan government that will rule until democratic elections scheduled for March 18.

The Communist Party earlier announced it was prepared to give up its dominant position in government and become an opposition party after the elections - the first since a popular uprising ousted the nation's Stalinst leadership last fall.

#90032u1418 02/01/1990 ~United Press International

DALLAS (FEB. 1) UPI - Triton Energy Corp., an independent international energy company, Thursday said it was considering the sale of its European subsidiary, Triton Europe P.L.C., which accounts for about 40 percent of its proven reserves.

The Dallas-based Triton owns 59.47 percent of Triton Europe which has a current market capitalization of about $240 million. Triton Europe's majority of the reserves are concentrated in the Paris Basin of France which were developed about eight years ago. It is headquartered in The Hague and has additional operations in the United Kingdom and the North Sea.

Triton Europe is listed on the London International stock exchange. Its remaining shares are publicly-owned. In 1989, prices of those shares ranged from a high of $3.30 to a low of $2.42 a share.

Triton Energy, which has suffered large losses in recent quarters, said it has engaged Credit Suisse First Boston Limited "to explore strategic alternatives" which could include the sale of all or part of its stake in the subsidiary.

"Triton stressed that no assurance can be given that any transaction will result from this engagement," the company said. If the subsidiary is sold, the proceeds would be used to reduce Triton Energy's outstanding debts of about $250 million.

Triton officials said they have asked the investment banking firm to

prepare a model based on a likely asking price of about $200 million. At the current market capitalization of $240 million, that asking price would give Triton Energy a premium of about $55 million on its holdings.

Spokesman Phil Shook said the company sees the sale of the subsidiary as a way to "bring the value home." He said the subsidiary currently is not providing cash flow to the parent company. The earnings are reinvested in the subsidiary.

Triton Energy currenlty has proven reserves of 82 million equivalent barrels. Of that Triton Europe accounts for 32 million barrels, most of it crude oil from the Paris Basin.

In the six months of fiscal 1990 ended Nov. 30, 1989, Triton Energy had a loss of $10.8 million (66 cents a share) on revenues of $135 million. In the same period of the previous fiscal year, it lost $18.2 million ($1.05 a share) on revenues of $96 million.

Last year, the company took $14 million of non-cash writedowns of assets. It divested about 20 percent of its oil and gas properties in the United States, located in Texas, Louisiana, Mississippi, Oklahoma, California, North Dakota, and Utah. Triton also has interests in Canada, Australia, Argentina, Gabon, Colombia, Thailand and New Zealand.

TORONTO (FEB. 1) UPI - A Canadian bank acknowledged Thursday it has launched an action against Robert Campeau, embattled chairman of Campeau Corp., for default on a $21.2 million personal loan.

In a statement of claim dated Jan. 19 and filed at the Supreme Court of Ontario, the Bank of Montreal said it was seeking $21.2 million plus almost $600,000 in interest from Robert Campeau. A spokesman for the bank said legal proceedings were initiated against Campeau, but declined further comment.

The claim said the bank was owed more than $585,000 in unpaid interest as of last Dec. 31 on a loan agreement dating from September 1987. A letter was sent to Campeau, dated Dec. 12, demanding payment but he "has neglected or refused to pay," the claim said.

Under Ontario law, Campeau is obliged to prepare a statement of defense within 20 days of the statement of claim being served. If a defense is not filed, the court may pass judgement without further notice.

On Jan. 4, the Montreal-based National Bank of Canada seized control of 29 percent of Campeau's outstanding common shares for default on a loan to a

company owned by Robert Campeau. That exchange of shares left the National Bank as Campeau Corp.'s second largest shareholder.

Less than a week later, two representatives of the National Bank were elected to Campeau's board of directors, as the bank sought a stronger voice in efforts to restructure the floundering retail and real-estate company.

On Jan. 15, Campeau's two United States retailing divisions, Federated Department Stores Inc., and Allied Stores Corp., now jointly renamed Federated Stores Inc., filed for Chapter 11 bankruptcy in Cincinnati to reorganize while protected from creditors, listing indebtedness of about $7.5 billion.

#90032u1442 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - In the aftermath of his call for deeper troop cuts in Europe, President Bush was defended Thursday against suggestions his public rhetoric does not always reflect the private realities of his foreign policy.

The secrecy with which the proposal was conceived, developed and finally added to his State of the Union speech Wednesday night provoked questions about whether, in the process, the public was misled about U.S. policy.

Asserting the intent was not secrecy for its own sake, White House chief of staff John Sununu told reporters Bush wanted to ensure his prerogatives were not undermined by being ''debated in headlines'' before a final decision.

''If it could be accomplished any other way,'' Sununu said, ''it would have been done.''

Still, the background of the proposal to cut U.S. and Soviet troops in parts of Europe to 195,000 - down from the 275,000 limit set by Bush eight months ago - had elements similar to two previous secret foreign policy gambits: his overtures to China and the superpower summit on Malta.

In both cases, Bush's actions seemed at odds with perceptions of stated U.S. policy: sending high-level envoys to Beijing after banning ''high-level exchanges'' to protest the Tianenman Square massacre; arranging to meet with Soviet President Mikhail Gorbachev at a time when U.S. officials were dismissing speculation of a summit before late spring or early summer of 1990.

White House officials tried to explain away the apparent discrepencies with semantics: On China, high-level exchanges were said to not be the

same as high-level contacts; Malta, they insisted, was a meeting, a non-summit-summit.

The troop-cut proposal similarly contrasted to most recent indications that Bush wanted to reach the target reductions already on the table at East-West negotiations in Vienna before setting more ambitious goals.

Facing a hopeful deadline of September for completing a formal treaty, Bush said after the Malta summit: ''We ought to manage that before we start the architecture of something else. I want to see that done on time.''

Sununu, however, said Bush subsequently had been moved by the events in Eastern Europe to rethink his position, increasingly concerned that U.S. policy was not keeping pace with political change.

''It was clear that the gap - the difference - in where this world was today was not the same place the world was at the end of November,'' Sununu said.

The events of December and January - the fall of holdout communist regimes in Czechoslovakia and Romania and demands by Warsaw Pact allies Poland, Hungary and Czechoslovakia that Soviet troops leave their soil - convinced Bush that security in Europe could be assured at far lower force levels, he said.

To suggestions the move was designed to help Gorbachev fend off conservative critics in the Kremlin, Sununu said, ''I suggest to you that if the cutting of troops would have been an advantage for Mr. Gorbachev, that Mr. Gorbachev would probably have announced it earlier himself, thereby getting both the advantage, the pressuring of the United States to do it and whatever international political benefits that come in that direction.''

Even in the absence of a move by Gorbachev, the impetus clearly came from Eastern Europe, where the Soviets have promised unilateral troop withdrawals and where President Vaclav Havel of Czechoslovakia said less than three weeks ago that he would visit Moscow and Washington to press for bigger force reductions.

Sununu said Bush decided just after New Year's that ''in order to be honest and credible on the basis of the current conditions rather than what was analyzed in November, we had to make that adjustment.''

That directive, officials said, set into motion an expedited review. Though coinciding with preparations for a fight with Congress over where cuts in defense spending, officials insisted the deliberations were not budget-driven.

Sununu said the idea of having the new troop-cut plan included in the State of the Union, which otherwise was devoid of major initiatives, was hatched ''about a week or 10 days ago.'' A pair of top administration officials left Sunday on a secret trip to brief officials in four NATO capitals and other allies were consulted by letter or telephone.

The final notification came Wednesday morning, about 14 hours before his speech, when Bush called Gorbachev. The two spoke for around 10 minutes about the new U.S. proposal on troops and other unspecified issues.

''It was a very cordial conversation,'' Sununu said. ''It was very upbeat.''

Though encumbered with translators at both ends, he said, ''there was a surprising amount of banter back and forth.''

#90032u1456 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Iranian arms middleman Albert Hakim was sentenced to two years probation and a $5,000 fine Thursday for his role in the Iran-Contra scandal.

U.S. District Judge Gerhard Gesell said Hakim had provided ''exceptional'' cooperation with the Iran-Contra special prosecutor, was drawn into the scandal by the U.S. government and had helped to secure the release of American hostage David Jacobsen.

Hakim pleaded guilty in late November to a misdemeanor charge of making an illegal payment to former White House aide Oliver North.

Hakim played a key role in a covert operation known as ''the enterprise'' to provide secret U.S. arms to Iran, then funnel the profits through Swiss bank accounts and divert millions of dollars to the Nicaraguan Contras during a congressional ban on such assistance.

Gesell told Hakim he had ''suffered substantially from aspects of the intense publicity'' that had affected his business and the families of all the Iran-Contra defendants.

Gesell said it was ''extremely clear that you have provided, and are continuing to provide, exceptional aid'' to the Iran-Contra special prosecutor, ''in sharp contrast'' to other defendants in the arms scandal.

Gesell said Hakim was ''brought into the situation you find yourself in by the U.S. government.''

Outside the courthouse, Hakim blasted Ronald Reagan and special Iran-Contra prosecutor Lawrence Walsh, referring to both men as ''presidents'' and saying, ''I have been abused by two presidents.''

''The result of all this is that our judicial system has been used as a tool by the politicans for their own gain,'' said Hakim.

The federal judge also referred to an arrangement under which Hakim had relinquished claims to ''very substantial funds'' still frozen by the United States in various overseas bank accounts.

Mary Belcher, Walsh's spokeswoman, said the U.S. government persuaded Swiss authorities in late 1986 to freeze $7.8 million in Swiss bank accounts. That money belonged to ''the enterprise'' and eventually it earned $1.2 million in interest for a total of $9 million.

The United States filed a claim to the money, along with Hakim - who also had claimed all of it. A Swiss financial manager, Willard Zucker, claimed $800,000 and Hakim's Swiss lawyer, Philippe Neyroud, claimed $120,000.

Under the deal Gesell referred to in court, the U.S. government withdrew its claim on $1.7 million of the $9 million total, leaving $7.3 million remaining. The United States still claims the $7.3 million, saying it represents illegal arms sales profits.

Hakim withdrew his claim on all but $1.7 million of the money and also accepted responsibility for the other two outstanding claims, Belcher said.

The deal must still be presented to Swiss authorities, Belcher said, but she added: ''This simplifies things about a thousand percent.''

The United States is still claiming the $7.3 million, saying that is the amount tracable to the Iranian arms sales.

Hakim was the seventh Iran-Contra defendant to be indicted in the scandal, the worst of Reagan's presidency. None of the six who were convicted or agreed to a plea bargain has been sentenced to prison. Charges were dismissed against the seventh, former CIA official Joseph Fernandez, because Attorney General Dick Thornburgh barred the use of sensitive information at trial.

Hakim was the business partner of retired Air Force Maj. Gen. Richard Secord, also sentenced to two years of probation.

Hakim's lawyer, N. Richard Janis, said Hakim was prosecuted as part of a ''political dispute'' between the president and Congress and the case never belonged in the criminal justice system. The White House staff and scores of federal government agencies gave him ''support and assurances''

in carrying out his actions in the Iran-Contra scandal, Janis said.

Jacobsen, interviewed on the Cable News Network, said, ''I have really mixed feelings over the situation. One, a sadness and also a joy - joy that the judge treated him (Hakim) very leniently. The real sadness that he was ever indicted and brought up on some minor, trivial charges.''

Jacobsen, who was released from Middle East captivity in October 1986, wrote a letter to the judge saying, ''I would be in my fifth year of captivity had it not been for'' Hakim's negotiating perseverance.

North was sentenced to two years of probation, 1,200 hours of community service and a $20,000 fine for obstruction of Congress, illegally mutilating government documents and taking an illegal gratuity - a $14,000 security fence.

The security fence also snared Hakim. He pleaded guilty to supplementing North's salary by making an illegal payment to North.

Gesell said Hakim could travel worldwide during his probation, as long as he gave 48 hours notice to the federal probation office in San Jose, Calif., where he has been reporting regularly.

Earlier this week, Walsh disclosed that he plans additional Iran-Contra prosecutions as the result of Hakim's cooperation. Currently, only one defendant awaits trail - John M. Poindexter, a retired rear admiral who was Reagan's national security adviser.

Poindexter has subpoenaed excerpts of Reagan's personal diaries for the trial and also is trying to force Reagan to testify. Reagan is resisting.

#90032u1460 02/01/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (FEB. 1) UPI - President Frederik de Klerk never intended to meet Thursday with jailed black nationalist Nelson Mandela, despite media reports that the two were going to discuss Mandela's freedom de Klerk's office said.

A senior government source was quoted in Thursday morning newspapers saying De Klerk and Mandela would meet before the opening of parliament Friday in an attempt to resolve differences over the timing of Mandela's release from life imprisonment and the circumstances.

However a statement issued by the office of the president said the meeting never took place.

''In response to numerous media queries and widespread speculation it can

be stated that a meeting did not take place today between the state president, Mr.F.W. de Klerk and Mr. Nelson Mandela,'' it said.

''Furthermore no such meeting is planned before the opening of Parliament on Feb. 2, 1990,'' it said.

The Cape Times reported in its Thursday edition the two would meet at an undisclosed spot to seek a compromise allowing de Klerk to give a firmer indication when he opens Parliament Friday of when Mandela may be freed.

But late in the day, after hours of speculation on whether the nation's two most powerful men had met at an undisclosed location, de Klerk's office said no meeting had taken place and none had been planned.

Mandela, 71, sentenced to life imprisonment in 1964 on sabotage charges, is said to be insisting his release be accompanied by the lifting of a 3 1/2-year-old state of emergency and an end to the ban on the African National Congress, which has been outlawed since 1960.

De Klerk, who has called for power-sharing negotiations with the black majority to end the country's racial conflict, is said to want to introduce the reforms gradually after the release of the world's most famous political prisoner.

The Cape Times said a compromise between the two could enable de Klerk to announce Mandela's release within the next two weeks.

The only known meeting between the two men was on Dec. 13 at Tuynhuys, de Klerk's office in the legislative capital of Cape Town. They discussed ''current obstacles in the way of meaningful dialogue,'' according to an official announcement.

For the past year, Mandela has been imprisoned in a suburban-style house with a swimming pool on the grounds of the minimum-security Victor Verster prison, about 30 miles north of Cape Town in the wine-growing region of Paarl.

Recently he has met with dozens of anti-apartheid leaders, fulfilling a role as a ''facilitator'' in the proposed power-sharing talks.

Speculation his release was imminent was fueled Jan. 8 when his wife, Winnie, emerged from a prison visit to say Mandela's freedom was only weeks away. But Saturday she again met her husband and reported ''obstacles'' had arisen and that he was growing impatient.

#90032u1468 02/01/1990 ~United Press International

(FEB. 1) UPI - TODAY'S PEOPLE:

MIAMI LOAN: A Miami businessman is taking Don Johnson to court, claiming the actor hasn't paid back an interest-free $300,000 handshake loan for the construction of a speed boat. Martin Ergas says he loaned the money last spring on the basis of an oral agreement and expected it to be repaid by November. But Johnson's lawyer says the money really isn't due until 1995. Neil Berman, Ergas's attorney, said Ergas recently talked with Johnson about the matter. ''I don't know what Johnson said exactly, but I do know Marty was left with the impression that Johnson said, 'You're not getting paid now,''' Berman said. ''It was a shock. Their whole deal was predicated on trust among friends.'' Ergas, a paraplegic since a childhood accident, says he got involved with Johnson because of their mutual interest in research into spinal injuries, and the purpose of the racing boat was to promote public awareness of spinal cord injuries. Last year, contractors in Colorado filed suit against Johnson, claiming he hadn't finished paying for renovations on his mountain home.

THE MAID'S TALE: Frank Sinatra's former maid tells some tales about her ex-boss in Friday's broadcast of ''A Current Affair.'' Joan Hanna says the dogs at Frank Sinatra's Palm Springs, Calif., home live in an air-conditioned house with Sinatra music piped in and that the singer stores his 15 toupees in a caboose. ''It's a real caboose,'' Hanna says. ''The barber comes once every two weeks to go look through these toupees, comb them out and reshape them. He (Sinatra) is not totally bald. He has a little hair that grows on the sides of his ears.'' Hanna says Sinatra spends most of his time in his pajamas and doesn't see much of his wife, because he sleeps all day and roams all night. That's better than the domestic scene she describes for another former employer, Tony Bennett. Hanna says Bennett once had a wife who beat him two to three times a week, sometimes so badly that doctors would have to make housecalls to stitch him up or set broken bones.

JACKSONIAN DIPLOMACY: Janet Jackson says the success of Paula Abdul, her former choreographer, hasn't hurt their friendship. But she does admit to a healthy rivalry with brother Michael Jackson. ''When 'Thriller' came out I was so envious,'' Janet says of her brother's record-setting hit album. ''It was so incredible. I was so happy for him, but it was like, 'Why can't that be me?' That's what inspired me. I'd love to break any of his records. That would be great for me.'' Jackson, in the upcoming issue of Rolling Stone, says Abdul's hit records, which compete on the charts with her own, haven't eroded their relationship. ''I'm really happy for the success that she's had,'' Jackson says. ''She's a very ambitious girl and I know that's something she wanted deep down. We're all reaching for that same spot. I don't feel that we're really competitors, I guess because I know her and love her. She's more like a sister than a competitor.''

ROSEY THE SOCIAL WORKER: Former football star Rosey Grier has been hired

by San Diego County, Calif., as a special assistant for social action programs. Grier, who followed up his 12-year NFL career with stints as an actor and author, will earn $50,000 a year working two to three days a week doing citizen outreach work. County Chief Administrative Officer Norman Hickey, who played football with Grier at Penn State University in the early 1950s, says Grier ''has repeatedly demonstrated a unique capability to interface with virtually every facet of humanity, even those who have become splintered from society.'' The new bureaucrat's first assignment is the ''New Beginnings'' program aimed at improving services to needy youngsters and their families.

GLIMPSES: A Memphis, Tenn., church is putting on a benefit Friday night for Ben Cauley, the only survivor of the 1967 plane crash that killed soul singer Otis Redding and Cauley's band, the Bar-Kays. Cauley, 42, a trumpet player, has had two strokes and is unable to work, but will perform along with several other Memphis acts in the concert at the Mount Gilead Missionary Church ... Civil rights pioneer Rosa Parks will be honored Sunday at a 77th birthday benefit at the Kennedy Center in Washington. Lou Rawls, Dionne Warwick, Melissa Manchester and the Neville Brothers are scheduled to entertain an expected 3,000 guests.

#90032u1477 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - American Telephone & Telegraph Co. announced Thursday the expansion of its worlwide high-performance fiber-optic network in the Pacific Rim area.

"Taiwan and the Philippines were joined today to a worldwide fiber-optic network as AT&T completed a $178 million undersea telecommunications cable " the company said.

The cable hooks up in Guam where communications are connected to AT&T's worlwide fiber-optic network already serving Japan, the United States, Canada, and Europe.

The new 2,333-mile cable meets high-performance telecommunication requirements with voice, data and video circuits. AT&T introduced fiber-optic telecommunications in the mid-80s and is a leader in the technology which was developed at the AT&T Bell Laboratories in New Jersey.

"The worlwide fiber-optic network is constantly expanding and is never likely to be really completed as AT&T keeps on adding points to better serve customers," said Bill Carter, vice president, international communications systems. Carter said AT&T plans to add more international points this year, "when the undersea fiber-optic cable will be extended to Hong Kong and South Korea."

"AT&T also will extend its fiber-optic network later this year to connect the U.S. mainland with Puerto Rico, Jamaica, the Dominican Republic and Colombia," Carter also said. "It is a major expansion of fiber-optic communications in the Caribbean area."

Communications systems using fiber-optic technology provide a high degree of reliability which allows to transmit complex digital signals, including a high volume of database information, video or fax signals for international business transactions. In the audio field, fiber-optics provide high quality for international communications going through a number of relay points.

The high-capacity cable, made of six optical fibers and 53 repeaters, can handle simultaneously 40,000 telephone conversations, the company said. The equipment was manufactured at AT&T's facility in Atlanta, and installed by C.S. Long Lines, the company's unit handling maritime communications.

The first call transmitted on the new cable was between AT&T President of International Communications Services John Berndt and the executive officers of national telephone companies in the Philippines and Taiwan.

AT&T owns one-third of the fiber-optic cable. There are 22 other owners of the cable system, including local telecommunications companies of the countries served, and several long-distance carriers in the United States.

AT&T Bell Laboratories are currently developing a new digital optic computer technology which could make today's supercomputers obsolete by the end of the decade and add improved features to a wide array of electronic products within two years.

#90032u1488 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - The Bush administration said Thursday it will try to remove absolute congressional control over its multibillion-dollar foreign aid program to get more flexibility in conducting foreign policy.

But members of the Senate Foreign Relations Committee suggested that Congress will not surrender its control lightly.

The foreign aid assistance presented Thursday by the administration amounts to $14.2 billion in outlays, plus another $6.6 billion requested for conducting foreign business such as the operation of the State Department and protecting U.S. installations overseas.

The total request of $20.8 billion is a 9 percent increase over the current year's amount.

''We can't conduct our foreign policy without a certain amount of flexibility,'' Secretary of State James Baker told the Senate committee.

Baker referred to the removal of congressional ''earmarks'' that determine how about 90 percent of the aid program will be spent. Earmarks are amendments to the final bill in which favored countries, such as Israel and Egypt, are required to receive the full amount of their foreign aid, even if the total amount of the foreign assistance appropriation is cut by Congress.

The practice means that smaller, less favored nations in the Caribbean and sub-Saharan Africa bear the brunt of any congressional cuts in the total amount.

''It would be nice if we could do away them (congressional earmarks). I realize it's not realistic. A lot of politics is involved. But what we are really after is some flexibility,'' Baker said.

Sen. Alan Cranston, D-Calif., said he would oppose the administration on the earmark issue, which he said guarantees the United States can keep commitments to friendly nations.

Sen. Nancy Kassebaum, R-Kan., has introduced a bill that would abolish congressional earmarks in the foreign aid program, but State Department officials said they give the measure little or no chance of success.

The only major changes in the foreign aid program proposed for fiscal year 1991 involved Eastern Europe, Panama, the anti-narcotics program and paying up past dues for international organizations such as the United Nations.

A special fund of $300 million was set up for Eastern Europe - mainly for Poland and Hungary - but with the possibility that other countries, such as Czechoslovakia, will be included as they establish their new governments. In addition, the United States has committed $640 million over a five-year program to an aid program involving 23 other Western governments.

An immediate $72 million would be made available for humanitarian aid in Panama, including money for food and the restoration of housing damaged during the Dec. 20 U.S. invasion. In addition, the U.S. government would be prepared to insure trade contracts and renew sugar subsidies for the Panamanian government.

The administration would spend $528 million on the drug war involving foreign countries, a $230 million increase over the current year. The major share, $442 million, would be spent on Bolivia, Colombia and Peru.

The proposed budget seeks for Congress to allocate $888 million to pay U.S. past due bills to the United Nations and its associated agencies, including those involved in refugee relief.

The largest programs in the aid package - $3 billion for Israel and $2.26 billion for Egypt - are virtually the same as the current year. There was no suggestion in the administration package that it is now prepared to follow Senate Republican leader Robert Dole's suggestion of taking 5 percent from those larger programs to make funds available to Eastern Europe.

#90032u1509 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Saying back-seat lap belts are a "menace" responsible for hundreds of deaths and crippling injuries a year, a consumer group urged automakers Thursday to install inexpensive back-seat shoulder belts in all cars.

New cars are required to have back-seat shoulder belts under an industry standard, but the Institute for Injury Reduction called for a joint effort by automakers, insurers, and the government to make sure all 140 million cars now on the road are equipped with the shoulder harnesses.

"The rear-seat lap-only belt design remains a menace, and it represents a special threat to children because they are the more likely occupants of rear-seat positions," said the group's president, Benjamin Kelley.

He said lap belts fail to prevent a passenger's head from hitting hard objects within a car and concentrate "hugely increased amounts of force" on the midsection, leading to spinal and abdominal injuries.

In an interview, Kelley said children are less able than adults to withstand such force to the midsection. In one case, a Maryland boy's "head was literally torn off (his spinal cord) by the whipping action," he said.

The IIR plan, endorsed by dozens of doctors and other consumer groups, calls for car dealers to install "low-cost" shoulder belts and to promote their use. The group also wrote Transportation Secretary Samuel Skinner asking him to encourage companies to take such action and, if necessary, seek congressional authority to require them to do so.

Kelley said U.S. cars built since 1970 have "anchorage points" for lap-shoulder belts and claimed such belts could be installed at the profit for about $40. But the IIR said its survey of 30 dealers in six cities found they ask an average of $200 and as much as $530 for the job. In all cases, they lacked the necessary supplies.

Kelley said his group had not contacted auto companies about the plan. But he described the proposal as a reasonable response to an "epidemic" of

injuries. "I could argue that the auto companies should willingly do this for nothing, but I just want to get this moving," he said.

Toni Simonetti, a General Motors spokeswoman in Warren, Mich., said the No. 1 automaker has sent materials to dealers encouraging them to install back-seat shoulder belts but cautioned that dealers are independent operators.

"We're also looking at variety of ways ... to encourage dealers to pass savings on to customers," she said. "We've been doing it all along. This is not a reaction to anything Ben Kelley had to say."

Kelley's group was joined in its call by victims of lap-belt injuries and their relatives, including Oney Santibanez of Miami and her daughter Alexandra, who was left paraplegic at age 5.

Santibanez said her Honda had a back-seat shoulder belt but the owner's manual said small children should only wear the lap belt. When another car ran a red light and struck her car, Santibanez suffered knee injuries. She learned in the hospital that Alexandra, now 7, would never walk again.

"The idea that other children and parents must suffer this way, all because the back seats of the their cars aren't equipped with shoulder belts, is intolerable," said Santibanez, who is now active in a group called the Miami Project, which is working to help paraplegics walk again.

The IIR said the National Highway Traffic Safety Administration estimates that based on ten percent use of back-seat belts, there are 410 serious or fatal accidents involving lap belts each year. The consumer group argued that seat belt use is closer to 30 percent, meaning there are about 1,200 such deaths and injuries every year.

CHICAGO (FEB. 1) UPI - Soybeans made session highs at midday Thursday on spillover from aggressive buying in soybean options, then fell to session lows when the options trading dried up.

Soybeans were lower across the board on the Chicago Board of Trade while grain prices were narrowly mixed at the close.

Active trading in soybean options for the second consecutive day fueled the rally in soybeans along with commercial and professional buying. But when the activity in options faded, soybean prices tumbled.

Soybean oil and meal also made session highs during the noon hour before selling off in sympathy with the downturn in soybeans.

The lack of near-term export business pressured grain futures, although new-crop wheat was slightly higher.

Trading ranges in the grains were narrow and the volume was light.

Precipitation was reported or predicted in much of the Grain Belt which also weighed on grain prices.

Country movement was light.

At the close, corn was off 1/2 to 1, soybeans down 1 to 3, wheat off 1/2 to up 1 3/4 and oats up 1 to down 1/2.

#90032u1551 02/01/1990 ~United Press International
WASHINGTON (FEB. 1) UPI - Secretary of State James Baker said Thursday the United States should seek ''a new global relationship'' with the Soviet Union that both eases tensions and promotes the reformist policies of Mikhail Gorbachev.

Baker, appearing before the Senate Foreign Relations Committee, said the crucial test of Moscow's determination to improve superpowers relations will be the Kremlin's role in resolving regional disputes.

The secretary of state presented a broad review of President Bush's foreign policy one day after the president's State of the Union address in which Bush proposed deeper U.S.-Soviet troop cuts in Europe and called for quick results in negotiations on limiting chemical, conventional and

strategic arms.

Baker, who is to visit Moscow next week for talks on troop reductions and other issues leading to a summit later this year, reaffirmed Bush's support for the success of ''perestroika'' - Gorbachev's policy of economic restructuring.

''Our goals are to institutionalize a new strategic relationship with the Soviet Union through verifiable arms control treaties and confidence building measures,'' Baker said.

''We seek to forge a new global relationship with the Soviets by pressing them to help end regional disputes peacefully,'' he said.

Pressing Moscow on regional disputes has been a staple of U.S. policy and met with some success late in the Reagan administration when Moscow and Washington worked together in arranging a withdrawal of Soviet troops from Afghanistan. The Bush administration is concerned with the Soviet role in Nicaragua and in seeking a political settlement in Cambodia.

Baker told the committee he is delaying his departure for Moscow by one day, leading to speculation that he is close to putting together a three-way meeting on the Middle East, involving him, the foreign minister of Israel and the foreign minister of Egypt.

Baker did not elaborate but his spokeswoman said ''no meeting is scheduled '' though she did not rule out such an encounter.

There is a one or two-day gap in Baker's schedule next week, leading to speculation that he may meet the other foreign ministers in Western Europe to open a dialogue on Palestinian elections in the occupied West Bank and Gaza.

Touching on a sensitive subject, the president's $300 billion-plus fiscal 1991 military budget, Baker told the committee, ''In these ways we will reduce the burden of defense spending over time.''

Defense Secretary Dick Cheney was also on Capitol Hill Thursday discussing defense spending in detail and the prosepects for what many members of Congress hope will be a result of reduced tension between the superpowers - a ''peace dividend'' of less spending on arms.

Baker broke no new ground in his general foreign policy assessment but appeared to be more positive than he was in his confirmation hearing 13 months ago regarding the prospects for political reform in the Soviet Union.

Since then, dramatic political change has swept through Eastern Europe,

turning out communist goverments from the Baltic to the Black Sea.

''In short, we seek to probe the points of mutual advantage with the Soviet Union, turning areas of conflict into areas of cooperation wherever possible,'' Baker said. ''In this way we will benefit ourselves as well as the reformers in Moscow.''

go regarding the prospects for political reform in the Soviet Union.

BAKU, U.S.S.R (FEB. 1) UPI - Strikes, power failures and material

shortages idled factories throughout the troubled southern Soviet republics of Azerbaijan and Armenia Thursday.

Railroads were at a standstill and thousands of Azerbaijani workers have turned in or ripped up their Communist Party cards, protesting occupation of the region by Soviet troops, who authorities maintain are trying to keep peace between warring ethnic groups.

The death toll in the current crisis in the Azerbaijani capital of Baku, scene of violence since Jan. 13, was said by the city authorities Thursday to be 139 - 33 of them Soviet troops or police.

Official figures also said close to 498 people were wounded.

Soviet officials have disclosed that in Azerbaijan, about 18,000 people have left the Communist Party in the last few weeks, many ripping up their cards in public protest at the Soviet intervention. But they claim many have done so after intimidation by nationalists.

Soviet troops stormed into Baku Jan. 10 in an attempt to quash recent ethnic violence that left more than 60 people dead - mostly Christian Armenians killed by Moslem Azerbaijani nationalists.

The authorities estimated that strikes had idled about 50 out of 500 state-owned factories Thursday in the Azerbaijani capital.

The picture in nine other Azerbaijani cities and towns and in the enclave of Nakhichevan was similar. Lenkoran, Gyandzha, Agdam, Sheki, Sumgait, Ilyichevsk, Babek, Gulf and Ordubad were all affected, Tass said.

Tass said losses to industrial enterprises in Azerbaijan since the trouble started were estimated by the republic's statistical committee at more than $350 million.

Strikes also swept the mostly Armenian enclave of Nagorno-Karakabkh located inside Azerbaijan, where Christian Armenians were protesting a visit by Azerbaijani republican leaders. Control of the enclave has been a key point of dispute between the neighboring republics of Azerbaijan and Armenia.

An Azerbaijan Popular Front delegation arrived in Riga, the capital of the the Baltic Latvian republic Thursday for preliminary talks that could lead to weekend round-table discussions with the Armenian Popular Front.

The talks, brokered by the popular fronts of the Soviet Baltic states of Estonia, Latvia and Lithuania, represent the first time that a non-state organization has adopted a prominent role in mediation attempts in the Soviet Union.

It remained uncertain Thursday whether the Azerbaijani and Armenian Popular Front delegations would meet face-to-face in Riga, but the Baltic Council said it was confident a multilateral plenum could be arranged.

Trains were beginning to move in the enclave and troops cleared the highways. But the capital, Stepanakert, was at a standstill with factories closed and schools and kindergartens empty.

More than 160 trains - most filled with supplies for Armenia - were idle in Azerbaijan where nationalists are refusing to let them run. Tass said 10,000 rail cars were blocking tracks right across the republic.

In Armenia, lack of fuel supplies threatened a blackout crisis. Factories were shut, schools closed and electricity was rationed. Private homes have been without heat and light for long periods daily and television transmissions have been cut to save power.

Tass said there was a wave of robberies and attacks on civilians in the Idzevan-Kazak border area. The agency said the situation was ''complex.''

Soviet troops continued to monitor border-crossings into Iran closely and Tass said arrests of Moslem Azerbaijanis trying to slip over in both directions illegally were running at more than 200 a day.

In Baku, which was opened to foreign correspondents for the first time Thursday since the trouble began, soldiers in full combat gear patrolled streets and were stationed at every intersection of this Caspian Sea capital.

Black flags of mourning flew from many buildings and on the main road to the airport there were flowers strewn on the sidewalks marking the places people died.

The troops wore brown helmets and camouflage suits and were armed with Kalashnikov assault rifles and submachine guns. They were stopping all traffic after dark and searching cars. Few trucks were on the streets. Tanks were kept outside the downtown area but soldiers moved around in small, armored personnel carriers.

There were 5,000 Red Army troops in the city and 12,000 Interior Ministry soldiers, an Army spokesman said.

City Commandant Lt. Gen. Vladimir Dubinyak told journalists Thursday he would like to lift an 11 p.m. to 5 a.m. curfew imposed by Soviet authorities as well as a declared state of emergency within two weeks.

''It seems to me it might be in the middle of February,'' he said.

Dubinyak said he would then like to move troops out of the city in a phased pullback.

''If there are no more attacks on soldiers, which unfortunately there have been, then we shall take away the armored patrols,'' he said.

#90032u1590 02/01/1990 ~United Press International

(FEB. 1) UPI - NATO headquarters in Brussels reports what is termed ''broad support'' in the Western alliance for the proposal by President Bush for even deeper troop cuts in Europe. And the Soviet Union says it will be ready to discuss the proposal at the conventional arms reduction talks in Geneva, Switzerland. Bush announced his proposal in his ''State of the Union'' address last night, drawing bi-partisan support on Capitol Hill. He told Soviet President Gorbachev about the proposal in a telephone call yesterday.

In Brussels, NATO Secretary General Manfred Woerner said in a statement that the idea shows the U-S commitment both to maintain adequate forces in Europe and to enhance stability at lower troop levels. The Soviet Foreign Ministry said in Moscow that Bush outlined the proposal in his telephone talks with Gorbachev yesterday.

The Democratic response to the Bush ''State of the Union'' address concentrated on domestic issues. House Speaker Thomas Foley of Washington said administration actions do NOT match the Bush rhetoric. And he again blasted the president's decision to veto a bill to protect Chinese students in the United States from being forced to return home. Foley said Democrats will work with Bush wherever they can... but will stand their ground against the president when necessary for the good of the nation's working people.

Thai police say they are hunting for two gunmen who shot and killed three Saudi Arabian diplomats today in Bangkok. A spokesman says the three were killed in two separate shooting incidents within about one mile of each other. The victims included the Saudi charge d'affaire . An official spokesman declined to speculate on a motive in the slayings.

#90032u1594 02/01/1990 ~United Press International

ATLANTA (FEB. 1) UPI - Coca-Cola Enterprises, the bottling unit of the soft-drink company, said Thursday its earnings fell 95.6 percent to $2.4 million, or two cents a share, in the fourth quarter, compared with $54.6 million, or 40 cents a share, in the year-ago quarter. Revenues increased to $911.8 million from $895.2 in 1988.

For the year ended Dec. 31, earnings fell 62.5 percent to $53.5 million, or 41 cents a share, compared with $142.7 million, or $1.03 a share, in 1988. Revenues remained equal at about $3.9 billion.

Brian G. Dyson, president and chief executive officer of Coca-Cola Enterprises, said the company's volume in physical cases of beverage decreased about one percent for the full year and two percent for the fourth quarter, reflecting the effects of the sale of the Coca-Cola Bottling Co. of Mid-America during the final quarter of 1988.

If the Mid-America sale had occurred at the start of 1988, volume would have risen about four percent in 1989 and two percent in the fourth quarter, compared to the same periods a year earlier, Dyson said.

"Although 1989 was a disappointing year in terms of financial results, we believe it will prove to be an important year in Coca-Cola Enterprises' development," Dyson said.

"We expect operating cash flow and earnings per common share to increase in 1990. While it is likely that cost of sales per case will rise moderately, we are optimistic that we can achieve continued improvement in net pricing together with volume growth to offset the higher level of costs."

Coca-Cola Enterprises' tax rate for the year and final quarter increased to 48 percent from 43 percent in the last quarter of 1988, due primarily to lower earnings, Dyson said.

The company repurchased about 6.3 million shares of common stock from shareholders and from the Coca-Cola Co. in the fourth quarter. The company's 25-million-share repurchase program is expected to be completed by the end of the year.

NEW CANEY, TX (FEB. 1) UPI - Homicide detectives found part of a human head in a wooded area where a dog dug up two hands, and authorities said Thursday they have charged two men with murder in the death of the unidentified victim.

The head parts were discovered Wednesday after detectives resumed their search of a wooded area where the dog earlier dug up the hands and dropped them on its owner's lawn, Montgomery County sheriff's spokesman Bob Morrison said.

On Thursday, detectives, acting on an informant's tip, arrested Nicholas Fedore Borka, 22, of Bay City, Mich., and Steven Joseph Eribarne, 24, of New Caney. The men remained jailed pending a bond hearing.

Authorities have not found the rest of the unidentified victim's remains.

Barbara Tate's dog, Missy, apparently dug up the the right hand of a man and dropped it on Tate's front yard Jan. 22, detective Frank Hidalgo said.

The dog dug up the left hand and carried it to Tate's back yard Tuesday.

''I'm dreading what she drags up next,'' Tate said.

The right hand is believed to have been severed from the body no more than a week before its discovery, and fingerprints taken from it have turned up no matches, Hidalgo said.

Investigators searched the wooded area near Tate's home extensively after the first find, but came up with no evidence, Morrison said. They decided to renew the search Wednesday and found part of the top and side of a head.

(FEB. 1) UPI - East German Prime minister Hans Modrow says he favors step-by-step movement toward German reunification to create a federal state with its capital at Berlin. During an East Berlin news conference, Modrow told reporters- quoting now- ''Germany should once agains be a fatherland for all Germans.'' He says that the solution to the division of Germany can only come with the co-operation of the four Allied powers.

The so-called ''Greensboro Four'' showed up at a North Carolina Woolworth's lunch counter for breakfast. It was the same four black men who triggered a series of restaurant sit-ins in 1960 by demanding service at the Woolworth counter. Jibreel Khazan, Joe McNeil, Franklin McCain and David Richmond were invited to dine at Woolworth's today to mark the 30th anniversary of the sit-in.

Even Frankie and Annette of ''Beach Party'' movie-fame would have trouble finding a spot to hang out for spring break in Florida. Traditionally, Florida has been the hotspot for the nation's college students. But with the invasion about to begin, police and government officials are putting the word out for students to go elsewhere. Fort Lauderdale two years ago jerked the welcome mat by cracking down on the spring break crowd... Key West sent announcements to 200 colleges about the high cost of motel rooms... and Daytona Beach police are cracking down after a mob last year trashed motel rooms.

#90032u1626 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Treasury Secretary Nicholas Brady told a Senate panel Thursday that the benefits of President Bush's proposed capital gains tax cut would be ''widely distributed'' and not go just to the rich, as Democrats claim.

Testifying before the Senate Budget Committee, Brady said that based on 1987 tax data, 41 percent of the capital gains reported by taxpayers came from those with adjusted gross incomes of less than $50,000.

''The benefits of a capital gains tax rate cut would be widely distributed throughout the population,'' Brady said. ''In a typical year, 14 million tax returns, representing approximately 26 million taxpayers, report income from the sale of capital assets.''

Democrats, who defeated Bush's proposed capital gains tax cut in a bitter partisan fight last year and who are expected to oppose it again this year have claimed that the great majority of the tax benefit would go to the rich.

''A cut in the capitl gains tax rate does nothing to alleviate the squeeze on working Americans,'' committee Chairman James Sasser, D-Tenn., told

Brady in opening the hearing on Bush's budget proposal for the 1991 fiscal year starting Oct. 1.

''Eighty percent of the benefits from such a cut will flow to the wealthiest 1 percent of our citizens,'' Sasser said. ''Rather than tapping the enormous savings potential of the broad base of Americans, capital gains legislation merely rewards the highest income group for doing what they were going to do anyway.''

In his new budget proposal, Bush urged that taxes on the profits by individuals from the sale of assets, such as stocks, bonds, timber and real estate, be reduced from the current rate - 28 percent to 33 percent, depending on income - to as low as 19.6 percent if assets are held at least three years.

Capital gains are currently taxed at the same rate as regular income but Bush wants to give capital gains preferential treatment with lower rates. The administration says doing so would stimulate investment, create jobs, enhance savings and spur the economy.

Detractors - mostly Democrats - call it a giveaway to the rich. Some Democrats have proposed cutting the Social Security payroll tax or restoring tax deductible individual retirement accounts - moves they say would benefit more middle income Americans.

For taxpayers in the 28 percent income tax bracket, the Bush capital gains proposal works like this:

If an asset is held one year and then sold, 10 percent of the profits would be excluded from taxes, resulting in an effective tax rate of 25.2 percent instead of 28 percent.

Assets held two years and then sold would have 20 percent of their profits excluded from taxes, for an effective tax rate of 22.4 percent. Profits from the sale of assets held three years would enjoy a 30 percent exclusion from taxes, for an effective tax rate of 19.6 percent.

Testifying along with Brady Thursday was Michael Boskin, chairman of Bush's Council of Economic Advisers, who defended the economic assumptions of lower interest rates and high growth that underlie Bush's budget.

He said the administration projection of a 5.4 percent interest rate on 90-day Treasury bills in fiscal 1991 - a projection well below the interest rates projected by leading private economic forecasters - was solely dependant on the adoption of all of Bush's major budget proposals and the rejection of proposals that would drive up the deficit.

''Were it to appear that those would not occur, my view is the financial

markets would not move as favorably,'' Boskin said.

#90032u1635 02/01/1990 ~United Press International

OTTAWA (FEB. 1) UPI - The Canadian government said Thursday it is nearing a settlement agreement with Boeing of Canada Ltd. to compensate for health and safety deficiencies at a Toronto plant the aviation giant bought two years ago.

Cliff Mackay, spokesman for the federal department of Industry, Science and Technology, said negotiations have been underway for a year between Boeing and the Canadian government. "We are close to a final arrangement. When we reach that point, we will make public what the arrangement is," Mackay said.

But Mackay refused to confirm or deny a report published Thursday in the Globe and Mail daily newspaper, saying that the government will pay Boeing of Canada Ltd., a wholly owned subsidiary of the U.S.-based company, $127.5 million to settle the outstanding claim. Boeing Co. of Seattle purchased the de Havilland plant from the Canadian government in 1986 for $131.8 million.

The aerospace company disbursed $76.5 million and the Canadian government agreed to forgive the remaining amount, provided that Boeing brought $276 million worth of new business to its de Havilland division or other Canadian operations. The Globe and Mail said the company has achieved that goal.

Only months after the purchase was completed, Boeing filed a claim in the Ontario courts for health and safety deficiencies at de Havilland's Toronto plant. Boeing has repeatedly refused to disclose the amount sought in its claim, but the Globe and Mail reported it was $93.8 million.

A spokesman for Boeing's de Havilland division, Colin Fisher, said that negotiations with the Canadian government "have been long and protracted. It's a very complex situation they are dealing with. We are nearing conclusion of those negotiations."

The Globe and Mail report said about $85 million would be paid to Boeing by the Canada Development Investment Corp. Another $42.5 million or so would be paid to the company for development of the Dash 8 Series 400, a stretched 64 to 72 passenger version of the twin-engined turboprop plane that is currently de Havilland's only product.

The report said the $42.5 million would be in the form of a forgivable loan provided Boeing meets a number of sales targets. The report said Boeing had threatened during the negotiations to close and sell the Toronto plant if

the two sides failed to agree on a compensation package.

DENVER (FEB. 1) UPI - A newspaper sports columnist arrested in a drug raid at a home in Denver posted a $10,000 bond Thursday and was released from jail.

Teri Thompson, 36, was arrested about 9 p.m. Wednesday when police executed a no-knock search warrant at an east Denver home. The homeowner, John Dziki, 51, also was arrested.

Officers found 2 1/2 ounces of suspected cocaine and $14,000 in the basement of the home. Sgt. Joe Black said a quarter-ounce of cocaine, worth about $800, was found in Thompson's purse.

Dziki's wife, the couple's 10-year-old daughter and Thompson's sister also were in the home, but were not taken into custody.

Thompson is a longtime sports columnist with the Rocky Mountain News. Newspaper editor Jay Ambrose Thursday said Thompson's arrest came as a ''complete shock.''

Ambrose said he had not met with Thompson yet to discuss the charge against her. But he said her column had been suspended until further notice.

Police Capt. Rudy Sandoval said officers had been tipped that cocaine was in the home. They obtained a search warrant after putting the home under surveillance for several days.

Sandoval said in addition to cocaine and cash, evidence indicated a ''fairly sophisticated bookmaking operation'' was being run at the home. That evidence included records of betting on NFL and college football games.

Sandoval said names found in the alleged bookmaking records could implicate several prominent Denver residents. He said detectives would examine the bookmaking material during the next several days to determine whether charges of professional gambling should be filed against Dziki.

WASHINGTON (FEB. 1) UPI - Crop flexibility will be a ''major element'' in the Bush administration's proposals, due to be unveiled next week, for revising farm policy, Assistant Agriculture Secretary Bruce Gardner said

Thursday.

The comments, made during a Senate hearing, provided the latest clue of the shape of the package. There also were strong indications the administration will provide a package of ideas, rather than a formal bill.

Two members of a Senate Agriculture subcommittee said the administration tactic would complicate the task of writing a comprehensive farm policy law this year.

''We're going to drag this out,'' said Sen. Bob Kerrey, D-Neb.

In a speech one month ago, President Bush called for ''market-oriented farm policies that allow producers more flexibility to decide what crops to grow'' as the way to assure U.S. competitiveness in the world market.

Agriculture Secretary Clayton Yeutter has said the package will have ''a very substantial environmental component ... probably a greater component than anyone has ever suggested.'' There have been calls for the new law to give further encouragement to farmers to practice conservation and prevent groundwater contamination.

In addition, the administration is asking for elimination of the federally subsidized crop insurance program. Early this week, Yeutter hinted he might suggest a substitute ''as we describe our own farm bill package next week.''

Although farmers generally are happy with the economic recovery that has accompanied current farm policy, there are complaints the farm program prevents farmers from experimenting with alternative crops because it would jeopardize their eligibility for crop subsidies.

''Just in general terms, it is clear flexibility is going to be a major element'' in the administration package, Gardner told a Senate Agriculture subcommittee, but he refused to be specific.

Gardner refused to say if the administration would propose a bill. Sen. Richard Lugar, R-Ind., the GOP leader on the Agriculture Committee, said, ''My understanding is the administration will offer principles, guidelines.''

Although there is agreement that farmers should have more power to decide which crops to grow, there is no consensus among farm groups or on Capitol Hill of how to achieve it.

In early January, Yeutter noted diversity of opinion over how to implement the concept and said, ''We'll have specific recommendations to offer Congress when we articulate our ... legislative package.''

House Agriculture Committee leaders intend to use the current farm policy law, written in 1985, as the starting point for writing the new law.

#90032u1658 02/01/1990 ~United Press International

NASHVILLE, TN (FEB. 1) UPI - The state Senate voted Thursday to restrict mass launches of helium-filled balloons out of concern for sea turtles and dolphins in oceans hundreds of miles from Tennessee.

The Senate voted 27-0 to approve a bill prohibiting the simultaneous release of more than 25 non-biodegradable balloons.

The bill's sponsor, Democrat Bill Owen, said the University of Tennessee at Knoxville has already ended its practice of sending thousands of orange and white balloons into the atmosphere at football games and other events.

Balloon launches have stirred up controversy in recent years in communities across the nation. Environmentalists say the balloons can fly hundreds of miles and land in the sea. Dolphins, turtles and other sea life eat the balloons, which become lodged in their digestive systems and kill them, they argue.

''A biodegradable balloon is available that is cheaper than the balloons that are virtually indestructable,'' Owen said.

''I love to watch balloons, especially when they're orange and white,'' Owen said. ''And it would be wonderful if it were a benign thrill. But for the relatively cheap thrill of watching balloons, we have the environmental problem of suffering fish and turtles dying.''

#90032u1677 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - Salvadoran President Alfredo Cristiani met with President Bush Thursday and predicted that peace talks with rebels in his country could soon produce agreement so long as U.S. aid is maintained.

Though Cristiani said after the half-hour session with Bush at the White House that the question of overall reductions of aid for his country was not really addressed, he linked it with results of efforts to resume negotiations with the rebel Farabundo Marti National Liberation Front, known as the FMLN.

''I personally feel optimistic that if it can remain, without giving negative signals, then we're probably facing for the first time, that we might see the FMLN seriously look at the dialogue process and try to come to an agreement,''Cristiani told reporters after the meeting. ''I think if there is an aid cut, it would be sending in my opinion, negative signals, especially to the armed groups in the country.''

Bush opened the meeting praising Cristiani's ''commitment to democracy'' and courage in pursuing members of the military linked to the killings of Jesuit priests in his country.

''I know this man,'' Bush said. ''I know of his commitment to democracy. I support him now and I will support him in the future.''

Cristiani said he suggested during the meeting that Bush might increase aid to combat illegal drugs but that he did not request additional military assistance for the nation's 10-year civil war.

Washington provides more than $500 million a year - or about $1.4 million a day - to keep the war-torn Salvadoran economy afloat, $90 million of that total in direct military assistance.

But the Salvadoran president said that during the meeting with Bush and in meetings with members of Congress who are reviewing El Salvador's efforts to curb human rights abuses by its military, the talks focused more on his discussions at the United Nations this week to resume peace talks.

''Mainly we focused our discussion on the fact that we think that it is probably the best moment we have had to see if we can start a dialogue process that would solve the conflict,'' Cristiani said. ''In that respect

support for that project is necessary because if we could get rid of the conflict, we'd probably be getting rid of a lot of the problems we have.''

Fresh from a visit in New York with U.N. Secretary-General Javier Perez de Cuellar, Cristiani said he was confident the U.N. official could help resolve the impasse within the ground rules of a U.N. Security Council resolution.

Talks have been on hold since Nov. 11, when the FMLN launched its biggest offensive of the decade of war, which has killed more than 72,000 people, most of them civilians.

The resolution, No. 637, authorizes Perez de Cuellar to try to bring both sides to the bargaining table, but does not authorize him to mediate the Salvadoran dispute.

In San Salvador Wednesday, the FMLN expressed suspicion about the U.N. ''good offices'' arrangement set forth, saying Cristiani had balked at allowing Perez de Cuellar to mediate the talks.

Bush, facing budget constraints on Capitol Hill and reductions in aid to various countries in the region, went out of his way to endorse the Latin American leader, who also met last Saturday with Vice President Dan Quayle in Honduras.

''The success of democracy in Salvador is a very important thing to us, to this country,'' Bush said. ''I've been very impressed with courage he has shown in going after those who have broken the law in his country and that's been a shining example to all of us.''

Bush's reference to the recent arrest of several soldiers in the killing of six Jesuit priests in mid-November echoed words earlier from Cristiani, who said the move demonstrates his administration's commitment to human rights.

And on the aid cuts for his country, already an estimated $50 million in fiscal year 1990, Cristiani said, ''That is Gramm-Rudman. That is not necessarily a cut in Salvadoran aid alone.''

SAN JOSE, CA (FEB. 1) UPI - Japanese and European models dominated the 1990 list of "best overall values" issued Thursday by IntelliChoice Inc. in the new editions of The Complete Car Cost Guide. The book and its companion publication about trucks, evaluated 800 vehicles.

In their ratings, the guides considered the five-year cost of depreciation, insurance, state fees, fuel, and maintenance. Overall value considers both projected costs and original purchase price.

For the second consecutive year, Volvo led the list of best value selections for cars and wagons by taking first in four categories. The publishing firm said the best overall values were:

Subcompact under $10,000 Honda CRX HF and over $10,000 Honda Prelude Si; compact under $15,000 Toyota Camry and over $15,000 Volvo 240 DL; midsize/large under $16,000 Mazda 626 DX and over $16,000 Volvo 740 GL; luxury under $28,000 Acura Legend and over $28,000 Mercedes Benz 190E 1.6; sport under $30,000 Ford Mustang LX 5.0l Sport and over $30,000 Porsche 911 Carrera 2.

Smaller wagons under $13,000 Toyota Corolla Deluze (4WD) and over $13,000 Volvo 240 DL; midsize-large wagons under $18,000 Mercury Sable LS and over

$18,000 Volvo 740 GL.

Small pickup under $13,000 Mazda B-2200 and over $13,000 Nissan King Cab l (4WD); large pickup under $15,000 Dodge Dakota and over $15,000 Ford F-250 (4WD); utility vehicle under $17,000 Chevrolet Suburban R1500 and over $17,000 Toyota Runner SR5; and passenger van under $16,000 Dodge Caravan and over $16,000 GMC Safari SLT.

"Consumers who consider the price tag as the only indication of value, and fuel mileage as the only measure of economy, may be in for a big surprise if they discover their new vehicle costs a fortune to insure, or worse, depreciated by 50 percent after two years," said Peter Levy, president of IntelliChoice.

"The smart shopper would be better off comparing ownership costs before visiting the dealer," he said. "The buyer will save much more money over the long run than the consumer who thinks he or she is getting a deal by haggling a lower purchase price."

#90032u1736 02/01/1990 ~United Press International

(FEB. 1) UPI - Arctic seals have begun to turn up as far south as New England and the mid-Atlantic states, driven from their normal habitat by a population explosion in Canada or fringe melting of the Arctic pack ice, experts said Wednesday.

Marine mammal stranding centers in New York and New Jersey in the past two weeks have reported the first ringed seals they have ever handled. One that was captured Jan. 22 at Sandy Hook in New Jersey was released Tuesday off Cape Cod, Mass., while another found in Easthampton, N.Y., on Sunday is being kept in a lab at the Okeanos Ocean Research Foundation on Long Island.

A third ringed seal was found dead in a drainage creek in Middletown, N.J. on Tuesday.

Robert Schoelkopf, director of the Marine Mammal Stranding Center in Brigantine, N.J., said sightings of all seals have gone up recently off the Jersey Shore. Arctic seals may be returning to what was once their normal range before large-scale hunting began in waters farther north and trimmed the herds, he added.

''Maybe we're having seals that were here 200 or 300 years ago coming back into New Jersey waters,'' Schoelkopf said.

Ringed seals normally remain 500 to 1,000 miles to the north, where they live on and under the sea ice, said Holly Sutton, Okeanos education

coordinator. The Gulf of St. Lawrence is the southern end of their range, she said.

Canadian experts have been predicting a southward movement of ringed seals because of a population explosion following a ban on commercial hunting, Schoelkopf said.

But another theory is that recent warm winters have left more open water at the edge of the Arctic ice, freeing the seals to roam south. They can move faster in the open ocean than on the ice, Schoelkopf said.

Two other Arctic species, hooded and harp seals, breed off Newfoundland in the winter and then migrate up the coast of Greenland in the summer. Canada banned hunting of harp seal pups a few years ago after an international outcry.

In New England, sightings of harp seals have increased, said Greg Early, associate curator of animal care at the New England Aquarium in Boston. The Arctic population appears to be growing with ''more stragglers showing up in funny places,'' he said.

WASHINGTON (FEB. 1) UPI - The Consumer Product Safety Commission announced the nationwide recalls of the two toys Thursday - the Little Triplets doll and baby bottle set and the Chicco brand Activity Gym.

Henry Gordy International of Plainfield, N.J., is recalling 43,000 of the doll and baby bottle sets because the bottle caps and nipples pose a choking hazard to small children, the commission said.

The Toys R Us chain based of Paramus, N.J., is recalling 12,000 of the gyms, which are hung across cribs, because of a strangulation hazard.

The label on the box of the crib toy recommends its use for children from 6 months to 18 months. But the CPSC said toys hung across a crib or a playpen should be removed when a baby reaches 5 months or begins to push up on its hands and knees. Children able to pull themselves up can fall across crib toys and be strangled, the CPSC said.

The commission said it knew of no injuries caused by the doll and baby bottle set or the crib gym. However, it said similar crib toys have caused the deaths of infants over 5 months old.

The commission recommended parents take the toys away from children and return them to the place of purchase for a refund. Toys R Us stores will have a photograph of the crib toy so parents can identify it.

The crib gym, sold nationwide for about $13 each, is attached to a crib or playpen with a white strap and blue buckles. Suspended on the strap is a yellow plastic box with a music box inside. The word ''Chicco'' is molded on the yellow plastic, and No. 62930.0 appears in several places on the toy package.

The Little Triplets set, marked item No. 299, was sold in a clear plastic blister package and contains three bottles - two white and one orange - and four naked plastic dolls. The toy was sold nationwide from 1988 to 1989 for less than $2.

#90032u1743 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - The difference between the price refineries paid for crude oil and the amount they charged for heating oil made from crude, soared fourfold during the recent December freeze, the government reported Thursday. But the Energy Information Administration in its report to Congress said, "It's too early to translate these (margins) into profits."

In its report to the Senate Governmental Affairs Committee and the House Subcommittee on Energy and Power, the EIA said refinery margins in New England jumped from 15.8 cents a gallon Dec. 4, to 59 cents a gallon Jan. 2.

In the mid-Atlantic states, they soared from 14.2 cents Dec. 4 to Jan. 2's 53 cents a gallon, the Energy Department agency said. The Midwest increase was less - 14.6 cents Dec. 4 to 36.4 cents a gallon Jan. 2. Most heating oil is consumed in the Northeast.

The EIA report was made in response to congressional concerns and Northeast governors' questions of how much profits rose and who profitted from the near-record December cold snap and rise in consumer heating oil prices.

"Neither of these questions can be answered accurately without actual cost and profit data covering companies throughout the entire distribution chain. Such data are generally not readily available in a timely manner," the EIA said.

It noted that margins do not account for refining, distribution, transportation, storage and other costs, nor reflect the actual volume of product sold.

"Because the use of margins is so misleading, EIA has been reluctant to provide them in this study," the agency said, in apparent protest to the insistence of the congressional committees.

The data nevertheless indicated the margin between the price retailers charged homeowners and the wholesale price they paid remained relatively stable during December but rose during January as retail prices lagged the subsequent decline in wholesale prices.

"Data on margins indicate that the spread in heating oil was greatest at the wholesale level," the EIA report said. The report will be officially presented to a hearing Friday of the House subcommittee.

Subcommittee staffer Tom Runge said, "We've never had prices go way up and and come down like they did in the last month and a half in my experience." He conceded the profit picture may be more complicated than the margin portrayal.

Refiners' profits could have been diluted by positions they took in the futures trading market as a hedge against large price swings, Runge said. But some oil companies also have separate organizations trading in futures contracts.

These organizations could have benefited handsomely while the company's refinery operations would only show a modest profit on the balance sheet, he said.

In late December, the Justice Department announced a "preliminary inquiry" into the heating oil price increases to determine if a full investigation was warranted. A department spokesman Thursday said the inquiry was still underway and no determination had yet been made on whether to launch a full investigation.

NEW YORK (FEB. 1) UPI - John J. Phelan, the chairman and chief executive of the New York Stock Exchange, announced Thursday he would resign at the end of 1990.

Phelan ruled out taking a government post at this time, squashing rumors that have swept the financial markets in the past two days that he would replace Treasury Secretary Nicholas Brady.

"I thought 60 was a good time to make the transition," Phelan told a news conference. "I don't know what i'm going to do yet. I felt it was inappropriate to look while I had this job."

Phelan, who has been associated with the Big Board and the securities industry for 35 years, told the exchange's board of directors of his decision to retire Thursday afternoon.

BANGKOK, THAILAND (FEB. 1) UPI - Three Saudi Arabian diplomats, including the Saudi charge d'affairs in Bangkok, were shot and killed Thursday in

two separate but almost simultaneous street attacks, police said.

Police Maj. Bandit Panitsupapon said the three were gunned down in central Bangkok in incidents less than a mile apart. There were believed to be two shooters, one an Arab and the other a Thai, police said.

''No arrests have been and we can only speculate that the motive was a conflict of interest,'' Bandit said.

He said several witnesses to the shootings were being interviewed by police.

Abdullah H. Al-Shubaili, charge d'affairs at the Saudi Arabian Embassy, was gunned down in front of his residence in Bangkok, Bandit said. He was shot four times.

Police sources said Abdullah had been due to leave for home Friday with his pregnant wife. They said his wife found her husband's body as she returned home in a car.

The other two men, identified as attaches Ahmad Al-shef and Fahad Al-bahli were shot on a side street nearby, police said.

In Riyadh, the Saudi Arabian governemnt condemned the killings as a ''suspicious act of terrorism'' and demanded the Thai government find the killers and punish them.

''Saudi Arabia reiterates its categorical condemnation of such a suspicious act of terrorism, which has no target except saturating the appetite of killing and bloodshed,'' a Foreign Ministry spokesman said in a statement broadcast over state-run Radio Riyadh.

The spokesman said the Arab kingdom ''demands that the Thai government shoulder its full responsibilities by divulging the culprits, and inflicting on them a just punishment.''

Convicted murderers in the Arab kingdom usually face execution by beheading.

Fahad was killed with a single shot to the forehead and Ahmad had four bullet wounds, he said.

Police said witnesses described one of the gunmen as a Thai and the other as a pale-skinned man who appeared to be of Arab origin.

Interior Minister Banharn Silapa-acha said all departing flights at Bangkok airport are being checked to prevent the killers from leaving the country.

''We need some time but I am confident the police will find the killers,'' he said.

He refused to speculate on the motive for the murders.

Police Chief Sawaeng Thirasawath, however, told reporters he suspected the murder was related to the killing of another Saudi diplomat in January last year.

He said the murder weapons, small caliber pistols, and the methods of the killers were similar.

In that incident, third secretary Abdullah Al-Malik was fatally shot in the head as he walked on a Bangkok sidewalk.

Police later arrested a professional killer and charged him with the murder. A Thai overseas labor broker was also arrested in connection with the case.

Police said they believed the killing was motivated a conflict over visas for laborers being sent to Saudi Arabia by the broker.

#90032u1792 02/01/1990 ~United Press International

WASHINGTON (FEB. 1) UPI - A day after President Bush got a thunderous ovation from Congress for warning lawmakers not to ''mess around with Social Security,'' two Republicans introduced bills Thursday to cut Social Security's payroll tax.

Sen. Robert Kasten, R-Wis., and Rep. Hank Brown, R-Colo., a candidate for Colorado's open Senate seat this year, announced proposals to roll back the Social Security tax increase that took effect Jan. 1 and make other changes affecting the retirement program.

The two GOP proposals were billed as alternatives to a plan proposed Dec. 29 by Sen. Daniel Patrick Moynihan, D-N.Y., to cut Social Security taxes by $55 billion and prevent the current practice of using the large, and growing, Social Security surplus to mask the true size of the federal deficit.

In his State of the Union address to a joint session of Congress Wednesday night, Bush won his biggest ovation of the evening - from Democrats and Republicans alike - when he urged lawmakers to leave the retirement programalone.

''Our budget fully funds today's benefits and it assures that future

benefits will be funded as well,'' Bush said. ''And the last thing we need to do is mess around with Social Security.''

But Kasten said he was at odds with the administration over Social Security and had originally considered co-sponsoring Moynihan's proposal because he believes payroll taxes are too high.

Kasten said his plan would cut Social Security payroll taxes for average workers by up to $154 in 1990, another $172 in 1991 and an additional $193 in 1992, for a total tax cut of up to $519.

He told reporters at a new conference his plan would have the effect of rolling back the Social Security tax increase that took effect Jan. 1 - an increase from 6.06 percent to 6.2 percent.

That increase was among several payroll tax increases approved during the Social Security ''crisis'' of 1983 when Congress altered the retirement system's financing to ensure adequate funds when the post-war ''baby boom'' generation starts retiring in 20 years.

Kasten said his proposal would cut the payroll tax rate back to 5.3 percent over three years.

''America's families deserve a break,'' he said. ''They deserve to see more of their own hard-earned money in each paycheck.''

And he predicted that ''it's almost certain'' that the Senate would this year to scrap the Jan. 1 increase in payroll taxes.

''The easiest think to do is repeal this year's tax increase,'' he said. ''I think that is very likely ... notwithstanding the administration's opposition.''

He said that in the year 2010, under his plan, Social Security would have in reserve twice as much money as needed to pay benefits the following year so there was no danger baby boomers would lose benefits.

Kasten's plan, like Brown's, would prevent the current practice of using the Social Security cash surplus to mask the size of the federal deficit.

But unlike Brown, Kasten would adjust the Gramm-Rudman balanced budget law's annual deficit reduction targets to reflect the higher real deficit. Kasten would set new targets that would balance the budget in fiscal year 1997 - four years later than under the current Gramm-Rudman law.

Brown, ranking Republican on the House Ways and Means Social Security Subcommittee, also proposed rolling back the payroll tax increase that took effect Jan. 1.

''The 1990 tax hike is not justified because we don't know what is needed to keep a system sound,'' Brown said.

He also proposed making the Social Security Administration an independent agency - it's now under the Department of Health and Human Services - and increasing from $9,360 to $15,000 a year the amount of outside income over-65 workers can earn without losing Social Security benefits.

Moynihan's proposal, bitterly opposed by Bush, would cut the payroll tax over two years to 5.1 percent.

BUENOS AIRES, ARGENTINA (FEB. 1) UPI - The Argentine government, in a bid to generate more revenues to reduce its budget deficit, Thursday raised fuel prices and public service tariffs by up to 120 percent.

"We need some rate adjustments to permit the operation of the (public) companies, said Roberto Dromi, minister of works and public services, who together with Economic Minister Erman Gonzalez announced the increases in a

televised broadcast nationwide late Wednesday.

Gonzalez said the measures were aimed at "lowering the government's budget deficit" which was 11 percent of the 1989 domestic internal product according to a private economic foundation. "These steps taken in the public rates are all to wage the battle against the enemy of all Argentines - the fiscal deficit," he said.

High-grade gasoline rose to 890 australes a liter, from 645 australes and natural gas monthly rates hiked 90 percent. Kerosene almost doubled to 350 australes a liter from 155 australes. Train fares rose 90 percent. Gonzalez also warned of more hikes in public transportation, electricity and telephone rates by the end of the week.

Analysts felt the increases will have a limited impact on the inflation rate, because Argentines have little spending power left, which puts a downward pressure on price hikes.

The hikes come against the backdrop of the country's deepening economic crisis, including a roller coaster inflation rate expected to top 70 percent in January, which would make it the highest in six months.

Inflation peaked in July, the month President Carlos Menem took office, at more than 196 percent. Inflation was curbed below ten percent from September to November before rebounding to more than 40 percent in December.

The International Monetary Fund sent a delegation to Buenos Aires two weeks ago to renegotiate the terms of a previously-approved $1.4 billion loan for Argentina and help solve the developing country's economic crisis marked by a heavy budget deficit, a $62 billion foreign debt and a soaring inflation rate.

Gonzalez, who last month pledged not to raise public services rates and instead lower them, defended the government's policy and said the hikes "are not an imposition of the (International Monetary) Fund."

Inflation has eroded the purchasing power of most of the country's 32 million people, one quarter of whom live below the poverty line. The situation prompted the government to pledge $18 million in spendings a month as of January to care for 8 million Argentines.

"The treasury could not pay its bills," said Juan Luis Bour, an economist with the Latin American Economic Investigation Fund, commenting on the round of increases. "The economic program could not sustain itself."

According to the independent Foundation for Latin American Economic Investigation, Argentine's budget deficit amounted in 1989 to about 11

percent of the gross national product, which stood at $75 billion in 1988. Official figures will not be released before several months.

Some analysts speculated that the latest hikes reflected a willingness on the part of the Argentine government to please the IMF, which has been pushing for a reduction of the budget deficit to not more than 1.25 percent of Argentine's GNP.

Argentine and IMF officials signed in September a $1.4 billion loan agreement which calls for funds to be made available over a period of 14 months, provided that Argentina lowers its monthly inflation rate to less than two percent per month or less than 15 percent on an annual basis, and sharply reduces its budget deficit. The agreement also calls for Argentina to deregulate its economy and privatize state-owned companies operating at a deficit.

The first $230 million installment of the IMF loan was disbursed in November, and more funds were to be disbursed early this month, but officials admit the money will be delayed at least a month as Argentina renegotiates the loan conditions.

Gonzalez said the government was looking to "get a manageable inflation of two to three percent a month," the IMF desired figure. "It's not something someone put on us," Gonzalez stressed. "We need to lower inflation and have a stable economy that permits, encourages investment."

(FEB. 1) UPI - Iran-Contra figure Albert Hakim has been sentenced to two years probation and a five-thousand-dollar fine. The Iranian who was a middleman in the U-S arms shipments to Iran pleaded guilty last November to a misdemeanor charge of making an illegal payment to former White House aide Oliver North.

The head of the Senate Armed Services Committee, Georgia Democrat Sam Nunn says he's delighted by President Bush's proposal to cut super-power troop levels in Europe to 195-thousand on each side. Bush unveiled the troop cut plan in his ''State of the Union'' address and won bi-partisan support today.

East German Prime Minister Hans Modrow says Germany should once again be a united fatherland for all Germans. Modrow says German reunification is possible, but he favors a step-by-step process to end in a federal state with Berlin as its capital. Since World War Two, Berlin has been administered by the United States, France, England and the Soviet Union.

Members of Congress got a pay raise today. The first step of the pay hike lawmakers voted themselves last fall went into effect. It raises the annual salary for House members to 96-thousand 600 dollars and 98-thousand 400 for senators. House members get another 25 percent pay hike next January 1st.

Pope John Paul ended his eight-day trip to western and central Africa today with a call for ''solidarity between peoples.'' The pontiff told members of the international diplomatic corps in the capital of Chad that the world's preoccupation with events in Eastern Europe must NOT distract attention from the needs of the Third World.

(FEB. 1) UPI - A consumer group is calling for installation of inexpensive back-seat shoulder belts in all cars as a safety feature. The Institute for Injury Reduction describes back-seat lap belts as a ''menace '' responsible for hundreds of deaths and crippling injuries each year. The group wants all 140-Million cars on the road equipped with back seat shoulder harnesses.

Thousands of Miami-area children will get diptheria vaccinations after a two-year-old boy died of the infectious disease thought to have virtually disappeared in the United States. Officials say preliminary tests show four other children in the family were found to have the disease's microbes. Symptoms may include weakness, high fever and a think membrane at the back of the throat.

The head of Poland's Roman Catholic church, Cardinal Jozef Glemp , remains in serious condition at a Warsaw hospital, where he is being treated for a digestive ailment. Warsaw's official news agency says Glemp has undergone two operations since he was taken to the hospital on Tuesday, suffering from ''massive bleeding in his digestive system.''

The heaviest snowfall in six years left residents of Tokyo in shock today. A winter blitz dumped four inches of snow in central Tokyo, where 350 people were injured, most by falling or slipping into the path of skidding vehicles.

The snowfall shut down air and commuter rail service for much of the day, affecting more than half-a-Million travelers. Outlying areas got nearly a foot. But the accumulation wasn't even close to the record Tokyo snowfall of 19 inches in 1968.

TAMPICO, MEXICO (FEB. 1) UPI - No drugs were found aboard a Cuban-chartered freighter that was attacked by the U.S. Coast Guard after refusing to submit to a search in international waters, the Mexican navy said Thursday.

''Nothing has been found after a round-the-clock inspection that began at 8:40 Wednesday morning, when the Hermann was received by Mexican naval vessels,'' said a navy spokesman, who asked not to be identified.

The freighter was riddled with bullets fired by a U.S. Coast Guard cutter before dawn Wednesday after the vessel's skipper refused to allow it to be searched for suspected illegal drugs.

The Panamanian-registered freighter, taking on water, belching black smoke and sending ''mayday'' distress calls, fled from international waters into Mexican territorial waters after the shooting Wednesday in the Gulf of Mexico.

The ship, suspected by U.S. authorities to be carrying drugs, later docked at the gulf port of Tampico, 200 miles northeast of Mexico City.

The Mexican navy spokesman said the inspection included a search of all the vessel's cargo areas, ballast tanks, storerooms, anchor compartments and hull. Part of the search was conducted by divers, the spokesman said.

U.S. Coast Guard Cmdr. John McElwain, after learning that no drugs were found on the Hermann, defended the U.S. action as in strict adherence to international law.

''We thought there were drugs on board,'' he said. ''That's the way it goes.''

Asked if the shooting of the vessel was justified, he replied, ''Absolutely.'' Another Coast Guard spokesman had said Wednesday the Hermann had fit a ''profile'' of the type of ship often used in drug smuggling.

The U.S. cutter Chincoteague had sought to board the 250-foot freighter in international waters for a day before the shooting and had received approval from the Panamanian government to board the vessel after the ship's captain denied permission, the Coast Guard said.

The Coast Guard is authorized to search a vessel on the basis of permission from a vessel's flag government, in this case Panama, the Coast Guard said. Panama also gave permission for the Coast Guard to open fire Wednesday in an attempt to disable the Hermann.

Upon completion of the military inspection Thursday, the case was handed over to civilian officials, including the attorney general and the Tampico harbor master, the Mexcian navy spokesman said.

Separately, the official Cuban news agency Prensa Latina said in a dispatch monitored in Mexico City that the 11 crewmen, none of whom were injured in the incident, will receive a hero's welcome upon returning to Havana, where Cubans are reportedly angry over the attack.

''The attitude of the Cuban seamen, described as firm and patriotic by the morning daily 'Granma,' will be highlighted this afternoon during a rally at the Havana waterfront, where the (diplomatic) office representing U.S. interests in Cuba is located,'' the agency added.

The news agency described the attack against the vessel, sailing from Moa, Cuba, as ''an act of barbarism aimed at undermining free trade between Cuba and Mexico.

The incident with communist Cuba, the United States' hemispheric rival since 1959 when Fidel Castro seized power, came as Washington attempted to repair its image in Latin America following its Dec. 20 invasion of Panama that ousted military strongman Manuel Antonio Noriega.

For most of the century, some Latin American governments have been skeptical and critical of U.S. military actions in the hemisphere, often complaining that Washington practiced ''gunboat diplomacy.''

In January, Colombia reacted angrily when the United States sent naval ships to patrol for drug runners near the coast of the Latin American country. Washington later withdrew the ships.

#90032u1903 02/01/1990 ~United Press International

WORCESTER, MA. (FEB. 1) UPI - A man threw a chemical believed to be acid in the face of a woman who had just returned home from taking her children to school Thursday, leaving her suffering from serious burns, police said.

Police Detective Lt. John McKiernan said the man threw a vial of a liquid suspected to be acid in the face of Yan Ly, 38, as she returned to the building where she lives.

The attacker fled the scene and remained at large, McKiernan said. Police had a description of the assailant, he said.

Ly was being treated in the burn unit at Worcester City Hospital, where she was listed in serious condition, a nursing supervisor said.

Her husband, Dinh Hieu, 43, tried to assist her and also had to be treated at the hospital for minor burns. He was released later, the nursing supervisor said.

''He was was burned by the acid when he came to her rescue. He got some of the chemical on him when he was helping her get out of her clothes,'' McKiernan said.

Police laboratory technicians were testing the vial to determine the exact chemical it contained, McKiernan said. ''All we know right now is that it was a very caustic substance,'' he said.

McKiernan would not comment on a motive for the attack other to say ''it's

not racially motivated.''

''We have some information that is firm and some things that are only speculative at this time,'' he said.

The case remained under investigation.

#90032u1941 02/01/1990 ~United Press International

FAIRHAVEN, MA. (FEB. 1) UPI - Divers worked Thursday to repair three holes in the hull of a tanker that was carrying more than 2 million gallons of gasoline when it apparently struck bottom, Coast Guard officials said.

Civilian divers were trying to patch holes in the 316-foot barge Rockland, anchored in Buzzards Bay, after about a foot of water had leaked into it, said Coast Guard Petty Officer Kelly King. None of the 2.1 million gallons of unleaded gasoline had escaped, she said.

The vessel had just passed through the Cape Cod Canal on its way from Boston to Providence when a crew member noticed water in a cargo hold Wednesday afternoon.

''It apparently hit ground somewhere. No one has any knowledge of them going aground, but by the look of the holes it definitely hit something,'' King said.

''I'm not going to say there's not any danger. With a hole, there's always a danger, but we're not concerned about gasoline leaking right now,'' she said. ''Any time water's coming in, though, it's bad.''

The hull suffered a dent 16 feet by 3 feet. The largest of the three holes 3 feet by 10 inches, occurred in the cargo hold, King said. Two smaller holes were torn in the port side of the hull.

''We're taking gasoline from the hold where the problem is and redistributing it within the tanker,'' King said. Officials planned to transfer all of the gasoline onto another tanker later Thursday.

#90032u1944 02/01/1990 ~United Press International

TORONTO (FEB. 1) UPI - Molson Companies Ltd. reported third-quarter earnings of $21.9 million, or 66 cents a share, up 24 percent from $17.7 million, or 54 cents a share, in the same period a year ago.

Revenues for the quarter dropped to $503.2 million from $548.9 million in

the 1988 period.

For the nine months ended Dec. 31, Molson reported earnings of $133.9 million, or $4.07 a share, compared with $68.6 million, or $2.35 a share, in 1988. Revenues were off slightly to $1.70 billion from $1.73 billion the in 1988.

Molson said higher income from its brewing segment was the major factor in its increased earnings. While Molson said its share of the market in Canada remained strong, its sales declined by 2.2 percent primarily from the sale of discounted sale of U.S. beers in Ontario.

Shipments of Molson beer's to the U.S. declined, generally consistent with sales trends in the total United States import segment.

In its retail merchandising segment, Molson said sales were ahead of last year despite a softening in the retail market, reflecting a slowdown in consumer spending and housing starts.

Molson's 1989 financial results were impacted by the merger of its operations with Carling O'Keefe Breweries of Canada Ltd., owned by Elders IXL Ltd. of Australia. Molson's reported a $110 million gain from the brewing merger.

Molson's activities include brewing ale and beer, marketing chemical specialty products, retail merchandising and venture capital operations.

#90032u1959 02/01/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - Health care spending rose 2.5 percent per year faster than other spending from 1947 through 1987, and the health sector now accounts for 11.5 percent of the gross national product, compared to less than 5 percent 40 years ago, a study showed Thursday.

In an article published in the journal Science, Stanford University economist Victor Fuchs said there appears to be two major factors behind the growth ''gap'' that has developed between the health care industry and other sectors in the past 40 years.

''Health care prices rose 1.6 percent more rapidly than other prices, while the quantity of health care grew 0.9 percent per annum faster than other quantities,'' said Fuchs, who is also a research associate at the National Bureau of Economic Research.

The economist said there are no indications of that trend reversing, with many experts predicting that health care will account for 15 percent to 20 percent of the U.S. gross national product within a few decades. Currently

health care is a $600 billion-a-year industry, making up 11.5 percent of the GNP.

Many other industrial countries have a substantially lower share of their GNP linked to health care. The share is less than 7 percent in the United Kingdom and less than 9 percent in Canada, even though both nations have national health insurance, Fuchs said.

The Stanford professor said growth in medical services is not necessarily bad because it may ''increase the possibility of delivering high-tech state-of-the art medicine to all Americans.''

''On the other hand, it would exacerbate the diversion of resources from other pressing needs such as child care, education, the environment, housing and transportation,'' he added.

Beyond escalating prices and increased quantity of services, Fuchs said it is hard to pinpoint more precise reasons for the U.S. health sectors seemingly boundless growth.

''Many factors, including wages, productivity, technology and insurance contributed to these trends. No single explanation suffices, and no simple solution is apparent,'' Fuchs said.

WILMINGTON, Del. (FEB. 2) UPI - The Du Pont Co. said Thursday it has entered into a joint venture to manufacture and market orthopedic products including asurgicial glove liner that is resistant to cuts.

DePuy-Du Pont Orthopaedics will combine the Wilmington chemical giants'advanced materials research, development and engineering with DePuy's established position in the international market as a supplier of orthopedic devices. The company will be located in Warsaw, Ind.

The joint venture agreement follows a 1987 research and development agreement between the two companies.

The new company will focus on developing orthopedic products based on composites of polymers and fibers.

''The resources available from Du Pont to the venture extend even beyond their tremendous background in polymers and fibers,'' said Richard Tarr. Tarr has been named general manager of the new company.

The new products will include a surgical glove liner made of Kevlar fibers that will protect doctors and other health care professionals from cuts and puncture wounds. The liner is worn underneath surgical gloves and Tarr said the material is slash resistant.

The glove was designed by AOR Sullivan, Inc., a San Diego company.

DePuy is a subsidiary of Boehringer Mannheim and is the world's oldest manufacturer of orthopedic products.

#90032u2052 02/01/1990 ~United Press International

(FEB. 1) UPI - Oil prices ended mixed in a light, directionless market Thursday with many traders away from the trading pits to attend the annual dinner of the New York Mercantile Exchange.

Aggressive early gasoline buying by a large New York trader helped support the gasoline and crude markets despite a government report showing large inventory buildups last week, said Larry Lawrence of Elders Futures Inc. in New York.

Unleaded gasoline rose 0.09 cent to 62.70 cents a gallon in the Merc's first day of trading the March delivery contract. Unleaded gasoline gained 0.15 cent to 61.60 cents a gallon on the important New York Harbor cash market.

The benchmark West Texas Intermediate crude for March delivery gained two cents to finish the day on the Merc at $22.70 a barrel. It gained five cents on the U.S. Gulf Coast cash market to $22.65 a barrel.

Home heating oil fell 0.82 cent to 56.74 cents a gallon as unseasonably warm weather in the Northeast continued to dampen demand. It dropped 0.80 cent on the New York Harbor spot market.

The Energy Information Administration reported that gasoline inventories last week rose 10.5 million barrels - 3.2 million barrels more than the oil industry's American Petroleum Institute reported Tuesday. The report should have helped drive prices down.

The EIA also reported that crude stocks declined 2.1 million barrels compared to the 600,000 barrel decline reported by the API. Merc prices dropped sharply toward the end of the day because many would be buyers had left the trading floor, Lawrence said.

On the European spot market, Britain's widely traded North Sea Brent for February delivery remained level at $20.60 a barrel. The United Arab Emirates' Dubai light - the key OPEC Middle East crude from the Middle East, mainly exported to the Far East - gained five cents to $16.85 a barrel. On London's International Petroleum Exchange, heating oil was quoted at 53.51 cents a gallon, a decline of 0.16 cent.

#90032u2075 02/01/1990 ~United Press International

(FEB. 1) UPI - Federal Judge Gerhard Gesell praised Iran-Contra middleman

Albert Hakim for co-operating with prosecutors and sentenced him to two years probation and a five-thousand-dollar fine today. Hakim pleaded guilty last fall to a misdemeanor charge of making an illegal payment to then White House aide Oliver North. Hakim is the seventh Iran-Contra defendant to be sentenced in the scandal, the worst of the Reagan presidency. NONE of the seven has been sentenced to prison.

President Bush is setting ambitious goals to revitalize America's schools- including literacy for all adults and making U-S students the best in the world in math and science by the end of the '90's. Bush also wants a 90 percent high school graduation rate by the turn of the century, compared with 72 percent in the 1987-88 school year. Bush said in his ''State of the Union'' speech last night that ''real improvement in our schools is NOT simply a matter of spending more money.''

The maker of the nation's best-selling generic drug has agreed to recall its version of the blood pressure medication Dyazide . Bolar Pharmaceutical Company notified the Food and Drug Administration of its plans today. The New York drug company is facing charges that it lied to the government to win approval of its product. The F-D-A says the medication is NOT the therapeutic equivalent of the brand-name product.

The recall will affect the nearly half-a-Million high blood pressure suffers who currently take Bolar's version of Dyazide. But the F-D-A is warning patients on the medication NOT to suddenly stop taking the drug and to consult a doctor about what medication to take in its place. Brand-name Dyazide- made by SmithKline Beecham- costs about 50 percent more than the generic version.

#90032u2110 02/01/1990 ~United Press International

(FEB. 1) UPI - The Bush administration wants to remove absolute congressional control on foreign aid. The assistance program totals 20-point-eight-BILLION dollars, a nine percent rise over the current year. Officials want to stop Congress from amending the final bill in which favored nations, like Israel and Egypt, are required to get the full amount of their aid, even if the total foreign aid appropriation gets cut. This means small, less-favored nations in the Caribbean and sub-Sahara Africa take the full brunt of foreign aid cuts.

Weeks of ethnic warfare have brought Soviet Armenia and Azerbaijan to a virtual halt. Reports from the official Tass news agency say strikes, power failures and a lack of materials have closed scores of state-owned factories and rail traffic is at a standstill. Thousands of Azerbaijani workers reportedly have turned in their Communist Party membership cards to protest occuption of the region by Red Army troops. The death toll in the capital of Baku stands at 139.

Air traffic controllers are back on the job in the Philippines after staging their second one-day strike to protest President Aquino's wage policies. The job action by 280 controllers began shortly after midnight, canceling domestic flights and international flights at all 43 airports in the country. Operations at Manila International Airport were halted after 6 p-m because an emergency crew called in to work during the day had to rest.

#90032u2221 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - The dollar turned in a mixed performance against the world's key currencies Thursday in New York trading as market participants considered the latest evidence of a U.S. economic slowdown and awaited better calibration by U.S. unemployment data due in the morning.

Traders reported little foreign exchange market response to President Bush's State of the Union speech proposing U.S. and Soviet troop levels in Central Europe be reduced to 195,000 on each side. Word of that initiative leaked out the day before and its effect was played out.

More important in setting the tone of the market was a report by the National Association of Purchasing Management, showing U.S. economic growth slowed in January by the greatest monthly increment since December 1982.

The report was "closely watched and it was rather disappointing," said Carol Callanan, a Credit Lyonnais assistant vice president and manager of its corporate trading desk. She said the dollar drifted down on concern that U.S. economic deterioration boded lower interest rates.

Bearish sentiment was restrained, though, by remarks earlier in the week from Alan Greenspan, the Federal Reserve chairman, minimizing recession fears and hinting interest rates will hold up to counter inflation.

In late New York trading the dollar changed hands at 1.6760 German marks,

off from 1.6840 German marks the day before. Against the Japanese unit the dollar was fetching 144.85 yen, up from 144.42 yen.

Economic uncertainty means traders will be dissecting the job figures due out in the morning from the government, said Dana Johnson, chief money market economist for the First Chicago capital markets group.

Nonfarm payroll growth of 150,000 jobs or more and joblessness kept steady at 5.3 percent would reassure participants the Fed will keep short-term interest rates on hold, he said. Players will examine non-auto manufacturing closely for signs of Detroit troubles spreading.

Also of note was renewed yen weakness, which Dennis Pettit of PaineWebber's currency department attributed to news that major Japanese institutions are to set up domestic funds for investment in German markets.

In New York the British pound rose to $1.6840 from $1.6795. Other dollar rates: 1.4915 Swiss francs, off from 1.50; 5.6905 French francs, off from 5.7190; and 1,245.50 Italian lire, down from 1,251.25.

In European trading the dollar closed mostly lower, finishing in Frankfurt at 1.6810 German marks against 1.6885.

It also fell in Paris, Brussels and Milan, where it closed at 5.7120 French francs against 5.7160, 35.10 Belgian francs against 35.23 and 1,249.85 Italian lire against 1,253.

In Zurich the dollar rose to 1.4975 Swiss francs against 1.4970 but in London the pound advanced to $1.6845 against $1.6805.

Republic National Bank in New York closed cash gold at $418.25 an ounce, up from $412.50. The New York Commodity Exchange settled gold at $418 an ounce, ahead from $412.40. In Zurich gold rose to $416 an ounce from $415.50 the day before. In London it moved up to $416.25 an ounce from $412.75.

Republic closed cash silver at $5.305 an ounce, up from $5.205. Comex spot silver rose to $5.297 from $5.194. Zurich silver was up at $5.25 an ounce against $5.20. London silver rose to $5.28 an ounce from $5.20.

#90032u2248 02/01/1990 ~United Press International

DALLAS (FEB. 2) UPI - Texas Utilities Co. said Thursday its principal subsidiary has finalized a purchase from Tex-La Electric Cooperative of Texas of its 2.16 percent share of the Comanche Peak nuclear power plant.

TU said the purchase also settles litigation between the companies.

Texas Utilities said the purchase gives its subsidiary, TU Electric Co., 100 percent control of the Comanche Peak plant being built in Glen Rose, Texas, 40 miles southwest of Fort Worth.

The settlement results from an agreement on the sale between TU Electric and Tex-La announced in March of last year. The agreement was subject to regulatory approvals which have now been obtained, the company said.

#90032u2249 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - As the prosecution rested Thursday in the assault trial of John Gotti, the defense produced a document that it said indicated internal union strife caused the wounding of a labor leader, not revenge by the reputed Mafia boss.

Gotti, 49, the reputed head of the Gambino crime family, is accused of ordering the wounding of John O'Connor, business agent of Carpenters Union Local 608, in retaliation for the destruction of a Gambino-linked restaurant.

The government claimed O'Connor ordered Bankers and Brokers Restaurant trashed in February 1986 because it was using non-union labor.

Late Thursday, however, defense lawyer Gerald Shargel produced a prosecution document from an unrelated Manhattan case suggesting that O'Connor took bribes from the Gambinos to turn his back on the non-union work.

It was a rival of O'Connor, Pascal McGinness, head of the union's district council, who ordered the restaurant trashed to ''teach both O'Connor and 'the guineas' a lesson,'' the document said.

Four months after the destruction, O'Connor was shot four times in the buttocks.

Shargel told the jury that O'Connor and McGinness had a fistfight one week before the shooting, suggesting it was internal union sparring - rather than a vengeful mobster - that caused bullets to fly.

''The people disingenuously changed their theory of what happened,'' Shargel told Acting Justice Edward McLaughlin. ''This is a case in search of a theory.''

But lead prosecutor Michael Cherkasky said the document ''has nothing to do with this case.''

Gotti's lawyers asked McLaughlin to either dismiss the indictment against the reputed Godfather because it was built on a faulty foundation, allow them to show the document to the jury or delay the trial so the defense can gather witnesses to testify about what is in the document.

McLaughlin said he will rule on the matter at 9:45 a.m. Friday.

Earlier Thursday, the prosecution wrapped up its case after playing a secretly recorded tape in which an Irish gangster said he helped shoot O'Connor as a favor ''for the greaseballs.'' The shooting was allegedly subcontracted to the murderous Irish gang known as the Westies.

The taped conversation between Mickey Featherstone, the admitted No. 2 man in the Westies, and an underling, Kevin Kelly, took place in a visiting room packed with people at the Rikers Island jail. Tape recorders had been placed behind a picture hung over the table where they spoke, but the background noise makes the tape almost inaudible.

Just nine days after O'Connor was shot, Kelly visited Featherstone, who was jailed on murder charges, and they chuckled over the May 7, 1986, violence.

''Me and Kenny (Shannon) set it up. Then we met up with him. I stood outside. The guy was there. And he popped him,'' said Kelly, according to a government transcript.

Featherstone asked, ''For Jimmy?'' an apparent reference to Westies leader James Coonan.

Kelly said, ''Oh, yeah. For the greaseballs,'' an apparent reference to the Gambino crime family.

The two burst out laughing when they discussed where the bullets struck O'Connor.

According to the government transcript, Kelly said, ''He was supposed to get knee-capped, and they went up high. The bullets ended up high...''

But defense lawyers attacked the transcripts as inaccurate and produced a drastically different transcript of the same tape that was used in federal trials of Westies in 1987 and 1989.

The defense case was expected to open Friday and summations were slated for Monday. The judge told the jury it will likely get the case on Tuesday.

NANTUCKET, MA. (FEB. 1) UPI - Five gunshots from a .22-caliber weapon smashed through a window of the Brant Point Coast Guard station, narrowly missing two seamen on duty, officials said Thursday. No injuries were reported.

Whoever was responsible for the shooting, which occured at about 8 p.m. Wednesday, escaped on foot, the Coast Guard said.

The shots, which entered the station's communications center, were fired from adjacent property about 150 yards away, near the Brant Point lighthouse that greets visitors to the quaint resort island of Nantucket, Coast Guard Lt. Hank Leeper said.

While investigators were trying to determine a motive for the attack, Leeper said the bullets landed too close to the petty officer and seaman on duty to be considered a prank or an accident.

''All the shots came within inches of each other. Whoever was doing it was aiming,'' Leeper said.

Four bullets tore through the single 2-foot-square window in the small room and one entered the window's casing.

''Anyone who could fire a .22-caliber weapon from 150 yards and have the bullets land that close is a pretty good shot,'' Leeper said.

Leeper said the shootings may have been related to the Coast Guard's law enforcement duties. ''There's been no threats to the Coast Guard, but Brant Point does do law enforcement, with plenty of boardings of vessels

and arrests,'' he said. ''Pulling in people on boats who have outstanding warrants for various crimes is not uncommon.''

Because the incident is an attack on a federal facility, federal law enforcement agencies, including the FBI, were participating in the investigation, Leeper said. Nantucket and state police were also investigating.

#90032u2310 02/01/1990 ~United Press International

(FEB. 1) UPI - Secretary of State Baker is urging a new global relationship with the Soviet Union aimed at ending tensions and promoting the reform policies of Mikhail Gorbachev. Baker told the Senate Foreign Relations Committee that the key test of Moscow's intent to improve super-power ties will be the Kremlin role in resolving regional disputes. The Bush administration is concerned about the Soviet role in Nicaragua and in seeking a political settlement in Cambodia.

The president's call last night to trim U-S troop strength in Europe is winning rave reviews today on Capitol Hill. But Defense Secretary Cheney told the Senate Armed Services Committee that Moscow's strategic arms program is robust, and he cautioned against cuts in a proposed

307-BILLION-dollar Pentagon budget. Committee Chairman Sam Nunn, a Georgia Democrat, praised the Bush plan.

Albert Hakim, a leading figure in the Iran-Contra scandal, was sentenced to two years probation and a five-thousand-dollar fine today. In handing down the sentence, U-S District Judge Gerhard Gesell said Hakim- the middleman in the secret U-S arms sales to Iran- had provided ''exceptional'' co-operation to special prosecutor Lawrence Walsh. Gesell said Hakim was drawn into the affair by the U-S government and that he had helped win the release of American hostage David Jacobsen.

With President Bush's approval rating near 80 percent, Democrats are turning their attention to finding someone to run against him in 1992. Democratic National Committee Chairman Ron Brown says four prospects are considering a run, adding that the potential field of candidates should become clearer by the end of summer. Brown tells U-P-I that the candidate list should include New York Governor Mario Cuomo and Senators Lloyd Bentsen of Texas, Al Gore of Tennessee and New Jersey's Bill Bradley.

#90032u2317 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - Stocks closed mixed in quiet trading Thursday, with the blue chips pressured by profit taking after Wednesday's 47-point rally but the broad market seeming to shrug off some weak economic data.

The Dow Jones industrial average, which surged 47.30 Thursday, fell 4.28 to close at 2586.26.

But the transportation average gained 14.41 to 1060.28 thanks in large part to a jump of more than $8 in UAL, parent of United Airlines, on talk that a new bid from United's unions was on the way. The stock had plummeted in recent sessions.

Among broader market gauges, the New York Stock Exchange composite index closed up 0.02 to 181.52 and Standard & Poor's 500-stock index fell 0.29 to close at 328.79. The price of an average NYSE share rose 1 cent.

The broad market had a better day than the blue chips, however, as advances led declines 882-641 among the 1,962 issues crossing the NYSE tape.

Big Board volume totaled 154,580,000 shares, compared with 189,660,000 shares traded Wednesday.

Analysts cited profit taking in the blue chips after Wednesday's rally but said the broad market gained despite two weak economic reports.

The National Association of Purchasing Management said Thursday economic growth continued to decline in January for the ninth straight month and at the greatest rate of decline since December 1982. The group's index fell in January to 45.2 percent from 46.7 percent in December.

A reading below 50 generally indicates the manufacturing segment of the economy is experiencing a decline in growth.

And construction spending decreased 0.6 percent in December to $414.6 billion, the lowest monthly rate since a 1 percent decrease in June, the Commerce Department said.

''Really though, I think this was just one of those hesitations while we try to figure out 'was it real or was it Memorex,''' said Jerry Hinkle, a trader at Sanford C. Bernstein and Co., referring to Wednesday's dramatic surge.

''Was it just a technical bounce or did it have fundamental merit?'' he asked. ''Well, fundammentals don't change overnight but perceptions of them do and I think we have undergone a change in perception.''

Hinkle said Federal Reserve Chairman Alan Greenspan, in his testimony before Congress this week, alleviated a lot of fears that the economy may be headed for a recession, which Hinkle said was a main reason for the drop of more than 200 points in the Dow this month.

Another reason was the sharp jump in long-term interest rates, but Hinkle said Greenspan also eased investors' minds on that front by indicating that rates would probably be stable. In late trading, the long bond was up 5/32 at 96 19/32 to yield 8.44 percent.

''Over the next few days, I think we'll see prices at higher levels,'' he said.

On the trading floor, Chase Manhattan was the most active NYSE issue, off 1/8 to 30 5/8.

Texaco followed, down 1/4 to 58. Philip Morris was third, up 1/8 to 38.

Among the other blue chips, AT&T was off 5/8 to 38 3/8, IBM lost 7/8 to 97 3/4, Philip Morris added 1/8 to 38, General Electric fell 1/2 to 61 3/4, and Sears dropped 7/8 to 39 as most retailers were lower after reporting modest January sales gains. Boeing jumped 2 to 61 1/4.

Elsewhere in the retail sector, The Gap bucked the trend, surging 3 to 49 3/4 after reporting a steep sales rise, but J.C. Penney lost 1/4 to 66 5/8 and Wal-Mart fell 1/2 to 42 1/8.

On the earnings front, Compaq Computer surged 2 7/8 to 78 5/8 after reporting earnings at the high end of expectations. But Caesars World lost 3/8 to 24 3/8 after estimating earnings of 3 to 10 cents a share for the quarter ended Wednesday, well under year-ago levels and analysts' forecasts. The stock took other hotel and casino issues down with it, such as Marriott, down 1 1/4 to 26 1/8; and Holiday, off 1 1/2 to 58 1/8.

As for takeover-related issues, Hilton Hotels tumbled 2 1/4 to 58 1/2 after its board ended its meeting without taking action on the sale or restructuring of the company. Telecom-USA jumped 1 3/8 to 18 1/2 after ending talks about a proposed takeover of ALC Communications, reports said.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 184,881,780 shares, compared with 221,763,750 shares traded in the previous session.

Prices closed higher in moderately active trading on the American Stock Exchange.

The Amex Market Value index rose 1.43 to close at 351.50. The price of an average share added 5 cents. Advances led declines 282-258 among the 778 issues traded. Composite volume totaled 15,843,110 shares, compared with 15,553,100 traded Wednesday.

Hillhaven led the Amex issues, down 1/8 to 1 3/4.

The National Association of Securities Dealers composite index closed up 1.95 at 417.76.

#90032u2326 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - Major league owners will lock out players from spring training unless management sees sufficient progress toward a labor agreement, baseball's chief negotiator said Thursday.

Players and owners have been operating without a contract since the end of last year and talks have produced little, if any, progress. With spring training less than two weeks away, the owners refuse to enter the season without an agreement.

''The camps will not open (unless progress is made),'' said Chuck O'Connor general counsel for the owners' Player Relations Committee.

The decision to lock out the players could come at an owners' meeting Feb. 9 in Chicago. Pitchers and catchers are to report to spring training in Florida and Arizona Feb. 15.

''You implicate opening day from the first day of the lockout,'' Donald Fehr, executive director of the Players' Association, said at a news conference. ''You never take extreme measures until you have no alternative. I don't see February as a time where there are no alternatives.''

Fehr said a spring training lockout would last longer than a mid-season stoppage because the owners wouldn't lose as much money. Players would have received little of their salaries and ticket sales would have been minimal.

Even if an agreement were to be reached in March, it would take the players time to get into shape. There is also the likelihood of more injuries should players rush to prepare.

Owners are calling for revenue sharing, pay-for-performance and a salary cap. The union opposes the last two proposals, claiming it inhibits a free market. The owners' plan would eliminate salary arbitration, a substantial gain made by the players in the last decade.

Fehr said the union is willing to discuss revenue sharing.

''Does revenue sharing make for higher salaries, lower salaries or about the same?'' he said. ''We asked them that and they said 'Gee, we don't know.' If the industry has done this well, why change it?''

The PRC says the dollars from revenue sharing would include money from gate receipts and national and local broadcasting contracts.

In 1988, the PRC said that totaled $836 million. The PRC suggests 48 precent of that money go toward player salaries and benefits. From 1982-88 O'Connor said, salaries took up 30 to 40 percent of teams' revenues.

Total revenues for major league baseball in 1988, the PRC said, amounted to $1.018 billion. The additional money came from concessions, parking and licensing.

The salary cap, a system introduced by the NBA, would assess each of the 26 clubs a total payroll figure. Any team 10 percent above the cap would be ineligible to bid for another team's free agents. Also, a club could not be more than 20 percent under the cap.

''It would drastically change free agency and the way the market works ''fehr said of the salary cap. ''If a team is at the cap, they can't bid 10 cents. If they're under the cap, they're limited to how much they can spend.''

The owners say a cap would prevent teams in big television markets, such

as New York and Chicago, from outbidding smaller market teams, such as Seattle. the union says the Mariners can't be too badly off since they were just sold for about $70 million.

The pay-for-performance provision would determine player salaries on the basis of service and statistics, effectively eliminating contractual battles with agents.

Players would be ranked by computer and grouped by postition: starting pitchers; relief pitchers; first basemen, third basemen, outfielders and designated hitters; and middle infielders and catchers.

Pay scales would be imposed on players with less than six years' major league experience. Their salaries would be determined annually and their rankings would be derived from performance over the previous two seasons.

''There are ways to reflect the value of a player other than stats,'' Fehr said.

Players with more than six years' experience would continue to negotiate contracts and be eligible for free agency.

Now, players with less than three years' experience are ineligible for salary arbitration.

''It doesn't surprise me to see they want to pay zero-to-three players with money that isn't theirs,'' Fehr said. ''The players pay for it (out of revenue sharing).''

#90032u2371 02/01/1990 ~United Press International

TORONTO (FEB. 2) UPI - Communications giant Southam Inc. said Thursday it adopted a shareholders rights plan, amid speculation the company could become the target of a takeover attempt.

Southam said the rights plan was adopted so all shareholders would be treated equally in the event of a takeover, but that it wasn't aware of any impending bid for control of the company.

A five-year old standstill agreement between Southam and Torstar Corp. is set to expire June 30. Analysts have speculated Torstar, a newspaper, book publishing and printing company, might try to buy Southam.

Southam and Torstar signed the standstill agreement in 1985 after a share swap in which Southam got a 30 percent stake in Torstar and Torstar got a 22.4 stake in Southam.

Southam said its rights plan would be triggered if a person or group acquires 15 percent or more of its common shares other than through a deal approved by the board. The shareholders were given the right to buy additional common shares at a 50 percent discount to the market price.

Torstar and the Southam Family Group would trigger the plan only if either one acquired more than one additional ownership percent, the company said.

The plan went into effect immediately with the issue of one right for each common share outstanding at the close of business Thursday. However, the rights may not be exercised unless the preconditions take place.

Southam said it would seek approval of its rights plan by shareholders at the next regularly scheduled annual meeting May 3.

In the past several months, Southam has been depicted as a company scrambling to avert a takeover bid through an aggressive reorganization of its assets.

In November, Southam bought out the remaining 52 percent interest in the Kitchener-Waterloo Record newspaper it did not already own.

In December, Southam sold the weekly Financial Times of Canada newspaper to Thomson Corp., another communications company.

Southam is a communications company with interests in daily and community newspapers, book retailing and business information products and services.

The dailies are published in cities throughout Canada, including Montreal, Ottawa, Edmonton, Calgary and Vancouver.

(FEB. 2) UPI - SPORTS DIGEST:

AUTO RACING

Bob Wollek of France, trying for his fourth victory in the 24 Hours of Daytona, set a track qualifying record of 131 mph to earn the pole position for this weekend's race.

BASKETBALL

Two bar bouncers pleaded not guilty of trying to extort $50,000 from SuperSonics star Dale Ellis. The men worked at a Seattle bar Ellis patronized before he was seriously injured in a drunken-driving car accident Jan. 12. ... A World Basketball League All-Star team won for the

third straight time on its six-game Italian tour, defeating San Benedetto Gorizia 142-117. Chip Engelland led the WBL with 24 points.

BOXING

Roger Mayweather returns to the ring Friday for the first time since May 13 when he meets super lightweight Joe Rivera in Las Vegas, Nev. Three former Olympic team members are on the undercard: Andrew Maynard, Anthony Hembrick and Kelcie Banks.

COLLEGE

University of Maryland officials will offer self-imposed sanctions for the men's basketball program when they meet with the NCAA. Maryland is charged with 18 NCAA violations. ... The NCAA says Heisman Trophy winner Andre Ware committed no violations by attending an agent's Super Bowl party or by accepting game tickets from Oilers quarterback Warren Moon. ... Clint Johnson, a quarterback from Altamonte Springs, Fla., and running back Greg Layne of Austin, Texas, say they will sign letters of intent Feb. 14 to enroll at Notre Dame.

EQUESTRIAN

Debbie Dolan of Oyster Bay, N.Y., won the Le Menu Speed Stake aboard Country at the $1 million Winter Equestrian Festival at West Palm Beach, Fla.

FOOTBALL

Washington Redskins offensive tackle Jim Lachey reportedly signed a 2-year $1.5 million contract, making him the NFL's highest paid offensive lineman. ... A Mexican version of American football will begin Feb. 3 with a game between the Mexico City Patriotas and the Mexico City Cabballeros. Four teams will comprise the league in its inaugural season.

HOCKEY

Formation of a 20-team Global Hockey League was announced, with Albany, N.Y., named the first franchise. North American cities believed seeking franchises are Atlanta, San Diego, Tampa, Fla., and Hamilton, Ontario. Bern, Switzerland, and Stockholm, Sweden, are European candidates. Play is to begin in November.

HONORS

Brent Hull was named NHL Player of the Month for January. ... Philadelphia Coach Jim Lynam was named NBA Coach of the Month and San Antonio center David Robinson Rookie of the Month.

MEDIA

Chris Evert and Jimmy Connors will work as tennis commentators for NBC. ... Rocky Mountain News sports columnist Teri Thompson was arrested in a Denver drug raid. She posted $10,000 bond and was released from jail.

WINTER SPORTS

Maria Walliser of Switzerland had the fastest practice runs for a World Cup downhill to be run at Veysonnaz, Switzerland, Friday and Saturday. ... Fog hindered preparations for men's World Cup downhills this weekend in Cortina D'Ampezzo, Italy. ... East German Olympic champion Wolfgang Hoppe and Sintis Ekmanis of the Soviet Union had the fastest runs in the final practice for the World Bobsledding Championships at St. Moritz, Switzerland.

#90032u2418 02/01/1990 ~United Press International

NEW YORK (FEB. 1) UPI - Assets of the nation's 493 money market mutual funds increased $1.54 billion to $384.60 billion for the week ended Wednesday, the Washington-based Investment Company Institute reported Thursday.

The institute said broker-dealer fund assets increased $475.7 million to $163.11 billion, assets of general purpose funds increased $1.77 billion to $129.78 billion and institutional fund assets decreased $708.5 million to $91.71 billion.

''Falling stock and bond prices prior to the latest mid-week rally prompted some individual investors to shift their money out of long-term funds into money market funds,'' said Dr. Jacob Dreyer, vice president and chief economist at the institute. ''The resulting increase in assets of funds in the general purpose and broker/dealer categories was considerably larger than the drop in the institutional category, bringing the overall asset level of money market funds to a new record high.''

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds were 7.70 percent, unchanged, while 30-day simple yields fell to 7.75 percent from 7.83.

The average maturity of fund portfolios rose to 42 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions were mostly higher in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.12 percent, down from 6.13; Super-Now accounts 5.01 percent, unchanged; six month certificates of deposit, 7.67 percent, up from 7.66; one-year CDs 7.71 percent, up from 7.69; 2 1/2-year CDs 7.70 percent, up from 7.67; and five-year CDs 7.72 percent, up from 7.68.

The average rate for a one-year adjustable rate mortgage rose to 8.48 percent from 8.45 percent last week.

The average rate on a 15-year fixed-rate mortgage rose to 9.78 percent from 9.59 percent and the average rate on a 30-year fixed-rate mortgage went up to 10.03 percent from 9.84 percent.

The average rate for a four-year automobile loan fell to 12.10 percent from 12.11 percent.

#90032u2419 02/01/1990 ~United Press International

(FEB. 1) UPI - The London-based Human Rights group Amnesty International says Israel is guilty of detaining prisoners of conscience without trial in the occupied territories. The group says in a statement to the United Nations that Israel detained more than four-thousand Palestinians last year and about 15-hundred remain in detention in harsh conditions. Amnesty International says that in the two years of the Palestinian uprising, Israel has made extensive use of administrative detention of people NON-violently expressing their beliefs.

Officials in New Caney, Texas, say that for the second time a dog has dug up a human hand, but police have NOT found the rest of the body. Police in the area 40 miles northeast of Houston say they believe the hand is the mate to one Missy the dog dug up and left in the front yard of Barbara Tate. Police say the right hand found last week is believed to have been dismembered NO longer than a week ago, but fingerprints have turned up NO matches.

#90032u2655 02/01/1990 ~United Press International

(FEB. 1) UPI - President Bush is meeting with El Salvador's President Alfredo Cristiani this afternoon. Cristiani earlier said he planned to request increased U-S aid to fight illegal drugs, but he's NOT expected to ask for additional military aid. The United States already gives El Salvador 500-Million dollars a year.

In Geneva today, about 350 ethnic Albanian protesters from Yugoslavia's troubled Kosovo province appealed to the U-N to investigate alleged human rights abuses by Serbian troops. In Kosovo, officials say 19 people have died in a week of fighting between police and and ethnic Albanians seeking greater autonomy.

Motorists on New Jersey's Route One got a smile yesterday when a canvas cover ripped off a trash truck, spilling thousands of defective condoms on the roadway. Rubbernecking motorists snarled rush-hour traffic as they slowed and recognized what the orange and white objects being shoveled and swept up were. The truck was hauling Millions of factory-reject condoms from the Carter-Wallace pharmaceutical plant in Trenton. The condoms spilled when the truck's canvas cover ripped loose. In the words of a policeman- quoting now- ''He just didn't have it secured tightly enough.''

#90032u2692 02/01/1990 ~United Press International

LOS ANGELES (FEB. 2) UPI - A dispute between the Walt Disney Co. and MGM/UA Communications over Disney's right to use the MGM name on a movie studio in Florida, was sent back to Superior Court for trial, the California Court of Appeal said Thursday.

The order reverses a Superior Court decision dismissing MGM/UA's suit charging fraud, unfair competition and breach of contract.

MGM/UA filed the complaint in May 1988, charging that Disney had violated its licensing agreement by using the MGM name on a full-scale motion picture production facility, rather than simply in connection with an amusement park built around a motion picture theme.

''The guts of the case is whether Disney can use the MGM name in its entire facility, theme park and production facility,'' said Skip Miller, an attorney for MGM/UA.

A spokesman for Disney said, ''The prior judgement was upheld on all issues but one, which is essentially whether we have the right to use the MGM name on our working Florida studio. While we would have preferred to have the judgment upheld on all counts, we are prepared to go to trial on the remaining issue.''

MGM officials said that Disney argued to the court that a studio tour attraction cannot exist without a production studio around it.

But the Court of Appeal said, ''At this stage of the litigation, neither logic, experience or evidence compel the conclusion a studio tour must be

built around an actual, working studio.''

#90032u2786 02/01/1990 ~United Press International
(FEB. 2) UPI - SPORTS TRANSACTIONS;

BASEBALL

California - Agreed to terms with pitcher Chuck Finley and catcher Bill Schroeder on 1-year contracts.

Chicago (NL) - Agreed to terms with pitcher Paul Assenmacher on 1-year contract.

Houston - Signed reliever Larry Andersen to 2-year contract; signed pitcher Brian Fisher and reliever Juan Agosto to 1-year contracts; invited pitcher Mark Thurmond to spring training; named Ricky Peters manager and Don Alexander pitching coach at Auburn of the New York-Penn League (A).

Milwaukee - Signed shortstop Dale Sveum to 1-year contract.

Oakland - Signed outfielder Stan Javier to 1-year contract.

Philadelphia - Signed catcher Darren Daulton and infielder Victor Rosario to 1-year contracts.

Toronto - Signed to 1-year contracts: pitchers Steve Cummings, Pat Hentgen Ricky Trlicek and Nate Cromwell and catcher Randy Knorr.

BASKETBALL

Seattle - Placed guard Sedale Threatt on injured reserve; signed guard Jim Farmer to a second 10-day contract.

COLLEGE

Arkansas - Named Joe Pate defensive coordinator and Louis Campbell defensive secondary coach.

Indiana State - Named Sean Payton quarterback and receivers coach.

FOOTBALL

Dallas - Sent third-round draft picks in 1990 and 1991 and a 10th-round draft pick in 1990 to Minnesota for the rights to retain linebackers Jesse Solomon and David Howard and cornerback Issac Holt who were obtained in an earlier trade.

Kansas City - Signed fullback Christian Okoye to series of 1-year contracts.

Washington - Named Rod Dowhower assistant coach.

HOCKEY

Detroit - Recalled defenseman Yves Racine from Adirondack of the American Hockey League.

Pittsburgh - Recalled goaltender Frank Pieterangelo from Muskegon of the International Hockey League.

-30- 1952

#90032u3044 02/01/1990 ~United Press International

(FEB. 1) UPI - Rave reviews for President Bush... Baker sets test for U-S-Soviet relations... Iran-Contra middleman gets two years probation... and the 30th anniversary of the Greensboro Four sit-in. U-P-I has details, next:

President Bush is receiving bi-partisan praise today for his proposal to negotiate even lower super-power troop levels in Europe. However, the praise comes along with calls for cuts in Bush's defense budget.

Senate Armed Services Committee Chairman Sam Nunn says he's ''delighted'' by Bush's plan for 195-thousand troops each by the United States and Soviet Union in Europe. The Georgia Democrat calls it an arms control position ''much more relevant to the real world.''

California Senator Alan Cranston also is lauding Bush's proposal. But the Democratic lawmaker says it should come with cuts in Bush's 307-BILLION-dollar defense plan for fiscal 1991. Cranston says the savings should be moved into domestic programs.

Defense Secretary Cheney is cautioning lawmakers against any immediate assault on the Pentagon budget. Cheney told the Senate Armed Forces Committee that the Soviet Union remains a ''formible power'' and the United States has to be prepared.

As for the Kremlin, Soviet officials in Moscow are welcoming Bush's proposal to cut troops in Europe, saying they're ready to negotiate.

However, Soviet Foreign Ministry spokesman Gennady Gerasimov is taking issue with what he termed ''redundant ideology'' in Bush's ''State of the Union'' address. Gerasimov says Bush attempted to show- quote- ''the triumph of U-S ideas and the fiasco of communism.'' Gerasimov says the

comments were- quoting now- in ''the spirit of the Cold War- a relic of the past.''

White House Chief of Staff John Sununu says the president kept his troop reduction plan secret to ensure that it would NOT be ''debated in headlines.''

Sununu denied that the American people have been misled about foreign policy. He said- ''If it could be accomplished any other way... it would have been done.''

-30- 2220

#90032u3068 02/01/1990 ~United Press International

(FEB. 1) UPI - Secretary of State Baker says he will try to forge a ''new global relationship'' with the Soviet Union when he visits Moscow next week.

Baker provided lawmakers with a broad overview of the Bush administration's policy while speaking today to the Senate Foreign Relations Committee.

Baker says Bush continues to support Mikhail Gorbachev's reforms.

But he says a crucial test of Moscow's determination to improve super-power relations will be the Kremlin's role in resolving regional disputes. Baker says the United States will press the Soviets to deal with such problems ''peacefully.''

As for the president's 307-BILLION-dollar military budget for fiscal 1991, Baker says the on-going changes should- in his words- ''reduce the burden of defense spending over time.''

Baker will travel to the Soviet Union next week for talks on troop reductions and other issues leading to a summit scheduled for later this year.

Albert Hakim drew two years probation and a five-thousand-dollar fine for his role in the Iran-Contra affair by a judge who praised the Iranian arms dealer.

U-S District Judge Gerhard Gesell says Hakim has been especially co-operative with special prosecutor Lawrance Walsh, in sharp contrast to the other Iran-Contra defendants.

Gesell also noted Hakim's help in securing the release of an American hostage in Lebanon and pointed out that he'd been drawn into the scandal by the U-S government.

Hakim pleaded guilty in late November to a misdemeanor charge of making an illegal payment to former White House aide Oliver North. Hakim was the seventh Iran-Contra defendant to be indicted in the worst scandal of Ronald Reagan's presidency.

While Hakim received praise from the judge, he blasted Reagan and special prosecutor Walsh, saying he'd been ''abused'' by both.

-30- 2012

#90032u3101 02/01/1990 ~United Press International

(FEB. 1) UPI - Nelson Mandela may get an invitation to visit the White House when the South African black leader is finally released from prison.

President Bush says he will extend an invitation to the 71-year-old Mandela, saying he's hopeful the Africa National Congress leader will be freed soon. A White House spokesman says there are indications that Mandela may be released tomorrow, when President F-W de Klerk opens South Africa's Parliament.

But a South African government spokesman in Cape Town denies that de Klerk ever planned to meet with Mandela today, contrary to media reports. He released a statement saying NO such meeting was planned before the opening of Parliament.

Mandela- imprisoned since 1964 on sabotage charges- reportedly insists the government lift the three and one-half-year-old state of siege and a ban on the A-N-C when he is freed.

The on-going ethnic trouble in the Soviet republics of Azerbaijan and Armenia is taking the form of strikes, power failures and material shortages today.

Railroads are at a standstill in the troubled region, where thousands of Azerbaijani workers have turned in or ripped up their Communist Party cards.

The strikes and ripped up cards are to protest the occupation by Soviet troops.

Soviet officials in Azerbaijan say about 18-thousand people have left the Communist Party in the past few weeks.

Authorities say the death toll in the Azerbaijani capital of Baku - scene of violence that began on January 13th- stands at 139. Officials say nearly 500 people have been wounded.

In Armenia, blackouts are resulting due to a lack of fuel. Trains filled with supplies for Armenia are idle in Azerbaijan, where nationalists are refusing to let them pass.

-30- 1925

#90032u3123 02/01/1990 ~United Press International

(FEB. 1) UPI - Four black men sat down today to breakfast a Woolworth's lunch counter in Greensboro, North Carolina. But 30 years ago when the same men sat down at the same lunch counter it sparked the civil rights movement that changed the face of the segregated South.

Jibreel Khazan, Joe McNeil, Franklin McCain and David Richmond... who became known as ''the Greensboro Four''... were invited to return to Woolworth's to commemorate the protest.

On February 1st, 1960... all four were college students at North Carolina A-and-T who sat down to eat at a lunch counter reserved for whites only. The waitress refused to serve them. But the students remained until the store closed, then came back with 19 others.

The protest set off a chain of sit-ins in all-white restaurants in North Carolina, and similar demonstrations sprouted in Tennessee, Alabama, Georgia, West Virginia, Arkansas and Texas.

Khazan told reporters today that asking to be served at an all-white counter was a dangerous thing to do at the time, because- quoting- ''We broke the social custom, NOT a written law, and that can be dangerous.''

-30- 1288

#90032u3602 02/01/1990 ~United Press International

(FEB. 1) UPI - Mexico's Navy says it did NOT find any drugs aboard a Cuban-chartered freighter during a inspection that lasted around the clock. The search was made at the request of the U-S government... and followed a dramatic sea chase in which a U-S Coast Guard cutter riddled the freighter with bullets before it fled into Mexican waters. A Coast Guard commander defended the U-S action, saying- ''We thought there were drugs on board. That's the way it goes.''

The process of picking a jury in the trial of Exxon Valdez skipper Joseph Hazelwood came to a temporary halt today in Anchorage, Alaska. The judge in the case is taking time to consider whether to force the Coast Guard to comply with a defense subpoena seeking documents in the case. Hazelwood faces a possible seven years in prison if convicted of criminal charges in the nation's worst oil spill.

Romania will be temporarily ruled by a governing council consisting of 30

political parties under an agreement hammered out behind closed doors today. Under the pact, the ruling National Salvation Front is relinquishing its monopoly hold on the provisional government, which assumed control after the December overthrow of Nicolae Ceausescu . Elections are scheduled in May.

Bulgaria's Communist Party today declared itself reborn, saying it's breaking with 40 years of Stalinism to become a party of democratic socialism. The new party bylaws were overwhelmingly approved in an emergency meeting viewed as an attempt to spruce up the party's image before elections set for this spring.

South Korea's ruling Democratic Justice Party is disbanding and merging with two opposition groups to form a broadly based political force. The move is a follow-up to last week's announcement by the three parties involved that they wanted to form a middle-of-the-road democratic political organization.

Two men have been charged with murder in New Caney, Texas, in a case that began with a gruesome finding in a wooded area. Homicide detectives say they found part of a human head today near to where a dog had dug up two hands before dropping them on her owner's lawn. The victim's identity is still unknown.

-30- 2363

#90032u3950 02/01/1990 ~United Press International

(FEB. 1) UPI - Prosecutors rested their case in New York today in the assault and conspiracy trial of alleged Gambino family crime boss John Gotti . Federal attorneys played tapes which they say caught gangsters discussing a 1986 murder allegedly ordered by Gotti. But defense attorneys say the tapes are practically incomprehensible, and transcripts are written to fit government theories.

Researchers say a new drug used to fight malaria appears to completely cure and prevent a deadly pneumonia which often attacks AIDS patients. A published article says the drug can help lengthen the average life span of AIDS sufferers... but more testing is needed. New research also indicates people who have the AIDS virus but receive counseling do NOT have a greater risk of contemplating suicide.

A published study shows the health care industry has risen in 40 years from less than five percent of U-S gross national product to more than 11 percent. Other industrial countries which have national health insurance have a much lower share of their G-N-P devoted to health care. Along with the growth of services in the industry, health care prices rose one-point-six percent more rapidly than other prices.

Government regulators today announced the nationwide recall of the two toys- the Little Triplets doll and baby bottle set and the Chicco brand Activity Gym. The Consumer Product Safety Commission said the bottle caps and nipples in the doll set may pose a choking hazard to small children. The commission warned children may also choke themselves on the gym... which is a music box on a strap strung across a crib.

-30- 1794

#90032u4180 02/01/1990 ~United Press International

(FEB. 1) UPI - Attorney General Thornburgh is asking a federal court to appoint a special prosecutor to investigate possible criminal conduct by Samuel Pierce. Thornburgh says he wants a prosecutor to investigate whether the former housing secretary committed- quote- ''the crime of conspiracy to defraud the United States or any other crime.'' Pierce headed the scandal-plagued Department of Housing and Urban Development during Ronald Reagan's administration.

Bulgaria's government has resigned. The nation's prime minister handed in his government's resignation to parliament today... shortly after an emergency congress of the Communist Party declared it would take a course of radical reform. NO official reason was given for the first resignation by a Bulgarian government since 1947. But the official Bulgarian news agency says the move was prompted by the need to ''form a Cabinet on a broad national basis.''

A ninth day of anti-Serbian demonstrations brought more deaths in Yugoslavia's Kosovo Province. Officials say riot police killed three ethnic Albanians in clashes today, bringing the death toll to 22 in nine days of unrest. Ethnic Albanians, a majority in Kosovo, have been demonstrating for more freedom from Serbia, which is the largest of Yugoslavia's six states.

There are shortages of heat and power in the Soviet republic of Azerbaijan tonight, but NO scarcity of soldiers. Foreign journalists were allowed into Baku for the first time to observe Soviet troops patrolling the streets to prevent further ethnic fighting. Authorities say Azerbaijani workers are on strike in 10 cities to protest occupation by the troops. Azerbaijani nationalists also refuse to let trains take supplies to Armenia.

(FEB. 1) UPI - Iranian arms middleman Albert Hakim was sentenced to two years probation and fined five-thousand dollars in Washington today for his part in the Iran-Contra scandal. U-S District Judge Gerhard Gesell said Hakim had provided ''exceptional'' co-operation with the special

prosecutor. The judge said Hakim was drawn into the scandal by the U-S government and had helped to win the release of American hostage David Jacobsen.

Salvadoran President Cristiani says he believes peace talks to end his nation's civil war may soon bring results... as long as U-S aid to El Salvador continues. Cristiani made the prediction after a meeting today with President Bush in Washington. Bush opened the session by praising what he called Cristiani's ''commitment to democracy.''

Researchers say diets rich in olive oil and other vegetable oils appear to cut the risk of heart disease. A study says the oils lower blood pressure, sugar levels and cholesterol. In contrast, people who eat a lot of butter and other animal fats tend to have much higher levels of those three important risk factors for heart disease.

(FEB. 1) UPI - The latest news from across the nation and around the world... from the 'round-the-clock wires of United Press International.

U-S Attorney General Thornburgh is calling for an investigation of former Housing Secretary Samuel Pierce.

Thornburgh is asking a federal court to name a special prosecutor to look into possible criminal conduct by the Reagan administration cabinet member.

The move comes two months after Democrats on the House Judiciary Committee asked Thornburgh to seek a special prosecutor. Lawmakers said at the time that congressional investigators obtained evidence indicating Pierce may have been involved in a conspiracy to defraud the government. They also said Pierce may have committed perjury while testifying before the committee.

In calling for a special prosecutor today, Thornburgh says he didn't find any grounds to believe Pierce committed perjury during congressional testimony.

But Thornburgh says an investigation should be conducted to see whether Pierce or other officials- quote- ''committed the crime of conspiracy to defraud the United States or any other crime.''

Allegations against Pierce involve the awarding of Millions of dollars in federal housing funds during Pierce's eight years at HUD.

New York Representative Charles Schumer praised Thornburgh's decision. In the Democrat's words- ''While homelessness grew to be an epidemic in

America, the federal agency in charge became a swamp, a cesspool of corruption.''

The Bush administration today battled Democrats on Capitol Hill over who will benefit from a proposed capital gains tax cut- the rich or the working class?

Treasury Secretary Brady told the Senate Budget Committee that the cut President Bush wants would benefit a wide variety of people.

Brady said 1987 tax data shows 41 percent of capital gains came from those with adjusted gross incomes of less than 50-thousand dollars.

But committee chair James Sasser of Tennessee said a cut in the capital gains tax would do ''nothing to alleviate the squeeze on working Americans.''

Sasser claimed 80 percent of the benefits would go to the wealthiest one percent of the population.

The Democrats defeated the plan in a partisan fight last year. Today marked the first hearing on the issue, which Bush brought up again in his new budget proposal.

(FEB. 1) UPI - Cuba says the 11 crewmen aboard a freighter attacked by the U-S Coast Guard will get a hero's welcome when they return to Havana.

Cuba's official news agency describes the assault as- quote- ''an act of barbarism aimed at underming free trade between Cuba and Mexico.''

The U-S Coast Guard fired at the Cuban-chartered freighter Hermann yesterday after it refused to submit to a search in international waters.

The Panamanian-registered freighter... belching black smoke and sending distress calls... fled into Mexican territorial waters after the shooting.

The ship, suspected by U-S authorities of carrying drugs, later docked at a gulf port 200 miles northeast of Mexico City.

Mexico's navy says it completely searched the vessel and found NO drugs.

A U-S Coast Guard commander defends the American action as in accordance with international law. In his words- ''we thought there were drugs on board. That's the way it goes.''

El Salvador's president says he feels optimistic about peace talks with leftist rebels, as long as U-S aid to his nation keeps coming.

Alfredo Cristiani made his comments after a meeting today with President Bush, during which U-S aid to El Salvador was NOT directly addressed. Cristiani says he suggested to Bush that U-S aid be increased so he can fight illegal drugs... but he did NOT ask for additional military aid.

Washington is providing 315-Million dollars in aid to El Salvador this year, with the Bush administration proposing a 60-Million-dollar increase.

Bush opened the meeting with a ringing endorsement of Cristiani, praising what he called the Salvadoran's ''committment to democracy.''

But Cristiani is- in the words of Indiana Republican Richard Lugar- ''between a rock and a hard place.'' The senator says Cristiani is dealing with a civil war as well as El Salvador's far right which does NOT- in Lugar's words- ''have much faith in democracy.''
